Prerequisites: ENG 102 or ENG 105 with a B or HON 102. Introduction to copywriting and production for electronic, print and other advertising media. Emphasis on advertising strategy, motivation, appeals, visualization and design. Applies research and communication theory to creation of advertising.

**PUB 325S. Advertising Strategy and Practice. (3 Credits)**

Prerequisites: ENG 102 or ENG 105 with a B or HON 102. Using a service-learning-based approach, students learn copywriting and production for electronic, print and other advertising media. Topics included advertising strategy and practice, motivation, appeals, visualization and layout, applied research and communication theory. Credit will not be awarded for both PUB 325S and PUB 325, COM 325 or 325S.

**PUB 349. Applied Learning in Public Relations. (0.5-8 Credits)**

A. Prerequisites: junior standing, ≥B average in all courses within the department, and departmental approval. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 349A. Cooperative Study: Public Relations. (0.5-8 Credits)**

A. Prerequisites: junior standing, ≥B average in all courses within the department, and departmental approval. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 349B. Cooperative Study: Public Relations. (0.5-8 Credits)**

A. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 349C. Cooperative Study: Public Relations. (0.5-8 Credits)**

A. Work under faculty and field supervisors in cooperative placements related to the student's academic status. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 349D. Co-op or Appl Lrn: Public Rel. (0.5-8 Credits)**

A. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 349E. Cooperative Study: Public Relations. (0.5-8 Credits)**

A. Prerequisite: junior standing. "B" average in all courses within the department and department approval. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 349F. Cooperative Study: Public Relations. (0.5-8 Credits)**

A. Prerequisite: junior standing, "B" average in all courses within the department, and departmental approval. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirement within the department.

**PUB 349G. Cooperative Study: Public Relations. (0.5-8 Credits)**

A. Prerequisites: junior standing, "B" average in all courses within the department, and departmental approval. Work under faculty and field supervisors in cooperative placements related to the student's academic studies. One to eight hours credit per semester or summer. Total credit hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit. One hour may be used to satisfy major requirements within the department.

**PUB 375. Public Relations Principles. (3 Credits)**

I, II. Survey of principles and practices in disseminating information to internal and external audiences in business, industrial, educational, social and government agencies.

**PUB 380. Public Relations Writing. (3 Credits)**

I, II. Prerequisites: PUB 275. Practice in public relations planning and writing for publications, media releases and other mass media materials for the public and special interest groups, including institutions, governments, and other organizations. Also includes writing in business formats. I, II.

**PUB 385. PR Event Planning & Management. (3 Credits)**

A. Prerequisite: PUB 275. Hands-on experience identifying a public relations goal and supporting it with a special event. Also includes specific planning procedures, communication methods and evaluation procedures.

**PUB 385S. PR Event Planning & Management. (3 Credits)**

A. Prerequisite: PUB 375 with a grade of "C" or higher. Using a service-learning-based approach, students receive hands-on experience planning and managing an event supporting public relations goals specified by an actual client. Includes specific planning, execution and evaluation procedures. Credit will not be awarded for both PUB 385 and PUB 385S.

**PUB 390. Fundraising. (3 Credits)**

I, II. Prerequisite: PUB 275. An overview of fundraising, including planning, organization, management, marketing, and the common sense needed to raise money from private sources.

**PUB 395. Sports Promotion. (3 Credits)**

II. Prerequisites: ENG 102, 102R, ENG 105(B) or HON 102. Behind the scenes look at sports industry elements including public relations, sales, promotions, sponsorships, branding, marketing, social media and risk management. Credit will not be awarded for both PUB 395 and PUB 400 (Special Topics: Sports Promotion).

**PUB 400. Studies in Public Relations. (1-3 Credits)**

A. Prerequisite: departmental approval. Study of specific areas of Public Relations through a course examining timely or topical concerns in the field. Specific topic included in schedule. May be retaken to maximum of nine hours.

**PUB 410. Social Media and Public Relations. (3 Credits)**

(3) I, II. Prerequisite: PUB 375. Development and application of social media forms an design. Emphasis on social media as a strategic public relations tool in terms of institutional, social, and technological impact. Includes working with community partner(s) to strengthen an online presence.

**PUB 410S. Social Media & Public Rel. (3 Credits)**

I, II. Introduction to social media forms an design. Emphasis on social media as a public relations tool in terms of institutional, social, and technological impact. Includes working with community partner(s) to create an online presence.

**PUB 416. Media Ethics. (3 Credits)**

II. A. Prerequisite: BEM 200 or 200W, and Junior Standing. Examination of ethical standards and practices of the mass media. Includes development of ethical decision-making skills. Credit will not be awarded for both BEM 415 and PUB 416.

**PUB 420. Mass Communications Research. (3 Credits)**

I, II. Prerequisite: PUB 380(C) or departmental approval. Introduction to the research process, research approaches, basic statistics, and applied research in the field of mass communications. Credit will not be awarded for both PUB 420 and either COM 420 or CMS 305.

**PUB 425. Crisis & Risk Communication. (3 Credits)**

Prerequisites: PUB 275. Communicating the correct messages through proper methods and channels before, during, and after a crisis. Exploration of social media in crises. Identification and management of appropriate publics for crisis communication. Emphasis of avoiding miscommunication during crises, emphasis on follow-up after crises.

**PUB 470. Public Relations Internship. (1-3 Credits)**

I, II. Prerequisites: PUB 275 and Junior Standing. Supervised practical experience in a public relations operation. May be taken to a maximum of three hours.

**PUB 475. Public Relations Case Studies. (3 Credits)**

A. Prerequisite: PUB 275. Emphasizes a management approach and application of the four-step PR process to solving public relations problems through planning, design, and production of print, audiovisual, and broadcast materials used in public relations. Includes public relations case studies and problems.

**PUB 480. Integrated Communications. (3 Credits)**

A. Prerequisite: PUB 275. Examination of the interactions within an organization's overall communication efforts, including public relations, industrial and graphic design, organizational communication, and other related initiatives.

**PUB 490. Public Relations Campaigns. (3 Credits)**

A. Prerequisites: PUB 275, PUB 380, and PUB 475. Application of research, planning, strategies, and evaluations to a public relations campaign. Includes budgeting and scheduling of campaigns.

**PUB 490S. Public Relations Campaigns. (3 Credits)**

A. Prerequisite: BEM 320 or PUB 320(C), PUB 475(C), and PUB 305(C). Using a service-learning-based approach, students research, plan and prepare an integrated public relations campaign for a specified local business or organization client. Credit will not be awarded for both PUB 490 and PUB 490S.

**PUB 491. Senior Seminar in Public Relations. (1 Credit)**

I, II. Prerequisites: completion of 90 hours and PUB 275. Evaluates students' progress toward a career in public relations, especially the development of a portfolio, and develops job search strategies and skills. Includes assessment of instruction and curriculum.

**PUB 499. Independent Study in Public Relations. (1-3 Credits)**

A. Prerequisite: Student must consult with the faculty supervisor and have the independent study proposal form approved by the faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of three hours.

**PUB 530. Sports Information. (3 Credits)**

A. Study of the role and function of the sports information director. Includes public relations techniques applied to sports information: news releases, publications programs, office and staff organization, time utilizations, news media and formats.

## Broadcasting and Electronic Media, Bachelor of Arts with a Concentration in Broadcasting and Electronic Media (B.A.)

### Program Objectives

Graduates of the Broadcasting and Electronic Media program pursue careers in the media industry, as well as in cable companies, industrial and corporate video facilities, advertising agencies, and production houses. Students in the **BEM Concentration** must demonstrate excellence in their ability to produce, direct, write, perform, manage, and create commercials, public service announcements, sports programs, promotional videos, music videos, and entertainment programs for television, the Internet or other platforms. Students in the **Film Techniques and Technology Concentration** must demonstrate excellence in writing, visualizing, shooting, editing, and cinematic storytelling. Students in the **Multimedia Journalism Concentration** must demonstrate excellence in gathering information, writing, news production, and visual storytelling. Students will use cross-platform skills within journalistic standards and present news and commentary to a diverse audience. Our objectives are to train students for a variety of fields including traditional and emerging media, businesses and corporations, government public information, advocacy groups, and non-profit organizations. They will develop an understanding of the meaning of First Amendment freedom in the United States, and the social, political, and ethical responsibilities they will have as professionals.

## Public Relations, Bachelor of Arts (B.A.)

### Program Objectives

Graduates of the Public Relations program pursue careers with corporations, non-profits, educational, governmental, media, and public relations and advertising agencies. Managing the communication between an organization and its publics, practitioners write news releases, video news releases, newsletters, speeches, annual reports, advertising copy, promotional pieces, feature stories, and social media entries, to name a few. Public Relations practitioners provide appropriate counsel in employee, community, financial, consumer, government, and media relations, as well as crisis communication, all based on ethical principles set forth by the Public Relations Society of America (PRSA). They manage social media accounts, plan events, fundraise, and address public concerns. Students must demonstrate excellence in writing, research, planning, communication, and evaluation of public situations strategies using a variety of platforms to meet the standards for a public relations education as published by PRSA. One of only 40 Certified Bachelor's Degree Public Relations Programs in the World!

## Minor

- Music, Minor (p. 419)
- Musical Theatre, Minor (p. 419)

## Certificate

- Musical Theatre, Departmental Certificate (p. 419)

## Courses

### Music Education

#### **MUE 302. Classroom Music Teaching Methods. (2 Credits)**

(2) I. Cross-listed with ELE 303. Prerequisite: Admission to professional education. Co-requisite CED 300. Development of pedagogical skills and methods for teaching music concepts within the framework of a classroom music setting. Credit will not be awarded for both MUE 302 and ELE 303.

#### **MUE 378. Teaching Music in Grades P-8. (3 Credits)**

(3) II. Cross-listed with EME 378. Prerequisites: admission to professional education, major in music. Co-requisite: CED 400. Developmentally appropriate materials and methods for teaching P-8 music. Credit will not be awarded to students who have credit for EME 378.

#### **MUE 402. Perf Ensembles Teaching Methods. (2 Credits)**

(2) II. Cross listed with ESE 402. Prerequisite: Admission to professional education. Co-requisite CED 400. Pedagogy for instrumental and vocal performing ensembles in 6th through 12th grade classrooms. Ideas for developing musicianship through hands-on student involvement, ensemble pedagogy and techniques, literature and performance, and incorporation of technology. Credit will not be awarded for both MUE 402 and ESE 402.

#### **MUE 502. Music Tech Teaching Methods. (2 Credits)**

(2) I. Cross listed with EMS 502. Prerequisite: Instructor approval. Co-requisite: CED 450. Development of strategies and techniques for teaching music through digital pedagogy. Ideas for developing musicianship through hands-on student involvement, as well as the use of technology to aid in instruction and delivery in the P-12 music classroom. Credit will not be awarded for both MUE 502 and MUE 702 and EMS 502/702.

#### **MUE 579. Music Education: Principles and Practices. (3 Credits)**

(3) I. Cross-listed with ESE 579. Prerequisites: EDF 413 (C) EMS 490 (C), CED 400 (B), admission to professional education. Developmentally appropriate materials and methods for teaching music education in secondary schools. Co-requisite CED 450. Credit will not be awarded to students who have credit for ESE 579.

### Music History

#### **MUH 171. Music Appreciation. (3 Credits)**

I, II. May not count toward a music major or minor. Provides the general college student with a cultural background in music. Masterpieces of music, composers, and techniques presented through listening materials and concert attendance. Gen. Ed. Element 3A.

#### **MUH 271. Jazz History. (3 Credits)**

I, II. A listening survey course tracing the development of jazz from its roots in the music of West Africa, African American folk music, and European music styles to the present. Gen. Ed. Element 3A.

#### **MUH 272. Music Literature. (3 Credits)**

I, II. Critical listening and scorereading of the standard repertory of music in Western Civilization from Gregorian plainchant to the Contemporary era. Gen. Ed. Element 3A.

#### **MUH 273. Survey of American Popular Music. (3 Credits)**

I, II. Survey of American popular music establishing its origins and tracing its development to the present time. Gen. Ed. Element 3A.

#### **MUH 275. Western Musical Traditions I. (2 Credits)**

I. Prerequisite: MUS 118 or department approval. Survey of Western music traditions from Medieval times through the Baroque period.

#### **MUH 276. Western Musical Traditions II. (2 Credits)**

B. Prerequisite: ENG 102, 102R, or HON 102; MUH 275 or departmental approval. Survey of western music traditions from the Classical era to the present. Credit will not be awarded to students for both MUH 276 and 276W.

#### **MUH 276W. Western Musical Traditions II. (2 Credits)**

B. Prerequisite: ENG 102, 102R, or HON 102; MUH 275 or departmental approval. Survey of western music traditions from the Classical era to the present. Credit will not be awarded to students for both MUH 276 and 276W.

#### **MUH 372. Survey of Music History II. (3 Credits)**

II. Prerequisite: MUH 371 or departmental approval. Survey of music history from the Classical era to the present. Gen. Ed. VII (AH).

#### **MUH 373. The Diverse Worlds of Music. (2 Credits)**

A. Prerequisite: ENG 101(C) or 101R(C). An introduction to the academic study of world music, including musicological analysis and various approaches to the historical and socio-cultural issues regarding global musical traditions.

## Music

#### **MUS 101. Performance Class. (0 Credits)**

(0) I, II. Required of all music majors for six semesters. Passing grade achieved when students have attended total of 16 concert events per semester.

#### **MUS 107. Class Guitar for Nonmajors. (1 Credit)**

I, II. Instruction in guitar for non-music majors. May be retaken to a maximum of 4 hours.

#### **MUS 108. Class Voice for Nonmajors. (1 Credit)**

I, II. Instruction in singing for non-music majors. May be retaken to a maximum of 4 hours.

#### **MUS 110. Beginning Class Piano I. (1 Credit)**

I, II. Prepares non-piano majors to meet Level I Piano Proficiency Examination requirements. Basic keyboard skills, elementary repertoire, and technique. Some music reading ability required. May be retaken to a maximum of two hours.

#### **MUS 111. Beginning Class Piano II. (1 Credit)**

I, II. Prerequisite: MUS 110 or departmental approval. Continuation of MUS 110. May be retaken to a maximum of two hours.

#### **MUS 112. Piano I. (1,2 Credits)**

I, II. Corequisite: MUS 225 or 226 or 313; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

#### **MUS 113. Vocal Teaching Techniques. (1 Credit)**

A. Techniques and pedagogy for helping the beginning singer to develop fundamental habits of singing, and to become familiar with the vocal instrument; its mechanism, terminology, and techniques. Class restricted to music majors only.

**MUS 116. Classroom Instrument Techniques. (1 Credit)**

A. Techniques and pedagogy for incorporating traditional classroom instruments as a vehicle for teaching music. Topics will include ukulele, guitar, barred instruments, and recorder. Class restricted to music majors only.

**MUS 117. Applied Music Theory I. (3 Credits)**

I. An introductory study of the basic materials and organization of music through analysis, composition, aural perception, and performance.

**MUS 118. Applied Music Theory II. (3 Credits)**

II. Prerequisite: MUS 117 with a minimum grade of "C". Continuation of MUS 117. Further study of the basic materials and organization of music through analysis, composition, aural perception, and performance. Class restricted to music majors only.

**MUS 122. Voice I. (1,2 Credits)**

I, II. Corequisite: MUS 225 or 226; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

**MUS 127. Opera Workshop. (1 Credit)**

I, II. Prerequisite: instructor approval. Preparation and presentation of opera scenes and complete works. All phases of performance and technical procedures of staging, costumes, and management. Course may be retaken.

**MUS 132A. Violin I. (1-2 Credits)**

I, II. Corequisite: MUS 235 or 236; course open to music majors or minors only. One or two lessons per week. Instruction available in violin. May be retaken to a maximum of four hours.

**MUS 132B. Viola I. (1-2 Credits)**

I, II. Corequisite: MUS 235 or 236; course open to music majors or minors only. One or two lessons per week. Instruction available in viola. May be retaken to a maximum of four hours.

**MUS 132C. Cello. (1-2 Credits)**

I, II. Corequisite: MUS 235 or 236; course open to music majors or minors only. One or two lessons per week. Instruction available in violin & cello. May be retaken to a maximum of four hours.

**MUS 132D. String Bass I. (1-2 Credits)**

I, II. Corequisite: MUS 235 or 236 or 255A; course open to music majors or minors only. One or two lessons per week. Instruction available in string bass. May be retaken to a maximum of four hours.

**MUS 132F. Guitar I. (1-2 Credits)**

I, II. Corequisite: MUS 257; course open to music majors or minors only. One or two lessons per week. Instruction available in guitar. May be retaken to a maximum of four hours.

**MUS 142. Organ I. (1,2 Credits)**

I, II. Corequisite: MUS 225 or MUS 226 or MUS 313; course open to majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

**MUS 145A. Trumpet I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in trumpet. May be retaken to a maximum of four hours.

**MUS 145B. French Horn. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in French horn. May be retaken to a maximum of four hours.

**MUS 145C. Euphonium I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in euphonium. May be retaken to a maximum of four hours.

**MUS 145D. Trombone I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in trombone. May be retaken to a maximum of four hours.

**MUS 145E. Tuba I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in tuba. May be retaken to a maximum of four hours.

**MUS 146A. Flute I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in flute. May be retaken to a maximum of four hours.

**MUS 146B. Oboe I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in oboe. May be retaken to a maximum of four hours.

**MUS 146C. Clarinet I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in clarinet. May be retaken to a maximum of four hours.

**MUS 146D. Bassoon I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in bassoon. May be retaken to a maximum of four hours.

**MUS 146E. Saxophone I. (1-2 Credits)**

I, II. Corequisite: MUS 250 and 255A or 255B or 256; course open to music majors and minors only. One or two lessons per week. Instruction available in saxophone. May be retaken to a maximum of four hours.

**MUS 147. Percussion I. (1,2 Credits)**

I, II. Corequisite: MUS 253 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

**MUS 149. Music Entrepreneurship. (1 Credit)**

I. Develop a growth-mindset, creativity, and strong professional demeanor to help students succeed at EKU and beyond. Class restricted to music majors only.

**MUS 161. Musicianship I. (1 Credit)**

I. Corequisite: MUS 181. Skills and strategies for the perception, identification and performance of the basic materials of music.

**MUS 190. Music Industry I. (2 Credits)**

II. An overview to the music industry. Including a survey of industry careers and skills necessary to succeed in the music business.

**MUS 191. Music Industry II. (2 Credits)**

I. Prerequisite: MUS 190 or departmental approval. Continuation of MUS 190 including music copyright, publishing, and the evolution of the twenty-first century music business model.

**MUS 192. History of the Recording Industry. (2 Credits)**

A. Prerequisite: MUS 191. Understanding of the origins of recording technology, the development of production techniques, and the social/musical/cultural influences that helped shape these changes.

**MUS 201. Introduction to Piano Pedagogy. (1 Credit)**

II. Prerequisites: MUS 112 and major and minor in minor. Discusses teaching techniques, beginner methods, and materials for group and individual piano instruction.

**MUS 202. Introduction to Vocal Pedagogy. (1 Credit)**

II. Prerequisites: MUS 122 and major or minor in music. Studies principles of vocal production in singing and rudimentary concepts of teaching private voice lessons.

**MUS 205. Chamber Music. (0.5 Credits)**

I, II. Study and performance of standard chamber music literature. Open to pianists, vocalists, string, wind, and percussion players upon recommendation of instructor. Course may be retaken.

**MUS 210. Intermediate Class Piano I. (1 Credit)**

II. Prerequisite: MUS 111 or departmental approval. Second year course for non-piano majors to meet Level II Piano Proficiency Examination requirements. Continuation of skill development listed under MUS 110; more complex materials, intermediate repertoire, and technique. May be retaken to a maximum of two hours.

**MUS 211. Intermediate Class Piano II. (1 Credit)**

I, II. Prerequisite: MUS 210 or departmental approval. Continuation of MUS 210. May be retaken to a maximum of two hours.

**MUS 212. Piano II. (1,2 Credits)**

I, II. Prerequisite: MUS 112. Corequisite: MUS 225 or 226 or 313; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

**MUS 215. Woodwind Teaching Techniques. (1 Credit)**

A. Fingerings, care of instruments, tone production, and tuning. Group instruction to prepare for teaching woodwind instruments in band or orchestra. Examination of woodwind instrument materials suitable for beginning instrumental programs. Open to music majors only.

**MUS 216. Brass Teaching Techniques. (1 Credit)**

A. Fingering, slide positions, care of brass instruments, tone production, and tuning. Group instruction to prepare for teaching brass instruments in band or orchestra. Examination of brass materials suitable for beginning instrumental programs. Open to music majors only.

**MUS 217. Applied Music Theory III. (3 Credits)**

I. Prerequisite: MUS 118 with a minimum grade of "C". Continuation of MUS 118. Advanced study of the materials and organization of music through analysis, composition, aural perception, and performance.

**MUS 218. Applied Music Theory IV. (3 Credits)**

II. Prerequisite: MUS 217 with a minimum grade of "C". Continuation of MUS 217. Further advanced study of the materials and organization of music through analysis, composition, aural perception, and performance.

**MUS 220. Diction for Singers. (1 Credit)**

II. For voice, education, and choral conducting students. Enunciation and projection; accurate pronunciation in English, Italian and Ecclesiastical Latin. Phonetics and the International Phonetic Alphabet.

**MUS 221. Diction for Singers II. (1 Credit)**

I. Prerequisite: MUS 220. For voice students. Enunciation and projection; accurate pronunciation of German and French poetry and poetry in song. Using the International Phonetic Alphabet (IPA).

**MUS 222. Voice II. (1,2 Credits)**

I, II. Prerequisite: MUS 122. Corequisite: MUS 225 or 226; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

**MUS 224. Chamber Singers. (1 Credit)**

(1) Highly select small ensemble dedicated to the highest standards of preparation and performance of choral literature from all style periods. Membership is by audition only. May be retaken to a maximum of four hours.

**MUS 225. Concert Choir. (1 Credit)**

(0-1) Large mixed chorus open to all singers. This choir places an emphasis on developing sight reading and performance skills while providing a challenging and satisfying musical experience. Course may be retaken.

**MUS 226. University Singers (SATB). (1 Credit)**

(0-1) I, II. Advanced choral ensemble of mixed voices open by audition only. Rehearsal and performance of choral repertoire from various styles and eras. Presents several major concerts throughout the year on and off campus. Course may be retaken.

**MUS 228A. ENChor (SSAA Choir). (1 Credit)**

I, II. Choral ensemble of soprano/mezzo/alto voices open to all students. Rehearsal and performance of choral repertoire from various styles and eras. Repeatable maximum number of hours: 4.

**MUS 228B. Koros (TTBB Choir). (1 Credit)**

I, II. Choral ensemble of tenor/baritone/bass voices open to all students. Rehearsal and performance of choral repertoire from various styles and eras. Repeatable maximum number of hours: 4.

**MUS 230. String Instruments Methods I. (1 Credit)**

I. Fingering, care of instruments and tone production. Group instruction to prepare for teaching strings in class and for training string section of school orchestra; survey of teaching materials.

**MUS 232A. Violin II. (1-2 Credits)**

I, II. Prerequisite: MUS 132a. Corequisite: MUS 235 or 236; course open to music majors or minors only. One or two lessons per week. Instruction available in violin. May be retaken to a maximum of four hours.

**MUS 232B. Viola II. (1-2 Credits)**

I, II. Prerequisite: MUS 132b. Corequisite: MUS 235 or 236; course open to music majors or minors only. One or two lessons per week. Instruction available in viola. May be retaken to a maximum of four hours.

**MUS 232C. Cello II. (1-2 Credits)**

I, II. Prerequisite: MUS 132c. Corequisite: MUS 235 or 236; course open to music majors or minors only. One or two lessons per week. Instruction available in violin/cello. May be retaken to a maximum of four hours.

**MUS 232D. String Bass II. (1-2 Credits)**

I, II. Prerequisite: MUS 132d. Corequisite: MUS 235 or 236 or 255A; course open to music majors or minors only. One or two lessons per week. Instruction available in string bass. May be retaken to a maximum of four hours.

**MUS 232F. Guitar II. (1-2 Credits)**

I, II. Prerequisite: MUS 132f. Corequisite: MUS 257; course open to music majors or minors only. One or two lessons per week. Instruction available in guitar. May be retaken to a maximum of four hours.

**MUS 235. Symphony Orchestra. (1 Credit)**

I, II. Prerequisite: Audition. Rehearsal and performance of orchestra literature from all style periods. Concerts given both on and off campus. Three or more hours rehearsal per week. Course open by audition only. May be retaken to a maximum of four hours.

**MUS 236. String Orchestra. (1 Credit)**

I, II. Rehearsal and performance of string orchestra literature from all style periods. Concerts given both on and off campus. Two or more hours of rehearsal per week. Course open by audition only. May be retaken to a maximum of four hours.

**MUS 245A. Trumpet II. (1-2 Credits)**

I, II. Prerequisite: MUS 145a. Corequisite: MUS 250 and 235 or 255A or 255B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in trumpet. May be retaken to a maximum of four hours.

**MUS 245B. French Horn II. (1-2 Credits)**

I, II. Prerequisite: MUS 145b. Corequisite: MUS 250 and 235 or 255a or 255b or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in French horn. May be retaken to a maximum of four hours.

**MUS 245C. Euphonium II. (1-2 Credits)**

I, II. Prerequisite: MUS 145c. Corequisite: MUS 250 and 255A or 255B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available euphonium. May be retaken to a maximum of four hours.

**MUS 245D. Trombone II. (1-2 Credits)**

I, II. Prerequisite: MUS 145d. Corequisite: MUS 250 and 235 or 255a or 255b or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in trombone. May be retaken to a maximum of four hours.

**MUS 245E. Tuba II. (1-2 Credits)**

I, II. Prerequisite: MUS 145e. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in tuba. May be retaken to a maximum of four hours.

**MUS 246A. Flute II. (1-2 Credits)**

I, II. Prerequisite: MUS 146a. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in flute. May be retaken to a maximum of four hours.

**MUS 246B. Oboe II. (1-2 Credits)**

I, II. Prerequisite: MUS 146b. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors and minors only. One or two lessons per week. Instruction available in oboe. May be retaken to a maximum of four hours.

**MUS 246C. Clarinet II. (1-2 Credits)**

I, II. Prerequisite: MUS 146c. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in clarinet. May be retaken to a maximum of four hours.

**MUS 246D. Bassoon II. (1-2 Credits)**

I, II. Prerequisite: MUS 146d. Corequisite: MUS 250 and 255A or 255B or 235 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in bassoon. May be retaken to a maximum of four hours.

**MUS 246E. Saxophone II. (1-2 Credits)**

I, II. Prerequisite: MUS 146e. Corequisite: MUS 250 and 255A or 255B or 256; course open to music majors and minors only. One or two lessons per week. Instruction available in saxophone. May be retaken to a maximum of four hours.

**MUS 247. Percussion II. (1,2 Credits)**

I, II. Prerequisite: MUS 147. Corequisite: MUS 253 and 255A or 255B or 235 or 256; Course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of four hours.

**MUS 249. The Musician's Health. (2 Credits)**

I. Development of lifelong strategies to sustain healthy and successful careers in music, protect musicians from short-term and long-term injury, and promote positive performance practices. Open to music majors only.

**MUS 250. Small Ensembles:\_\_\_\_. (.5 Credits)**

I, II. Rehearsal and performance for: string, brass, percussion, vocal, and woodwind ensembles. Course may be retaken.

**MUS 251A. Trombone Methods. (0.5 Credits)**

Prerequisite: Music majors only. Slide positions, care of trombone, tone production, and tuning. Group instruction to prepare for teaching trombone in band or orchestra. Examination of trombone materials suitable for beginning instrumental programs.

**MUS 251B. Tuba/Baritone Methods. (0.5 Credits)**

Prerequisite: Music majors only. Fingering, care of tube/baritone, tone production, and tuning. Group instruction to prepare for teaching tuba/baritone in band or orchestra. Examination of tuba/baritone materials suitable for beginning instrumental programs.

**MUS 252A. Horn Methods. (0.5 Credits)**

Prerequisite: MUS 251A or MUS 251B. Fingering, care of horn, tone production, and tuning. Group instruction to prepare for teaching horn in band or orchestra. Examination of horn materials suitable for beginning instrumental programs.

**MUS 252B. Trumpet Methods. (0.5 Credits)**

II. Prerequisite: MUS 251A or MUS 251B. Fingering, care of trumpet, tone production, and tuning. Group instruction to prepare for teaching trumpet in band or orchestra. Examination of trumpet materials suitable for beginning instrumental programs.

**MUS 253. Percussion Ensemble. (1 Credit)**

I, II. Rehearsal and performance of standard Percussion Ensemble literature including steel drums, African studies, and marimba ensemble literature. Course open by audition only. May be retaken to a maximum of four hours.

**MUS 254. Jazz Ensemble. (1 Credit)**

I, II. Rehearsal and performance of standard Jazz Ensemble literature including jazz improvisation, jazz styles, and form. Course open by audition only. May be retaken to a maximum of four hours.

**MUS 255A. Symphonic Band. (1 Credit)**

I, II. Course open by audition only. Rehearsal and performance of standard band literature. May be retaken to a maximum of four hours.

**MUS 255B. Concert Band. (1 Credit)**

II. Course open to all students with prior experience in wind and percussion instruments. Rehearsal and performance of standard band literature. May be retaken to a maximum of four hours. Departmental approval required for 0 credit section.

**MUS 256. Marching Band. (1 Credit)**

I. Preparation and performances of marching band shows during the football season. Three or more rehearsals per week. May be retaken to a maximum of four hours.

**MUS 257. Guitar Ensemble. (1 Credit)**

I, II. Course open to guitar majors only. Must have experience reading music and performance skills on the instrument. May be retaken for a total of four hours.

**MUS 258. Bass Choir. (1 Credit)**

(1) I, II. Course open to students with prior experience in wind and percussion instruments, by audiotion only. Rehearsal and performance of standard brass choir literature. May be retaken to a maximum of 4 hours.

**MUS 261. Musicianship IV. (1 Credit)**

I. Prerequisite: MUS 162 (C), corequisite MUS 281. Skills and strategies for the perception, identification and performance of the basic materials of music. Further study of more difficult, harmonic, melodic and rhythmic materials from the Baroque and Classic periods.

**MUS 262. Musicianship IV. (1 Credit)**

II. Prerequisite: MUS 261, co-requisite MUS 282. Skills and strategies for the perception, identification and performance of the materials of music. Further study of more difficult, harmonic, melodic and rhythmic materials from the Romantic and Modern periods.

**MUS 281. Intermediate Theory III. (3 Credits)**

I. Prerequisite: minimum grade of "C" in MUS 182, corequisite: MUS 261. Continuation of MUS 182. Integrated skills further developed through the study of more difficult, longer structures from the Baroque and Classic periods.

**MUS 282. Intermediate Theory IV. (3 Credits)**

II. Prerequisite: MUS 281, corequisite: MUS 262. Continuation of MUS 281. Integrated skills further developed through the study of more difficult structures from the Romantic and Modern periods.

**MUS 283. Beginning Composition. (1 Credit)**

A. Prerequisite: instructor approval. Guidance in the exploration and development of compositional techniques relevant to the student's stylistic direction. Correct notation and major stylistic analysis stressed. May be retaken to a maximum of four hours provided the subject matter is different each time.

**MUS 285. Jazz Improvisation. (2 Credits)**

II. Prerequisite: MUS 118 or instructor approval. Develop skills for improvising in contemporary jazz idioms.

**MUS 290. Film Scoring. (2 Credits)**

II. Prerequisite: MUS 190, 191 or departmental approval. This course gives students important and practical knowledge, tools, and approaches to writing music in the profession. Will also cover topics in Midi, sequencing, Finale, Sibelius, and hard disk recording applications.

**MUS 292. Fundamentals in Audio Production. (2 Credits)**

A. Prerequisite: MUS 192. Understanding of the physics of sound, fundamentals of sound design, microphone usage, and digital audio recording technology.

**MUS 300. Music Industry Careers & Internship Seminar. (0 Credits)**

I,II. Prerequisite: junior standing in music or departmental approval. Required for all Music Industry students who have earned at least 60 hours. Credit will be given when students have attended and/or completed department-sponsored activities regarding professional skills and internships and careers.

**MUS 310. Topics in Music:\_\_\_\_. (1-3 Credits)**

Selected topics in music, music technology, or applied musical skills. May be retaken to a maximum of 6 hours if topic is different.

**MUS 312. Piano III. (1-4 Credits)**

I, II. Prerequisite: MUS 212 and completion of the sophomore comprehensive in music. Corequisite: MUS 425 or 426; course open to music majors only. One or two lessons per week. May be retaken to a maximum of eight hours.

**MUS 313. Accompanying. (1 Credit)**

(1) I, II. Prerequisite: keyboard coordinator approval. Keyboard students may substitute MUS 313 for ensembles requirements. Additional accompanying hours assigned. May be retaken to a maximum of four hours.

**MUS 317. Applied Music Theory V. (3 Credits)**

I. Prerequisite: MUS 218 with a minimum grade of "C". Advanced study of musical organization and techniques through score analysis, research, and aural perception.

**MUS 320. Class Voice Methods. (1 Credit)**

II. Basic vocal techniques with emphasis on developing the voice for solo and/or choral performance.

**MUS 322. Voice III. (1-4 Credits)**

I, II. Prerequisite: MUS 222 and completion of the sophomore comprehensive in music. Corequisite: MUS 425 or 426; course open to music majors only. One or two lessons per week. May be retaken to a maximum of eight hours.

**MUS 327. Opera Workshop. (1 Credit)**

I, II. Prerequisite: instructor approval. Preparation and presentation of opera scenes and complete works. All phases of performance and technical procedures of staging, costumes, and management. Course may be retaken.

**MUS 330. String Instruments Methods II. (1 Credit)**

II. Prerequisite: MUS 230. Continuation of MUS 230.

**MUS 332A. Violin III. (1-4 Credits)**

I, II. Prerequisite: MUS 232a and completion of the sophomore comprehensive in music. Co-requisite: MUS 435 or 436; course open to music majors only. One or two lessons per week. Instruction in violin. May be retaken to maximum of eight hours.

**MUS 332B. Viola III. (1-4 Credits)**

I, II. Prerequisite: MUS 232b and completion of the sophomore comprehensive in music. Corequisite: MUS 435 or 436; course open to music majors only. One or two lessons per week. Instruction in viola. May be retaken to a maximum of eight hours.

**MUS 332C. 'Cello III. (1-4 Credits)**

I, II. Prerequisite: MUS 232c and completion of the sophomore comprehensive in music. Corequisite: MUS 435 or 436; course open to music majors only. One or two lessons per week. Instruction in cello. May be retaken to a maximum of eight hours.

**MUS 332D. String Bass III. (1-4 Credits)**

I, II. Prerequisite: MUS 232d and completion of the sophomore comprehensive in music. Corequisite: MUS 435 or 436 or 455a; course open to music majors only. One or two lessons per week. Instruction in string bass. May be retaken to a maximum of eight hours.

**MUS 332F. Guitar III. (1-4 Credits)**

I, II. Prerequisite: MUS 232f and completion of the sophomore comprehensive in music. Corequisite: MUS 457; course open to music majors only. One or two lessons per week. Instruction in guitar. May be retaken to a maximum of eight hours.

**MUS 345A. Trumpet III. (1-4 Credits)**

I, II. Prerequisite: MUS 245a and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 256 or 455a or 455b or 435; course open to music majors only. One or two lessons per week. Instruction available in trumpet. May be retaken to a maximum of eight hours.

**MUS 345B. French Horn III. (1-4 Credits)**

I, II. Prerequisite: MUS 245b and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 256 or 455a or 455b or 435; course open to music majors only. One or two lessons per week. Instruction available in French horn. May be retaken to a maximum of eight hours.

**MUS 345C. Euphonium III. (1-4 Credits)**

I, II. Prerequisite: MUS 245c and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 455A or 455B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in euphonium. May be retaken to a maximum of eight hours.

**MUS 345D. Trombone III. (1-4 Credits)**

I, II. Prerequisite: MUS 245d and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 256 or 455a or 455b or 435; course open to music majors only. One or two lessons per week. Instruction available in trombone. May be retaken to a maximum of eight hours.

**MUS 345E. Tuba III. (1-4 Credits)**

I, II. Prerequisite: MUS 245e and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in tuba. May be retaken to a maximum of eight hours.

**MUS 346A. Flute III. (1-4 Credits)**

I, II. Prerequisite: MUS 246a and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in flute. May be retaken to a maximum of eight hours.

**MUS 346B. Oboe III. (1-4 Credits)**

I, II. Prerequisite: MUS 246b and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in oboe. May be retaken to a maximum of eight hours.

**MUS 346C. Clarinet III. (1-4 Credits)**

I, II. Prerequisite: MUS 246c and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in clarinet. May be retaken to maximum of eight hours.

**MUS 346D. Bassoon III. (1-4 Credits)**

I, II. Prerequisite: MUS 246d and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in bassoon. May be retaken to a maximum of eight hours.

**MUS 346E. Saxophone III. (1-4 Credits)**

I, II. Prerequisite: MUS 246e and completion of the sophomore comprehensive in music. Corequisite: MUS 250 and 445A or 455B or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in saxophone. May be retaken to a maximum of eight hours.

**MUS 347. Percussion III. (1-4 Credits)**

I, II. Prerequisite: MUS 247 and completion of the sophomore comprehensive in music. Corequisite: MUS 253 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of eight hours.

**MUS 349. Applied Learning in Music. (0.5-8 Credits)**

A. Prerequisite: departmental approval. Work in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours employment required for each semester hour credit.

**MUS 349A. Cooperative Study: Music. (0.5-8 Credits)**

A. Prerequisite: departmental approval. Work in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours employment required for each semester hour credit.

**MUS 349B. Cooperative Study: Music. (0.5-8 Credits)**

Work in placements related to academic studies.

**MUS 349C. Cooperative Study: Music. (0.5-8 Credits)**

Work in placements related to academic studies.

**MUS 349D. Cooperative Study: Music. (0.5-8 Credits)**

Work in placements related to academic studies.

**MUS 351A. Clarinet Methods. (0.5 Credits)**

Prerequisite: Admission to Teacher Education. Fingering, care of instruments, tone production, and tuning. Group instruction to prepare for teaching the clarinet in band orchestra. Examination of clarinet materials suitable for beginning instrumental programs.

**MUS 351B. Flute Methods. (0.5 Credits)**

Prerequisite: Admission to Teacher Education. Fingering, care of the flute, tone production, and tuning. Group instruction to prepare for teaching the flute in band or orchestra. Examination of flute materials suitable for beginning instrumental programs.

**MUS 352A. Saxophone Methods. (0.5 Credits)**

II. Prerequisite: MUS 351A or MUS 351B. Fingerings, care of the saxophone, tone production, and tuning. Group instruction to prepare for teaching saxophone in band. Examination of saxophone materials suitable for beginning instrumental programs.

**MUS 352B. Oboe/Bassoon Methods. (0.5 Credits)**

II. Prerequisite: MUS 351A or MUS 351B. Fingerings, care of oboe/bassoon, tone production, and tuning. Group instruction to prepare for teaching oboe/bassoon in band or orchestra. Examination of oboe/bassoon materials suitable for beginning instrumental programs.

**MUS 354. Percussion Teaching Techniques. (1 Credit)**

II. Pre-requisite: MUS 215 or 216. Snare drumming, rudiments, teaching techniques. Experiences on all related percussion instruments: bass drum, tympani, and others. Some experiences with mallet instruments; marimba, xylophone, bells, and others.

**MUS 364. Principles of C & I in Music. (1 Credit)**

I. Co-requisite: MUS 366 and CED 300. Principles of curriculum and instructional design for the music classroom. Demonstration and application of standards-based learning and curricular alignment within a music setting.

**MUS 365. Error Detection. (1 Credit)**

I. Prerequisite: MUS 366. Practical experience in performing and conducting instrumental and choral music literature appropriate for use in school situation, including application of identifying and correcting performance errors.

**MUS 366. Basic Conducting Pedagogy. (2 Credits)**

I. Prerequisite: junior standing in music or instructor approval. Basic techniques of conducting.

**MUS 367. Instrumental Conducting. (2 Credits)**

II. Prerequisite: MUS 366. Instrumental conducting techniques and their application in rehearsal and performance.

**MUS 368. Choral Conducting. (2 Credits)**

II. Prerequisite: MUS 366. Choral conducting techniques and their application in rehearsal and performance.

**MUS 369. Intermediate Conducting. (2 Credits)**

II. Prerequisite: MUS 366. Development of artistry expressed through physical movement. Specific topics include aesthetics as they apply to conducting, enhanced musicianship and interpretation, ensemble leadership, movement principles, gestural development, transposition/clef reading, aural training, and score study.

**MUS 373. Stylistic Composition. (2 Credits)**

I. Prerequisite: MUS 218 (with a grade of C or better) or departmental approval. A study of musical styles from the Baroque to the Romantic, including analysis of representative literature and stylistic composition assignments.

**MUS 383. Orchestration. (3 Credits)**

I. Prerequisite: Music majors only, MUS 182 and junior standing. Survey of ranges, timbers, and characteristics of orchestra and band instruments. Scoring for wind ensemble and full orchestra.

**MUS 384. Survey of Music Technology. (2 Credits)**

I, II. Prerequisite: MUS 182 and junior standing in Music. Survey of music technology, including sound reinforcement, MIDI sequencing, DAW software, music specific web design notation software, and the history of music technology.

**MUS 390. Music Industry III. (3 Credits)**

I. Prerequisite: MUS 191 or departmental approval. Continuation of MUS 190 including marketing, promotion, advertising, and starting a business. A project reflecting course study is required.

**MUS 391. Music Industry IV. (3 Credits)**

II. Prerequisite: MUS 390 or departmental approval. Continuation of MUS 390 including non-profit organizations, grants, contacts and website creation. A project reflecting course study is required.

**MUS 392. Microphone Placement Techniques. (2 Credits)**

A. Prerequisites: MUS 292 and Junior standing in Music. The study and understanding of microphone construction, usage, and placement techniques.

**MUS 399. Joint Recital. (1 Credit)**

I, II. Prerequisite: junior standing in music. A half recital shared with another student.

**MUS 412. Piano IV. (1-4 Credits)**

I, II. Prerequisite: MUS 312. Corequisite: MUS 425 or 426 or 513; course open to music majors only. One or two lessons per week. May be retaken to a maximum of eight hours.

**MUS 422. Voice IV. (1-4 Credits)**

I, II. Prerequisite: MUS 322. Corequisite: MUS 425 or 426; course open to music majors only. One or two lessons per week. May be retaken to a maximum of eight hours.

**MUS 424. Chamber Singers. (1 Credit)**

(1) Prerequisite: MUS 224. Highly select small ensemble dedicated to the highest standards or preparation and performance of choral literature from all style periods. Membership is by audition only. Course may be retaken.

**MUS 425. Concert Choir. (1 Credit)**

I, II. Prerequisite: MUS 225. Large mixed chorus open to all singers. This choir places an emphasis on developing sight reading and performance skills while providing a challenging and satisfying musical experience. Course may be retaken.

**MUS 426. University Singers (SATB). (1 Credit)**

I, II. Prerequisite: MUS 226. Advanced choral ensemble of mixed voices open by audition only. Rehearsal and performance of choral repertoire from various styles and eras. Presents several major concerts throughout the year on and off campus. Course may be retaken.

**MUS 428A. EnChor (SSAA Choir). (1 Credit)**

I, II. Prerequisite: MUS 228A. Choral ensemble of soprano/mezzo/alto voices open to all students. Rehearsal and performance of choral repertoire from various styles and eras. Repeatable maximum number of hours: 4.

**MUS 428B. Koros (TTBB Choir). (1 Credit)**

I, II. Prerequisite: MUS 228B. Choral ensemble of tenor/baritone/bass voices open to all students. Rehearsal and performance of choral repertoire from various styles and eras. Repeatable maximum number of hours: 4.

**MUS 432A. Violin IV. (1-4 Credits)**

I, II. Prerequisite: MUS 332a. Corequisite: MUS 435 or 436; course open to music majors only. One or two lessons per week. Instruction available in violin. May be retaken to a maximum of eight hours.

**MUS 432B. Viola IV. (1-4 Credits)**

I, II. Prerequisite: MUS 332b. Corequisite: MUS 435 or 436; course open to music majors only. One or two lessons per week. Instruction available in viola. May be retaken to a maximum of eight hours.

**MUS 432C. 'Cello IV. (1-4 Credits)**

I, II. Prerequisite: MUS 332c. Corequisite: MUS 435 or 436; course open to music majors only. One or two lessons per week. Instruction available in violin/cello. May be retaken to a maximum of eight hours.

**MUS 432D. String Bass IV. (1-4 Credits)**

I, II. Prerequisite: MUS 332d. Corequisite: MUS 435 or 436 or 455a; course open to music majors only. One or two lessons per week. Instruction available in string bass. May be retaken to a maximum of eight hours.

**MUS 432F. Guitar IV. (1-4 Credits)**

I, II. Prerequisite: MUS 332f. Corequisite: MUS 457; course open to music majors only. One or two lessons per week. Instruction available in guitar. May be retaken to a maximum of eight hours.

**MUS 435. Symphony Orchestra. (1 Credit)**

I, II. Prerequisite: MUS 235. Rehearsal and performance of orchestra literature from all style periods. Concerts given both on and off campus. Course open by audition only. May be retaken.

**MUS 436. String Orchestra. (1 Credit)**

I, II. Rehearsal and performance of string orchestra literature from all style periods. Concerts given both on and off campus. Two or more hours of rehearsal per week. Course open by audition only. May be retaken.

**MUS 445A. Trumpet IV. (1-4 Credits)**

I, II. Prerequisite: MUS 345a. Corequisite: MUS 250 and 256 or 455a or 455b or 435; course open to music majors only. One or two lessons per week. Instruction available in trumpet. May be retaken to a maximum of eight hours.

**MUS 445B. French Horn IV. (1-4 Credits)**

I, II. Prerequisite: MUS 345b. Corequisite: MUS 250 and 256 or 455a or 455b or 435; course open to music majors only. One or two lessons per week. Instruction available in French horn. May be retaken to a maximum of eight hours.

**MUS 445C. Euphonium IV. (1-4 Credits)**

I, II. Prerequisite: MUS 345c. Corequisite: MUS 250 and 455a or 455b or 256; course open to music majors only. One or two lessons per week. Instruction available in baritone horn. May be retaken to a maximum of eight hours.

**MUS 445D. Trombone IV. (1-4 Credits)**

I, II. Prerequisite: MUS 345d. Corequisite: MUS 250 and 256 or 455a or 455b or 435; course open to music majors only. One or two lessons per week. Instruction available in trombone. May be retaken to a maximum of eight hours.

**MUS 445E. Tuba IV. (1-4 Credits)**

I, II. Prerequisite: MUS 345e. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in tuba. May be retaken to a maximum of eight hours.

**MUS 446A. Flute IV. (1-4 Credits)**

I, II. Prerequisite: MUS 346a. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in flute. May be retaken to a maximum of eight hours.

**MUS 446B. Oboe IV. (1-4 Credits)**

I, II. Prerequisite: MUS 346b. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors and minors only. One or two lessons per week. Instruction available in oboe. May be retaken to a maximum of eight hours.

**MUS 446C. Clarinet IV. (1-4 Credits)**

I, II. Prerequisite: MUS 346c. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. Instruction available in clarinet. May be retaken to a maximum of eight hours.

**MUS 446D. Bassoon IV. (1-4 Credits)**

I, II. Prerequisite: MUS 346d. Corequisite: MUS 250 and 455A or 455B or 435 or 256; course open to music majors and minors only. One or two lessons per week. Instruction available in bassoon. May be retaken to a maximum of eight hours.

**MUS 446E. Saxophone IV. (1-4 Credits)**

I, II. Prerequisite: MUS 346e. Corequisite: MUS 250 and 455A or 455B or 256; course open to music majors and minors only. One or two lessons per week. Instruction available in saxophone. May be retaken to a maximum of eight hours.

**MUS 447. Percussion IV. (1-4 Credits)**

I, II. Prerequisite: MUS 347. Corequisite: MUS 253 and 455A or 455B or 435 or 256; course open to music majors or minors only. One or two lessons per week. May be retaken to a maximum of eight hours.

**MUS 449. Music Industry Senior Capstone. (1 Credit)**

(1) I, II. Prerequisite: MUS 300 and departmental approval. Music Industry and Recording Arts students will apply knowledge and skills to the student run record label. May be retaken for a maximum of two hours.

**MUS 451. Piano Teaching Repertoire. (1 Credit)**

Prerequisites: MUS212 and major in music. Explores the teaching repertoire of elementary and intermediate piano students.

**MUS 452. Vocal Teaching Repertoire. (1 Credit)**

I. Prerequisite: MUS 222 and major in music. Explores the teaching repertoire for beginning to intermediate voice students.

**MUS 453. Percussion Ensemble. (1 Credit)**

I, II. Rehearsal and performance of standard Percussion Ensemble literature including steel drums, African studies, and marimba ensemble literature. By audition only. May be retaken.

**MUS 454. Jazz Ensemble. (1 Credit)**

I, II. Rehearsal and performance of standard Jazz Ensemble literature including jazz improvisation, jazz styles, and forms. By audition only. May be retaken.

**MUS 455A. Symphonic Band. (1 Credit)**

I, II. Prerequisite: MUS 255A. By audition only. Rehearsal and performance of standard band literature. May be retaken. Departmental approval required for 0 credit section.

**MUS 455B. Concert Band. (1 Credit)**

II. Prerequisite: MUS 255B. Course open to all students with prior experience in wind and percussion instruments. Rehearsal and performance of standard band literature. May be retaken. Departmental approval required for 0 credit section.

**MUS 457. Guitar Ensemble. (1 Credit)**

I, II. Prerequisite: MUS 257. Course open to guitar majors only. Must have experience reading music and performance skills on the instrument. May be retaken.

**MUS 458. Brass Choir. (1 Credit)**

(0-1) I, II. Prerequisite: MUS 258. Course open to students with prior experience in wind and percussion instruments, by audition only. Rehearsal and performance of standard brass choir literature. May be retaken. Departmental approval required for 0 credit section.

**MUS 480. Form and Analysis. (3 Credits)**

I. Prerequisites: MUS 281 and junior standing in music. In-depth study of the materials of form from the motive through large structures.

**MUS 481. Tonal Counterpoint. (3 Credits)**

A. Prerequisite: MUS 281 or equivalent. A study of contrapuntal music from the 18th century, including analysis of representative literature and stylistic composition assignments.

**MUS 482. Music Since 1900. (2 Credits)**

II. Prerequisite: Junior standing. Corequisites and/or prerequisites: MUS 218 and MUS 276W. A study of the compositional devices relevant to music since 1900, and a study of specific representative literature of significant composers.

**MUS 483. Composition. (2 Credits)**

A. Prerequisite: MUS 282 and 283; or departmental approval. Individual guidance in the exploration and development of compositional techniques relevant to the student's stylistic direction. May be retaken to a maximum of eight hours, provided the subject matter is different.

**MUS 484. Digital Music. (2 Credits)**

I. Prerequisite: MUS 218 or equivalent with a grade of C or better. Advanced instruction in the concepts, software and techniques related to creating music for digital media.

**MUS 492. Advanced Mixing. (2 Credits)**

A. Prerequisite: MUS 392 and senior standing. Covers concepts and techniques involved in mixing audio for commercial productions. Become familiar with terminology and concepts specific to recording studios and sound reinforcement.

**MUS 499. Senior Project/Recital. (1,2 Credits)**

I, II. Prerequisite: MUS 399. A full performance recital or a theory and composition project consisting of a theory project and recital of student's own compositions.

**MUS 501. Music Leadership. (2 Credits)**

(2) II. Prerequisite: MUH 276W or instructor approval. Development of music leadership skills for the 21st century. Leadership styles, digital marketing, grant writing, and policy development will be addressed. Credit will not be awarded for both MUS 501 and 701.

**MUS 510. Special Topics in Music:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: MUS 480 or equivalent, or departmental approval. Advanced topics in music. May be retaken to a maximum of six hours, provided the topics are different.

**MUS 510S. Special Topics in Music:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: MUS 480 or departmental approval. Advanced topics in music that incorporates a service learning component. May be retaken to a maximum of six hours, provided the topics are different. Credit will not be awarded for both MUS 510 and 510S.

**MUS 511. Jazz Theory. (2 Credits)**

(2) I. Prerequisite: MUS 218 or departmental approval. Study of musical concepts relating to the jazz idiom. Credit will not be awarded for both MUS 511 and 711.

**MUS 512. Piano V. (1-4 Credits)**

I, II. May not be taken for credit by piano majors.

**MUS 513. Techniques of Accompanying. (1 Credit)**

I, II. Practical training in the tradition, interpretation, and execution of accompaniments. May be retaken to a maximum of two hours.

**MUS 516. Studio Management. (1 Credit)**

(1) II. Pre-requisite: departmental approval. This course explores business practices and administrative duties of managing an applied music studio. Credit will not be awarded for students who have credit for MUS 716, 816.

**MUS 517. Arranging. (2 Credits)**

(2) A. Prerequisite: MUS 218 with a minimum grade of "C". A study of the practical skills and fundamental knowledge needed to arrange music for instruments and/or voices in various ensemble configurations. Credit will not be awarded for both MUS 517 and 717.

**MUS 519. Performance Temperament. (2 Credits)**

(2). A. Prerequisite: MUS 218. Condition students for optimal public performance. Strategies for artful and effective practicing/preparation, maintaining motivation, as well as confronting performance anxieties and achieving peak performance. Credit will not be awarded for both MUS 519 and 719.

**MUS 520. Advanced Diction for Singers. (1 Credit)**

A. Prerequisite: MUS 220. For voice and choral conducting students. Enunciation and projection; accurate pronunciation in German and French. Phonetics and the International Phonetic Alphabet.

**MUS 522. Voice V. (1-4 Credits)**

I, II. May not be taken for credit by voice majors.

**MUS 542. Organ V. (1-4 Credits)**

I, II. May not be taken for credit by voice majors.

**MUS 549. Career Development. (2 Credits)**

(2). I. Prerequisite: MUH 276W or instructor approval. Development of the professional skills necessary for a sustainable career in music. Self-marketing, business and finance, networking, and interviewing topics will be explored. Creation of professional documents needed for personal promotion in the industry. Credit will not be awarded for both MUS 549 and 749.

**MUS 550. Teaching Techniques. (1 Credit)**

A. Prerequisite: MUS 399. Analysis of current teaching methods and materials with the intention of developing sound teaching procedures. May include observation and performance. Topics in woodwinds, brass, percussion, strings, voice, piano, and organ. Credit will not be awarded for both MUS 550 and 750.

**MUS 551. Performance Literature. (1 Credit)**

A. Prerequisite: MUS 399. Literature for various performing media relative to performance practices and problems. Topics in woodwinds, brass, percussion, strings, voice, piano, and organ. Credit will not be awarded for both MUS 551 and 751.

**MUS 555. Symphonic Music Literature. (3 Credits)**

I. Prerequisites: MUH 371, 372 and music majors only. Evolution of the symphony from its beginning to the 20th century with emphasis on score reading and listening.

**MUS 556. Choral Music Literature. (2 Credits)**

II. Prerequisites: MUH 275 Survey of choral music literature from the 15th century to the present.

**MUS 557. Symphonic and Wind Band Literature. (2 Credits)**

(2). I. Evolution of instrumental music from its beginning to modern day. Includes a detailed exploration of music and the many artistic, social, and cultural forces that helped to shape these genres. Credit will not be awarded for both MUS 557 and 757.

**MUS 586. Workshop in Instrumental Music. (1-4 Credits)**

A. Topics in band or orchestra procedures. May be retaken to a maximum of four hours.

**MUS 588. Pedagogy of Theory. (2 Credits)**

A. Prerequisite: MUS 399 and music majors only. Comparative study of theory systems with emphasis on presentation and illustrative exercises dealing with related theoretical problems.

**MUS 589. Workshop in Choral Music. (1-4 Credits)**

A. Techniques, literature, and materials pertinent to a particular area or areas of preparation and performance of choral music. Topics to be announced. May be retaken to a maximum of four hours.

## Music Theatre

**MUT 135. Voice and Movement for the Actor. (3 Credits)**

A. Exploration of voice and movement as the basic tools of performance. Students will gain awareness of their own habits and develop their capacities for clear and expressive vocal and physical communication. The development of character-specific physicalization and vocal production.

**MUT 250. Musical Theatre Ensemble. (1 Credit)**

I, II. Rehearsal and performance for: musical theatre performance, dance ensemble, or orchestra ensembles. Outside rehearsals, performances, and all technical rehearsal are required. Repeatable maximum number of hours: 8.

**MUT 280. Acting for Musical Theatre. (3 Credits)**

A. Formerly THE 280. Prerequisite: THE 135 or MUT 135. Study of Musical Theatre as an art form, and an examination of the acting process and how it applies to the musical genre; performance work is included. Credit will not be awarded for both THE 280 and MUT 280.

**MUT 285. Theatre Dance I. (2 Credits)**

I, II. A beginning course in movement and dance for the stage. Expands the capacity for non-verbal self-expression and dramatic imagination. Basic work in ballet, jazz and musical theatre styles will be introduced. Any combination of THE 285/MUT 285 may be retaken to a maximum of six hours.

**MUT 385. Theatre Dance II. (2 Credits)**

I, II. Prerequisite: THE 285 or instructor approval. Emphasis is placed on enhancing strength, coordination, and technique as movement skills develop. Ensemble work, and fundamentals in ballet, jazz, partnering and musical theatre styles will be included. Any combination of THE 385/ MUT 385 may be retaken to a maximum of six hours. Insert: Formerly THE 385.

# Music, Bachelor of Music with a Concentration in Music Education (B.M.)

## Program Objectives

Upon successful completion of the Bachelor of Music program, graduates will be able to perform a recital in their major applied area, communicate effectively about the theoretical concepts in music, and identify and analyze musical works from diverse cultures and historical periods.

In addition, all music education majors will demonstrate the ability to sing, play a variety of instruments, develop lesson plans, and engage in effective teaching during a student teaching semester. All theory and composition students will demonstrate composition skills and present original compositions in public recitals as well as identifying an area of advanced analysis of musical works through a senior project. All music industry students will demonstrate music technology skills, identify trends in the many facets of this business field, and demonstrate an ability to work with professionals through cooperative learning experiences. All performance majors will prepare two performance recitals and analyze repertoire presented on those recitals, in addition to identifying different pedagogical approaches in their area.

## Bachelor of Music Core Requirements

### Applied Music

All music majors must complete a minimum of seven semesters of applied lessons with at least three of the semesters at the upper division levels (numbered 300 or 400). Applied students must complete a jury examination at the end of each semester. Each major is required to enroll in applied music every semester of full-time enrollment.

### Solo Recital Performance

Each major is required to perform the equivalent of a half recital (MUS 399 Joint Recital) during the course of study.

### Ensemble Requirements

Each major is expected to enroll in a major ensemble reflecting the major applied area of study every semester of full-time enrollment. Wind and percussion majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 256	Marching Band	1
MUS 255A/455A	Symphonic Band	1
MUS 255B/455B	Concert Band	1
MUS 235/435	Symphony Orchestra	1

With permission of the Director of the School of Music, MUS 254 Jazz Ensemble/MUS 454 Jazz Ensemble may be submitted for the major ensemble requirement for wind and percussion majors.

Orchestral string majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 235/435	Symphony Orchestra	1
MUS 236/436	String Orchestra	1

Some string bass majors may be assigned to MUS 255A Symphonic Band/MUS 455A Symphonic Band based on audition results.

Guitar majors will enroll in:

Code	Title	Hours
MUS 257/457	Guitar Ensemble	1
MUS 250	Small Ensembles:____ (Electric Guitar Ensemble)	.5

Vocal majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 228A/428A	ENChor (SSAA Choir)	1
MUS 228B/428B	Koros (TTBB Choir)	1
MUS 226/426	University Singers (SATB)	1

Even if the student plans to study in two or more applied areas, one of them must be declared the major. Students enrolling in more than three ensembles must receive permission for such participation from their applied teacher, ensemble director, and advisor.

### Recital Attendance

All majors are required to attend 16 recitals including the departmental recitals and other School of Music concerts and recitals held throughout the semester (MUS 101 Performance Class) for at least six semesters. Performances off campus must receive approval by the Director of the School of Music.

### Music Education

All wind and percussion majors must complete at least two semesters of MUS 256 Marching Band. Non-marching instruments/voice may choose an advisor-approved ensemble in lieu of MUS 256 Marching Band.

## Admission to the Music Major Program

Admission to the Bachelor of Music programs requires a successful audition for the applicable applied teacher. The student is expected to demonstrate acceptable levels of achievement in performance in terms of intonation, tone quality and rhythmic accuracy. Incoming students will be expected to perform two selections of contrasting styles. Students may be accepted on probationary status at the discretion of the applied teacher and the School of Music Director. Students seeking to opt out of one of more semesters of class piano may complete a placement exam prior to the start of the semester of study.

Code	Title	Hours
MUS 110	Beginning Class Piano I	1
MUS 111	Beginning Class Piano II	1

MUS 210	Intermediate Class Piano I	1
MUS 211	Intermediate Class Piano II	1

# Music, Bachelor of Music with a Concentration in Music Performance (B.M.)

## Program Objectives

Upon successful completion of the Bachelor of Music program, graduates will be able to perform a recital in their major applied area, communicate effectively about the theoretical concepts in music, and identify and analyze musical works from diverse cultures and historical periods.

In addition, all music education majors will demonstrate the ability to sing, play a variety of instruments, develop lesson plans, and engage in effective teaching during a student teaching semester. All theory and composition students will demonstrate composition skills and present original compositions in public recitals as well as identifying an area of advanced analysis of musical works through a senior project. All music industry students will demonstrate music technology skills, identify trends in the many facets of this business field, and demonstrate an ability to work with professionals through cooperative learning experiences. All performance majors will prepare two performance

recitals and analyze repertoire presented on those recitals, in addition to identifying different pedagogical approaches in their area.

## Bachelor of Music Core Requirements

### Applied Music

All music majors must complete a minimum of seven semesters of applied lessons with at least three of the semesters at the upper division levels (numbered 300 or 400). Applied students must complete a jury examination at the end of each semester. Each major is required to enroll in applied music every semester of full-time enrollment.

### Solo Recital Performance

Each major is required to perform the equivalent of a half recital (MUS 399 Joint Recital) during the course of study.

### Ensemble Requirements

Each major is expected to enroll in a major ensemble reflecting the major applied area of study every semester of full-time enrollment.

Wind and percussion majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 256	Marching Band	1
MUS 255A/455A	Symphonic Band	1
MUS 255B/455B	Concert Band	1
MUS 235/435	Symphony Orchestra	1

With permission of the Director of the School of Music, MUS 254 Jazz Ensemble/MUS 454 Jazz Ensemble may be submitted for the major ensemble requirement for wind and percussion majors.

Orchestral string majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 235/435	Symphony Orchestra	1
MUS 236/436	String Orchestra	1

Some string bass majors may be assigned to MUS 255A Symphonic Band/MUS 455A Symphonic Band based on audition results.

Guitar majors will enroll in:

Code	Title	Hours
MUS 257/457	Guitar Ensemble	1
MUS 250	Small Ensembles:____ (Electric Guitar Ensemble)	.5

Vocal majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 228A/428A	ENChor (SSAA Choir)	1
MUS 228B/428B	Koros (TTBB Choir)	1
MUS 226/426	University Singers (SATB)	1

Even if the student plans to study in two or more applied areas, one of them must be declared the major. Students enrolling in more than three ensembles must receive permission for such participation from their applied teacher, ensemble director, and advisor.

## Recital Attendance

All majors are required to attend 16 recitals including the departmental recitals and other School of Music concerts and recitals held throughout the semester (MUS 101 Performance Class) for at least six semesters. Performances off campus must receive approval by the Director of the School of Music.

## Music Performance

All Music Performance majors must pass an audition beyond the entrance audition. They will be on probationary status for one to four semesters. At the end of the probationary period, the student may re-audition for full candidacy. The Audition Committee will consist of at least three members of the music faculty including the applied teacher. All performance majors must give a full recital (MUS 499 Senior Project/Recital) in addition to the half recital required of all majors. Vocal Performance majors must elect foreign language as part of their Gen. Ed. All Music Industry and Recording Arts majors must complete 3 or 4 credit hours of MUS 349 Applied Learning in Music and 2 credit hours of MUS 449 Music Industry Senior Capstone. All Co-op projects must be approved by the Co-op office, School of Music Director, and Co-op coordinator.

## Admission to the Music Major Program

Admission to the Bachelor of Music programs requires a successful audition for the applicable applied teacher. The student is expected to demonstrate acceptable levels of achievement in performance in terms of intonation, tone quality and rhythmic accuracy. Incoming students will be expected to perform two selections of contrasting styles. Students may be accepted on probationary status at the discretion of the applied teacher and the School of Music Director. Students seeking to opt out of one of more semesters of class piano may complete a placement exam prior to the start of the semester of study.

## Music, Bachelor of Music with a Concentration in Music Theory and Composition (B.M.)

### Program Objectives

Upon successful completion of the Bachelor of Music program, graduates will be able to perform a recital in their major applied area, communicate effectively about the theoretical concepts in music, and identify and analyze musical works from diverse cultures and historical periods.

In addition, all music education majors will demonstrate the ability to sing, play a variety of instruments, develop lesson plans, and engage in effective teaching during a student teaching semester. All theory

and composition students will demonstrate composition skills and present original compositions in public recitals as well as identifying an area of advanced analysis of musical works through a senior project. All music industry students will demonstrate music technology skills, identify trends in the many facets of this business field, and demonstrate an ability to work with professionals through cooperative learning experiences. All performance majors will prepare two performance recitals and analyze repertoire presented on those recitals, in addition to identifying different pedagogical approaches in their area.

## Bachelor of Music Core Requirements Applied Music

All music majors must complete a minimum of seven semesters of applied lessons with at least three of the semesters at the upper division levels (numbered 300 or 400). Applied students must complete a jury examination at the end of each semester. Each major is required to enroll in applied music every semester of full-time enrollment.

### Solo Recital Performance

Each major is required to perform the equivalent of a half recital (MUS 399 Joint Recital) during the course of study.

### Ensemble Requirements

Each major is expected to enroll in a major ensemble reflecting the major applied area of study every semester of full-time enrollment.

Wind and percussion majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 256	Marching Band	1
MUS 255A/455A	Symphonic Band	1
MUS 255B/455B	Concert Band	1
MUS 235/435	Symphony Orchestra	1

With permission of the Director of the School of Music, MUS 254 Jazz Ensemble/MUS 454 Jazz Ensemble may be submitted for the major ensemble requirement for wind and percussion majors.

Orchestral string majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 235/435	Symphony Orchestra	1
MUS 236/436	String Orchestra	1

Some string bass majors may be assigned to MUS 255A Symphonic Band/MUS 455A Symphonic Band based on audition results.

Guitar majors will enroll in:

Code	Title	Hours
MUS 257/457	Guitar Ensemble	1
MUS 250	Small Ensembles:_____ (Electric Guitar Ensemble)	.5

Vocal majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 228A/428A	ENChor (SSAA Choir)	1

MUS 228B/428B	Koros (TTBB Choir)	1
MUS 226/426	University Singers (SATB)	1

Even if the student plans to study in two or more applied areas, one of them must be declared the major. Students enrolling in more than three ensembles must receive permission for such participation from their applied teacher, ensemble director, and advisor.

## Recital Attendance

All majors are required to attend 16 recitals including the departmental recitals and other School of Music concerts and recitals held throughout the semester (MUS 101 Performance Class) for at least six semesters. Performances off campus must receive approval by the Director of the School of Music.

## Music Theory and Composition

Music Theory and Composition majors must complete 2 credits of MUS 283 Beginning Composition and 8 credits of MUS 483 Composition. MUS 283 Beginning Composition is open to all music students with permission of the instructor. Students wishing to move on to advanced composition (MUS 483 Composition) must receive the approval of the theory/composition faculty based on their performance in MUS 283 Beginning Composition. Students seeking to apply for entry into advanced composition study will submit a portfolio of their compositions. All theory and composition majors, whose major applied area is not piano, must elect two semesters of additional piano studies (MUS 112 Piano I). Music Theory and Composition students will complete a senior project (MUS 499 Senior Project/Recital) consisting of a theory project and a half recital of original compositions as part of this degree program.

## Admission to the Music Major Program

Admission to the Bachelor of Music programs requires a successful audition for the applicable applied teacher. The student is expected to demonstrate acceptable levels of achievement in performance in terms of intonation, tone quality and rhythmic accuracy. Incoming students will be expected to perform two selections of contrasting styles. Students may be accepted on probationary status at the discretion of the applied teacher and the School of Music Director. Students seeking to opt out of one of more semesters of class piano may complete a placement exam prior to the start of the semester of study.

**Music, Bachelor of Music with a Concentration in Recording Arts Emphasis (B.M.)**

**Program Objectives**

Upon successful completion of the Bachelor of Music program, graduates will be able to perform a recital in their major applied area, communicate effectively about the theoretical concepts in music, and identify and analyze musical works from diverse cultures and historical periods.

In addition, all music education majors will demonstrate the ability to sing, play a variety of instruments, develop lesson plans, and engage in effective teaching during a student teaching semester. All theory and composition students will demonstrate composition skills and present original compositions in public recitals as well as identifying an area of advanced analysis of musical works through a senior project. All music industry students will demonstrate music technology skills,

identify trends in the many facets of this business field, and demonstrate an ability to work with professionals through cooperative learning experiences. All performance majors will prepare two performance recitals and analyze repertoire presented on those recitals, in addition to identifying different pedagogical approaches in their area.

**Bachelor of Music Core Requirements Applied Music**

All music majors must complete a minimum of seven semesters of applied lessons with at least three of the semesters at the upper division levels (numbered 300 or 400). Applied students must complete a jury examination at the end of each semester. Each major is required to enroll in applied music every semester of full-time enrollment.

**Solo Recital Performance**

Each major is required to perform the equivalent of a half recital (MUS 399 Joint Recital) during the course of study.

**Ensemble Requirements**

Each major is expected to enroll in a major ensemble reflecting the major applied area of study every semester of full-time enrollment.

Wind and percussion majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 256	Marching Band	1
MUS 255A/455A	Symphonic Band	1
MUS 255B/455B	Concert Band	1
MUS 235/435	Symphony Orchestra	1

With permission of the Director of the School of Music, MUS 254 Jazz Ensemble/MUS 454 Jazz Ensemble may be submitted for the major ensemble requirement for wind and percussion majors.

Orchestral string majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 235/435	Symphony Orchestra	1
MUS 236/436	String Orchestra	1

Some string bass majors may be assigned to MUS 255A Symphonic Band/MUS 455A Symphonic Band based on audition results.

Guitar majors will enroll in:

Code	Title	Hours
MUS 257/457	Guitar Ensemble	1
MUS 250	Small Ensembles:____ (Electric Guitar Ensemble)	.5

Vocal majors will enroll in:

Code	Title	Hours
Choose from one of the following:		
MUS 228A/428A	ENChor (SSAA Choir)	1
MUS 228B/428B	Koros (TTBB Choir)	1
MUS 226/426	University Singers (SATB)	1

Even if the student plans to study in two or more applied areas, one of them must be declared the major. Students enrolling in more than three ensembles must receive permission for such participation from their applied teacher, ensemble director, and advisor.

## Recital Attendance

All majors are required to attend 16 recitals including the departmental recitals and other School of Music concerts and recitals held throughout the semester (MUS 101 Performance Class) for at least six semesters. Performances off campus must receive approval by the Director of the School of Music.

## Music Industry and Recording Arts

All Music Industry and Recording Arts majors must complete 3 or 4 credit hours of MUS 349 Applied Learning in Music and 2 credit hours of MUS 449 Music Industry Senior Capstone. All Co-op projects must be approved by the Co-op office, School of Music Director, and Co-op coordinator.

## Admission to the Music Major Program

Admission to the Bachelor of Music programs requires a successful audition for the applicable applied teacher. The student is expected to demonstrate acceptable levels of achievement in performance in terms of intonation, tone quality and rhythmic accuracy. Incoming students will be expected to perform two selections of contrasting styles. Students may be accepted on probationary status at the discretion of the applied teacher and the School of Music Director. Students seeking to opt out of one of more semesters of class piano may complete a placement exam prior to the start of the semester of study.

**College of Science, Technology, Engineering, and Mathematics**

Dr. Tom Otieno, Dean  
Science Building 1228  
(859) 622-1405

Dr. Tim Ross, Associate Dean  
(859) 622-8140

STEM.eku.edu (<http://www.science.eku.edu>)

The College of Science, Technology, Engineering, and Mathematics offers associate, baccalaureate, masters programs, and a variety of certificate programs in a number of disciplines encompassing the natural and mathematical sciences, technology, and engineering. The college also offers pre-professional programs in pre-dental, pre-engineering, pre-optometry, pre-physician associate, pre-pharmacy, pre-veterinary, and pre-medical sciences; minors in Agriculture, Aerospace Management, Engineering Technology Management, Aviation (Flight), Construction Management, Land Surveying, Quality Assurance Technology, Biology, Chemistry, Chemistry/Teaching, Computer Science, Informatics, Computer Electronics Technology, Cybersecurity and Intelligence, Earth Science Teaching, Forensic Science, Game Content Design, Geography, Geology, Mathematics, Mathematical Sciences, Mathematics/ Teaching, Statistics, Actuarial Science, Physics and Physics Teaching, and Pre-Professional Health; and certificate programs in Companion Animal Management, Crops, Soils, and Resource Conservation, Greenhouse and

Fruit/Vegetable Production, Land Surveying, Landscape Horticulture, Livestock Management, Turfgrass Management, Environmental Education, Artificial Intelligence in Data Science, Cyber Security and Digital Forensics, Cyber Systems and Network Security, Game Design, Informatics, Fermentation, Fermentation Science, Environmental Geosciences, Geographic Information Systems (GIS), and Applied Data Science.

The College of Science, Technology, Engineering, and Mathematics (STEM) plays a central role in the University's general education program through which all University students are provided the opportunity to develop the skills, the knowledge, and the discernment essential to the full development of each person as an individual and as a member of society.

Through its disciplines, the College of STEM strives to provide all students an exceptional education with the most complete and current resources; to provide service to the University and to the community through its academic programs; and to encourage and support research in all the disciplines included in the College.

## Degrees Offered

The College of STEM offers the following degrees: Bachelor of Science and Associate of Applied Sciences.

## College Degree Requirements

General University degree requirements as set forth in Section Four of this *Catalog* as well as specific course requirements set forth in the descriptive curricula must be met by students completing programs administered by the College. All students graduating with majors in the College of must have a 2.0 GPA in the major exclusive of any supporting courses. Students pursuing a minor in the College must have a minimum 2.0 GPA in the minor. At least twenty-five percent of the courses in the major must be taken at Eastern Kentucky University. In addition, individual programs may have specific requirements that exceed College requirements. Students should consult with an advisor or department chair to learn the particular requirements of a program.

## Department of Agriculture

**Executive Director**, Dr. Stephen Richter

**Director of Agriculture**, Dr. Andrea Sexten

(859) 622-2228

Carter 2

## Faculty

B. Jones, C. Hagan, J. Kenealy, K. Luitel, M. McDermott, J. Settimi, and A. Sexton

The Department of Agriculture offers Bachelor of Science and Associate of Applied Science degrees in Agriculture and Animal and Veterinary Sciences. Concentrations in the Agriculture degree program include Agribusiness Management, Fruit, Vegetable, Nursery and Greenhouse Production, Livestock Management, Agriculture Engineering Technology, Turfgrass and Landscape Management, and Agronomy, Soils and Natural Resources. Concentrations in the Animal and Veterinary Sciences degree program include Animal Science and Pre-Veterinary Medicine. The Department also offers a degree program for Career and Technical

Education – Agriculture Education Concentration in collaboration with the College of Education and Applied Human Sciences.

A minor is offered in Agriculture. Students may receive the Associate degree and then continue for a Bachelors degree with no loss of credit. Students must obtain a "C" average in Department classes. The Pre-Veterinary Medicine program has an excellent veterinary school acceptance rate. More detailed information can be obtained by reading the section on Pre-Veterinary medicine.

Students have ample opportunities to personalize their education. Academic credit can be earned for Cooperative Education. Students may receive up to eight hours of Co-Op credit for the Associate Degree and 12 for the Bachelor of Science Degree. Students can also obtain credit for experiential learning in the Department's facilities through practicum courses. In addition, students are encouraged to participate in Independent Studies with faculty mentors.

## Department Goals

The Department of Agriculture's vision is to be the first choice of students interested in addressing issues relating to food, energy, and the human environment within a sound economic framework.

The mission of the Department of Agriculture is to provide programs designed to develop leaders, entrepreneurs and educators for the global challenges in which agriculture plays a significant role. Areas of study include Pre-Veterinary Medicine, Agriculture Education, Agricultural Business, Food Production, the Human Environment, and Agriculture Engineering Technology.

Programs in the Department stress the latest technical information with applications through required laboratories and practicums at the University farms or through cooperative education. The Department operates greenhouses, fruit and vegetable plots, a plant nursery and specimen garden and turf plots to support the horticultural instruction area. The University also owns and operates approximately 1000 acres devoted to the programs in agriculture. This includes state of the art facilities for beef, dairy, swine, sheep and crop enterprises.

The Department will also provide service to the University, community, region, profession, and industry; provide opportunities for faculty/staff/student collaboration in scholarly and creative activities; and engage in continuous improvement processes to ensure its programs, services, and infrastructure are current and relevant.

EKU Farms will provide a technologically current, high quality learning environment for instruction. It will demonstrate agricultural practices and techniques that are consistent with the instructional program, are environmentally sound and have practical application. Information will also be disseminated to the regional agricultural community. ECU Farms will also promote and conduct service activities such as field days, tours, seminars, demonstrations, meetings, and open houses to serve the needs of diverse consumer groups.

## Program Objectives

Graduates in the agriculture area are well trained for careers in many diverse aspects of agriculture such as government agencies (Kentucky Department of Agriculture, USDA, Cooperative Extension Service, NRCS), 4-H programs, soil conservation, farm management and operations, agribusiness including agriculture financial agencies/institutions, sales, feed sales, food plant supervision, retail-store management, technical service, agriculture education Career and Technical Education, and

the livestock industry, to name a few. Students can also continue their education in graduate school or in veterinary medicine.

## Animal and Veterinary Sciences

In Animal and Veterinary Sciences, students will receive hands on training in animal handling and research that will include opportunities to work directly with both large and small animals. The Pre-Veterinary curriculum will allow students to meet entrance requirements for veterinary schools throughout the United States and abroad. The rigorous coursework will also prepare students to pursue advanced degrees in veterinary science, animal science, human medicine, biomedical science, biotechnology, genetics, nutrition, microbiology, reproduction, behavior, or any of the other basic sciences. The Animal Science curriculum will provide career training allowing graduates to pursue a wide array of opportunities in the public and private sector in areas such as pharmaceutical and feed sales, farm management, biotechnology research and development, communication and marketing consultant, food science, agriculture finance and banking, extension and 4-H agents, government agency employees, and pursuing advanced degrees.

## Horticulture

In the horticulture area, the abundance of hands-on practical experiences allow graduates in the horticulture programs to pursue careers in the regional and local food industry, the turf industry as golf course superintendents, sports turf managers, sales and service areas, professional landscape industry, the nursery industry, and in the greenhouse industry.

## Career and Technical Education - Agriculture Education Concentration

Graduates of the BS degree program in Career and Technical Education - Agriculture Education Concentration are prepared for teaching careers in secondary schools. They are prepared to lead programs in horticulture and agriculture and to advise their chapter's FFA members in carrying out their annual program of activities.

Numerous opportunities are available for extracurricular activities to complement the academic training. These include the Agriculture Club, Horticulture Club, Delta Tau Alpha (honorary society), student chapter of the Golf Course Superintendents Association of America, and Pre-Vet Club. Numerous local and national trips are taken to expand students' learning experiences.

## The Institute of Agriculture, Natural Resources, and the Environment

The Institute of Agriculture, Natural Resources, and the Environment is comprised of the Department of Agriculture, the Center for Environmental Education, and the Division of Natural Areas. Consistent with Eastern Kentucky University's long and successful history of managing agricultural and natural resources for the greater benefit of the campus and local community, the Institute will enhance opportunities for collaborative growth and program support in developing interdisciplinary programs and administering EKU's farms and natural areas for land stewardship and resource management. The Institute offers associate, baccalaureate, and university certificate programs.

The Institute also supports a broad range of interdisciplinary activities, programs, and opportunities for students, including (1) applied learning through internships in agriculture, natural resource management, and environmental education at EKU farms and natural areas; (2) courses, educational programming, and public engagement at our six field stations totaling over 3,200 acres: Meadowbrook Farm, Lilley Cornett

Woods Appalachian Research Station, Maywoods Environmental and Educational Laboratory, Taylor Fork Ecological Area, Cardinal Lane Outdoor Laboratory, and Gladie Cultural and Environmental Learning Center; and (4) job-placement opportunities with state, federal, and non-governmental organizations; and (5) interdisciplinary university certificates that will enrich their degree programs.

## Bachelor's

- Agriculture, Bachelor of Science with a Concentration in Agribusiness Management (B.S.) (p. 425)
- Agriculture, Bachelor of Science with a Concentration in Agriculture Engineering Technology (B.S.) (p. 427)
- Agriculture, Bachelor of Science with a Concentration in Agronomy, Soils and Natural Resources (B.S.) (p. 428)
- Agriculture, Bachelor of Science with a Concentration in Fruit, Vegetable, Nursery and Greenhouse Production (B.S.) (p. 429)
- Agriculture, Bachelor of Science with a Concentration in Livestock Management (B.S.) (p. 430)
- Agriculture, Bachelor of Science with a Concentration in Turfgrass and Landscape (B.S.) (p. 431)
- Animal and Veterinary Sciences, Bachelor of Science with a Concentration in Animal Science (B.S.) (p. 433)
- Animal and Veterinary Sciences, Bachelor of Science with a Concentration in Pre#Veterinary (B.S.) (p. 434)

## Associate's

- Technical Agriculture, Associate of Applied Science (A.A.S.) (p. 436)

## Minor

- Agriculture, Minor (p. 432)

## Certificate

- Animal and Veterinary Sciences, University Certificate (p. 435)
- Crops, Soils and Resource Conservation, University Certificate (p. 436)
- Greenhouse and Fruit/Vegetable Production, University Certificate (p. 436)
- Turfgrass and Landscape Horticulture, University Certificate (p. 437)

## Courses

### Agriculture

#### AGR 105. Introductory Topics in Agriculture. (3 Credits)

I, II. A non-structured course for incoming students who have met the secondary skills standard examination requirements in the area of agriculture. Departmental chair approval required prior to enrollment. May be taken to a maximum of 6 hours.

#### AGR 111. Introduction to American Agriculture. (3 Credits)

A. An overview of the agriculture industry in the United States including significant past events, current status and trends. Complexities of laws and regulations and their influence on the producer and consumer.

#### AGR 115. Operation of Agricultural Equipment. (2 Credits)

(2) I. Lecture, laboratory and field experiences related to agricultural power equipment, and their safe operation, including hydraulics, electricity, chemical, and processing & handling facilities. 1 Lec/2 Lab.

**AGR 125. Principles of Animal Science. (3 Credits)**

I. Corequisite: AGR 126. Management and production of livestock enterprises; types, market classes, and grades of beef cattle, sheep and swine, and the breeds and products of dairy cattle.

**AGR 126. Animal Science Laboratory. (1 Credit)**

I. Corequisite: AGR 125. Applied principles in the proper handling, restraint, and management techniques in beef, dairy, sheep, swine, and horses.

**AGR 130. Plant Science. (3 Credits)**

I. Corequisite: AGR 131. Principles of plant growth, reproduction, and plant-soil relationships. Provides foundations of information for further study in agricultural and horticultural crop production and soil management. Credit will not be awarded to students who have credit for OHO 131.

**AGR 131. Plant Science Laboratory. (1 Credit)**

I. Corequisite: AGR 130. Laboratory and field experiences related to plant growth, development, and management of crops. Credit will not be awarded to students who have credit for OHO 132.

**AGR 170. Appl Unmanned Aerial Sys Agri. (3 Credits)**

I. Introduction to the application of UAS/drones in agriculture. Typical applications and an overview of foundational skills needed to safely operate UAS systems in the U.S. airspace. 2 Lec/2 Lab.

**AGR 213. Principles of Agricultural Mechanics and Energy Systems. (3 Credits)**

I, II. Principles of operation, maintenance, and repair of electrical motors; basic electrical circuits, electrical power generation and electrical controls for agricultural mechanization systems and power requirements for agricultural structures; theoretical and practical experience.

**AGR 215. Principles of Soils. (3 Credits)**

I, II. Corequisite: AGR216. Soil origin, classification and properties, soil conservation, soil microorganisms, organic matter, soil water, soil minerals, lime and commercial fertilizers, soil erosion, soil management.

**AGR 216. Principles of Soils Laboratory. (1 Credit)**

(1) I,II. Corequisite: AGR 215. Laboratory and fiels experiences related to soils, and their properties, including soil sampling, fertility, pH, liming, water and texture. 2 Lab.

**AGR 225. Evaluation and Selection of Livestock. (3 Credits)**

II. An evaluation of dairy cattle, beef cattle, swine and sheep; use of records, body type ratings, and carcass information as they relate to functional anatomy and efficiency of production; sire selection and pedigree interpretation. 2 Lec/2 Lab.

**AGR 250. Introduction to Horses. (3 Credits)**

A. History and role of horses and the equine industry, breeds of horses and ponies for work and pleasure, includes terminology, management and responsibilities, breeding, pests, current issues and care of horses.

**AGR 255. Companion Animal Management. (3 Credits)**

A. Care and management of dogs, cats, rabbits, birds, reptiles and tropical fish. Companion animal breeds, behavior, nutrition, genetics and reproduction will be emphasized.

**AGR 300. Travel Study in Agriculture Technology. (1-6 Credits)**

A. A travel course for groups and individuals in agriculture and horticulture to study new and emerging technologies in agriculture and horticulture, structural organizations of agricultural enterprises, and professional and interpersonal relationships. May be retaken once.

**AGR 301. Directed Work Experience. (1-4 Credits)**

I, II. Agriculture majors only; minimum sophomore standing or departmental approval. A minimum of three hours per week per hour of credit using university or other approved facilities. May be retaken for a maximum of 4 credit hours.

**AGR 302. Directed Work Experience- Management Practicum. (3 Credits)**

I, II. Student will schedule nine hours of work per week during the semester on a university farm to practice management and production skills related to a livestock herd or machinery operations. Options may be taken to a maximum of 12 hours. AGR 302A Agricultural Mechanization Option. AGR 302B Beef Cattle Option. AGR 302C Swine Option. AGR 302D Dairy Cattle Option. AGR 302E Crops Option. AGR 302F Sheep Option. AGR 304 Pest Management. (4) II. Identification of the principal agriculture and horticulture insect disease and weed pests in Kentucky. Control measures are identified with special emphasis on the safe use of chemicals and equipment calibration.

**AGR 302A. Agricultural Mechanization Option. (3 Credits)****AGR 302B. Beef Cattle Option. (3 Credits)****AGR 302C. Swine Option. (3 Credits)****AGR 302D. Dairy Cattle Option. (3 Credits)****AGR 302E. Crops Option. (3 Credits)****AGR 302F. Sheep Option. (3 Credits)****AGR 304. Pest Management. (4 Credits)**

Identification of the principal agriculture and horticulture insect disease and weed pests in Kentucky. Control measures are identified with special emphasis on the safe use of chemicals and equipment calibration. Credit will not be awarded for both AGR 304 and OHO 304. 3 Lec/2 Lab.

**AGR 305. Professional Skills Seminar. (1 Credit)**

A. Prerequisite: completion of 30 hours in the Associate or more than 60 hours and less than 90 hours in the Bachelor Degree Program. Course prepares students for the job market including; resume development, cover letter preparation, job interview skills and oral presentations.

**AGR 308. Agricultural Economics. (3 Credits)**

I, II. Prerequisite: ECO 120. An introduction to the economic environment of the agribusiness sector. Examines the role of agriculture in the U.S. and world economies. Includes concepts and principles concerning individual agribusiness decision making.

**AGR 310. Principles of Agribusiness Management. (3 Credits)**

II. Prerequisite: AGR 308. Organization and operation of the farm related agricultural business with emphasis on budgeting, enterprise selection, financial statements, and resource management. Includes microcomputer applications and survey of government regulations that are applicable to topic.

**AGR 311. Agriculture Metal Fabrication. (2 Credits)**

A. Principles and techniques of arc and oxyacetylene welding and soldering as it pertains to fabrication and repair of agriculture machinery and equipment. 1 Lec/2 Lab.

**AGR 312. Ecology and Management of Grasslands and Pastures. (4 Credits)**

II. Prerequisites: AGR 130 and 131, and Junior standing. Examination of grasslands and pastures from an ecological perspective with an emphasis on wildlife and livestock management. 3 Lec/2 Lab.

**AGR 318. Soil/Water Conservation Technology. (3 Credits)**

A, I. Principles and procedures for basic surveying and soil-water conservation systems. This will include how rainfall, run-off, erosion, contours, ponds, lagoons, drainage, and irrigation interact with the desired conservation system. 2 Lec/2 Lab.

**AGR 319. Renewable and Sustainable Energy Systems. (3 Credits)**

(3) II. Crosslisted as ENV 319. Prerequisite: ENG 102 or ENG 105 (B) or HON 102; and MAT 105 or higher. Principles of energy and how those needs can potentially be met in the future will be discussed. Comparisons of existing energy sources (fossil fuels, nuclear power) with renewable sources (biomass, solar, and tidal). Credit will not be awarded for both AGR 319 and ENV 319.

**AGR 321. Feeds and Feeding. (4 Credits)**

I. Feeds used in livestock feeding; including harvesting, storage, feeding characteristics, and ration formulation from these feedstuffs. 3 Lec/2 Lab.

**AGR 326. Light Horse Production and Management. (4 Credits)**

A. Prerequisite: AGR 125 and 126, AGR 250, or Departmental Approval. Size and scope of horse industry, conformation and selection of horses, basics of equine nutrition and reproduction. Signs of health and illness. Routine health care procedures. 3 Lec/2 Lab.

**AGR 327. Beef Production. (4 Credits)**

I. Prerequisites: AGR 125 and 126. History, importance, and trends associated with the beef cattle industry; systems of selecting, breeding, feeding, marketing, and management of beef cattle. 3 Lec/2 Lab.

**AGR 328. Swine Production. (4 Credits)**

A. Prerequisites: AGR 125 and 126. History, importance, and trends associated with the swine industry; systems of selecting, breeding, feeding, marketing, and management of swine. 3 Lec/2 Lab.

**AGR 329. Small Ruminant Production. (4 Credits)**

(4). A. Prerequisite: AGR 125 and 126. An overview of the small ruminant industry. Topics include: selection, breeding, reproduction, health, nutrition, management, and marketing of small ruminant and their products. 3 Lec/2 Lab.

**AGR 330. Animal Products. (3 Credits)**

A. Prerequisites: AGR 125 and 126. Principles of grading, cutting, identifying, pricing, and consumer evaluation of poultry, beef, pork, and lamb cuts, and related products. 2 Lec/2 Lab.

**AGR 332. Poultry Production and Management. (3 Credits)**

A. Prerequisites: AGR 125 & 126. An overview of the poultry industry focused on industry trends, breeds, management, environmental impacts, bird welfare, food safety, and product quality. Students will acquire practical experience in poultry production and product evaluation. 2 Lec/2 Lab.

**AGR 340. Conservation of Agricultural Resources. (3 Credits)**

(3) A. Crosslisted as ENV 341. Prerequisite: any ENV or OHO course. Conservation of soils and their fertility, erosion and control, soil conservation methods for individual farms, water supply and distribution, problems of water and air pollution, problems resulting from the population explosion. Credit will not be awarded for both AGR 340 and ENV 341.

**AGR 345. Sustainable Agroecosystems. (3 Credits)**

A, I. Prerequisites: any course in chemistry, AGR 130, and 131; or OHO 131 and 132 or BIO 131. A comprehensive study of new technology related to crop, and pest management practices which could enhance economic returns, environmental quality, and the resource base for the short and long term.

**AGR 349. Applied Learning in Agriculture. (0.5-8 Credits)**

A. Work under faculty and field supervisors in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit.

**AGR 350. Agricultural Marketing. (3 Credits)**

A. A study of concepts, principles and practices of marketing as related to the agribusiness system. Emphasis on agricultural input, production and processing/manufacturing sectors. Includes agriculture futures commodity market theory, mechanics and practical applications.

**AGR 362. Hydraulic Systems. (2 Credits)**

A. A study of basic principles of hydraulic systems and their application to agricultural and turf equipment. Lab experiences will provide familiarity and practice with equipment. 1 Lec/2 Lab.

**AGR 372. Topics and Laboratories in Animal Sciences. (2-6 Credits)**

A. May be taken to a maximum of six hours, provided the topics are different. Lec/Lab hours will vary depending on topic.

**AGR 373. Animal Diseases. (4 Credits)**

I. Prerequisite: six hours of animal science. Lecture topics include common diseases infecting domestic animals focusing on their treatment, prevention, and eradication. Laboratory content will focus on basic lab techniques and diagnostic methods. Prior completion of AGR 376 is recommended. 3 Lec/2 Lab.

**AGR 374. Genetics of Livestock Improvement. (3 Credits)**

II. Prerequisite: AGR 125 and AGR 126. An introduction to Mendelian, molecular, quantitative, and population genetics. Applied genetic principles of improving farm animals including crossbreeding, inbreeding, and other mating plans. Study and practice modern genetic laboratory techniques. 2 Lec/2 Lab.

**AGR 375. Reproduction and Artificial Insemination of Domestic Animals. (4 Credits)**

A. Prerequisite: AGR 125 and AGR 126. The study of anatomical structures and physiological processes that control reproduction across species. This will include reproductive system development, spermatogenesis, female cycles, reproductive behavior, fertility, pregnancy, parturition, and lactation. Practice in artificial insemination and experience with pregnancy diagnosis in domestic animals. 3 Lec/2 Lab.

**AGR 376. Domestic Animal Anatomy. (4 Credits)**

A. Prerequisites: AGR 125 and 126. Fundamental anatomy of bones, muscles and organs of domestic animals, with a focus on comparative anatomy and how form dictates function. Practical experience with a whole-systems approach utilizing anatomical models and specimen dissections. 3 Lec/2 Lab.

**AGR 377. Livestock Behavior and Welfare. (3 Credits)**

A. Prerequisite: AGR 125 and 126. An introduction to animal behavior and its implications for animal welfare in modern animal husbandry. History of the animal welfare movement, current standards and applications in production settings will also be discussed. Students will engage in field trips and/or hands-on experiences to support learning outcomes and learn proper animal handling techniques. 2 Lec/2 Lab.

**AGR 380. Technical Management of Dairy Cattle. (4 Credits)**

I. Prerequisites: AGR 125 and 126. History, economics and nutritional importance and trends associated with the dairy industry including systems of selecting, breeding, feeding, sanitation, housing, marketing and management for financial success emphasizing both the cow and herd management. 3 Lec/2 Lab.

**AGR 381. Agriculture Structures. (3 Credits)**

I. Study the principles of planning, drawing, locating, and constructing farm livestock and materials handling facilities. Also, develop an understanding of closely related structure aspects: such as, environmental control, waste management, ventilation, and structure design. 2 Lec/2 Lab.

**AGR 383. Diesel Power Systems. (3 Credits)**

I. Study of the operation, maintenance, and repair of agricultural diesel powered systems; includes electrical systems, fuels, injection pumps, and nozzles laboratory practice. 2 Lec/2 Lab.

**AGR 404. Advanced Pest Management. (3 Credits)**

(3) II. Prerequisite: AGR 304 or OHO 304. Physical, biological, chemical, cultural, and genetic control of insects, weeds, and diseases. Specific emphasis on the science behind pest controls and use of organic and/or sustainable control methods.

**AGR 409. Agriculture Business Records and Analysis. (3 Credits)**

I. Management and analysis of record systems for decision support involving organization, enterprise selection, and operation of agricultural and horticultural businesses.

**AGR 410. Independent Study in Agriculture: \_\_\_\_\_. (1-3 Credits)**

I, II. Prerequisite: Departmental approval. Cross listed as OHO 410. Students choose a problem and work under the supervision of the instructor in the field of the problem. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken for a maximum of 6 credit hours, providing additional study projects differ. Credit will not be awarded to students who have credit for OHO 410.

**AGR 411. Senior Seminar. (1 Credit)**

I, II. Prerequisite: senior standing. Preparation of graduates to enter the job market. Students complete oral presentations, resumes, job applications, cover letters, job interviews and register with CD and P. Includes overall assessment of the graduate and department curriculum.

**AGR 416. Soil Fertility and Management. (3 Credits)**

(3) A. Prerequisite: AGR 215. Management of soils in turfgrass, vegetable and crop production. Topics include soil fertility and various soil amendments such as lime, organic and inorganic fertilizers, soil fertility programs, problem soils, and soil conservation.

**AGR 421. Animal Nutrient Metabolism. (3 Credits)**

II. Prerequisite: AGR 321 or instructor approval. Principles of nutrient utilization and feeding; structure, organization, synthesis, and catabolism of carbohydrates, proteins, and lipids; symptoms of nutrient deficiencies, nutritional disorders, and mechanisms of metabolic control.

**AGR 430. Field Crop Production. (3 Credits)**

(3). A. Prerequisite: AGR 130 and 131 or OHO 131 and 132. Advanced study of crop production theories and practices for agronomic crops. Topics include ecological, physiological and economic aspects of production of currently relevant crops.

**AGR 440. Agricultural Financing. (3 Credits)**

II. Uses and types of agricultural credit, credit institutions, and relating credit needs to farm enterprises.

**AGR 499. Agricultural Advocacy and Issues Capstone. (3 Credits)**

(3). A. Prerequisite: Junior or Senior standing. Development of critical thinking skills, debates of current issues facing agriculture, and training to become agriculture advocates.

**AGR 501. Independent Study in Agriculture:\_\_\_\_. (3 Credits)**

A. A course for exceptional seniors involving independent study and research related to problems of a theoretical and/or practical nature. May be retaken to a maximum of six hours. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**AGR 509. Agriculture Research Methods and Interpretation. (3 Credits)**

I. Prerequisite: Junior or Senior standing. Explores the scientific underpinnings of modern agriculture and adaptive management, including: the scientific method, observation, experimentation, and data interpretation with an examination of fallacies that masquerade as science.

**AGR 520. Global Food Systems. (3 Credits)**

A. Prerequisite: AGR 308. A wide-ranging examination of various domestic and international food systems. The supply chain will be analyzed from field to farm gate through marketing and transportation to the consumer. Emphasis on the economics of the food supply chain.

**AGR 570. Advanced Technical Agriculture:\_\_\_\_. (3 Credits)**

A. Advanced study of agriculture with emphasis on updating, understanding, and developing competency in recent technology. May be retaken to a maximum of nine hours provided the topic varies.

**AGR 577. Workshop in the Conservation on Natural Resources. (3 Credits)**

A. For teachers returning for graduate work. Instruction is given in the areas of soil, water, fish and wildlife, forest conservation, and methods of teaching related units at the elementary and junior high level.

**Ornamental Horticulture****OHO 115. Operation of Horticultural Equipment. (2 Credits)**

(2) I. Lecture, laboratory and field experiences related to horticultural power equipment, and their safe operation, including hydraulics, electricity chemical and maintenance facilities. 1 Lec/2 Lab.

**OHO 131. Plant Science. (3 Credits)**

A. Corequisite: OHO 132. Principles of plant growth, reproduction and plant-soil relationships. Provides foundations of information for further study in agricultural and horticultural crop production and soil management. Credit will not be awarded to students who have credit for AGR 130.

**OHO 132. Plant Science Laboratory. (1 Credit)**

I. Corequisite: OHO 131. Laboratory and field experiences related to plant growth, development, and management of crops. Credit will not be awarded to students who have credit for AGR 131.

**OHO 301. Directed Work Experience. (1-4 Credits)**

I, II. A minimum of three hours per week per hour of credit using university or other approved facilities. May be retaken for a maximum of 4 credit hours.

**OHO 304. Horticulture Pest Management. (4 Credits)**

(4). II. Identification of the principle horticulture insect, disease, and weed pests in the transition zone. Control measures are identified with special emphasis on the safe use of chemicals and equipment calibration. Credit will not be awarded for both OHO 304 and AGR 304. 3 Lec/2 Lab.

**OHO 349. Applied Learning in Horticulture. (1-8 Credits)**

A. Work under faculty and field supervisors in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit.

**OHO 351. Turf Grass Management. (4 Credits)**

I. Prerequisite: AGR 215. The establishment and maintenance of greenspaces utilizing turfgrass species and cultivars adapted to variable intensities of culture. Relationships of environmental factors and cultural practices are emphasized. 3 Lec/2 Lab.

**OHO 353. Sports Turf Management. (3 Credits)**

(3) A. Management techniques for today's specialized athletic fields. The agronomic aspects of football, soccer, baseball, and some specialty fields are presented. Field trips and classroom exercises develop a practical understanding of field construction and management.

**OHO 354. Irrigation Systems and Horticultural Equipment. (3 Credits)**

I. An introduction to irrigation systems, their design and installation for efficient water utilization. Lecture and field experiences related to horticultural power equipment and their safe operation. 2 Lec/ 2 Lab.

**OHO 362. Topics in Landscape Gardening. (1 Credit)**

A. Students may enroll once in each topic for a total of seven hours. OHO 362A Home Landscape Option. OHO 362D Disease and Insect Control Option. OHO 362E Floral Design Option. (2 credit hours: 1 Lec/2 Lab) OHO 362F Lawn Establishment and Maintenance Option. OHO 362G Problems of Golf Course Operation Option. OHO 362K Interior Plantscaping Option.

**OHO 362E. Floral Design Option. (2 Credits)**

A. An Option in Landscape Gardening.

**OHO 362G. Problems of Golf Course Operation Option. (1 Credit)****OHO 364. Advanced Floral Design. (2 Credits)**

A. The study and practice of advanced floral design techniques; includes construction of conventional and contemporary floral designs. 1 Lec/2 Lab.

**OHO 365. Plant Identification. (3 Credits)**

I. Study of plants used in horticulture (including landscape and specialty crops) including their biological identification, ornamental features, environmental adaptation, utilization, and management. 2Lec/2Lab.

**OHO 366. Plant Identification. (2 Credits)**

A. Study of plants used in landscaping and nursery production including their biological identification, ornamental features, environmental adaptation, utilization, and management 1 Lec/2 Lab.

**OHO 368. Landscape Design Using CAD. (2 Credits)**

(2) I. Introduces computer aided design (CAD) for landscape design. The course also provides experience in the use of commercially available programs for landscape design, project management, pricing, and bid preparation. 4 Lab.

**OHO 370. Landscape Operations Management. (3 Credits)**

II. Management of labor, estimating and bidding along with basic maintenance of trees, shrubs, and herbaceous plants in the landscape operation. 2 Lec/2 Lab.

**OHO 372. Horticulture Retail and Wholesale Management. (2 Credits)**

A. The design, development, and management of a retail/wholesale outlet for horticultural products. Students will develop a model retail/wholesale business including all phases of applied sciences such as business record keeping. 1 Lec/2 Lab.

**OHO 373. Fruit Production. (3 Credits)**

(3) a. Study of domestic and commercial production practices of fruits including identification, agricultural and environmental characteristics, horticulture, and marketing. Fruits include tree fruits, vines, brambles, and soft fruits. 2 Lec/2 Lab.

**OHO 374. Vegetable Production. (3 Credits)**

(3) A. Study of domestic and commercial production of vegetables including identification, agricultural and environmental characteristics, horticulture, and marketing. 2 Lec/2 Lab.

**OHO 375. Post Harvest Technology of Horticultural Crops. (3 Credits)**

(3) A. The science and procedures for handling, packaging, storing and transporting fresh fruits, vegetables and ornamentals.

**OHO 388. Greenhouse Operation and Management. (3 Credits)**

II. Plant propagation and growing techniques in a greenhouse. The student learns operation procedures and the economics of operating a greenhouse and using cold and hot frames. 2 Lec/2 Lab.

**OHO 391. Landscape Design and Methods. (3 Credits)**

A. Prerequisite: OHO 365. Elements of design and the execution of the landscape architect plan, introduction to CAD and project management. 1 Lec/4 Lab.

**OHO 392. Landscape Construction Techniques. (3 Credits)**

II. Comprehensive study of common landscape construction materials and their use in current landscape applications. Class will include laboratory exercises involving the construction of such components as retaining walls, water features, decks, and patios.

**OHO 410. Independent Study in Horticulture:\_\_\_\_. (1-3 Credits)**

I, II. Prerequisite: Departmental approval. Cross listed as AGR 410. Students choose a problem and work under the supervision of the instructor in the field of the problem. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken for a maximum of 6 credit hours provided topics are different. Credit will not be awarded to students who have credit for AGR 410.

**OHO 498. Turf Grass Capstone. (3 Credits)**

(3) A. Prerequisites: OHO351 or 353, and Junior or Senior standing. A comprehensive review of information pertinent to managing turfgrass areas that will enhance graduate's ability to stay within budget, stay on task with seasonal work, and prepare for industry offered certification exams.

**OHO 499. Horticultural Issues Capstone. (3 Credits)**

(3) A. Prerequisite: OHO 349 and Junior or Senior standing. This course provides students with an in-depth examination of the issues facing contemporary horticultural managers including management principles, ethical considerations, and delivery of a quality product or service.

## Agriculture, Bachelor of Science with a Concentration in Agribusiness Management (B.S.)

### Program Requirements

CIP Code: 01.0301

#### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3

**Element 3**

A: Arts (p. 63)	3
B: Humanities (p. 63)	3

**Element 4**

Natural Sciences (p. 64)	6
--------------------------	---

**Element 5**

A: Historical Science (p. 65)	3
B: Social Behavioral Science (p. 65)	3

**Element 6**

Diversity of Perspectives Experiences (p. 65)	6
---	---

<b>Total Hours</b>	<b>36</b>
--------------------	-----------

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

**Major**

Code	Title	Hours
<b>University Graduation Requirements</b>		
General Education		36
<i>Student Success Seminar</i>		
SCO 100	Student Success Seminar	1
Upper division courses (42 hrs. distributed throughout Major/ Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>College Requirement: Professional Skills Seminar</i>		
<i>Core Courses</i>		
Choose from one of the following:		4
AGR 130 & AGR 131	Plant Science and Plant Science Laboratory	
OHO 131 & OHO 132	Plant Science and Plant Science Laboratory	
AGR 115	Operation of Agricultural Equipment	2
AGR 170	Appl Unmanned Aerial Sys Agri	3
AGR 213	Principles of Agricultural Mechanics and Energy Systems	3
AGR 215	Principles of Soils	3
AGR 216	Principles of Soils Laboratory	1
AGR 304	Pest Management	4
AGR 305	Professional Skills Seminar	1
AGR 308	Agricultural Economics	3
AGR 310	Principles of Agribusiness Management	3
AGR 319	Renewable and Sustainable Energy Systems	3
AGR 340	Conservation of Agricultural Resources	3
AGR 411	Senior Seminar	1

**Concentrations**

Students must select one of the following Concentrations:

Agribusiness Management	43-47
Agriculture Engineering Technology	
Agronomy, Soils and Natural Resources	
Livestock Management	
Fruit, Vegetable, Nursery and Greenhouse Production	
Turfgrass and Landscape	

**Supporting Course Requirements**

BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>
---------	---

or BIO 112	Ecology and Evolution	
CHE 101 & 101L	Introductory Chemistry and Introductory Chemistry Lab (Element 4) <sup>G</sup>	
ECO 120	Economic Reasoning and Issues (Element 5B) <sup>G</sup>	
Choose from one of the following:		3
CIS 212	Introduction to Computer Information Systems	
INF 104	Computer Literacy with Software Applications	
TEC 161	Computer Applications in Technology	
<b>Free Electives</b>		
Choose from 0-3 hours of free electives		0-3
<b>Total Hours</b>		<b>120</b>

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

**Concentration**

Code	Title	Hours
<b>Concentration Courses</b>		
AGR 125	Principles of Animal Science	3
AGR 126	Animal Science Laboratory	1
AGR 350	Agricultural Marketing	3
AGR 409	Agriculture Business Records and Analysis	3
AGR 440	Agricultural Financing	3
AGR 520	Global Food Systems	3
Choose from one of the following programs:		9-12
<i>Advisor Approved Personalized Program</i>		
Choose from nine hours of advisor approved courses		
<i>Certificate in Corporate Communication</i>		
CCT 310	International Business Communication	
CCT 550	Integrated Corporate Communication	
Choose from one of the following:		
BUS 207	Fund of Interpersonal Bus Comm	
BUS 300W		
BUS 301W	Essentials of Formal Communication	
<i>Certificate in Financial Literacy</i>		
FIN 201	Personal Money Management	
FIN 310	Entrepreneurial Finance	
FIN 311	Personal Financial Planning	
ACC 200	Survey of Accounting (included in supporting course requirements)	
<i>Certificate in Marketing Research and Analytics</i>		
BUS 305	Essentials of Marketing	
or BUS 301	Essentials of Formal Communication	
MKT 455	Marketing Research and Analysis	
MKT 456	Qualitative Research in Marketing	
MKT 457	Experimental Design for Marketing	
<i>Certificate in Sales</i>		
BUS 305	Essentials of Marketing	
or BUS 301	Essentials of Formal Communication	
BUS 310		
BUS 408		
BUS 431		

**Additional Supporting Course Requirements**

ACC 200	Survey of Accounting	3
STA 215	Introduction to Statistical Reasoning (included in General Education hours)	
<i>Program Electives</i>		
Experiential Learning:		
Choose from three hours of the following:		3
AGR 301	Directed Work Experience	
AGR 302	Directed Work Experience- Management Practicum	
AGR 349	Applied Learning in Agriculture	
OHO 301	Directed Work Experience	
OHO 349	Applied Learning in Horticulture	
ACCT Capstone:		
Choose from one of the following:		3
AGR 499	Agricultural Advocacy and Issues Capstone	
AGR 509	Agriculture Research Methods and Interpretation	
OHO 498	Turf Grass Capstone	
OHO 499	Horticultural Issues Capstone	
Choose from nine hours of Upper Division Electives in AGR and/or OHO		9
<i>Free Electives</i>		
Choose from 0-1 hour of free elective		0-1
<b>Total Hours</b>		<b>43-47</b>

## Agriculture, Bachelor of Science with a Concentration in Agriculture Engineering Technology (B.S.)

AGR 216	Principles of Soils Laboratory	1
AGR 304	Pest Management	4
AGR 305	Professional Skills Seminar	1
AGR 308	Agricultural Economics	3
AGR 310	Principles of Agribusiness Management	3
AGR 319	Renewable and Sustainable Energy Systems	3
AGR 340	Conservation of Agricultural Resources	3
AGR 411	Senior Seminar	1
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
Agribusiness Management		
Agriculture Engineering Technology		44
Agronomy, Soils and Natural Resources		
Livestock Management		
Fruit, Vegetable, Nursery and Greenhouse Production		
Turfgrass and Landscape		
<i>Supporting Course Requirements</i>		
BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>	
or BIO 112	Ecology and Evolution	
CHE 101 & 101L	Introductory Chemistry and Introductory Chemistry Lab (Element 4) <sup>G</sup>	
ECO 120	Economic Reasoning and Issues (Element 5B) <sup>G</sup>	
Choose from one of the following:		3
CIS 212	Introduction to Computer Information Systems	
INF 104	Computer Literacy with Software Applications	
TEC 161	Computer Applications in Technology	
<i>Free Electives</i>		
Choose from 2 hours of free electives		2
<b>Total Hours</b>		<b>120</b>

**G**  
 Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

**Concentration**

## Agriculture, Minor

A minor consists of 18 hours of agriculture classes arranged between the Department Chair and the student seeking the minor. The objective is to meet the student's need for a minor.

Courses counted toward a horticulture major may not be counted toward a minor. Transfer classes are to be evaluated by the Department Chair.

## Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
Choose from 18 hours of agriculture classes with approval from the Department Chair, six or more hours shall be upper division courses <sup>1</sup>		18
<b>Total Hours</b>		<b>18</b>

1

A minimum of six hours are to be taken at EKU.

## Animal and Veterinary Sciences, Bachelor of Science with a Concentration in Animal Science (B.S.)

#### Concentrations

Students must select one of the following Concentrations:

Pre-Veterinary	
Animal Science	23-33

#### Supporting Course Requirements

All Concentrations:		
BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>	4
BIO 112	Ecology and Evolution	4
CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
ECO 120	Economic Reasoning and Issues (Element 5B) <sup>G</sup>	

#### Free Electives

Choose from 4-16 hours of free electives	4-16
<b>Total Hours</b>	<b>120</b>

#### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

### Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
AGR 225 or AGR 330	Evaluation and Selection of Livestock or Animal Products	3
Choose from four animal science courses of the following:		11-16

AGR 312	Ecology and Management of Grasslands and Pastures
AGR 372	Topics and Laboratories in Animal Sciences
AGR 373	Animal Diseases
AGR 374	Genetics of Livestock Improvement
AGR 375	Reproduction and Artificial Insemination of Domestic Animals
AGR 376	Domestic Animal Anatomy
AGR 377	Livestock Behavior and Welfare
AGR 421	Animal Nutrient Metabolism

#### Supporting Course Requirements

Choose from one of the following: <sup>G</sup>

MAT 112A & MAT 112B	Algebra: Polynomials and Algebra: Functions & Matrices (Element 2) <sup>G</sup>
MAT 114	College Algebra (Element 2) <sup>G</sup>
MAT 120	Trigonometry (Element 2) <sup>G</sup>
MAT 122	Precalculus Mathematics (Element 2) <sup>G</sup>
MAT 211	Applied Calculus (Element 2) <sup>G</sup>
MAT 234	Calculus I (Element 2) <sup>G</sup>

STA 215	Introduction to Statistical Reasoning	3-4
or STA 270	Applied Statistics	

Choose from two of the following science electives: 6-10

AGR 374	Genetics of Livestock Improvement
or BIO 315	Genetics
BIO 320	Principles of Microbiology
BIO 331	Cell Biology
BIO 348	Vertebrate Physiology
BIO 546	Histology
CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II
CHE 430	Biochemistry of Macromolecules
PHY 131	College Physics I
or PHY 132	College Physics II

**Total Hours** **23-33**

#### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

## Animal and Veterinary Sciences, Bachelor of Science with a Concentration in Pre#Veterinary (B.S.)

### Pre-Veterinary Medicine

For students who have a strong interest in veterinary medicine, The Department of Agriculture offers a program of study that will provide an abundance of hands-on experience with both large and small animals while fulfilling admission requirements of veterinary schools.

Students in the Pre-Veterinary concentration of Animal and Veterinary Sciences will work directly with a knowledgeable faculty advisor throughout their academic career and the application process. Although Kentucky does not have a veterinary school, Auburn University College

of Veterinary Medicine and Tuskegee University College of Veterinary Medicine have seats specifically designated for Kentucky residents.

Admission to Auburn or Tuskegee Colleges of Veterinary Medicine Kentucky is a member of the Southern Regional Educational Board Plan under which legal Kentucky residents attend Auburn University College of Veterinary Medicine or Tuskegee University College of Veterinary Medicine. The program is funded by an appropriation of the General Assembly to the Kentucky Council on Post-Secondary Education. A limited number of students who have completed pre-veterinary requirements are selected on a competitive basis by Auburn or Tuskegee each year and are exempt from out-of-state tuition. Both veterinary colleges have similar entrance requirements, including a GRE examination.

Students should have a grade point average of 3.4 to be competitive. Students need to pass all pre-veterinary required courses with a grade of "C" or better. Courses in organic chemistry and physics must have been completed within six years of entry into the college of veterinary medicine. Students applying to Auburn or Tuskegee use the Veterinary Medical College Application Service (VMCAS). Application deadlines for both are September 15. Students are expected to gain veterinary experience by working directly with a D.V.M.

	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

### Major

Code	Title	Hours
<b>University Graduation Requirements</b>		
General Education		36
<i>Student Success Seminar</i>		
SCO 100	Student Success Seminar	1

Upper division courses (42 hrs. distributed throughout Major/ Supporting/Gen Ed/Free Electives categories)

### Major Requirements

#### Core Courses

AGR 125	Principles of Animal Science	3
AGR 126	Animal Science Laboratory	1
AGR 304	Pest Management	4
AGR 305	Professional Skills Seminar	1
AGR 308	Agricultural Economics	3
AGR 321	Feeds and Feeding	4
AGR 411	Senior Seminar	1
AGR 499	Agricultural Advocacy and Issues Capstone	3
or AGR 509	Agriculture Research Methods and Interpretation	

Choose from three hours of the following: 3

AGR 301	Directed Work Experience	
AGR 302	Directed Work Experience- Management Practicum	
AGR 349	Applied Learning in Agriculture	

Choose from one of the following: 3

AGR 310	Principles of Agribusiness Management	
AGR 350	Agricultural Marketing	
AGR 440	Agricultural Financing	

Choose from two of the following production classes: 6-8

AGR 255	Companion Animal Management	
AGR 326	Light Horse Production and Management	
AGR 327	Beef Production	
AGR 328	Swine Production	
AGR 329	Small Ruminant Production	
AGR 332	Poultry Production and Management	
AGR 380	Technical Management of Dairy Cattle	

### Concentrations

Students must select one of the following Concentrations:

Pre-Veterinary	Animal Science	30-33
----------------	----------------	-------

#### Supporting Course Requirements

All Concentrations:

BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>	
BIO 112	Ecology and Evolution	4
CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
ECO 120	Economic Reasoning and Issues (Element 5B) <sup>G</sup>	

#### Free Electives

Choose from 4-9 Free Electives 4-9

Total Hours 120

### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

## Concentration

Code	Title	Hours
AGR 421	Animal Nutrient Metabolism	3
Choose from three animal science courses of the following:		9
AGR 312	Ecology and Management of Grasslands and Pastures	
AGR 372	Topics and Laboratories in Animal Sciences	
AGR 373	Animal Diseases	
AGR 374	Genetics of Livestock Improvement	
AGR 375	Reproduction and Artificial Insemination of Domestic Animals	
AGR 376	Domestic Animal Anatomy	
AGR 377	Livestock Behavior and Welfare	
<i>Supporting Course Requirements</i> <sup>1</sup>		
Choose from one of the following: <sup>G</sup>		
MAT 120	Trigonometry (Element 2) <sup>G</sup>	
MAT 122	Precalculus Mathematics (Element 2) <sup>G</sup>	
MAT 211	Applied Calculus (Element 2) <sup>G</sup>	
MAT 234	Calculus I (Element 2) <sup>G</sup>	
BIO 331	Cell Biology	3
CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II	4
PHY 131	College Physics I	5
Choose from two of the following science electives:		6-9
AGR 374	Genetics of Livestock Improvement	
or BIO 315	Genetics	
BIO 320	Principles of Microbiology	
BIO 348	Vertebrate Physiology	
BIO 546	Histology	
CHE 430	Biochemistry of Macromolecules	
or PHY 132	College Physics II	
<b>Total Hours</b>		<b>30-33</b>

### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

### 1

Courses listed will meet requirements for Auburn College of Veterinary Medicine for students with a Baccalaureate degree prior to starting veterinary school.

## Animal and Veterinary Sciences, University Certificate

The Certificate in Animal and Veterinary Sciences offers courses in a wide spectrum of areas including nutrition, diseases, genetics, reproduction, anatomy and physiology, behavior, and welfare. Students completing the certificate will gain basic skills in animal management and husbandry for employment opportunities as animal caretakers, veterinary technicians/assistants, and animal science sales and services. For students interested in continuing their studies, courses are applicable to the A.A.S. or B.S. degree programs related to Livestock Production and Animal and Veterinary Sciences.

AGR 332	Poultry Production and Management		
AGR 380	Technical Management of Dairy Cattle		
<b>Total Hours</b>		<b>13-16</b>	

## Crops, Soils and Resource Conservation, University Certificate

The Certificate in Crops, Soils and Natural Resources is designed to prepare students with degrees in related fields such as forestry, environmental sciences or biology with the opportunity to enter the agroforest industry. In addition, it will assist students to attain some of the basic requirements for careers in federal or state agroforestry-oriented agencies.

### Program Requirements

CIP Code: 01.1201

Code	Title	Hours

AGR 130	Plant Science	3
AGR 131	Plant Science Laboratory	1
AGR 215	Principles of Soils	3
AGR 216	Principles of Soils Laboratory	1
AGR 318	Soil/Water Conservation Technology	3
AGR 340	Conservation of Agricultural Resources	3
or AGR 345	Sustainable Agroecosystems	
<b>Total Hours</b>		<b>14</b>

## Greenhouse and Fruit/Vegetable Production, University Certificate

The Certificate in Greenhouse and Fruit/Vegetable Production offers courses that will cover the science and practice of growing, harvesting, handling, sorting, processing, and marketing potted plants, tree fruits, small fruits, and vegetables. The certificate is designed to enhance technical competencies for individuals currently working in the greenhouse or fruit/vegetable industry or those individuals wanting to gain employment in these industries. For students interested in continuing their studies at the Associate or Baccalaureate level, all of the courses in this certificate may be used as part of the A.A.S. or B.S. degree programs related to Greenhouse and Fruit/Vegetable Production.

## Turfgrass and Landscape Horticulture, University Certificate

The Certificate in Turfgrass and Landscape Horticulture can be used to enhance technical competencies for those working in the turfgrass and landscape industry or in order to gain employment in that industry. In addition, individuals who have or are pursuing a degree in Landscape Management, Landscape Construction, Parks and Recreation, and Physical Education/Sports Development can pursue this certificate in order to make themselves more marketable. Turfgrass and landscape management knowledge is in high demand with many positions available in golf courses, commercial and residential lawn and landscape, landscape design/construction, sports fields and parks. For students interested in continuing their studies at the Associate or Baccalaureate level, all of the courses in this certificate may be used as part of the A.A.S. or B.S. degree programs related to Turfgrass and Landscape Horticulture.

## Program Requirements

CIP Code: 01.0601

Code	Title	Hours
<b>Certificate Requirements</b>		
Select four of the following for a minimum of 12 hours:		12-13
OHO 351	Turf Grass Management	
OHO 353	Sports Turf Management	
OHO 354	Irrigation Systems and Horticultural Equipment	
OHO 368	Landscape Design Using CAD	
OHO 370	Landscape Operations Management	
OHO 391	Landscape Design and Methods	
OHO 392	Landscape Construction Techniques	
<b>Total Hours</b>		<b>12-13</b>

## Department of Biological Sciences

### Chair

Dr. Sherry Harrel  
(859) 622-1531  
Science Building 3238

### Faculty

K. Blank, A. Braccia, D. Brown, P. Calie, S. Chambers, L. Cormier, B. Davis, L. Dodd, C. Elliott, S. Harrel, D. Hayes, J. Koslow, L. Middleton, C. Mott, O. Oakley, V. Peters, M. Pierce, S. Richter, W. Staddon, S. Sumithran, A. Whitson, and A. Wigginton.

### Bachelor's

- Biology, Bachelor of Science with a Concentration in Aquatic Biology (B.S.) (p. 444)
- Biology, Bachelor of Science with a Concentration in Biodiversity and Conservation (B.S.) (p. 444)
- Biology, Bachelor of Science with a Concentration in Biology Teaching (B.S.) (p. 446)
- Biology, Bachelor of Science with a Concentration in General Biology (B.S.) (p. 447)
- Biomedical Sciences, Bachelor of Science with a Concentration in Biomedical Research (B.S.) (p. 448)
- Biomedical Sciences, Bachelor of Science with a Concentration in Pre-Dental (B.S.) (p. 449)
- Biomedical Sciences, Bachelor of Science with a Concentration in Pre-Medical (B.S.) (p. 451)
- Biomedical Sciences, Bachelor of Science with a Concentration in Pre-Optometry (B.S.) (p. 452)
- Biomedical Sciences, Bachelor of Science with a Concentration in Pre-Physician Associate (B.S.) (p. 454)
- Biomedical Sciences, Bachelor of Science with a Concentration in Pre-Veterinary (B.S.) (p. 456)
- Wildlife Management, Bachelor of Science with a Concentration in Conservation Management (B.S.) (p. 457)
- Wildlife Management, Bachelor of Science with a Concentration in Game Management (B.S.) (p. 458)

### Minor

- Biology, Minor (p. 447)

## Courses

### Biology

#### BIO 100. Introductory Biology. (3 Credits)

I, II. Prerequisite: Completion of all academic readiness requirements in English and reading or ENG101R; and MAT ACT score of 19 or higher, or Math SAT score of 500 or higher, or passing score on math placement test, or MAT 105 or higher, or STA 215 or higher. The course will deal with introductory principles of biology that are fundamental to an individual's knowledge as it pertains to the interrelationships of organisms in the natural world. Topics to be addressed: cellular basis of life, metabolism, genetics, biological diversity, reproduction, evolution, ecology, and environmental biology. May not be used to satisfy area, major, or minor requirements. Credit will not be awarded to students who have credit for BIO 101 or 102. 2 Lec/2 Lab. Gen. Ed. E-4 [NS].

#### BIO 101. Essentials of Biology. (3 Credits)

I, II. ONLINE ONLY. Prerequisite: Completion of all academic readiness requirements in English and reading or ENG 101R; and Math ACT score of 19 or higher, or Math SAT score of 500 or higher, or passing score on math placement test, or MAT 105 or higher, or STA 215 or higher. Biological principles and applications as relates to life on earth from the molecular to ecosphere scale; current topics in genetics, evolution, ecology, plant and animal diversity, and human biology will be discussed. May not be used to satisfy area, major, or minor requirements. Credit will not be awarded to students who have credit for BIO 100 or 102. 2 Lec/2 Lab. Gen. Ed. E-4 [NS].

#### BIO 102. Inquiry Biology for Teachers. (3 Credits)

I, II. Prerequisites: completion of all academic readiness requirements in English and reading or ENG 101R; and Math ACT score of 19 or higher, Math SAT score of 500 or higher, or passing score on math placement test, or MAT 105 or higher; pre-teaching or teaching elementary, and middle school, special education, and DHH majors only, or departmental approval. An inquiry-based, conceptual-approach biological sciences course for teaching majors. Topics include the nature of science, cell biology, biodiversity, inheritance, ecology and ecosystems, evolution and adaptation. May not be used to satisfy area, major, or minor requirements. Credit will not be awarded to students who have credit for BIO 100 or 101. 2 Lec/2 Lab. Gen. Ed. E-4 [NS].

#### BIO 111. Cell and Molecular Biology. (4 Credits)

I, II. Prerequisite: Completion of all academic readiness requirements in English and reading or ENG 101R; and Math ACT score of 19 or higher, or Math SAT score of 500 or higher, or passing score on math placement test, or MAT 105 or higher, or STA 215 or higher. An introduction to fundamental principles of cell and molecular biology as they apply to plants, animals, and microbes; the molecular basis of life, cellular structure and function, genetic and molecular biology. Designed for biology majors. 3 Lec/2 Lab. Gen. Ed. E-4 [NS].

#### BIO 112. Ecology and Evolution. (4 Credits)

I, II. Prerequisite: Completion of all academic readiness requirements in English and reading or ENG 101R; and Math ACT score of 19 or higher, or Math SAT score of 500 or higher, or passing score on math placement test, or MAT 105 or higher, or STA 215 or higher. An introduction to the fundamental principles of ecology and evolution: interactions among plants, animals, microbes, and their environment, and the diversification of life through evolutionary processes. Designed for biology majors. 3 Lec/2 Lab. Gen. Ed. E-4 [NS].

**BIO 215. Insects and Society. (3 Credits)**

A. Prerequisites: ENG 102 or 105(B) or HON 102. An introduction to insects and their influence on human society. Impacts of insects on our food supply, homes and health, as well as the influence of insects on culture, world history, and the long-term maintenance of the earth's critical support systems. May not be used to satisfy biology major or minor requirements. Gen. Ed. VII.

**BIO 271. Advanced Human Anatomy. (3 Credits)**

II. Prerequisites: BIO 171 (grade of C or better) or 308 (grade of C or better). An advanced study of human anatomy. Emphasis is placed on the musculoskeletal and nervous systems and their anatomical and functional relationships. May not be used to satisfy area, major, or minor requirements. 2 Lec/2 Lab.

**BIO 273. Clinical Microbiology. (4 Credits)**

Prerequisite: BIO 171 (grade of C or better) or 307 (grade of C or better). A study of microorganisms as causative agents in diseases of humans with emphasis on differentiation and culture, types of diseases, modes of transmission, prophylactic, therapeutic and epidemiological considerations. May not be used to satisfy area, major, or minor requirements. Credit will not be awarded to students who have credit for MLS 209. 2 Lec/4 Lab. Gen. Ed. VII (NS).

**BIO 300. Economic Plants. (3 Credits)**

I, II. Economic consideration of plants as sources of food, medicine, and other products; the origin, domestication, general anatomy and culture of plants; deleterious plants; aspects of aesthetics and effect on society and world events. May not be used to satisfy area, major, or minor requirements, except the biology (teaching) major and minor.

**BIO 305. Biology of Sex. (3 Credits)**

I, II. Prerequisite: ENG 102, 105 (B), HON 102, or departmental approval. Crosslisted as WGS 311. Fundamental principles related to human sexual reproduction. Structure, function, control, and coordination of the human reproductive system. Problems associated with fertility, sexuality, birth control, STD's, and human population will be discussed. Fulfills University Wellness Requirement. May not be used to satisfy area, major or minor requirements. Credit will not be awarded to students who have credit for WGS 311.

**BIO 307. Human Anatomy and Physiology I. (3 Credits)**

I, II. Prerequisite: Completion of all academic readiness requirements and composite ACT of 20 or higher or completion of BIO 100 (grade of C or better) or 111 (grade of C or better). Basic chemistry and the interrelationship of structure and function of body systems including cell structure, cell physiology, metabolism, tissues, and integumentary, skeletal, muscular, sensory and nervous systems. 2 Lec./2 lab. Credit will not be awarded for both BIO 171 and BIO 307.

**BIO 308. Human Anatomy and Physiology II. (3 Credits)**

I, II Prerequisite: BIO 307 (grade of C or better) or BIO 171 (C or better) or major in pre-medical lab science or EHS. The interrelationship of structure and function of body systems including endocrine, cardiovascular, circulatory, respiratory, digestive, urinary, reproductive, lymphatic and immune systems. Lecture 2 hours, Laboratory 2 hours. Credit will not be awarded for both BIO 308 and BIO 301, 378.

**BIO 310. Biology of Aging. (3 Credits)**

A. Prerequisite: BIO 100, 171, or 308 (with a grade of C or better) or departmental approval. System by system approach to the biological effects of the aging process on the human body. May not be used to satisfy area, major, or minor requirements in the Department of Biological Sciences. Gen. Ed. VI. Fulfills University Wellness Requirement.

**BIO 315. Genetics. (4 Credits)**

I, II. Prerequisite: BIO 111 (with a grade of C or better) and 112 (with a grade of C or better). Discussion of Mendelian genetics, molecular genetics, genetic mapping, and population genetics. Emphasis on critical thinking skills and logic through experimental analysis. Laboratory will include experimental manipulation of prokaryotic and eukaryotic organisms. 3 Lec/3 Lab.

**BIO 316. Ecology. (4 Credits)**

I, II. Prerequisite: BIO 111 (grade of C or better) and BIO 112 (with a grade of C or better). Basic concepts and principles as applied to the study of organisms or groups of organisms in their interrelations to each other and to their environments. 2 Lec/4 Lab.

**BIO 317. Conserv of Wildlife Resources. (3 Credits)**

I, II. Introduction to the principles and practices of conservation of plants and animals; requirements and values of wildlife resources; impact of human activities on resources. May not be used to satisfy area, major, or minor requirements. Gen. Ed. VII (NS).

**BIO 318. General Botany. (4 Credits)**

I,II. Prerequisite: BIO 111 (with a grade of C or better) and 112 (with a grade of C or better). Structure and functions of vascular plants; morphology, classification, life histories, ecology and evolution of autotrophs, plantlike protists and fungi. 3 Lec/3 Lab. Credit will not be awarded to students who have credit for BIO 131.

**BIO 319. General Zoology. (4 Credits)**

I,II. Prerequisite: BIO 111 (with a grade of C or better) and 112 (with a grade of C or better). Morphology, physiology, comparative anatomy, development, life history, evolution, and diversity of animals. 3 Lec/3 Lab. Credit will not be awarded to students who have credit for BIO 141.

**BIO 320. Principles of Microbiology. (4 Credits)**

I, II. Prerequisite: BIO 111, BIO 112, and CHE 112 (with a grade of C or better) or Environmental Health Science major with BIO 111 (C) and CHE 112 (C). A study of bacteria and other microorganisms, their morphology, development and function; techniques of isolation, cultivation and identification; physiology, nutrition, and genetics; role of microbes in medicine, agriculture, and industry. 2 Lec/4 Lab.

**BIO 331. Cell Biology. (3 Credits)**

I, II. Prerequisite: BIO 111 (grade of C or better) and CHE 361 (grade of C or better) or departmental approval. An examination of cellular structure and function. Emphasis will be placed on macromolecule biosynthesis, gene expression, membrane dynamics, cytoskeletal function, intracellular signaling, cascades, protein trafficking, and intercellular interactions. Molecular research methods and their applications will also be discussed.

**BIO 332. Careers in Biomedical Sciences. (1 Credit)**

Prerequisites: BIO 111 (C or better) and CHE 112 (C or better). Students will explore the diverse range of career options within the biomedical sciences, develop materials and skills for successful admission in graduate/professional programs. This course requires 50 hours of experiential learning through an internship/shadowing experience. 1 Lec.

**BIO 335. Plant Systematics. (3 Credits)**

II. Prerequisite: BIO 111 (grade of C or better), 112 (grade of C or better), and 318 (grade of C or better); or departmental approval. Identification, classification and phylogeny of vascular plants; principles of taxonomy. 1 Lec/4 Lab.

**BIO 342. Comparative Vertebrate Anatomy. (4 Credits)**

I. Prerequisite: BIO 112 (grade of C or better), and 319 (grade of C or better); or departmental approval. Evolutionary relationships of the classes of vertebrates are investigated through their anatomy. Laboratory studies of organs and systems of vertebrate animals primarily compare the dogfish shark, the mudpuppy (*Necturus*), and the cat. 2 Lec/4 Lab.

**BIO 348. Vertebrate Physiology. (3 Credits)**

(3) I, II. Prerequisite: BIO 331 (C or better); CHE 112 (C or better), and PHY 131 (C or better) or PHY 201 (C or better) or departmental approval. Command of human physiology through an integrated study of the physical, chemical, and cellular aspects of physiological systems across vertebrates. Group work and critical thinking will be stressed utilizing human case studies and computer simulations. 3 Lec.

**BIO 349. Applied Learning in Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349A. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349B. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349C. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349D. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349E. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349F. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349G. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349H. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349I. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349J. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349K. Co-op or Appl. Lrn: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349L. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349M. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 349N. Cooperative Study: Biology. (0.5-8 Credits)**

I, II. Prerequisites: BIO 111 (C or better) or BIO 112 (C or better). Work in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. Three hours may be applied to the major. May not be used to satisfy minor requirements. Graded Satisfactory/Unsatisfactory.

**BIO 371. Neuroanatomy. (3 Credits)**

I, II. Prerequisite: BIO 308 (grade of "C" or better) or departmental approval. Anatomy of the nervous system and the relationships to functions of systems of the human body. May not be used to satisfy area, major, or minor requirements in the Department of Biological Sciences. 2 Lec/2 Lab.

**BIO 375. Microbes and Food. (3 Credits)**

A. Prerequisites: ENG 102 or 105 (B) or HON 102 and BIO 111 (grade of C or better) or departmental approval. An overview of food-borne illness and food safety, the role of microbes in food production and the relationships between diet and the human microbiome. Credit will not be awarded to students for both BIO 375 and 375W.

**BIO 380. Wildlife Law & Law Enforcement. (3 Credits)**

A. Discussion of pertinent state and federal wildlife laws and how law enforcement impacts wildlife management.

**BIO 381. Principles of Wildlife Mgt. (3 Credits)**

I. Basic principles of wildlife management and their application to current management issues.

**BIO 382. Wildlife Population Analysis. (4 Credits)**

I. Population ecology of vertebrates, with a focus on field methods and analysis of data applicable to wildlife conservation. Recommend BIO 316 and 381 prior to or concurrent with enrollment. 2 Lec/4 Lab.

**BIO 382W. Wildlife Population Analysis. (4 Credits)**

I. Prerequisites: ENG 102 or ENG 105 (B) or HON 102, and Wildlife Management major or department approval. Population ecology of vertebrates, with a focus on field methods, analysis of data, and writing techniques applicable to wildlife conservation. Recommend BIO 316 and 381 prior to or concurrent with enrollment. Credit will not be awarded for both BIO 382 and 382W. 2 Lec/4 Lab.

**BIO 399. Trends in Biological Science. (1-4 Credits)**

A. Prerequisite: instructor approval. A presentation of selected topics in the biological sciences reflective of new developments and current trends in scientific advancement. May be retaken to a maximum of six hours. Gen. Ed. 15 or 16.

**BIO 489. Field Studies in Wildlife. (1-3 Credits)**

A. Prerequisite: student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. Field studies designed to enhance the student's wildlife management techniques. Required of all wildlife management majors during the junior or senior year. May be retaken to a maximum of three hours.

**BIO 490. Biology Seminar. (1 Credit)**

I, II. Prerequisite: junior or senior standing in biology. Students and members of the faculty meet to present, discuss, and exchange ideas on selected topics, based on the scientific literature for the biological sciences.

**BIO 495. Evolutionary Application and Theory. (1 Credit)**

I, II. Prerequisite: Senior standing in Biology, Biomedical Sciences, or Wildlife Management. Discussion of topics relating to evolutionary theory with special emphasis on the impact of evolution in everyday life. This is a course that builds upon evolutionary concepts learned throughout the biology curriculum. 2 Lab.

**BIO 500. Environmental Issues. (3 Credits)**

(3) II. Prerequisite: BIO 100, 102, or 112. Students will learn to identify, investigate, and evaluate environmental issues as well as plan appropriate action based on their analysis. Credit will not be awarded to students who have credit for ENV 500, CNM 800, and BIO 700.

**BIO 511. Experiment Appro/Molecular Bio. (3 Credits)**

I. Prerequisite: BIO 111. Laboratory experience-based course in molecular biology techniques. Subject will be introduced in a lecture setting and practical laboratory training. Techniques will include PCR-based methodologies; immunological approaches; basic protein and nucleic acid manipulations. 1 Lec/4 Lab.

**BIO 514. Evolution. (3 Credits)**

A. Prerequisite: BIO 315 (grade of C or better) or departmental approval. A study of Darwinism, the history of life in the context of contemporary biology, and the evidences and mechanisms of evolutionary change, with particular emphasis on human evolution and the challenges of teaching and understanding evolution in modern society.

**BIO 520. Invasive Species Management. (3 Credits)**

A. Prerequisites: BIO 316 (C or better) or department approval. Examination of the circumstances that allow introduced species to become invasive. Reviews the current approaches used to reduce the incidence and impact of invasive species. Credit will not be awarded to students who have credit for BIO 599/799 Special Topics: Invasive Species Management.

**BIO 521. Plant Ecology. (4 Credits)**

A. Prerequisite: BIO 316 (grade of C or better) and BIO 318 (grade of C or better) or 335 (grade of C or better) or departmental approval. Ecological concepts and principles relevant to eastern terrestrial ecosystems. Required Fall Break field trip. 2 Lec/4 Lab.

**BIO 522. Grasses and Grasslands. (3 Credits)**

I. Prerequisite: instructor approval. Development and composition of grasslands; phylogeny, classification, and identification of grasses. Emphasis on North American grasses and grasslands with field trips to native and managed grasslands. 1 Lec/4 Lab.

**BIO 525. Aquatic and Wetland Plants. (3 Credits)**

A. Prerequisite: BIO 111 (C or higher), 112 (C or higher), and 318 (C or higher); or departmental approval. Collection, systematics, distribution, ecology, and reproduction of aquatic and wetland vascular plants. 1 Lec/4 Lab.

**BIO 527. Immunology. (3 Credits)**

I. Prerequisite: BIO 320 (grade of C or better) and CHE 361 (grade of C or better); or instructor departmental approval. Characteristics of immune reactions at the molecular level and in vivo. Nature and interactions of antigens and antibodies, and allergic phenomena. 2 Lec/3 Lab.

**BIO 528. Virology. (3 Credits)**

A. Prerequisite: BIO 320 (grade of C or better); or departmental approval. Fundamentals of classification, structure, and pathogenesis of viruses. Host-virus interactions and their applications to medicine and industry. Viral related areas of immunology, cell culture procedures, and applications will be introduced. 2 Lec/3 Lab.

**BIO 529. Microbiology in Everyday Life. (3 Credits)**

A. Prerequisite: BIO 100 (grade of C or better), or 102 (grade of C or better), or 111 (grade of C or better), or 112 (grade of C or better), or departmental approval. Microbes in medicine, agriculture, and industry; emphasis on teaching microbiology in the classroom. Course open only to Biology-Teaching or Education majors.

**BIO 531. Principles of Molecular Biology. (4 Credits)**

I, II. Prerequisites: BIO 320 (grade of C or better) or 331 (grade of C or better), and CHE 361 (grade of C or better); or departmental approval. An in-depth study of the structure, function, and technological applications of nucleic acids and proteins. Laboratory experiences will involve manipulations of DNA and RNA molecules for the purpose of isolation, genetic engineering, forensics, and gene expression analysis. Credit will not be awarded for both BIO 531 and BIO 531S 2 Lec/4 Lab.

**BIO 531S. Principles of Molecular Biology. (4 Credits)**

I, II. Prerequisite: BIO 320 (grade of C or better) or 331 (grade of C or better) and CHE 361 (grade of C or better); or departmental approval. An in-depth study of the structure, function, and technological applications of nucleic acids and proteins. Laboratory experiences will involve manipulations of DNA and RNA molecules for the purpose of isolation, genetic engineering, forensics, and gene expression analysis. Credit will not be awarded for both BIO 531S and BIO 531 2 Lec/4 Lab.

**BIO 532. Conservation Biology. (3 Credits)**

II. Prerequisite: BIO 316 (grade of C or better) or departmental approval. Examination of principles and practices of conserving global biological diversity. Emphasis on causes, consequences and rates of extinction, as well as the natural resource planning and policies used to mitigate the loss of biodiversity. Focus will be given to the application of philosophical, biological, sociological, legal, and on-the-ground management principles for the conservation of genes, species and ecosystems.

**BIO 533. Bioinformatics: Principles and Applications. (3 Credits)**

A. Prerequisite: BIO 315 (grade of C or better); or departmental approval. An exposure to the theory and practice of bioinformatics, as they relate to laboratory (Cell and Molecular Biology, Biochemistry) and field (Evolutionary and Population Biology) research applications in the life sciences. Discussion and utilization of the prevalent approaches and methodologies currently used in Bioinformatics.

**BIO 535. Pathogenic Microbiology. (4 Credits)**

A. Prerequisite: BIO 320 (grade of C or better); or departmental approval. Studies in the field of advanced clinical microbiology with emphasis on morphology, cultivation, biochemistry, and serological identification of bacterial diseases; aspects of pathogenesis, epidemiology, and control measures of bacterial and mycotic diseases. 2 Lec/4 Lab.

**BIO 536. Dendrology. (3 Credits)**

A. Prerequisite: BIO 318 (grade of C or better); or departmental approval. Woody plant taxonomy with emphasis on field identification of trees and shrubs in summer and winter conditions; habitats and distributions; economic importance; forest regions of North America. 1 Lec/4 Lab.

**BIO 542. Freshwater Invertebrates. (3 Credits)**

A. Prerequisite: BIO 112 (grade of C or better) and 319 (grade of C or better) or departmental approval. Collection, systematics, distribution, behavior, ecology, and life histories of freshwater invertebrates. 2 Lec/3 Lab.

**BIO 546. Histology. (4 Credits)**

II. Prerequisite: BIO 331 (grade of C or better) and 348 (grade of C or better); or departmental approval. This course will provide students with an essential understanding of functional morphology in vertebrate tissues and organs. Pathology examples will be used to explain cellular and molecular basis of normal function related to structure.

**BIO 547. Comparative Vertebrate Embryology. (4 Credits)**

A. Prerequisite: BIO 331 (grade of C or better) or departmental approval. Gametogenesis, fertilization, morphogenesis, and organogenesis of the frog, bird, and mammal. Particular emphasis is placed on mammalian development. 2 Lec/4 Lab.

**BIO 548. Insect Diversity. (3 Credits)**

A. Prerequisite: BIO 319 (C or better) or departmental approval. An introduction to the insects with an emphasis on classification, identification, natural history, and evolution of insect orders and common families. (2 Lac/3 Lab) Credit will not be awarded for both BIO 548 and BIO 599: Topics in Biological Sciences.

**BIO 549. Neurobiology. (3 Credits)**

I. Prerequisites: BIO 331. A discussion of the cellular architecture of the nervous system, with emphasis on the biochemical and electrophysiological properties of neurons and glia that control cognition, learning and memory, emotion, sensation and perception, endocrine regulation, and neurological illness. An overview of molecular research methods used to investigate neural function.

**BIO 550. Animal Behavior. (4 Credits)**

II. Prerequisite: BIO 111 (grade of C or better) and 112 (grade of C or better); or departmental approval. Advanced study of behavior with emphasis on inherited behavioral patterns in relation to the evolution and ecology of animals. 3 Lec/2 Lab.

**BIO 553. Mammalogy. (3 Credits)**

I. Prerequisites: BIO 111 (grade of C or better) and 112 (grade of C or better); or departmental approval. Classification, natural history, field methods, and distribution of mammals. Requires participation in an extended field trip outside of normal class hours. 1 Lec/4 Lab.

**BIO 554. Ornithology. (3 Credits)**

II. Prerequisite: BIO 111 (grade of C or better) and 112 (grade of C or better); or departmental approval. Avian biology with emphasis on field identification of local avifauna, anatomy, physiology, ecology, evolution, migration, economic importance, distribution, and behavioral patterns. Early morning field trips required. 2 Lec/4 Lab.

**BIO 555. Behavioral Ecology. (3 Credits)**

A. Prerequisite: BIO 316 (grade of C or better); or instructor approval. How behavior is influenced by natural selection in relation to ecological conditions. Emphasis on quantitative and experimental methods and on integrating theoretical ideas with field and laboratory evidence.

**BIO 556. Herpetology. (3 Credits)**

II.. Prerequisite: BIO 319 (grade of C or better) or departmental approval. Natural history of the amphibians and reptiles including taxonomy, general ecology, behavior, distribution, breeding, and food habits. 2 Lec/3 Lab.

**BIO 557. Ichthyology. (3 Credits)**

I. Prerequisite: BIO 112 (grade of C or better) and 319 (grade of C or better) or departmental approval. A phylogenetic examination of morphological, ecological, and behavioral diversification of fishes of the world, with special attention to the Appalachian fauna. Laboratory devoted to anatomy, identification, and reproductive strategies. 2 Lec/4 Lab.

**BIO 558. Freshwater Ecology. (3 Credits)**

A. Prerequisite: BIO 316 (grade of C or better) or departmental approval. Ecology of lakes and streams with special reference to physical, chemical, and biological factors. To include a variety of methods and instruments. 2 Lec/3 Lab.

**BIO 561. Fisheries Biology. (3 Credits)**

A. Prerequisite: BIO 112 (grade of C or better) and 316 (grade of C or better); or departmental approval. Methods for assessment and analysis of fish populations and aquatic habitats, including age and growth, fecundity, food habits, and yield. Emphasis on economic and ecological importance of management decisions. 2 Lec/4 Lab.

**BIO 590. Ecology for Teachers. (3 Credits)**

(3) I. Cross-Listed as ENV 590, Prerequisite: BIO 100 (grade of C or better), 102 (grade of C or better), or 112 (grade of C or better). This course introduces ecology and the environment through an interdisciplinary approach beginning with the physical environment progressing to whole ecosystems and onto analyses of ecological sustainability. Classroom strategies and techniques will be modeled. Credit will not be awarded to students who have credit for ENV 590 or CNM 599.

**BIO 595. Topics in Field Biology.\_\_\_\_. (3 Credits)**

A. Prerequisite: BIO 318 (grade of C or better) or 319 (grade of C or better); and departmental approval. Concepts, methods, analyses, and organismal identification used to study \_\_\_\_\_. Material will be taught using a combinations of lecture, discussion, and experiential learning via hands-on field activities. May be repeated up to a maximum of 12 hours provided subject matter is different each time. 1 Lec/4 Lab.

**BIO 598. Special Problems. (1-3 Credits)**

I, II. Prerequisites: junior or senior standing; students must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. Independent research in the biological sciences, under the guidance of a faculty member, which allows students to design a research problem and make experimental observations and conclusions. May be retaken to a maximum of six hours.

**BIO 599. Topics in Biological Sciences:\_\_\_\_. (6 Credits)**

A. Prerequisites: Senior Standing, BIO 111 (grade of C or better), 112 (grade of C or better) and departmental approval. Special topics in the biological sciences of current interest to faculty and students may be presented through lecture, discussion, lab and field experiences, and reports. May be retaken to a maximum of nineteen hours, provided subject matter differs each time.

**Wildlife Management****WLD 317. Conservation of Wildlife Resources. (3 Credits)**

(3) I, II. Prerequisites: ENG 102 or 102R or ENG 105 (B) or HON 102. Introduction to the principles and practices of conservation of plants and animals; requirements and values of wildlife resources; impact of human activities on resources. May not be used to satisfy BIO or WLD area, major, or minor requirements. Credit will not be awarded to students who have credit for ENV 317.

**WLD 380. Wildlife Law & Law Enforcement. (3 Credits)**

A. Prerequisite: ENG 102 or ENG 105 (B) or HON 102. Discussion of pertinent state and federal wildlife laws and how law enforcement impacts wildlife management. Credit will not be awarded for both WLD 380 and BIO 380.

**WLD 381. Principles of Wildlife Management. (3 Credits)**

I. Prerequisite or Corequisite: BIO 112 (grade of C or better) or departmental approval. Principles of wildlife management and their application to current management issues.

**WLD 382. Wildlife Population Analysis. (4 Credits)**

I. Prerequisites: BIO 316 (grade of C or better), STA 215 or STA 270 (grade of C or better), and Wildlife Management major; or departmental approval. Quantitative population ecology of vertebrates, with a focus on sampling and analysis of field data applicable to wildlife conservation. Credit will not be awarded for both WLD 382 and WLD 382W. 2 Lec/4 Lab.

**WLD 489. Wildlife Management Research and Writing. (3 Credits)**

I, II. Prerequisites: WLD 382 (grade of C or better); STA 215 or 270 (grade of C or better); junior or senior status; ENG 102 or ENG 105(B) or HON 102; and Wildlife Management major. Students will design and execute a research project or management plan. Emphasis placed on (a) writing a project proposal and (b) writing a final report. Credit will not be awarded to students who have credit for WLD 489W.

**WLD 489W. Wildlife Research and Writing. (3 Credits)**

I, II. Prerequisites: WLD 382 (grade of C or better); STA 215 or 270 (grade of C or better); junior or senior status; ENG 102 or ENG 105(B) or HON 102; and Wildlife Management major. Students will design and execute a research project or management plan. Emphasis placed on (a) writing a project proposal and (b) writing a final report. Credit will not be awarded to students who have credit for WLD 489.

**WLD 583. Game Species Management. (3 Credits)**

A. Prerequisite or corequisite: WLD 381 (C or better) or departmental approval. Biology and ecology of the major game species found in North America with emphasis on current management practices and problems. Credit will not be awarded to students who have credit for BIO 599/799 Special Topics: Game Species Management.

**WLD 584. Upland Wildlife Management. (4 Credits)**

A. Prerequisite: WLD 381 (with grade of C or better) or departmental approval. Ecological principles and management strategies to preserve and enhance forest and grassland wildlife and their habitats. 2 Lec/2 Lab.

**WLD 585. Wildlife Resource Policy and Administration. (3 Credits)**

II. Prerequisite: WLD 381 (grade of C or better) or Departmental approval. Discussion of state, regional, national, and international policies and agencies which impact management of wildlife resources; with emphasis on North America.

**WLD 586. Wetland Wildlife Management. (4 Credits)**

II. Prerequisites: BIO 316 (grade of C or better) and WLD 381 (grade of C or better) or Departmental approval. Ecology and management of migratory and resident wetland wildlife populations and their habitats, with a focus on waterfowl. 2 Lec/4 Lab.

**WLD 587. Urban Wildlife Management. (3 Credits)**

A. Formerly BIO 587. Prerequisites or Corequisites: BIO 316 (with grade of C or better) and WLD 381 (with grade of C or better); or departmental approval. The strategies employed to manage urban wildlife and prevent/control animal damage in North America will be discussed. Credit will not be awarded to students who have credit for BIO 587.

**WLD 588. Fire Ecology and Management. (1 Credit)**

(1) I. Prerequisite: ENG 101 or departmental approval. Course addressing fire behavior and skills related to fire prescription, wildfire suppression, and the role of fire in wildlife management. 2Lec/lab.

**WLD 599. Topics in Wildlife Management. (1-6 Credits)**

A. Prerequisites: Sr. Standing; BIO 316 (C or better), WLD 381 (C or better) and departmental approval. Special topics in wildlife management of current interest to faculty and students will be presented through lecture, discussion, and reports. May be retaken to a maximum of 6 hours, provided the subject matter differs each time.

# Biology, Bachelor of Science with a Concentration in Aquatic Biology (B.S.)

## Program Requirements

CIP Code: 26.0101

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

## Major

Code	Title	Hours
<b>University Graduation Requirements</b>		
	General Education	36
<i>Student Success Seminar</i>		
SCO 100	Student Success Seminar (waived for transfers with 30+ hrs.)	1

Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)

### Major Requirements

#### Core Courses

BIO 111	Cell and Molecular Biology	4
BIO 112	Ecology and Evolution	4
BIO 315	Genetics	4
BIO 316	Ecology	4
BIO 318	General Botany	4
BIO 319	General Zoology	4
BIO 320	Principles of Microbiology	4
BIO 495	Evolutionary Application and Theory	1

### Concentrations

Students must select at least one of the following Concentrations: Courses used for one concentration may not count toward another concentration.

Aquatic Biology	26-27
Biodiversity and Conservation	
General Biology	
Biology Teaching	
<i>Free Electives</i>	
Choose from 27-28 hours of free electives	27-28
<b>Total Hours</b>	<b>120</b>

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
BIO 525	Aquatic and Wetland Plants	3
BIO 542	Freshwater Invertebrates	3
BIO 557	Ichthyology	3
BIO 558	Freshwater Ecology	3
	Choose from one of the following:	3
BIO 556	Herpetology	
BIO 561	Fisheries Biology	
GLY 315	Hydrology	
<i>Supporting Course Requirements</i>		
CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
MAT 234 or MAT 211	Calculus I (Element 2) <sup>G</sup> Applied Calculus	
PHY 131 or PHY 201	College Physics I (Element 4) <sup>G</sup> University Physics I	
STA 215 or STA 270	Introduction to Statistical Reasoning Applied Statistics	3-4
<b>Total Hours</b>		<b>26-27</b>

### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

BIO 495	Evolutionary Application and Theory	1

#### Concentrations

Students must select at least one of the following Concentrations:

Courses used for one concentration may not count toward another concentration.

Aquatic Biology	
Biodiversity and Conservation	
General Biology	23-24
Biology Teaching	
<i>Free Electives</i>	
Choose from 30- 31 hours of free electives	30-31
<b>Total Hours</b>	<b>120</b>

#### Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
Choose from 12 hours of the following: <sup>1</sup>		12
Any 300, 400, or 500 level BIO, CHE, or PHY course not included in Biology Core or from which Biology majors are not excluded		
PHY 132	College Physics II	
or PHY 202	University Physics II	
<i>Supporting Course Requirements</i>		
CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
MAT 234	Calculus I (Element 2) <sup>G</sup>	
or MAT 211	Applied Calculus	
PHY 131	College Physics I (Element 4) <sup>G</sup>	
or PHY 201	University Physics I	
STA 215	Introduction to Statistical Reasoning	3-4
or STA 270	Applied Statistics	
<b>Total Hours</b>		<b>23-24</b>

<sup>1</sup>

Students applying to graduate school are strongly advised to include CHE 362 Organic Chemistry II/CHE 362L Organic Chemistry Lab II and PHY 132 College Physics II or PHY 202 University Physics II as part of the 12 hours.

### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

## Biology, Minor

Students pursuing Biology or Biomedical Sciences degrees may not declare a Minor in Biology.

## Teaching Certification for Biology Minor

The previously described minor in biology must be coupled with a secondary teaching certificate in another discipline to qualify students to teach biology at the secondary level. Students enrolled in a teaching program other than science who desire teaching certification in biology will be required to take ESE 561 Teaching Science in Secondary School and student teach in biology. Please note that the biology minor GPA must be 2.75 or greater to seek certification in biology. The minor certification cannot be recommended until the secondary teaching program is completed and a recommendation for certification has been processed. Appropriate PRAXIS exams must be completed for each area of certification being recommended.

### PRAXIS Examination

Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education requirements. Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

## Program Requirements

A student may qualify for a minor in biology by completing 21 semester hours to include:

Code	Title	Hours
<b>Required Courses</b>		
BIO 111	Cell and Molecular Biology	4
BIO 112	Ecology and Evolution	4
BIO 318	General Botany	4
BIO 319	General Zoology	4
	Choose from five hours of 300 through 500 level courses normally taken for one of the majors in the department	5
<b>Total Hours</b>		<b>21</b>

## Biomedical Sciences, Bachelor of Science with a Concentration in Biomedical Research (B.S.)

The Biomedical Sciences degree program is a rigorous program designed to prepare students for careers in biomedical research and a wide variety of biomedical professional programs. The Biomedical Sciences degree can be tailored to prepare students for graduate or professional schools, including but not limited to medical, dental, physician associates, optometry, and veterinary medicine. This degree will prepare students interested in pursuing a broad range of careers, including biotechnology, industrial microbiology, or pharmaceutical sales. The biomedical sciences degree provides students with a curriculum that develops strong creative and critical thinking skills while also providing them with the required and recommended courses for admission to graduate and professional schools.

## Admission Requirements

All students must be admitted to the University by the ECU Admissions Office and declare their major as biomedical sciences (BMS). For admission to the BMS program, a high school graduate must meet the following three criteria:

1. A Math ACT score of 23 (or equivalent SAT) or a "C" or better in MAT 112A Algebra: Polynomials/MAT 112B Algebra: Functions & Matrices or MAT 114 College Algebra
2. An English ACT score of 20 (or equivalent SAT), or a "C" or better in ENG 101 Reading, Writing, and Rhetoric
3. A High School GPA of a 3.0.

Individuals who are transfer students or wish to change their major must have attained a minimum GPA of 3.00 overall on a minimum of 24 hours attempted. Entering freshmen and transfer students who do not meet the minimum requirements are encouraged to enroll in the general option of the Biology BS Degree program, until qualified to transfer into the program.

### Progression Policy

The Biomedical Sciences degree program limits the number of major core, concentration, and supporting courses which may be repeated. Students are allowed only one repeat per major course and a total of not more than two repeats in all major courses combined. In addition, a supporting course may be repeated only once.

To remain in the Biomedical Sciences degree program, a student must maintain an ECU GPA and overall GPA of 3.0 with a grade of "C"/2.0 or better in each of the supporting and major courses of the curriculum. Students who fail to maintain a 3.0 GPA will be removed from the BMS program and placed in the Biology B.S. program, General Biology Concentration.

## Program Requirements

The Biomedical Sciences degree program is a rigorous program designed to prepare students for careers in biomedical research and a wide variety of biomedical professional programs. The Biomedical Sciences degree can be tailored to prepare students for graduate or professional schools, including but not limited to medical, dental, physician associates, optometry, and veterinary medicine. This degree will prepare students interested in pursuing a broad range of careers, including biotechnology, industrial microbiology, or pharmaceutical sales. The biomedical sciences degree provides students with a curriculum that develops strong creative and critical thinking skills while also providing them with the required

and recommended courses for admission to graduate and professional schools.

## Admission Requirements

All students must be admitted to the University by the EKU Admissions Office and declare their major as biomedical sciences (BMS). For admission to the BMS program, a high school graduate must meet the following three criteria:

1. A Math ACT score of 23 (or equivalent SAT) or a "C" or better in MAT 112A Algebra: Polynomials/MAT 112B Algebra: Functions & Matrices or MAT 114 College Algebra
2. An English ACT score of 20 (or equivalent SAT), or a "C" or better in ENG 101 Reading, Writing, and Rhetoric
3. A High School GPA of a 3.0.

Individuals who are transfer students or wish to change their major must have attained a minimum GPA of 3.00 overall on a minimum of 24 hours attempted. Entering freshmen and transfer students who do not meet the minimum requirements are encouraged to enroll in the general option of the Biology BS Degree program, until qualified to transfer into the program.

## Progression Policy

The Biomedical Sciences degree program limits the number of major core, concentration, and supporting courses which may be repeated. Students are allowed only one repeat per major course and a total of not more than two repeats in all major courses combined. In addition, a supporting course may be repeated only once.

To remain in the Biomedical Sciences degree program, a student must maintain an EKU GPA and overall GPA of 3.0 with a grade of "C"/2.0 or better in each of the supporting and major courses of the curriculum. Students who fail to maintain a 3.0 GPA will be removed from the BMS program and placed in the Biology B.S. program, General Biology Concentration.

Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)

### Major Requirements

#### Core Courses

BIO 111	Cell and Molecular Biology	4
BIO 112	Ecology and Evolution	4
BIO 315	Genetics	4
BIO 319	General Zoology	4
BIO 320	Principles of Microbiology	4
BIO 331	Cell Biology	3
BIO 332	Careers in Biomedical Sciences	1
BIO 348	Vertebrate Physiology	3
BIO 495	Evolutionary Application and Theory	1

### Concentrations

Students must select at least one of the following Concentrations: <sup>1</sup>

Biomedical Research	
Pre-Medical	
Pre-Dental	
Pre-Physician Associate	
Pre-Optometry	28-30
Pre-Veterinary	

### Supporting Course Requirements

All Concentrations:

CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
INF 104	Computer Literacy with Software Applications	3
PHI 383	Health & Biomedical Ethics	3
or PHI 383W	Health and Biomedical Ethics	
PHY 131	College Physics I (Element 4) <sup>G</sup>	
or PHY 201	University Physics I	

Choose from one of the following:

STA 215	Introduction to Statistical Reasoning (Element 2) <sup>G</sup>	
STA 270	Applied Statistics (Element 2) <sup>G,2</sup>	

### Free Electives

Choose from 11-13 hours of free electives	11-13
---	-------

<b>Total Hours</b>	<b>120</b>
--------------------	------------

1

Courses used for one concentration may not count toward another concentration.

2

STA 270 Applied Statistics may be required for admission to Physician Associate or other professional programs.

G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

# Biomedical Sciences, Bachelor of Science with a Concentration in Pre-Physician Associate (B.S.)

The Biomedical Sciences degree program is a rigorous program designed to prepare students for careers in biomedical research and a wide variety

of biomedical professional programs. The Biomedical Sciences degree can be tailored to prepare students for graduate or professional schools, including but not limited to medical, dental, physician associates, optometry, and veterinary medicine. This degree will prepare students interested in pursuing a broad range of careers, including biotechnology, industrial microbiology, or pharmaceutical sales. The biomedical sciences degree provides students with a curriculum that develops strong creative and critical thinking skills while also providing them with the required and recommended courses for admission to graduate and professional schools.

## Admission Requirements

All students must be admitted to the University by the ECU Admissions Office and declare their major as biomedical sciences (BMS). For admission to the BMS program, a high school graduate must meet the following three criteria:

1. A Math ACT score of 23 (or equivalent SAT) or a "C" or better in MAT 112A Algebra: Polynomials/MAT 112B Algebra: Functions & Matrices or MAT 114 College Algebra
2. An English ACT score of 20 (or equivalent SAT), or a "C" or better in ENG 101 Reading, Writing, and Rhetoric
3. A High School GPA of a 3.0.

Individuals who are transfer students or wish to change their major must have attained a minimum GPA of 3.00 overall on a minimum of 24 hours attempted. Entering freshmen and transfer students who do not meet the minimum requirements are encouraged to enroll in the general option of the Biology BS Degree program, until qualified to transfer into the program.

## Progression Policy

### Chemistry

#### CHE 100. Inquiry Chemistry for Middle School Teachers. (3 Credits)

A. Prerequisite: completion of all academic readiness requirements in English and reading or completion of ENG 101R and Math ACT score of 19 or higher, Math SAT score of 500 or higher, or passing score on the math placement test, or MAT 105 or higher; pre-teaching or teaching middle school, special education, and DHH education majors only, Activity oriented chemistry; elements, molecules, solutions, acids and bases, reactions, energy and environmental topics. 2 Lec/2 Lab. Gen. Ed. E-4 [NS].

**CHE 101. Introductory Chemistry. (3 Credits)**

I, II. Prerequisite: completion of all academic readiness requirements in English and reading or completion of ENG 101R; and Math ACT score of 19 or higher, or passing score on math placement test, or Math SAT score of 500 or higher, or MAT 105 or higher. Corequisite: CHE 101L. For students who plan to take no more than one year of chemistry. Basic principles of structure and properties of matter, chemical nomenclature and reactivity. Relates chemistry concepts to everyday life phenomena. A withdrawal from CHE 101 must be matched by a withdrawal from CHE 101L. Gen. Ed. E-4 with CHE 101L [NS].

**CHE 101L. Introductory Chemistry Lab. (1 Credit)**

I, II. Prerequisite: completion of all developmental requirements in English and reading. Prerequisite or Corequisite: CHE 101. Laboratory component of CHE 101. Basic laboratory techniques, methods of separation, types of chemical reactions, solution preparation, titrations, household chemicals, molecular modeling. 2 Lab. Gen. Ed. IVB with CHE 101. Credit will not be awarded for both CHE 101L and CHE 107.

**CHE 102. Introductory Chemistry II. (3 Credits)**

I, II. Prerequisite: CHE 101 and 101L or CHE 111 and 111L. Prerequisite or Corequisite: CHE 102L. Continuation of CHE 101. A survey on the classes of organic molecules including their common uses and physical and chemical properties. In addition, an introductory look at the structure and function of biological macromolecules. Gen. Ed. VII (NS) with CHE 102L. Withdrawal from CHE 102 must be matched by a withdrawal from CHE 102L.

**CHE 102L. Introductory Chemistry Lab II. (1 Credit)**

I, II. Prerequisite: CHE 101 and 101L. Prerequisite or Corequisite: CHE 102. Lab component of CHE 102. Perform basic organic reactions and laboratory procedures including melting point, distillation, and recrystallization. 2 Lab. Gen. Ed. VII (NS) with CHE 102.

**CHE 104. Inquiry Physical Science for Elementary Teachers. (3 Credits)**

I, II. Cross-Listed with PHY 104. Prerequisite: Elementary, special education elementary, and DHH elementary education majors only, sophomore standing, and MAT 112 or 112B or higher. An activity-oriented conceptual course in the physical sciences. Topics include the structure and properties of matter, heat and temperature, forces, motion, magnets, energy, and sound waves. Credit will not be awarded for students who have credit for PHY 104. 2 Lec/2 Lab.

**CHE 105. Chemistry for the Health Sciences. (3 Credits)**

I, II. Prerequisite: completion of all academic readiness indicators in English and reading or completion of ENG 101R; and math ACT score of 19 or higher, math SAT score of 500 or higher or passing score on the math placement test. or, MAT 105 or higher or STA 215 or higher. Prerequisite or Corequisite: CHE 105L. An introductory course for students in allied health. Principles of bonding structure, and reactivity related to biological processes. A withdrawal from CHE 105 must be matched by a withdrawal from CHE 105L. Gen. Ed. VII (NS) or IVB with CHE 105L.

**CHE 105L. Health Science Chemistry Lab. (1 Credit)**

I, II. Prerequisite: completion of all academic readiness requirements in English and reading or completion of ENG 101R; Math ACT score of 19 or higher, Math SAT score of 510 or higher, MAT105 or higher, or passing score on math placement test, or STA 215 or higher. Prerequisite or Corequisite: CHE 105. Laboratory experiments that demonstrate chemical concepts and laboratory techniques related to the health science profession. 2 Lab. Gen. Ed, VII (NS) or IVB with CHE 105.

**CHE 107. Introductory Chemistry Lab. (1 Credit)**

I, II. Prerequisite: completion of all developmental requirements. Prerequisite or Corequisite: CHE 101 or CHE 105. Laboratory component of CHE 101 and CHE 105. Basic laboratory techniques, methods of separation, types of chemical reactions, solution preparation, titrations, household chemicals, molecular modeling. 2 Lab. Gen. Ed. IVB with CHE 101 or CHE 105.

**CHE 110. General Chemistry Preparation. (3 Credits)**

A. Prerequisite: Completion of all developmental requirements. Prepares students for further studies in general chemistry. Topics will include introduction to matter, chemical formulas and reactions, bonding and molecules, chemical calculations and the periodic table.

**CHE 111. General Chemistry. (3 Credits)**

I, II. Prerequisite or Corequisite: CHE 111L and ACT math score of 22 or higher; or SAT math score of 530; or MAT 112B (C or better) or MAT 114 (C or better) or higher or departmental approval. Principles of atomic and molecular structure and reactivity, stoichiometry, states of matter. Prepares students for further studies in chemistry. One year of high school chemistry is recommended. A withdrawal from CHE 111 must be matched by a withdrawal from CHE 111L. Gen. Ed. VII (NS) or IVB with CHE 111L.

**CHE 111L. General Chemistry Lab I. (1 Credit)**

I, II. Formerly CHE 115. Prerequisite or Corequisite: CHE 111. Laboratory component of CHE 111. Basic laboratory techniques, methods of separation, types of chemical reactions, solution preparation and standardization, titrations, molecular modeling, qualitative analysis, gases, virtual labs on computer. Credit will not be awarded to students who have credit for CHE 115. 3 Lab. Gen. Ed. IVB with CHE 111.

**CHE 112. General Chemistry II. (3 Credits)**

I, II. Prerequisite: CHE 111 and 111L with a grade of "C" or better. Prerequisite or Corequisite: CHE 112L or CHE 112HL with a grade of "C" or better. Continuation of CHE 111. Kinetics and equilibrium, solution chemistry, energy changes in chemical reactions, descriptive inorganic chemistry. Prepares students for further studies in chemistry. A withdrawal from CHE 112 must be matched by a withdrawal from CHE 112L or CHE 112HL. Gen. Ed. VII (NS) or IVB with CHE 112L or CHE 112HL.

**CHE 112L. General Chemistry Lab. (1 Credit)**

I, II. Formerly CHE 116. Prerequisites: CHE 111 and 111L with a grade of "C" or better. Prerequisite or Corequisite: CHE 112 with a grade of "C" or better. Laboratory component of CHE 112. Kinetics, equilibrium, UV-VIS spectroscopy, introductory qualitative and quantitative analysis, electrochemistry, virtual labs on computer. Credit will not be awarded to students who have credit for CHE 116. 3 Lab. Gen. Ed. IVB with CHE 112.

**CHE 200. Volunteering in Chemistry. (0 Credits)**

(0) A. An exposure to chemistry outreach activities, including, but not limited to exploring chemical research projects, organizing chemistry community service, and assisting other chemistry departmental events. Students can choose the focus of the volunteering in each semester. Passing grade achieved for attending 80% of the designated activities in each semester.

**CHE 250. Descriptive Inorganic Chemistry. (2 Credits)**

(2) A. Prerequisite: CHE 112 and CHE 112L with grade of 'C' or better. Basic principles of inorganic chemistry including the discovery of the elements, their properties, and the significance of the Periodic table; atomic structure, bonding models, acid-base chemistry, oxidation-reduction chemistry, and coordination chemistry. (2 Lec)

**CHE 261. Organic Chemistry Preparation. (3 Credits)**

A. Prepares students for further studies in organic chemistry. This course will emphasize fundamental concepts and help students develop a productive mindset for studying Organic Chemistry.

**CHE 325. Analytical Chemistry. (3 Credits)**

A. Prerequisite: CHE 112 and 112L (C or better). Prerequisite or Corequisite: CHE 325L. Introduces chemical analysis (with statistical evaluations) focusing on the principles of stoichiometry, chemical equilibrium, titrimetric and spectrophotometric analysis, potentiometry, and analytical separation processes. 3 Lec. A withdrawal from CHE 325 must be matched by a withdrawal from CHE 325L.

**CHE 325L. Analytical Chemistry Lab. (2 Credits)**

A. Prerequisite: CHE 112 and 112L (C or better). Prerequisite or Corequisite: CHE 325. Lab component of CHE 325. Lab course designed to introduce the principles of wet chemical techniques and basic instrumental analysis through experimentation. 4 Lab.

**CHE 349. Applied Learning in Chemistry. (0.5-8 Credits)**

A. Work in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: sixteen, baccalaureate. A minimum of 80 hours of employment required for each semester hour of academic credit. May not be used to satisfy area, major or minor requirements.

**CHE 349A. Cooperative Study: Chemistry. (0.5-8 Credits)**

A. Work in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: sixteen, baccalaureate. A minimum of 80 hours of employment required for each semester hour of academic credit. May not be used to satisfy area, major or minor requirements.

**CHE 349B. Cooperative Study: Chemistry. (0.5-8 Credits)**

A. Work in placements related to academic studies. May not be used to satisfy area, major or minor requirements.

**CHE 349C. Cooperative Study: Chemistry. (0.5-8 Credits)**

A. Work in placements related to academic studies. May not be used to satisfy area, major or minor requirements.

**CHE 349D. Cooperative Study: Chemistry. (0.5-8 Credits)**

A. Work in placements related to academic studies. May not be used to satisfy area, major or minor requirements.

**CHE 349E. Cooperative Study: Chemistry. (0.5-8 Credits)**

A. Work in placements related to academic studies. May not be used to satisfy area, major or minor requirements.

**CHE 361. Organic Chemistry I. (3 Credits)**

I, II. Prerequisite: CHE 112 and 112L (C or above). Prerequisite or Co-requisite: CHE361L. Bonding; structure; reaction theory; aliphatic hydrocarbons; functional groups; stereochemistry; aromatic hydrocarbons; spectroscopy; substitution and elimination reactions. A withdrawal from CHE 361 must be matched by a withdrawal from CHE 366.

**CHE 361L. Organic Chemistry Lab I. (1 Credit)**

I, II. Formerly: CHE 366. Prerequisite or Corequisite: CHE 361. Laboratory component of CHE 361. Experimental work to illustrate principles of organic chemistry. Basic techniques including separation and spectroscopic methods; and selected syntheses. 3 Lab. Credit will not be awarded to students who have credit for CHE 366.

**CHE 362. Organic Chemistry II. (3 Credits)**

I, II. Prerequisites: CHE 361 and CHE361L ("C" or above). Prerequisite or Co-requisite: CHE362L. Alcohols and ethers; aldehydes and ketones; carboxylic acids and derivatives; carbanions; amines; phenols; carbohydrates and amino acids. A withdrawal from CHE 362 must be matched by a withdrawal from CHE 362L.

**CHE 362L. Organic Chemistry Lab II. (1 Credit)**

I, II. Formerly: CHE 367. Prerequisites: CHE 361 and CHE 361L with a "C" (2.0) or better. Prerequisite or Corequisite: CHE 362. Laboratory component of CHE 362. Experimental work to illustrate principles of organic chemistry. Selected chemical syntheses and advanced techniques such as separation and spectroscopic methods. 3 Lab. Credit will not be awarded to students who have credit for CHE 367.

**CHE 385. Chemical Literature. (3 Credits)**

A. Prerequisites: CHE 112(C) and ENG 102, 105(B), or HON 102. Course introduces chemical literature searching, and methods for disseminating chemical data. At the end of this course students will be able to demonstrate the skill to create effective and appropriate styled chemical reports and presentations. Credit will not be awarded to students who have credit for CHE 385W.

**CHE 385W. Chemical Literature. (3 Credits)**

A. Prerequisites: CHE 112(C) and ENG 102, 105(B), or HON 102. Course introduces chemical literature searching, and methods for disseminating chemical data. At the end of this course students will be able to demonstrate the skill to create effective and appropriate styled chemical reports and presentations. Credit will not be awarded to students who have credit for CHE 385.

**CHE 411. Practicum. (1-3 Credits)**

(1-3) A. Departmental Approval. Students will gain specific experiences through participation in planning, testing, analysis, and/or required maintenance in a designated undergraduate chemistry course. Formal project assigned by faculty mentor. May be retaken for a maximum of three hours. Student must have the Chemistry Practicum Enrollment Form approved by faculty mentor and departmental chair prior to enrollment. 3-9 lab.

**CHE 425. Instrumental Analysis. (3 Credits)**

A. Cross-listed as FOR 411. Prerequisites: CHE 325, 325L, 362, 362L; PHY 132 (or 202); MAT 234 (C or better in each course). Prerequisite or Co-requisite: CHE 425L. Fundamental principles of the operation and application of an analytical instrumentation including spectroscopy, chromatography, electrochemistry, and mass spectrometry found throughout industrial, government, forensic, and/or research environments is presented. Credit will not be awarded to those who have received credit for FOR 411 or CHE 525. 3 Lec.

**CHE 425L. Instrumental Analysis Lab. (1 Credit)**

A. Co-requisite: CHE 425. Lab component of CHE 425. Lab course designed to provide hands-on experience with modern chemical instrumentation for qualitative and quantitative measurements found throughout industrial, government, and/or research environments. Credit will not be awarded for both CHE 425L and FOR 411L. 3 Lab.

**CHE 430. Biochemistry of Macromolecules. (3 Credits)**

A. Prerequisites: CHE 362 and 362L. Structure, analysis, and organization of proteins, nucleic acids, and lipids; physical and organic mechanisms of enzyme action; chemistry of membrane action and the immune system. Credit will not be awarded for both CHE 430 and CHE 530.

**CHE 431. Metabolic Biochemistry. (3 Credits)**

A Prerequisites: CHE 430 (C or better). Continuation of CHE 430. Chemistry, catabolism, and biosynthesis of carbohydrates, lipids, amino acids, and nucleotides; mechanisms of metabolic control.

**CHE 432. Biochemistry Laboratory. (1 Credit)**

A. Prerequisite or Corequisite: CHE 430 or 431 or departmental approval. Experimental techniques characteristic of biochemical research. Purification and characterization of proteins and nucleic acids; use of computers in modeling biochemistry data. 3 Lab. Credit will not be awarded for both CHE 432 and CHE 532.

**CHE 450. Inorganic Chemistry. (3 Credits)**

I. Prerequisite: CHE 250 (C) and CHE 362 (C). Principles of inorganic chemistry with emphasis on advanced chemical bonding models and their applications to solid-state, coordination, organometallic, bioinorganic, and materials chemistry. (3 Lec).

**CHE 485. Chemistry Seminar. (1 Credit)**

I, II. Prerequisite: CHE 362 (C). Presentation of specific chemical research from recent literature and/or performed experimentation to members of the chemistry faculty and departmental majors. One weekly meeting. May be retaken to a maximum of three hours. Cannot be taken concurrently with CHE 385W.

**CHE 495A. Independent Chemical Research. (1 Credit)**

A. Prerequisite: CHE 112 and departmental approval. An introduction to research in all fields of chemistry. Literature-based assigned research project with a faculty mentor that will require a formal research report. May be retaken to a maximum of three hours. A maximum of six hours of independent study may be applied per degree earned. Student must have the independent study proposal form approved by faculty mentor and departmental chair prior to enrollment. Credit will not be awarded for both CHE 495 and CHE 495A. 3 Lab.

**CHE 495B. Chemistry Laboratory Independent Research: \_\_\_\_\_. (1-3 Credits)**

A. Prerequisites: CHE 112 and departmental approval. Objectives and techniques of chemical research. Problems in all fields of chemistry. May be retaken to a maximum of six hours. A maximum of six hours of independent study may be applied per degree earned. Students must have the independent study proposal form approved by faculty supervisor and departmental chair prior to enrollment. 3-9 Lab. Credit will not be awarded for both CHE 495 and CHE 495B.

**CHE 501. Chemtopics: \_\_\_\_\_. (3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from current and/or specialized area of chemistry such as environmental chemistry or industrial chemistry. Topics will vary according to students needs. May be retaken to a maximum of six hours.

**CHE 501A. Chemtopics: \_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 501B. Chemtopics: \_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 501C. Chemtopics: \_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 501D. Chemtopics. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 501E. Chemtopics: \_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 501L. Chemtopics Lab: \_\_\_\_\_. (1 Credit)**

A. Prerequisite: departmental approval. Laboratory experiences chosen from specialized areas of chemistry including advanced chemical instrumentation/analysis, synthetic methods, computational chemistry, or molecular modeling. Topics vary according to student needs. May be retaken to a maximum of two hours. 3 Lab.

**CHE 502. Polymers & Particles. (1 Credit)**

A. Prerequisite: CHE 361/361L ('C' or better in both). Study of the structure, synthesis, preparation, characterization, and properties of synthetic polymers, supramolecular aggregates, and/or meso- or nanoscale materials. (3 Lab)

**CHE 515. Synthetic & Analytical Methods. (3 Credits)**

A. Prerequisites: CHE 362, 362L, 425 (or FOR 411), 425L (or FOR 411L) (C or better in each course). Pre or Corequisite: CHE 450 (C or better). Synthesis, isolation, purification, and characterization (including spectroscopy and other analytical methods) of inorganic and organic compounds and mixtures. Other methods include handling of air and moisture sensitive compounds and molecular computations. 3 Lec/6 Lab.

**CHE 515L. Synthetic & Analytical Methods Lab. (2 Credits)**

A. Prerequisites: CHE 362, 362L, 425 (or FOR 411), 425L (or FOR 411L) (C or better in each course). Senior standing. Prerequisite or Corequisite: CHE 450 (C or better), CHE 515 or CHE 715 (C or better). Synthesis, isolation, purification, and characterization (including spectroscopy and other analytical methods) of inorganic and organic compounds and mixtures. Other methods include handling of air and moisture sensitive compounds and molecular computations. 6 Lab.

**CHE 520. Mass Spectrometry. (3 Credits)**

A. Prerequisite: CHE 362 (C). Topics include types of mass spectrometers; qualitative and quantitative mass spectrometry, different ionization processes, sample inlet systems (including chromatography systems), and interpretation of mass spectral data. Credit will not be awarded for both CHE 520 and FOR 475.

**CHE 570. Biophysical Chemistry I. (4 Credits)**

I, II. Prerequisite: CHE 361 (C or better), BIO 111 or higher (C or better), and either MAT 234 or MAT 261. Prerequisite or Corequisite: PHY 131 or 201. An introduction to physical and chemical explanations of biological phenomenon and physical chemistry theories and methodologies applied on biological systems. Topics include thermodynamics, chemical equilibrium, kinetics, quantum chemistry, spectroscopy, and selected topics. 3 Lec/ 2.5 lab. Credit will not be awarded for CHE 470, 570, 770.

**CHE 574. Physical Chemistry I. (3 Credits)**

A. Prerequisite: CHE 361 (C or better). Prerequisites or Corequisites: CHE 574L and MAT 244 and PHY 131 or 201 (C or better in each course). A study of thermodynamic properties in physical and chemical systems; electrochemical processes; rates and mechanisms of chemical reactions. Credit will not be awarded for both CHE 574 and CHE 471.

**CHE 574L. Physical Chemistry Lab I. (1 Credit)**

A. Prerequisite: CHE 325 and 325L (C or better in each course). Prerequisites or Corequisites: CHE 574 and CHE 385 or 385W (C or better in each course). Laboratory component of CHE 574. Experimental work to illustrate principles of physical chemistry that include thermochemistry, thermodynamics, equilibrium, and reaction kinetics. 3 Lab.

**CHE 575. Physical Chemistry II. (3 Credits)**

A. Prerequisite: CHE 361 (C or better). Prerequisite or Corequisite: CHE 575L and MAT 254 and PHY 132 or 202 (C or better in each course). An introduction to quantum mechanics as applied to model, atomic, and molecular systems; applications of atomic and molecular spectroscopy; introduction to computational chemistry. Credit will not be awarded for both CHE 575 and CHE 472.

**CHE 575L. Physical Chemistry Lab II. (1 Credit)**

A. Prerequisite: CHE 325 and 325L (C or better in each course). Prerequisites or Corequisites: CHE 575 and CHE 385 or 385W (C or better in each course). Laboratory component of CHE 575. Experimental work to illustrate principles of physical chemistry including UV-visible, infrared, and fluorescence spectroscopic techniques, fundamentals of laser operation, statistical mechanics, and computational chemistry. 3 Lab.

**CHE 576. Advanced Physical Chemistry. (3 Credits)**

A. Prerequisite: CHE 575 (MAT 353 Recommended) or departmental approval. Intermediate and advanced topics in thermodynamics, kinetics, structure and bonding. Credit will not be awarded to students who have credit for CHE 572.

**Fermentation****FMT 140. Introduction to Fermentation. (4 Credits)**

A. Prerequisites: completion of all academic readiness requirements. Course will provide an introduction to chemical and biological concepts as it relates to the production of desirable beverages and other products through biochemical pathways of microorganisms typically used (for fermentation process). 3 Lec/ 3 Lab. Gen. Ed. E-4 [NS].

**FMT 343. Fermentation Microbiology. (3 Credits)**

A. Prerequisites: FMT 140 (C). Course demonstrates the biochemistry, genetics, and behavior of microorganisms for the production of fermented beverages. 2 Lec/ 3 Lab. Credit will not be awarded for both FMT 343 and 540.

**FMT 344. Chemical Analysis & Quality Control. (4 Credits)**

A. Prerequisite: FMT 140 (C) and ACT math score of 22+ or SAT math score of 530+ or MAT 112B (C) or higher. Course focuses on quality assurance and control (QA/QC) based on analysis using chemical and instrumental methods of initial feedstocks, water, and fermentation products. Analysis will be based in current industrial standards. 3Lec/ 3 Lab.

**FMT 345. Sensory Analysis. (2 Credits)**

Prerequisite: FMT 140 (C) and age requirement of 21 and over. Basic principles involved in sensory perception pertaining to neurochemistry and practical sensory experience with products generated from fermentation process. 1 LEC/2 LAB.

**FMT 349. Applied Learning in Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349A. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349B. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349C. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349D. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349E. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349F. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349G. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349H. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349I. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349J. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349K. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349L. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349M. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 349N. Cooperative Study: Fermentation Science. (0.5-8 Credits)**

Prerequisite: FMT 140 (C) and departmental approval. Independent investigations and study related to academic studies in fermentation science and based in a laboratory setting. One half to eight hours credit per semester or summer. A minimum of 80 hours of employment required for each semester hour of academic credit. May be repeated for a maximum of 12 credit hours but only three hours may be counted towards the major requirements.

**FMT 495. Fermentation Research. (1-3 Credits)**

A. Prerequisites: FMT 340 (C) and departmental approval. Students concentrate on the objectives and techniques of fermentation science research to address a variety of issues / problems in all aspects of the field. May be retaken to a maximum of six hours but only three hours can count towards a degree. Student must have the independent study proposal form approved by faculty supervisor and departmental chair prior to enrollment. 3-9 Lab.

**FMT 501A. Special Topics in Fermentation:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: Senior standing and departmental approval. Lecture or laboratory experience to be chosen from current and/or specialized area of fermentation science including (but not limited to) historical aspects, advanced methods of analysis, or facility building. Topics will vary according to student interests and needs. May be retaken to a maximum of six hours. If a laboratory course, then three contact hours will be required for every credit hour.

**FMT 501B. Special Topics in Fermentation:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: Senior standing and departmental approval. Lecture or laboratory experience to be chosen from current and/or specialized area of fermentation science including (but not limited to) historical aspects, advanced methods of analysis, or facility building. Topics will vary according to student interests and needs. May be retaken to a maximum of six hours. If a laboratory course, then three contact hours will be required for every credit hour.

**FMT 501C. Special Topics in Fermentation:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: Senior standing and departmental approval. Lecture or laboratory experience to be chosen from current and/or specialized area of fermentation science including (but not limited to) historical aspects, advanced methods of analysis, or facility building. Topics will vary according to student interests and needs. May be retaken to a maximum of six hours. If a laboratory course, then three contact hours will be required for every credit hour.

**FMT 501D. Special Topics in Fermentation:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: Senior standing and departmental approval. Lecture or laboratory experience to be chosen from current and/or specialized area of fermentation science including (but not limited to) historical aspects, advanced methods of analysis, or facility building. Topics will vary according to student interests and needs. May be retaken to a maximum of six hours. If a laboratory course, then three contact hours will be required for every credit hour.

**FMT 549. Fermentation Project Lab. (2 Credits)**

Prerequisites: Senior standing, FMT 343 (C), and 344 (C). Age requirement (>21 years). Course to perform an independent capstone project where students will decide on the process to make a final fermentation product. Complete analysis of the product will also be performed at different stages of production. 1 Lec / 3 Lab.

## Forensic Science

### FOR 301. Introduction to Forensic Science. (3 Credits)

A. Introduction to the application of scientific methods for the examination of physical evidence in the criminal justice system; an overview of the forensic analysis of firearms, fingerprints, drugs, blood, hair, fibers, paint, glass, arson debris, etc.

### FOR 310. Training for Forensic Internships. (1 Credit)

(1) A. Prerequisite: Junior or Senior Standing in Forensic Science. This course provides the student guidance in the preparation for an internship and explains the forensic internship application process.

### FOR 330. Bloodstain Pattern Analysis. (1 Credit)

Prerequisite: FOR 301 (C), BIO 111 (C), and CHE 361(C). Bloodstain Pattern Analysis focuses on the identification and examination of bloodstain patterns, effectively recreating and establishing the types of activities and mechanisms that produced them. Prepares students for further studies/career in forensic biology. (1 Lec/2 Lab). Credit will not be awarded to students who have credit for CHE 501: Bloodstain Pattern Analysis.

### FOR 349. Applied Learning in Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349A. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349B. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349C. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349D. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349E. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349F. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349G. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349H. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349I. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349J. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349K. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349L. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349M. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

### FOR 349N. Cooperative Study: Forensic Science. (0.5-8 Credits)

(.5-8) A. Prerequisite: FOR 310 and Departmental Approval. Independent laboratory work and study related to forensic science in a laboratory setting. A minimum of 80 hours of employment are required for each semester hour of academic credit. May be retaken for a maximum of 8 credit hours.

**FOR 401. Forensic Professional Practice. (1 Credit)**

I. Prerequisite or Corequisite: FOR 401. Introduces professional practices and expectations for the forensic scientist. Includes discussion of professional organizations, certification, ethics, QA/QC, accreditation, technical writing, data treatment and interpretation.

**FOR 411. Instrumental Analysis. (3 Credits)**

A. Cross-listed with CHE 425. Prerequisites: CHE 325, 325L, 362, 362L; PHY 132 (or 202); MAT 234 (C or better in each course). Prerequisite or co-requisite: CHE 411L. Fundamental principles of the operation and application of analytical instrumentation including spectroscopy, chromatography, electrochemistry, and mass spectrometry found throughout industrial, government, forensic, and/or research environments is presented. Credit will not be awarded for both FOR 411 and CHE 425.

**FOR 411L. Forensic Instrumental Lab. (1 Credit)**

A. Prerequisite: BIO 121 (C); Prerequisite or co-requisite: FOR 411. Lab component of FOR 411. Hands-on experience operating instrumentation most commonly used in forensic science and analytical laboratories, including spectroscopic and chromatographic techniques. Credit will not be awarded for both FOR 411L and CHE 425L. 3 Lab.

**FOR 412. Forensic Trace Evidence. (3 Credits)**

II. Prerequisites: FOR 411 (C) or CHE 425 (C), FOR 411L (C) or CHE 425L (C), FOR 451 (C), and FOR 451L (C). Prerequisite or Corequisite: FOR 412L. Introduction and the application of the instrumentation and techniques to analyze various types of trace and impression evidence.

**FOR 412L. Forensic Trace Evidence Lab. (1 Credit)**

II. Prerequisites: FOR 411 or CHE 425 (C), FOR 411L or CHE 425L (C), FOR 451 and FOR 451L. Prerequisite or Corequisite: FOR 412. Lab component of FOR 412. Use of microscopes and various instruments for examination of forensic trace evidence materials. 3 Lab.

**FOR 431. DNA Profiling. (3 Credits)**

A. Prerequisite: BIO 111(C). Prerequisite or corequisite: CHE 361(C). This course will include topics in forensic DNA profiling; sample collection, DNA extraction, DNA quantitation and amplification. Prepares students for further studies/ career in forensic/molecular biology. Laboratory FOR 431L is optional with this course. Credit will not be awarded for both FOR 331 and FOR 431.

**FOR 431L. DNA Profiling Lab. (1 Credit)**

A. Prerequisite: CHE 361(C). Prerequisite or co-requisite: FOR 431. Laboratory course of FOR 431. Provides practical experience in Forensic DNA profiling: sample collection, DNA extraction, DNA quantitation and amplification. Prepares students for further studies/career in forensic/ molecular biology. Credit will not be awarded for both FOR 331L and FOR 431L.

**FOR 432. Forensic Serology. (1 Credit)**

Prerequisite: FOR 301 (C), BIO 111 (C), CHE 361 (C) and STA 270 or 215. Forensic Serology sample collection, biological fluid identification, and report writing. Prepares students for further studies/career in forensic biology. (1 Lecture/2 Lab).

**FOR 442. Forensic Toxicology & Drugs. (3 Credits)**

(3) II. Formerly: FOR 430. Prerequisite: CHE 362. Study of the chemistry, biochemical activity, isolation and identification of drugs of forensic interest in biological materials. Credit will not be awarded to students who have credit for FOR 430.

**FOR 442L. Drugs & Toxicology Lab. (1 Credit)**

II. Prerequisites: FOR 411 (C) and 411L (C) or CHE 425 (C) and 425L (C); Prerequisite or Corequisite: FOR 442. Introduces techniques and instrumentation used for the chemical separation and analysis of drugs in both solid dosage and toxicological samples. 3 Lab.

**FOR 451. Forensic Microscopic Analysis. (2 Credits)**

I. Prerequisite or Corequisite: PHY 132 (or 202), MAT 234, and for 451L (C or better). Introduction to concepts of forensic microscopic analysis; identification and characterization of trace evidence, such as glass, hair, fiber, and soil. Only forensic major or minor can take this class.

**FOR 451L. Forensic Microscopy Lab. (1 Credit)**

I. Prerequisite or Corequisite: FOR 451. Laboratory component of FOR 451. Use of stereoscopes and polarizing light microscopes for examination of forensic materials. 3 Lab.

**FOR 460. Selected Topics in Forensic Science. (1-3 Credits)**

A. Prerequisite: instructor approval. Topics will be chosen from areas of current interest and may be retaken for credit when new topics are offered. Topics and credit will be announced prior to each offering.

**FOR 465. Expert Witness Testimony. (3 Credits)**

A. Prerequisites: ENG 102 or ENG 105 (B) or HON 102 and either FOR 331 and 331L(C) or FOR 412 and 412L(C) or FOR 431 and 431L(C) or FOR 442 and 442L(C), INF 322, or departmental approval. Theory and purpose for expert witness testimony, qualifications of scientific experts, ethical issues, and practical aspects of expert witness discovery and courtroom testimony. Videotaping of testifying in mock testifying situations is also included. Credit will not be awarded for both FOR 465W and 465.

**FOR 465W. Expert Witness Testimony. (3 Credits)**

A. Prerequisites: ENG 102 or ENG 105 (B) or HON 102 and either FOR 331 and 331L(C) or FOR 412 and 412L(C) or FOR 431 and 431L(C) or FOR 442 and 442L(C), INF 322, or departmental approval. Theory and purpose for expert witness testimony, qualifications of scientific experts, ethical issues, and practical aspects of expert witness discovery and courtroom testimony. Videotaping of testifying in mock testifying situations is also included. Credit will not be awarded for both FOR 465W and 465.

**FOR 490. Introduction to Research. (1-3 Credits)**

A. Prerequisite: CHE 111(C), 111L(C), BIO 111(C), or departmental approval. Instruction to laboratory research in one of the areas of forensic science. May be retaken to a maximum of six hours, but only three hours may be counted toward the major requirements. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. 3-9 Lab.

**FOR 499. Forensic Science Capstone. (3 Credits)**

A. Prerequisites: Either FOR 412 and 412L(C), FOR 431 and 431L(C), or FOR 442 and 442L(C). Prerequisite or Corequisite: FOR 465 or 465W. Capstone experience that provides overview of the investigative process from collection of evidence at a mock crime scene, through analysis, data interpretation, and presentation of results in a mock courtroom setting. 2 Lec/3 Lab.

## Chemistry, Bachelor of Science with a Concentration in Biochemistry (ACS Certification Optional) (B.S.)

### Program Requirements

<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

## Major

Code	Title	Hours
<b>University Graduation Requirements</b>		
	General Education	36
	<i>Student Success Seminar</i>	
SCO 100C	Student Success Seminar in Chemistry (waived for transfers with 30+ hrs.)	1
Upper division courses (42 hrs. distributed throughout Major/ Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>		
CHE 111 & 111L	General Chemistry and General Chemistry Lab I	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 250	Descriptive Inorganic Chemistry	2
CHE 325 & 325L	Analytical Chemistry and Analytical Chemistry Lab	5
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II	4
CHE 430	Biochemistry of Macromolecules	3

### Concentrations

Students must select one of the following Concentrations:

Biochemistry	
Biochemistry (ACS Certification Optional)	52
Pre-Health (Pre-Medical, Pre-Dental, Pre-Optometry, Pre-Physician Associate)	
Chemistry	
Chemistry (ACS Certification Optional)	

Pre-Pharmacy	
Chemistry Teaching	
<i>Free Electives</i>	
Choose from 5 hours of free electives	5
<b>Total Hours</b>	<b>120</b>

## Concentration

This program option produces a degree certified by the American Chemical Society (ACS) and follows the recommendation from the American Society for Biochemistry and Molecular Biology (ASBMB).

Code	Title	Hours
<b>Concentration Courses</b>		
CHE 385W	Chemical Literature	3
CHE 425 & 425L	Instrumental Analysis and Instrumental Analysis Lab	4

	Pre-Health (Pre-Medical, Pre-Dental, Pre-Optometry, Pre-Physician Associate)	
Chemistry		30
	Chemistry (ACS Certification Optional)	
	Pre-Pharmacy	
	Chemistry Teaching	
<i>Free Electives</i>		
	Choose from 27 hours of free electives	27
<b>Total Hours</b>		<b>120</b>

### Concentration

With all specified courses, this program option produces a degree certified by the American Chemical Society (ACS).

Code	Title	Hours
<b>Concentration Courses</b>		
CHE 385W	Chemical Literature	3
CHE 425 & 425L	Instrumental Analysis and Instrumental Analysis Lab	4
CHE 450	Inorganic Chemistry	3
CHE 485	Chemistry Seminar	1
CHE 570	Biophysical Chemistry I	4
	Choose from one hour of the following:	1
	CHE 411 Practicum	
	CHE 432 Biochemistry Laboratory	
	CHE 495A Independent Chemical Research	
	CHE 495B Chemistry Laboratory Independent Research: ___	
	CHE 501L Chemtopics Lab: ___ or CHE 502 Polymers & Particles	
	Choose from nine hours of either 400- or 500-level CHE or FOR electives	9
<i>Supporting Course Requirements</i>		
BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>	
MAT 234	Calculus I (Element 2) <sup>G,1</sup>	

PHY 131	College Physics I (Element 4) <sup>G</sup>	
or PHY 201	University Physics I	
PHY 132	College Physics II	5
or PHY 202	University Physics II	
<b>Total Hours</b>		<b>30</b>

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

1

Preparatory courses in mathematics may be required before admission to MAT 122 Precalculus Mathematics or MAT 234 Calculus I.

## Chemistry, Bachelor of Science with a Concentration in Chemistry Teaching (B.S.)

### Program Requirements

CIP Code: 40.0501

#### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

### Major

Code	Title	Hours
<b>University Graduation Requirements</b>		
	General Education	36
<i>Student Success Seminar</i>		
SCO 100C	Student Success Seminar in Chemistry (waived for transfers with 30+ hrs.)	1
Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		

#### Core Courses

CHE 111 & 111L	General Chemistry and General Chemistry Lab I	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 250	Descriptive Inorganic Chemistry	2
CHE 325 & 325L	Analytical Chemistry and Analytical Chemistry Lab	5
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II	4
CHE 430	Biochemistry of Macromolecules	3

#### Concentrations

Students must select one of the following Concentrations:

Biochemistry	
Biochemistry (ACS Certification Optional)	
Pre-Health (Pre-Medical, Pre-Dental, Pre-Optometry, Pre-Physician Associate)	
Chemistry	
Chemistry (ACS Certification Optional)	
Pre-Pharmacy	
Chemistry Teaching	50
<i>Free Electives</i>	
Choose from 7 hours of free electives	7
<b>Total Hours</b>	<b>120</b>

### Concentration

Following this curriculum and passing the appropriate standardized teacher exams will lead to certification to teach chemistry at the secondary education level. The student must meet the 2.75 GPA requirement listed in the College of Education section under The Office of Teacher Education Services.

Code	Title	Hours
<b>Concentration Courses</b>		
CHE 570	Biophysical Chemistry I	4
	Choose from four hours of either 400- or 500-level CHE or FOR courses <sup>1</sup>	4

#### Supporting Course Requirements

(Must also complete all Professional Education Requirements)

BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>	
or BIO 112	Ecology and Evolution	
GLY 109	Great Moments in Earth History (Element 4) <sup>G</sup>	
MAT 234	Calculus I (Element 2) <sup>G,2</sup>	
PHY 131	College Physics I (Element 4) <sup>G</sup>	
or PHY 201	University Physics I	
PHY 132	College Physics II	5
or PHY 202	University Physics II	

#### Professional Education Requirements

EDC 300	Differentiation in Inclusive Classrooms	3
EDF 203	Educational Foundations	3
EDF 204	Emerging Instructional Technologies	2
EDF 219	Human Development and Learning	3

EDF 413	Assessment in Education	3
EMS 300W	Curriculum and Instructional Design	3
EMS 474	Disciplinary Literacy	3
EMS 490	Classroom & Behavior Management	3
ESE 561	Teaching Science in Secondary School	3
SED 104	Special Education Introduction (Element 6) <sup>G</sup>	
Clinical Experiences:		
CED 100	Clinical I: Introduction to the Education Profession	0
CED 200	Clinical II: Understanding the Learner	0
CED 300	Clinical III: Curriculum and Instructional Design	0.5
CED 400	Clinical IV: Diagnosis and Prescription	0.5
CED 450	Clinical V: Practicing Teaching	1
CED 499	Clinical VI: The Professional Semester	9

**Exit Requirements****PRAXIS Examination**

Appropriate PRAXIS exams must be completed for each area of certificate on being recommended.

Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education requirements. Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

**Total Hours** **50**

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

1

If CHE 495A Independent Chemical Research and/or CHE 495B Chemistry Laboratory Independent Research: \_\_\_ is taken, only three hours can be applied to the major.

2

Preparatory courses in mathematics may be required before admission to MAT 122 Precalculus Mathematics or MAT 234 Calculus I.

## Chemistry, Bachelor of Science with a Concentration in Pre-Health (Pre-Medical, Pre-Dental, Pre-Optometry, Pre-Physician Associate) (B.S.)

STA 270	Applied Statistics	4
<b>Total Hours</b>		<b>47</b>

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

**1**

Preparatory courses in mathematics may be required before admission to MAT 122 Precalculus Mathematics or MAT 234 Calculus I.

## Chemistry/Teaching, Minor

### Program Requirements

Code	Title	Hours
------	-------	-------

**Required Courses**

CHE 111 & 111L	General Chemistry and General Chemistry Lab I	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4

Choose from six hours of the following:<sup>1</sup>

CHE 250	Descriptive Inorganic Chemistry	6
CHE 325 & 325L	Analytical Chemistry and Analytical Chemistry Lab	
CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II	
CHE 430	Biochemistry of Macromolecules	
CHE 450	Inorganic Chemistry	
CHE 501	Chemtopics: _____	
CHE 520	Mass Spectrometry	
CHE 570	Biophysical Chemistry I	

<b>Total Hours</b>		<b>18</b>
--------------------	--	-----------

**1**

See Course Descriptions for prerequisite and corequisite requirements.

## Teaching Certification for Chemistry Minor

The previously described minor in chemistry must include CHE 250 Descriptive Inorganic Chemistry and be coupled with a secondary teaching certificate in another discipline to qualify students to teach chemistry at the secondary level. Students enrolled in a teaching program other than science who desire teaching certification in chemistry will be required to take ESE 561 Teaching Science in Secondary School. Please note the chemistry minor GPA must be 2.75 or greater, and student teaching in chemistry is required.

The minor cannot be recommended until the secondary teaching program is completed and a recommendation for certification has been processed. Appropriate PRAXIS exams must be completed for each area of certification being recommended.

**PRAXIS Examination**

Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education requirements. Refer to

Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

## Fermentation Science, University Certificate

### Program Requirements

CIP Code: 40.0501

Code	Title	Hours
<b>Certificate Requirements</b>		
<i>Core Courses</i> <sup>1</sup>		
FMT 140	Introduction to Fermentation	4
FMT 343	Fermentation Microbiology	3
FMT 344	Chemical Analysis & Quality Control	4
FMT 345	Sensory Analysis	2
<i>Electives</i>		
Choose from 11 hours of the following: <sup>1,2</sup>		11
CHE 349	Applied Learning in Chemistry <sup>2</sup>	
	or FMT 349 Applied Learning in Fermentation Science	
FMT 349	Applied Learning in Fermentation Science (A-N) <sup>2</sup>	
FMT 495	Fermentation Research (A-B) <sup>2</sup>	
FMT 501A	Special Topics in Fermentation:___	
FMT 501B	Special Topics in Fermentation:___	
FMT 501C	Special Topics in Fermentation:___	
FMT 501D	Special Topics in Fermentation:___

BIO 111	Cell and Molecular Biology	
AGR 130	Plant Science	
AGR 131	Plant Science Laboratory	
AGR 430	Field Crop Production	
EHS 280	One Health: Global Environmental Public Health	
EHS 380	Food Security and Sanitation	
OSH 110	Introduction to Safety Studies	
Or Department approved courses		
Choose from one of the following:		
CHE 101 & 101L	Introductory Chemistry and Introductory Chemistry Lab	
CHE 111 & 111L	General Chemistry and General Chemistry Lab I	
<b>Total Hours</b>		<b>24</b>

<sup>1</sup>

See Course Descriptions for prerequisite and corequisite requirements.

<sup>2</sup>

If CHE 349 Applied Learning in Chemistry or FMT 349 Applied Learning in Fermentation Science, FMT 349 Applied Learning in Fermentation Science (A-N) and/or FMT 495 Fermentation Research is taken, only three hours can be applied to the certificate.

## Fermentation, Departmental Certificate

### Program Requirements

Code	Title	Hours
<b>Certificate Requirements</b>		
<i>Core Courses</i> <sup>1</sup>		
FMT 140	Introduction to Fermentation	4
FMT 343	Fermentation Microbiology	3
FMT 344	Chemical Analysis & Quality Control	4
FMT 345	Sensory Analysis	2
<b>Total Hours</b>		<b>13</b>

<sup>1</sup>

See Course Descriptions for prerequisite and corequisite requirements.

## Forensic Science, Bachelor of Science with a Concentration in Forensic Biology (B.S.)

The Forensic Science degree program at EKU is a comprehensive science-based undergraduate education that prepares students to become leaders in the forensic science discipline. Forensic analytical work requires patience and diligence, with attention to detail and high-quality standards that will stand up in court. A forensic scientist must be able to communicate effectively, both orally and in writing, have personal integrity and high ethical standards, and have no history of drug abuse or criminal activity. Because the program provides a strong knowledge base and skill set in both molecular biology and analytical chemistry, graduates can also pursue careers in a variety of laboratory settings in industry, academic research labs, environmental work, or pharmaceutical science.

The program offers two options:

1. Forensic Chemistry and
2. Forensic Biology.

The Forensic Chemistry option of the Forensic Science degree prepares analysts to use analytical chemistry to examine evidence in the crime laboratory. Forensic Chemistry graduates will typically work in trace evidence, toxicology, drug identification, or firearm sections of the crime laboratory. The Forensic Biology option of the Forensic Science degree prepares students to work in areas of a forensic laboratory requiring a knowledge of genetics, molecular biology, and analytical chemistry. The forensic biologist applies scientific knowledge and skills to solve complex real-life problems in DNA analysis in support of investigative work. Forensic Biology graduates will typically work in the DNA/serology sections of the forensic laboratory.

## Admission/Progression Criteria

All forensic science majors utilize the regular admission policy of the University for students taking courses offered during the first 60 earned hours of the program. In order to continue in the program after 60 earned hours, the student must maintain an overall earned GPA of 2.50 or better on a 4.0 scale. Students who fail to meet this criterion will be

removed from the Forensic Science degree program and placed in the B.S. Chemistry, Chemistry Option, degree program.

## Program Requirements

CIP Code: 40.0510

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3

<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

### Major

- Forensic science majors have a graduation requirement of an overall earned GPA of 2.5/4.0 or better.
- The curriculum below produces a degree that meets the guidelines for accreditation by the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Science (AAFS).

Code	Title	Hours
<b>University Graduation Requirements</b>		
	General Education	36
<i>Student Success Seminar</i>		
SCO 100C	Student Success Seminar in Chemistry (waived for transfers with 30+ hrs.)	1
Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		

**Core Courses**

CHE 111 & 111L	General Chemistry and General Chemistry Lab I	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4
CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II	4
CHE 430	Biochemistry of Macromolecules	3
FOR 301	Introduction to Forensic Science	3
FOR 401	Forensic Professional Practice	1
FOR 431	DNA Profiling	3
FOR 451 & 451L	Forensic Microscopic Analysis and Forensic Microscopy Lab	3
FOR 465W	Expert Witness Testimony	3
FOR 499	Forensic Science Capstone	3

**Concentrations**

Students must select one of the following Concentrations:

Forensic Chemistry	28
Forensic Biology	

**Supporting Course Requirements**

BIO 111	Cell and Molecular Biology (Element 4) <sup>G</sup>	
BIO 112	Ecology and Evolution	4
MAT 234	Calculus I (C or better) (Element 2) <sup>G</sup>	
PHY 131	College Physics I (Element 4) <sup>G</sup>	
or PHY 201	University Physics I	
PHY 132	College Physics II	5
or PHY 202	University Physics II	
STA 215	Introduction to Statistical Reasoning	3-4
or STA 270	Applied Statistics	

**Free Electives**

Choose from 8-9 hours of free electives 8-9

**Total Hours 120**

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

**Concentration**

Code	Title	Hours
<b>Concentration Courses</b>		
CHE 325 & 325L	Analytical Chemistry and Analytical Chemistry Lab	5
CHE 520	Mass Spectrometry	3
CHE 570	Biophysical Chemistry I	4
Choose from one of the following: 4		
CHE 425 & 425L	Instrumental Analysis and Instrumental Analysis Lab	
FOR 411 & 411L	Instrumental Analysis and Forensic Instrumental Lab	
FOR 412 & 412L	Forensic Trace Evidence and Forensic Trace Evidence Lab	4
FOR 442 & 442L	Forensic Toxicology & Drugs and Drugs & Toxicology Lab	4

**Electives**

Choose from four hours of the following: 4

CHE 349	Applied Learning in Chemistry <sup>1</sup>	
CHE 349	Applied Learning in Chemistry (A-N) <sup>1</sup>	
CHE 432	Biochemistry Laboratory	
CHE 450	Inorganic Chemistry	
CHE 501	Chemtopics: _____	
CHE 501L	Chemtopics Lab:____	
FOR 310	Training for Forensic Internships	
FOR 330	Bloodstain Pattern Analysis	
FOR 431L	DNA Profiling Lab	
FOR 349	Applied Learning in Forensic Science (highly recommended) <sup>1</sup>	
FOR 431L	DNA Profiling Lab	
FOR 460	Selected Topics in Forensic Science	
FOR 490	Introduction to Research	
FSE 350	Fire Arson and Explosion Investigation	
FSE 380	Failure Analysis	
PLS 316	Criminal Evidence	

**Total Hours 28**

1

The internship (FOR 349 Applied Learning in Forensic Science) in a forensic science laboratory is an elective but highly recommended. Students interested in internship must complete FOR 310 Training for Forensic Internships Training for Forensic Internship before FOR 349 Applied Learning in Forensic Science.

## Forensic Science, Minor

### Program Requirements

The minor in Forensic Science requires a minimum of 18 credit hours as indicated below:

Code	Title	Hours
<b>Required Courses</b>		
<b>Core Courses</b>		
FOR 301	Introduction to Forensic Science	3
FOR 330	Bloodstain Pattern Analysis	1
FOR 401	Forensic Professional Practice	1
FOR 460	Selected Topics in Forensic Science	3
<b>Electives</b>		
Choose from ten hours of the following: 10		
FSE 250	Introduction to Explosion Investigations and Bombings	
PLS 220	Criminal Investigation	
PLS 316	Criminal Evidence	
CHE 425 & 425L	Instrumental Analysis and Instrumental Analysis Lab <sup>1</sup>	
FOR 411 & 411L	Instrumental Analysis and Forensic Instrumental Lab <sup>1</sup>	
FOR 412 & 412L	Forensic Trace Evidence and Forensic Trace Evidence Lab	
FOR 431 & 431L	DNA Profiling and DNA Profiling Lab	

FOR 432	Forensic Serology
FOR 442 & 442L	Forensic Toxicology & Drugs and Drugs & Toxicology Lab
FOR 451 & 451L	Forensic Microscopic Analysis and Forensic Microscopy Lab
FOR 465W	Expert Witness Testimony
FOR 490	Introduction to Research
FOR 499	Forensic Science Capstone
<b>Total Hours</b>	<b>18</b>

1

*Courses are cross-listed. Credit will only be awarded to one Lecture/Lab grouping.*

## Department of Computer Science and Information Technology

### Chair

Dr. Kuang-Nan Chang  
(859) 622-2398  
Wallace 417

### Faculty

R. Bai, C. Bragg, V. Chandra, K. Chang, A. Kazadi, E. Kim, L. Kong, T. Randles, E. Styer, K. Wong, M. Yang, and S. Zhang

### Bachelor's

- Computer Science, Bachelor of Science with a Concentration in Artificial Intelligence in Data Science (B.S.) (p. 487)
- Computer Science, Bachelor of Science with a Concentration in Computer Science (General) (B.S.) (p. 488)
- Computer Science, Bachelor of Science with a Concentration in Computer Technology (B.S.) (p. 489)
- Computer Science, Bachelor of Science with a Concentration in Interactive Multimedia (B.S.) (p. 490)
- Cyber Systems Technology, Bachelor of Science with a Concentration in Network Security and Electronics (B.S.) (p. 495)
- Cyber Systems Technology, Bachelor of Science with a Concentration in Tech Systems (B.S.) (p. 496)
- Digital Forensics and Cybersecurity, Bachelor of Science (B.S.) (p. 497)

### Accelerated

- Cyber Systems Technology, Bachelor of Science (B.S.) & Technology Management Master of Science (M.S.) [Cyber Systems Tech Security Concentration] Accelerated 3+2 Dual Degree Program (p. 492)
- Cyber Systems Technology, Bachelor of Science (B.S.) & Technology Management Master of Science (M.S.) [Tech Systems Concentration] Accelerated 3+2 Dual Degree Program (p. 493)

### Minor

- Computer Electronics Technology, Minor (p. 486)
- Computer Science, Minor (p. 491)
- Cybersecurity and Intelligence, Minor (p. 497)

- Game Content Design, Minor (p. 498)
- Informatics, Minor (p. 499)

## Certificate

- Artificial Intelligence in Data Science, Departmental Certificate (p. 486)
- Cyber Security and Digital Forensics, Departmental Certificate (p. 492)
- Cyber Systems and Network Security, University Certificate (p. 492)
- Game Design, Departmental Certificate (p. 498)
- Informatics, Departmental Certificate (p. 499)

## Courses

### Computer Science

#### CSC 101. The World of Code. (3 Credits)

A. Prerequisite: Completion of all academic readiness requirements. Introduction to computational thinking through the exploration of code, its place in our lives, and the use of code for problem-solving. A beginning programming language will be used to explore key coding concepts such as making decisions and repetition.

#### CSC 140. Introduction to Computer Game Design. (3 Credits)

I, II. Prerequisite: a grade of "C" or higher in both CSC 185 and CSC 190. Introduction to computer game design, frame based animation, sound effects, program logic, game scripting, and object oriented programming.

#### CSC 160. Introduction to Web Programming. (3 Credits)

A. Prerequisite: MAT 112 A/B or higher with a grade of "C" or higher, or a minimum score of 22 on the mathematics portion of the ACT, or a minimum score of 530 on the math portion of the SAT, or a passing grade of the math Algebra placement test. Introduction to problem solving with computers and the Internet using an appropriate programming language. Basic concepts include data types, objects, control structures, functions, and input/output features. Gen. Ed. VII (QS).

#### CSC 170. Intro to Game Programming. (3 Credits)

A. Prerequisite: MAT 112 or 112B or 114 with a grade of "C" or better, or Math ACT score of 23 or higher, or Math SAT score of 560 or higher. Introduction to game programming using Python. Programming concepts including data types, input/output, and control structures will be introduced through the construction of various types of 2-D games. 3 Lecture/Lab.

#### CSC 174. Introduction to Programming for Science & Engineering. (3 Credits)

I, II. Prerequisite: MAT 122 or higher with a minimum grade of C, a minimum score of 25 on the mathematics portion of the ACT, or a minimum score of 590 on the math portion of the SAT. Introductory programming for scientific and engineering applications, input/output, decision, loops, arrays, subroutines, functions, files and simulation. Gen. Ed. VII (QS).

#### CSC 177. Introduction to Visual Basic. (3 Credits)

I, II. Prerequisite: MAT 112 A/B or higher with a grade of "C", or a minimum score of 22 on the mathematics portion of the ACT, or a minimum score of 530 on the math portion of the SAT, or a passing score on a math Algebra placement test. Introduction to programming in the event driven/graphical programming language Visual Basic. Topics include forms, common controls/objects, coding, procedures, file management and developing Windows applications. Gen. Ed. VII (QS).

**CSC 178. Introduction to \_\_\_\_.** (1-3 Credits)

A. Prerequisite: Minimum ACT Math score of 19, Minimum SAT math score of 510, or completion of MAT 105 or higher with a "C" or higher grade. Introduction to selected topics in computer science. May be retaken to a maximum of nine hours, provided the topics are different.

**CSC 185. Discrete Structures I.** (3 Credits)

I, II. Prerequisite: MAT 122 or higher with a grade of "C" or higher, or a minimum score of 25 on the mathematics portion of the ACT, or a minimum score of 590 on the math portion of the SAT. Introduce basic mathematical structures and logical principles for computer science. Practice step-by-step problem solving in support of good algorithm design and verification practices. Topics include basic counting, sequences, series and recurrence relations.

**CSC 189. Computing Concepts and Programming.** (3 Credits)

(3) A. Prerequisite: MAT 122 or higher (minimum grade of C) or a minimum of 25 on the mathematics portion of the ACT or a minimum of 590 on the mathematics portion of the SAT. Introduction to the computing concepts and programming. Topics include numbering systems, computing system concepts, problem solving with computers using an object-oriented programming language. 2 Lec/2 Lab.

**CSC 190. Object- Oriented Programming I.** (3 Credits)

I, II. Prerequisite: MAT 122 or higher with a grade of "C" or higher, a minimum of 25 on the mathematics portion of the ACT or a minimum of 590 on the mathematics portion of the SAT. Introduction to problem solving with computers using an object-oriented programming language. Concepts include data types, input/output, classes, control structures, and arrays. 3 Lec/2 Lab. Gen. Ed. VII (QS).

**CSC 191. Object- Oriented Programming II.** (3 Credits)

I, II. Prerequisite: a minimum grade of "C" in both CSC 185 and CSC 190. Object-oriented programming, recursion, arrays, inheritance, file input/output, exception handling, multi-thread programming, GUI, object-oriented analysis and design. 3 Lec/2 Lab.

**CSC 195. Discrete Structures II.** (3 Credits)

I, II. Prerequisites: a minimum grade of "C" in both CSC 185 and CSC 190. Develop foundation and analysis technique in mathematical structures for computing. Topics include sets, relations, functions; logic; algorithm design/ analysis, recursive algorithms, recurrence relations, mathematical induction, counting, probability. 3 Lec/2 Lab.

**CSC 210. Data Structures and Programming.** (3 Credits)

(3) A. Prerequisite: A minimum grade of "C" in CSC 189 or CSC 190. Object-oriented programming, inheritance, arrays, stacks, queues, trees, hashing, recursions, and exception handling. 3 Lec/2 Lab.

**CSC 250. Intro to Interactive Games/App.** (3 Credits)

A. Prerequisite: CSC 190 with a minimum grade "C". Introduction to multimedia programming and scripting. Topics include frame-based animation, video editing, sound effects, program logic, and object-oriented programming. Credit will not be awarded to student who have credit for for CSC 140.

**CSC 302. Introduction to System Environ.** (3 Credits)

I, II. Prerequisite: CSC 191 with a minimum of grade of  $\geq C$ . Introduction to computer system environments, utilities, system programming, system administration, networking and operating systems.

**CSC 306. Ethics for the Comput Profess.** (3 Credits)

A. Prerequisite: CSC 191 with a minimum grade of  $\geq C$ . Responsibilities of the computing professional, social implications of computing, privacy, crime and abuse, risk and liabilities, copyright, and patents.

**CSC 308. Mobile App Development for Apple iOS.** (3 Credits)

Prerequisite: A minimum grade of "C" in CSC 191 and CSC 195 or in CSC 210. Introduction to developing mobile applications for Apple iOS. Topics include development tools, APIs, user interfaces, mobile-specific technologies and application design.

**CSC 309. Mobile App Dev for Android.** (3 Credits)

(3) A. Prerequisite: A minimum grade of "C" in CSC 191 and CSC 195 or in CSC 210. Introduction to developing mobile device web sites and applications for Android. Topics include development tools, APIs, user interfaces, mobile-specific technologies and application design.

**CSC 310. Data Structures.** (3 Credits)

I, II. Prerequisites: CSC 191 and CSC 195 with a minimum grade of C in both. The application and implementation of data structures including arrays, stacks, queues, linked lists, and trees. Internal searching and sorting techniques. The analysis of algorithms.

**CSC 311. Algorithms I.** (3 Credits)

A. Prerequisites: CSC 191, CSC 195, and MAT 234 or MAT 234H with a grade of "C" or better in all three courses. Logic and proof, mathematical induction; order of magnitude, recurrence, relations, analysis of recursive algorithms; Boolean algebra and logic networks, networks for adding, merging and sorting; matrices; finite state machines, push-down automata, linear bound automata, Turing machines; formal languages.

**CSC 312. File Processing.** (3 Credits)

I, II. Prerequisite: CSC 310 with a minimum grade of  $\geq C$ . File organization and file storage devices. Topics include external sorting, sequential file processing, hashing, B+ trees, and introduction to databases.

**CSC 313. Database Systems.** (3 Credits)

A. Prerequisite: A minimum grade of "C" in CSC 191 and CSC 195 or in CSC 210. Introduction to databases, storage and retrieval of data, report generation, interface and application development, online queries, XML, multimedia database, and database security.

**CSC 315. 3D Modeling.** (3 Credits)

A. Prerequisite: CSC 191 and CSC 195 with a grade of "C" or better in both courses. An introduction to geometric representations in 3D. Topics include polygon and spline modeling, texture mapping, materials, 3D scanning, and topics in animation including character rigging.

**CSC 316. 3D Game Engine Design.** (3 Credits)

A. Prerequisite: A grade of "C" or higher in CSC 310. Introduction to 3D animation and programming. Topics include coordinate systems, vertices, lines, polygons, geometric objects, 3D models, motion control, and interaction design.

**CSC 320. Algorithms II.** (3 Credits)

A. Prerequisites: CSC 310 and 311 with a minimum grade of "C" in both courses. Fundamental algorithms required in computer science; algorithm design/analysis methods, graph algorithms, probabilistic and parallel algorithms, and computational models.

**CSC 330. System Environments & Networks.** (3 Credits)

A. Prerequisite: A minimum grade of "C" in CSC 191 or in CSC 210. Introduction to computer system environments, utilities, system administration, and networking.

**CSC 332. Digital Storage Device Forensics.** (3 Credits)

A. Prerequisite: a minimum grade of "C" in CSC 210 or CSC 310. Introduction to digital storage forensics. Topics include digital investigation fundamentals, fundamentals of storage devices (hard disk, optical, flash, consumer electronics devices, and mobile devices), disk volume analysis, and file systems analysis (FAT/NTFS, Ext 2/3/4, UFS 1/2, HFS/HFS+/HFSX).

**CSC 338. Fundamentals of Cybersecurity. (3 Credits)**

Pre-requisite: A minimum grade of "C" in CSC 210 or CSC 310. This course discusses the fundamentals of cybersecurity. Topics include information security principles, network and Internet basics, hacker techniques, cybersecurity technologies, encryption, security policies, cyber terrorism and information warfare, cyber detective, digital forensics, cybersecurity engineering, and society security.

**CSC 340. Ethics & Software Engineering. (3 Credits)**

A. Prerequisite: CSC 310 and 313 with a minimum grade of "C" in both courses. Responsibilities of software professionals, social implications of software such as privacy, crime and abuse, risk and liabilities, copyright, and patents, software project planning, software requirements analysis, software design, and software testing.

**CSC 349. Applied Learning in Computer Science. (0.5-8 Credits)**

I, II; (1-6) SUMMER ONLY. Prerequisite: students must have successfully completed 30 semester hours of course work including six hours of Computer Science major courses. In addition, transfer students must have completed at least one semester of full-time course work at EKU. Work in placements related to academic studies. A maximum of three hours may be applied toward the Computer Science technology option degree only. Credit does not apply to general Computer Science major or minor requirements. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours of employment is required for each semester hour of academic credit. Credit may only be awarded in the semester in which the work is completed.

**CSC 349A. Cooperative Study: Computer Science. (0.5-8 Credits)**

I, II; (1-6) SUMMER ONLY. Prerequisite: students must have successfully completed 30 semester hours of course work including six hours of Computer Science major courses. In addition, transfer students must have completed at least one semester of full-time course work at EKU. Work in placements related to academic studies. A maximum of three hours may be applied toward the Computer Science technology option degree only. Credit does not apply to general Computer Science major or minor requirements. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours of employment is required for each semester hour of academic credit. Credit may only be awarded in the semester in which the work is completed.

**CSC 349B. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 349C. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 349D. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 349E. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 349F. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 349G. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 349H. Cooperative Study: Computer Science. (0.5-8 Credits)**

Work in placements related to academic studies.

**CSC 350. Principles of Prog Languages. (3 Credits)**

I, II. Prerequisites: CSC 200 and 310 with a minimum grade of "C" in both courses. The principles used in the design and implementation of programming languages. Language descriptions, structural implementations, and specialized features of languages.

**CSC 360. Computer Org & Architecture. (3 Credits)**

(3) A. Prerequisite: CSC 191 with a minimum grade of "C" or CSC 210. Information representation, instruction set architecture, assembly language, instruction execution, basic processing units, input/output organization, memory and storage organization, overlap and pipeline processing, parallel processing, and performance evaluation. Credit will not be awarded for both CSC 360 and 370.

**CSC 390. Advanced Programming Techniques with \_\_\_\_\_. (3 Credits)**

A. Prerequisite: CSC 191, with a minimum grade of "C." Advanced programming with a selected programming language, with appropriate applications. May be taken to a maximum of six hours, provided the languages are different.

**CSC 400. Operating Systems. (3 Credits)**

I, II. Prerequisites: CSC 310 and 360 with a grade of "C" or higher in both courses. Overall structure of multiprogramming systems, details of addressing techniques, memory-management, file system design and management, traffic control, interprocess communication, system module design, interfaces.

**CSC 401. Network & System Programming. (3 Credits)**

A. Prerequisites: CSC 302, CSC 370 or EET 254. Technical programming in the UNIX and the Internet environments: shell scripts, TCP/IP, HTML, CGI, and JavaScript. Survey of Internet protocols.

**CSC 410. Cyber Networking and Security. (3 Credits)**

(3) A. Prerequisite: CSC 210 or CSC 310 with a minimum grade of "C". This course discusses the fundamentals of computer networking and cyber security. Topics include layered protocols of computer network, Internet architecture and applications, cyber security and defense technologies.

**CSC 440. Applied Software Engineering. (3 Credits)**

A. Prerequisite: A minimum grade of "C" in CSC 340. Techniques and tools for software requirements, software design, software testing, and software project planning as a team project for majors in computer science.

**CSC 460. Computer Network & System Administration. (3 Credits)**

A. Prerequisite: A minimum grade of "C" in CSC 210 CSC 310. Introduction to the subject of computer networks and layered protocols, architecture of data communication systems, point-to-point networks, local networks, end-to-end protocols and internetworking, and server-side technology to create interactive web pages.

**CSC 490. Seminar in \_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. For advanced students in computer science. Subject announced when offered. May be retaken to a maximum of 12 hours, provided that the topics are different.

**CSC 491. Game Design Capstone. (3 Credits)**

A. Prerequisite: CSC 140 and INF 391 with a grade of "C" or higher. Level design, storyboarding, character modeling, game scripting, game interface design, audio effects, marketing, and ethics. Students will work in groups to develop a computer game term project. May be retaken to a maximum of 6 hours.

**CSC 494. Innovative Problem Solving. (1-3 Credits)**

Prerequisite: Departmental approval. An individually developed project related to an innovative solution of a problem provided by the software industry. The result is to be presented in open forum. May be retaken to a maximum of 6 hours provided the topics are different.

**CSC 495. Independent Work. (1-3 Credits)**

I, II. Prerequisite: A grade of "C" or higher in ENG 102, 105 (B), or HON 102 and departmental approval. Directed study/ research on a problem or area chosen in consultation with the instructor. Final paper required. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of twelve hours.

**CSC 496. Senior Seminar. (1 Credit)**

Prerequisite: CSC 340 with a minimum grade of "C". Critically evaluate current issues in computer science and effectively communicate creative ideas with professionals to foster collaborative problem solving.

**CSC 499. CS Career Preparation. (1 Credit)**

A. Prerequisite: CSC 310 with a grade of "C" or better. Career preparation for students seeking internship or permanent jobs. Job search, resume creation, interview techniques for application of computer science positions. 2 Lec.

**CSC 507. Special Topics:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics vary with offering. May be retaken to a maximum of six times, with advisor approval, provided the topics are different.

**CSC 520. Multimedia System and Forensics. (3 Credits)**

A. Prerequisite: A minimum grade of "C" in CSC 210 CSC 310. Integration of multimedia technologies, signal processing and compression of images, audio, and video, multimedia forensics and message hiding.

**CSC 530. Programming and Data Structures. (3 Credits)**

A. Prerequisite: At least a "C" in CSC 190 and 191, or equivalent courses. The application and implementation of data structures including arrays, linked lists, stacks, queues, heaps, trees and graphs and their related algorithms, using an object-oriented programming language. Credit does not apply to the B.S. degree in Computer Science or the B.S. degree in Digital Forensics and Cybersecurity.

**CSC 535. Discrete Structures. (3 Credits)**

A. Prerequisite: MAT 112, 114 or equivalent. Corequisite: CSC 530. Logic, sets, functions, Boolean algebra, probability and their applications, number theory, recursion, math induction proofs with application of these topics to computer science.

**CSC 536. Incident Response I. (3 Credits)**

(3) A. Prerequisite: CSC 410 with a minimum grade of "C". This course discusses the details of various aspects of cybersecurity incident response. Topics include pre-incident preparation, incident detection and characterization, data collection and analysis, and remediation.

**CSC 537. Incident Response II. (3 Credits)**

(3) A. Prerequisite: CSC536 with a minimum grade of "C". This course discusses cybersecurity incident response in the context of various computing platforms. Topics include dead-box analysis, memory analysis, log analysis, and malware analysis in Windows, Linux and MacOS Systems.

**CSC 538. Computer Crime and Forensics. (3 Credits)**

A. Introductory course on computer crime and forensics. Computer criminal evidence collection, analysis and handling; computer forensics tools; data acquisition; digital evidence control; Windows and Linux systems investigation; email investigation; network forensics; computer forensic report writing.

**CSC 539. MAC Forensics. (3 Credits)**

(3) A. Prerequisite: INF 322. This course covers the basic knowledge and skills necessary to analyze MAC operating system artifacts for digital evidence recovery. The topics include: MAC OS overview, GPT partitioning system, MAC system acquisition, MAC directory structure and evidence, Property lists, User logon password recovery, Safari and Firefox artifacts, iChat artifacts, Apple mail analysis, and other related topics.

**CSC 541. Software Testing. (3 Credits)**

(3) A. Prerequisites: Senior standing and CSC 310 with a grade of "C" or higher. The purpose of this course is to study software testing process, methods, techniques and tools. Topics include black box testing, white box testing, integration testing, acceptance testing, regression testing, performance testing, stress testing, and testing of object-oriented software.

**CSC 542. Internet Forensics. (3 Credits)**

(A). Prerequisite: INF 322 with a minimum grade of "C". This course covers the basic knowledge and skills necessary to analyze Internet-based applications artifacts for digital evidence recovery. The topics include popular Web browsers, instant messengers, and social media apps.

**CSC 543. Windows Forensics. (3 Credits)**

(3) A. Prerequisite INF 322. This course covers the basic knowledge and skills necessary to analyze MS Windows operating system artifacts for digital evidence recovery. The topics include: Windows OS overview, System bitlocker, GPT file system, Windows Security Model, Windows registry, USB devices, Windows event logs, Windows recycle bin, and other related topics.

**CSC 544. Database Admin and Security. (3 Credits)**

Prerequisite: A minimum grade of "C" in CSC 210 or CSC 310. This course covers database management system concepts, database system architecture, installation and setup, data management, performance monitoring and tuning, backup and recovery, database security models and management, database auditing.

**CSC 545. Theory of Database Systems. (3 Credits)**

A. Prerequisite: A minimum grade of "C" in CSC 210 or CSC 310. Models and principles of information systems. Database languages. The logical and physical design as well as the implementation and use of database systems.

**CSC 546. Artificial Intelligence. (3 Credits)**

A. Prerequisite: A minimum grade of "C" in CSC 210 or CSC 310 and STA 270. The use of programming languages to model concepts selected from artificial intelligence. The application of heuristics to problem solving. Perception and pattern recognition.

**CSC 547. Network Forensic and Investigation. (3 Credits)**

A. Prerequisites: Senior standing and CSC 400 with a grade of "C" or higher. Introduction to Windows network forensics. Topics include: Windows network structure; Windows password/authentication mechanisms; Windows ports and services; Live-analysis techniques; Windows registry structure and evidence; Forensic analysis of events logs; Network forensics tools and reporting.

**CSC 548. Personal Electronic Device Forensics. (3 Credits)**

A. Prerequisite: CSC 332 with a grade of "C" or higher. Introduction to personal electronic device forensics. Topics include architecture, functionality, operating systems implementation of PEDs (cell phones, PDAs, iPod, MP3 music players, GPS devices), recovering evidence from PEDs, and hostile forensic and booby-trapping techniques.

**CSC 549. Computer Forensics Capstone. (3 Credits)**

A. Prerequisite: CSC 332 with a grade of "C" or higher. Project course. Students apply learned digital forensic knowledge, techniques, and software and hardware tools to work on a team project on a case for digital evidence collection, handling, analysis, and reporting.

**CSC 550. Graphics Programming. (3 Credits)**

A. Prerequisites: CSC 316 with a grade of "C" or higher. 3-D geometry, model transformation, matrices, computer algorithms and protocols, texture mapping, camera control, and collision detection.

**CSC 555. Topics in Multimedia:\_\_\_\_. (3 Credits)**

A. Prerequisite: departmental approval. For advanced students in computer science. Subject announced when offered. May be retaken to a maximum of six hours, provided that the topics are different.

**CSC 581. Machine Learning. (3 Credits)**

(3) A. Prerequisites: A grade of "C" or higher in CSC 210 or 310 and STA 270. Introduction to Machine Learning and its core models and algorithms. Hands-on R programming experiences of using machine learning/deep learning algorithms to analyze real-world data sets.

**CSC 582. Big Data. (3 Credits)**

(3) A. Prerequisites: A grade of "C" or higher in all CSC 310. Advanced cutting edge and state-of-the-arts knowledge and implementation in big data. Modern deep learning tools for analyzing real-world data sets.

**CSC 583. Data Visualization. (3 Credits)**

(3) A. Prerequisites: CSC 310. Principles and techniques for data visualization, including visual representation methods and techniques for increasing the understanding of complex data and models. Hands-on visual programming experiences in data collection and demonstration.

**Electricity/Electronics****EET 251. Electricity and Electronics. (3 Credits)**

I, II. Prerequisite: Grade of at least "C" in MAT 095 or a minimum math ACT score of 18 or a minimum SAT math score of 490. Principles of basic electricity, circuit operation, and electronics. Topics include electrical components, measurements, power, characteristics of AC-DC, basic circuit laws, circuit simulation, magnetism, energy conversion, and sources. 2 Lec/2 Lab.

**EET 252. Digital Electronics. (3 Credits)**

I, II. Prerequisite: grade of at least "C" in MAT 090 or equivalent. A survey of digital electronics fundamentals and applications. Topics include number systems, digital mathematics, logic families, logic gates, multiplexers, demultiplexers, comparators, counters, decoders, displays, and converters. 2 Lec/2 Lab.

**EET 253. Microprocessor Control Systems. (3 Credits)**

A. Prerequisite: EET 251 and 252. The operation and application of microprocessor-based control systems in electro-mechanical project environments. Topics include data, address, and control signals; memory software; interfacing digital and analog devices; ports; and data communications. 2 Lec/2 Lab.

**EET 254. Machine Language/Microcontroll. (3 Credits)**

A. Prerequisite/Corequisite: EET 252. Machine language programming for ROM based microprocessor based industrial controllers. Emphasis on software manipulation of I/O control devices in real-time, interrupt driven, process control environments. 2 Lec/2 Lab.

**EET 257. Electronic Devices and Circuits. (3 Credits)**

A. Prerequisite: EET 251. An analysis of the characteristics of solid state devices and the common circuits that utilize these devices. Emphasis on problem solving supplemented by laboratory activities and demonstration of electronic circuits and devices. 2 Lec/2 Lab.

**EET 349. Co-op or Appl Lrn: CET/CEN. (1-8 Credits)**

II. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies in Computer Electronics Technology (CET) or Computer Electronic Networking (CEN). Transfer students must have completed at least 12 hours of coursework at EKU. A minimum of 80 hours work required for each academic credit.

**EET 350. Industrial Electronics I. (3 Credits)**

A. Prerequisite: EET 257. Principles of timing, power control circuitry, transducers, and programmable controllers in commercial and industrial applications. 2 Lec/2 Lab.

**EET 351. Programmable Logic Controllers. (3 Credits)**

A. Prerequisite: EET 251 or 252. The study of programmable logic controllers (PLCs). PLC functioning theory, selection, wiring, and programming. 2 Lec/2 Lab.

**EET 452. Electrical Power & Drives. (3 Credits)**

A. Prerequisites: EET 257; MAT 120 or higher and PHY 101. Principles of electromagnetic induction as applied to the generation, distribution, conversion, control, and measurement of electrical power. Analysis of the electronics used for electrical drives. Installation, programming and maintenance of digital drives. 2 Lec/2 Lab.

**Informatics****INF 101. Introduction to Online Learning. (1 Credit)**

(1) A. Formerly CSC 101. Prepare students to take online courses at EKU including the use of the Blackboard learning environment. Help students acquire basic skills to be successful in online learning. Credit will not be awarded to students who have credit for CSC 101.

**INF 104. Computer Literacy with Software Applications. (3 Credits)**

(3) A. Formerly: CSC 104. A non-technical survey of computer history, hardware, and software. Implications of the use and misuse of computers. The effect of computers on society. Software applications such as word processors, spread sheets, databases, and graphics. Credit will not be awarded to students who have credit for CSC 104. 3 Lec (1 lab when taught in large lecture sections).

**INF 105. Software Application Topics. (1-3 Credits)**

(1-3) A. Formerly CSC 105. Selected topics in software applications. Topics vary with offering. May be retaken with advisor approval to a maximum of nine hours provided topics are different.

**INF 110. Introduction to the Internet. (1 Credit)**

(1) I, II. Formerly CSC 110. Introduction to the internet and the Internet processing tools. The course emphasizes the use of the World Wide Web as an information broadcasting and retrieval tool. Credit will not be awarded to students who have credit for CSC 110.

**INF 120. Introduction to Multimedia. (3 Credits)**

(3) I, II. Formerly CSC 120. Introduction to multimedia technology and computerized visual communication. Topics include video editing, media file processing, video streaming, computer graphics. Credit will not be awarded to students who have credit for CSC 120.

**INF 123. Exploring Virtual Worlds. (3 Credits)**

(3) A. Formerly: CSC 123. Exploration of the technologies used in virtual environments and their effects on society. Review of technology driving virtual environments with historical context. Emerging technology. Social/economical consequences. Possible Future outcomes through new technologies and science fiction. Credit will not be awarded to students who have credit for CSC 123.

**INF 130. 3D Printing. (3 Credits)**

A. Exploration of the technologies used in the 3D printing process. Development of skills needed to generate content for 3D printing. Software-driven solutions to 3D printing issues. Emerging technology, Social/Economic consequences. Credit will not be awarded to students who have credit for Special Topics course: 3D printing.

**INF 301. Current Topics in Informatics:\_\_\_\_. (3 Credits)**

(3) A. Formerly CSC 301. Prerequisite: A grade of "C" or higher in INF 104, CIS 212, or or equivalent. Introduction to contemporary topics in informatics. May be retaken to a maximum of six hours provided the topics are different.

**INF 307. Cyberspace Security and Ethics. (3 Credits)**

(3) A. Formerly CSC 307. Prerequisite: A grade of "C" or higher in ENG 102, ENG 105 (B), or HON 102. A non-technical survey of computing, including computers' effect on society, computer crime, viruses and other threats, and self-protection in an online environment. Credit will not be awarded to students who have credit for CSC 307.

**INF 314. MS Office & Data Analysis. (3 Credits)**

(3) A. Formerly CSC 314. Prerequisite: "C" or higher in INF 104, CIS 212 or equivalent. Designing advanced Excel spreadsheets and Access databases to manage data problems with an emphasis on data calculations, data analysis, and organization of data.

**INF 318. Mobile Device Security & Privacy. (3 Credits)**

(3) A. Formerly CSC 318. Prerequisite: A grade of "C" or higher in ENG 102, 105(B), or HON 102. Introductory course on mobile device security and privacy. Topics include mobile devices including smart phones, tablets and others; mobile device threats; mobile device security including planning and implementation; mobile device privacy. Credit will not be awarded to students who have credit for CSC 318.

**INF 321. Computer Forensics. (3 Credits)**

(A). Formerly CSC 321. Prerequisite: A grade of "C" or higher in ENG 102, 105(B) or HON 102. Introductory course on computer forensics. Topics include computer forensics concept, digital evidence, law and regulations, computer forensics lab, computer forensic investigation, digital forensics report, court testimony, ethics and codes to expert witness. Credit will not be awarded to students who have credit for CSC 321.

**INF 322. Computer Forensics II. (3 Credits)**

(A). Formerly CSC 322. Prerequisite: CSC 321 with a minimum grade of C, or INF 321 with a minimum grade of C. Introductory course on computer forensics. Topics include digital evidence, digital forensics investigation procedure, evidence identification, data acquisition, crime scene processing, digital forensic tools, quality assurance, evidence processing, investigation report, and court testimony. Credit will not be awarded to students who have credit for CSC 322.

**INF 330. 2D Animation. (3 Credits)**

A. Prerequisite: A grade of "C" or higher in ART 100, BEM 240, INF 120, CSC 140, or TEC 190. Introduction to 2D animation for use in animation and games. Graphical tablets will be used to learn various digital drawing techniques and key-framing, onion-skinning, rigging will be used for animation generation leading to sprite-sheet assets. Credit will not be awarded to students who have credit for Special Topics course: 2D Animation.

**INF 391. Game Level Design for \_\_\_\_\_. (3 Credits)**

(3) A. Prerequisite: a grade of "C" or higher in INF 130 or INF 330 or ART 100 or MUS 290. Introduction to game asset creation, texture painting, 3D modeling, 2D assets, visual programming, and level design. May be retaken to a maximum of 12 hours provided the covered game genres are different.

**INF 430. Digital Sculpting. (3 Credits)**

A. Prerequisite: A grade of "C" or higher in ART 100, INF 130, INF 330, CSC 315. Navigate and utilize 3D sculpting tools. Create animation ready meshes and game ready models and textures. Learn appropriate terminology and vocabulary in the discussion of 3D assets. Credit will not be awarded to students who have credit for Special Topics course: Digital Sculpting.

**INF 495. Independent Work. (1-3 Credits)**

Prerequisite: A grade of "C" or higher in ENG 102, 105 (B), or HON 102, and departmental approval. Directed study/research on a problem or area chosen in consultation with the instructor. Final paper required. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of 12 hours.

**INF 507. Special Topics in Informatics:\_\_\_\_. (1-3 Credits)**

(1-3) A. Prerequisite: Departmental approval. topics vary with offering. May be retaken to a maximum of six hours with advisor approval, provided the topics are different.

**INF 511. Principles of Game Design and Game Theory. (3 Credits)**

A. Fundamentals of designing both digital and non-digital games. In-depth study of the nature of "Fun," design philosophies, choice, motivation, flow theory, types of decisions, and reward in gameplay systems. Additional topics related to gamification, monetization, and serious games also covered.

**INF 512. Game Production and Publication. (3 Credits)**

A. Review of historical and current aspects of the games industry from AAA to indie. Industry operations, Employment, Founding your own studio, Funding, Freelancing, the Role of Influencers (Twitch, Youtube, social media), Platforms, IP protection.

**INF 513. Online Game and Application Design. (3 Credits)**

A. Introduction to the principles of design for online games applications. Topics include game balance, competition, cooperation, detecting exploits and cheating, security, privacy, social structures, administration, community management, online harassment, and client-server communication. Credit will not be awarded for both INF 513 and INF 713 .

**INF 515. Special Topics in Gaming:\_\_\_\_. (3 Credits)**

(3) A. Topics vary with offering. May be retaken to a maximum of six hours with advisor approval, provided the topics are different. Credit will not be awarded to students who have credit for INF 507: Special Topics in Informatics. Credit will not be awarded for both INF 515 and INF 715.

**INF 518. Principles of Cybersecurity. (3 Credits)**

A. Pre-requisite: A minimum grade of "C" in CSC 210 or CSC 310. This course discusses cybersecurity principles. Topics include security governance, risk assessment, security, people, information, and physical asset management; system development, access, and management; threat and incident management; business continuity; security monitoring and improvement.

**Networking****NET 302. PC Troubleshooting & Construction. (3 Credits)**

I, II. Prerequisite: TEC 161 or (INF 104 or higher) or (CSC 140 or higher) or (CIS 212 or higher). Construction, operation and troubleshooting microprocessors, system memory, computer architecture, video types, monitors, hard drives, mice, cabling, notebook computers and printers modern operating systems, and application programs. Building computer systems to specific requirements. 2 Lec/2 Lab.

**NET 303. LANs & PC Communications. (3 Credits)**

I, II. Formerly EET 303. Prerequisite: TEC 161 or (INF 104 or higher) or (CSC 140 or higher) or (CIS 212 or higher) and (a grade of at least "C" in MAT 095 or a minimum math ACT score of 18 or a minimum SAT math score of 490). Installing, configuring, managing, and troubleshooting network and computer systems communications hardware and software. 2 Lec/2 Lab.

**NET 343. Network Switches & Routers. (3 Credits)**

A. Formerly EET 343. Prerequisite: NET 303 or EET 303 or CIS 375. Cisco internetworking, switching, IOS, routing, VLAN's, access lists, and WAN protocols are covered in a combination of lecture, demonstration, and laboratory. 2 Lec/2 Lab.

**NET 344. Advanced Network Devices. (3 Credits)**

A. Prerequisite: NET 343. Configure and troubleshoot network-aware devices/objects in small- to mid-sized LANs. Principles of network device/object startup, configuration and management, VLAN, advanced network communications and security. 2 Lec/2 Lab.

**NET 349. Applied Learning in NET. (0.5-8 Credits)**

I, II. Prerequisite: departmental approval, Sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors.

**NET 349A. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349B. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349C. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349D. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349E. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349F. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349G. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349H. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349I. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349J. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349K. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349L. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349M. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349N. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at ECU. Minimum 80 hours work required per credit hour.

**NET 354. Microcomputer & Network Security. (3 Credits)**

I, II. Formerly EET 354. Prerequisite: NET 303 or EET 303 or CIS 375. Security considerations in computer systems and networks using appropriate hardware and software. Topics include malware, encryption, VPNs, ACLs, firewalls, Wi-Fi, and secure protocols. Testing configuring, managing and troubleshooting security in network systems. 2 Lec/2 Lab.

**NET 361. Cloud Technology Foundations. (3 Credits)**

A. Prerequisite: NET 303 or CIS 375. Cloud computing configurations and deployments. Definition, models, characteristics, testing, security, and management, business cases, and emerging technologies from the perspective of a cloud practitioner. Case studies of cloud computing across various industries. 2 Lec/2 Lab.

**NET 367A. Exit Exam for AAS in Tech, with Computer Electronics. (0 Credits)**

(0) A. Prerequisite: Consent of Advisor. Registration in NET 367A is required of all undergraduate A.A.S. students in the Technology program specializing in Computer Electronics program for the term in which they wish to take their comprehensive examination.

**NET 367B. Exit Exam for Minor in Computer Electronics Technology. (0 Credits)**

(0) A. Prerequisite: Consent of Advisor. Registration in NET 367B is required of all undergraduate students in the Minor for Computer Electronics Technology program for the term in which they wish to take their comprehensive examination.

**NET 367C. Exit Exam for University Certificate in Cyber Systems and Network Security. (0 Credits)**

A. Prerequisite: A minimum of 9 semester hours of NET courses completed, and EET 252. Registration in NET 367c is required of all students in the Cyber Systems and Network Security Technology university certificate, for the semester in which they wish to take their comprehensive exit examination.

**NET 385. Advanced Switches & Routers. (3 Credits)**

(3) A. Prerequisite: NET 343. Configure and troubleshoot small to mid-sized switched LANs. Principles of switch and router startup, configuration and management, VLAN, trunking, STP, advanced routing, WAN, scaling IP address space. Configure, apply and verify Access Control Lists. 2 Lec/2 Lab.

**NET 395. Special Topics in NET. (2-3 Credits)**

A. Formerly EET 395. Prerequisite: 30 credit hours or more completed, and (EET 252 or NET 303). Emerging technologies in the area of Network security and electronics (NET). May be retaken up to a maximum of 9 hours provided subject matter differs each time. Lec/Lab.

**NET 399. Associate Degree Capstone. (3 Credits)**

II. Formerly EET 399. Prerequisite: 30 credit hours or more completed, with a minimum of 9 semester hours of NET coursework completed, and a minimum of 6 semester hours of EET coursework completed. A project and research oriented course which serves as a capstone experience at the Associate Degree level. Design, implementation, analysis, and troubleshooting of electronic and computer technology related systems, and managing a technical.

**NET 403. Advanced LANs and PC Communication. (3 Credits)**

A. Formerly EET 403. Prerequisite: NET 303 or EET 303 or CIS 375. This course will cover installation, configuration, troubleshooting and maintaining common server platforms. The participants will be given the opportunity to setup and manage network hardware, operating systems and applications. 2 Lec/2 Lab.

**NET 440. Wired/Wireless Communications. (3 Credits)**

A. Prerequisite: EET 257; MAT 112B or higher and PHY 101. Principles of communication over fiber and other wired/wireless media; digital and analog data transmission; modulation and multiplexing of data. Communication system components, safety, testing and troubleshooting. 2 Lec/2 Lab.

**NET 454. Wireless/WAN Security. (3 Credits)**

A. Prerequisites: ((NET 303 or CIS 375) and NET 354) or CSC 338. Security considerations in wireless and WANs. Wi-Fi, 802.11x, WPA, RADIUS, encryption, VPNs, VLANs, AAA authentication, Network Security Appliances, and secure protocols. Laboratory based configuration and security testing of WAPs, appliances and servers. 2 Lec/2 Lab.

**NET 467. Exit Exam for BS in NET. (0 Credits)**

(0) A. Prerequisite: Consent to advisor. Registration in NET 467 is required of all undergraduate B.S. (NET) students for the term in which they wish to take their comprehensive examination, including the exit exam and advisor approved certification or license.

**NET 499. Senior Capstone. (3 Credits)**

II. Formerly EET 499. Prerequisite: 90 credit hours or more completed, with a minimum of 18 semester hours of NET coursework completed, and a minimum of 9 semester hours of EET coursework completed, and AEM 310W. A project and research oriented course which serves as a capstone experience at the Bachelor Degree level. Design, implementation, analysis, and troubleshooting of networking, computers and electronics technology related systems, and managing a technical project.

## Artificial Intelligence in Data Science, Departmental Certificate Program Requirements

A student may qualify for a Certificate in Artificial Intelligence in Data Science by completing:

Code	Title	Hours
<b>Certificate Requirements</b>		
CSC 546	Artificial Intelligence	3
CSC 581	Machine Learning	3
CSC 582	Big Data	3
CSC 583	Data Visualization	3
<b>Total Hours</b>		<b>12</b>

## Computer Electronics Technology, Minor Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
EET 251	Electricity and Electronics	3
EET 252	Digital Electronics	3

Choose from one of the following:	3
EET 253 Microprocessor Control Systems	
EET 351 Programmable Logic Controllers	
AEM 352 Robotics and Automated Systems	
NET 302 PC Troubleshooting & Construction	3
NET 303 LANs & PC Communications	3
Choose from one of the following:	3
NET 343 Network Switches & Routers	
NET 354 Microcomputer & Network Security	
NET 395 Special Topics in NET	
Upper-division NET course approved by advisor	
<b>Exit Requirements</b>	
Students must take an assessment examination for completing the minor.	
NET 367B Exit Exam for Minor in Computer Electronics Technology (CR only, no hours)	0
<b>Total Hours</b>	<b>18</b>

Prerequisites may be required for some course selections.

# Computer Science, Bachelor of Science with a Concentration in Artificial Intelligence in Data Science (B.S.)

## Program Objectives

The mission of the Bachelor of Science in Computer Science program is to provide students with an education that will prepare them to develop a career in the fields of computer science or computer forensics.

## Program Requirements

CIP Code: 11.0101

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

## Major

Code	Title	Hours
<b>University Graduation Requirements</b>		
General Education		36
<i>Student Success Seminar</i>		
SCO 100	Student Success Seminar	1
Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>		
CSC 185	Discrete Structures I <sup>1</sup>	3
CSC 190	Object- Oriented Programming I <sup>1</sup>	3
CSC 191	Object- Oriented Programming II	3
CSC 195	Discrete Structures II	3
CSC 308	Mobile App Development for Apple iOS	3
CSC 310	Data Structures	3
CSC 313	Database Systems	3
CSC 338	Fundamentals of Cybersecurity	3
CSC 340	Ethics & Software Engineering	3
CSC 499	CS Career Preparation	1
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
Computer Science (General)		
Computer Technology		
Interactive Multimedia		
Artificial Intelligence in Data Science		54
<i>Free Electives</i>		
Choose from 1 hour of free electives		1
<b>Total Hours</b>		<b>120</b>

1

Students without a 25 ACT or 590 SAT will be advised to take CSC 170 Intro to Game Programming as preparation for CSC 185 Discrete Structures I and CSC 190 Object- Oriented Programming I.

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
CSC 311	Algorithms I	3
CSC 320	Algorithms II	3
CSC 545	Theory of Database Systems	3
CSC 546	Artificial Intelligence	3
CSC 581	Machine Learning	3
CSC 582	Big Data	3
CSC 583	Data Visualization	3
Choose from one hour of the following:		1
CSC 494	Innovative Problem Solving	
CSC 495	Independent Work	
CSC 496	Senior Seminar	
<i>Supporting Course Requirements</i>		
MAT 234	Calculus I (Element 2) <sup>G</sup>	

MAT 244	Calculus II	4	2
STA 270	Applied Statistics	4	
STA 340	Applied Regression Analysis	3	
STA 375	Sampling Methods	3	
STA 380	Nonparametric Statistics	3	
STA 575	Statistical Methods Using SAS	3	
STA 580	R and Introductory Data Mining	3	
STA 585	Experimental Design	3	
Choose from one of the following sequences:		6	
<b>Applied Engineering Mgt:</b>			
AEM 202	Introduction to Quality		
Choose from one of the following:			
AEM 332	Process Control and Auditing		
AEM 336	Reliability and Sampling		
AEM 506	Six Sigma Quality		
<b>Biology:</b>			
BIO 315	Genetics <sup>1</sup>		
BIO 533	Bioinformatics: Principles and Applications		
<b>Economics:</b>			
ECO 230	Fundamentals of Microeconomics		
ECO 231	Fundamentals of Macroeconomics (Element 5B) <sup>G</sup>		
<b>Insurance:</b>			
INS 370			
Choose from one of the following:			
INS 372			
INS 374			
INS 378			
<b>Statistics:</b>			
STA 520	Mathematical Statistics I		
STA 521	Mathematical Statistics II		
<b>Computer Science:</b>			
CSC 332	Digital Storage Device Forensics		
Choose from one of the following:			
CSC 542	Internet Forensics		
CSC 547	Network Forensic and Investigation		
CSC 548	Personal Electronic Device Forensics		
<b>Geography:</b>			
GEO 353	Geographic Information Systems <sup>2</sup>		
GEO 453	Advanced GIS		
<b>Homeland Security:</b>			
Choose from two of the following:			
HLS 401	Intelligence Process		
HLS 402	Counterintelligence		
HLS 403	Intelligence Analysis		
<b>Total Hours</b>		<b>54</b>	

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

<sup>1</sup>

BIO 315 Genetics has a prerequisite of BIO 111 Cell and Molecular Biology or BIO 112 Ecology and Evolution.

GEO 353 Geographic Information Systems has a prerequisite of one course from: AGR 216 Principles of Soils Laboratory, GEO 100 Regions and Nations of the World, GEO 210 Introduction to Physical Geography, GEO 220 , GLY 102 Earth Science for Elementary Teachers, GLY 107 Gold and Diamonds, or GLY 108 Earthquakes and Volcanoes.

## Computer Science, Bachelor of Science with a Concentration in Computer Science (General) (B.S.)

### Program Objectives

The mission of the Bachelor of Science in Computer Science program is to provide students with an education that will prepare them to develop a career in the fields of computer science or computer forensics.

### Program Educational Objectives/Goals for General Computer Science Concentration

1. Our graduates will be productive professionals in the computing field.
2. Our graduates will develop professionally through continued formal education and/or professional activities.
3. Our graduates will demonstrate leadership skills at work.
4. Our graduates will contribute to community as computing professionals.

### Program Requirements

CIP Code: 11.0101

#### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

**Major**

Code	Title	Hours
<b>University Graduation Requirements</b>		
General Education		36
<i>Student Success Seminar</i>		
SCO 100I	Student Success Seminar in Computer Science (waived for transfers with 30+ hrs.)	1
Upper division courses (42 hrs. distributed throughout Major/ Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>		
CSC 185	Discrete Structures I <sup>1</sup>	3
CSC 190	Object- Oriented Programming I <sup>1</sup>	3
CSC 191	Object- Oriented Programming II	3
CSC 195	Discrete Structures II	3
CSC 308	Mobile App Development for Apple iOS	3
CSC 310	Data Structures	3
CSC 313	Database Systems	3
CSC 338	Fundamentals of Cybersecurity	3
CSC 340	Ethics & Software Engineering	3
CSC 499	CS Career Preparation	1
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
Computer Science (General)		39
Computer Technology		
Interactive Multimedia		
Artificial Intelligence in Data Science		
<i>Free Electives</i>		
Choose from 16 hours of free electives		16
<b>Total Hours</b>		<b>120</b>

1

Students without a 25 ACT or 590 SAT will be advised to take CSC 170 Intro to Game Programming as preparation for CSC 185 Discrete Structures I and CSC 190 Object- Oriented Programming I.

**Concentration**

Accredited by the Computer Science Accreditation Commission of ABET, <http://www.abet.org>

Code	Title	Hours
<b>Concentration Courses</b>

### Student Success Seminar

SCO 100	Student Success Seminar	1
---------	-------------------------	---

Writing Intensive Course (Hrs. incorporated into Major/Supporting/Gen Ed/Free Electives category)

Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)

ACCT - Computer Science majors will fulfill ACCT with the following. (Credit hours may be incorporated into Major or Supporting requirements)

Choose from one of the following:

CSC 349	Applied Learning in Computer Science	
CSC 440	Applied Software Engineering	
CSC 491	Game Design Capstone	
CSC 549	Computer Forensics Capstone	
CSC 495	Independent Work (with a program-approved topic)	

### Major Requirements

#### Core Courses

CSC 185	Discrete Structures I <sup>1</sup>	3
CSC 190	Object- Oriented Programming I <sup>1</sup>	3
CSC 191	Object- Oriented Programming II	3
CSC 195	Discrete Structures II	3
CSC 308	Mobile App Development for Apple iOS	3
CSC 310	Data Structures	3
CSC 313	Database Systems	3
CSC 338	Fundamentals of Cybersecurity	3
CSC 340	Ethics & Software Engineering	3
CSC 499	CS Career Preparation	1

### Concentrations

Students must select one of the following Concentrations:

Computer Science (General)	
Computer Technology	
Interactive Multimedia	47
Artificial Intelligence in Data Science	

#### Supporting Course Requirements

Choose from 16-34 hours of supporting courses

16-18 hours of Computer Science (General)
24-25 hours of Computer Technology
25-28 hours of Interactive Multimedia
30-34 hours of Artificial Intelligence in Data Science

#### Free Electives

Choose from 14 hours of free electives	14
<b>Total Hours</b>	<b>120</b>

1

Students without a 25 ACT or 590 SAT will be advised to take CSC 170 Intro to Game Programming as preparation for CSC 185 Discrete Structures I and CSC 190 Object- Oriented Programming I.

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		

CSC 140	Introduction to Computer Game Design	3

## Cyber Systems Technology, Bachelor of Science (B.S.) & Technology Management Master of Science (M.S.) [Cyber Systems Tech Security Concentration] Accelerated 3+2 Dual Degree Program

Students accepted to the 3+2 Accelerated Dual Degree Program are able to complete their B.S. degree and M.S. degree within five calendar years because of the accelerated curriculum and because nine semester hours of graduate coursework will apply to both the undergraduate B.S. degree and the graduate M.S. degree. Only undergraduate students of proven academic ability will be considered for the program. Students should be aware that, in order to maintain their progress in the accelerated 3+2 program, careful coordination with their advisor is required. Depending upon undergraduate progress at the time of 3+2 admission, some summer-school classes may be needed.

The Cyber Systems Technology degree program has an articulation agreement for transfer of credit and cooperation with Bluegrass Community and Technical College's Associate in Applied Science degree in Engineering Technology with Electrical Specialization.

Prerequisites may be required for some course selections.

Students must take at least one computer systems, networking, security, electronics, or telecommunications technology certification or license exam approved by the advisor.

Students must take a Cyber Systems Technology exit examination before graduation. Graduates must have an overall GPA of 2.25 in major requirements.

The Cyber Systems Technology program is accredited by the Association of Technology, Management, and Applied Engineering (ATMAE).

### Admission Requirements

Students interested in this option must satisfy all of the following conditions:

1. Junior or Senior standing
2. Overall grade point average (GPA) of at least 3.0 at the time of admission to the 3+2 program
3. Approval from department and Graduate School (see the form at <http://gradschool.eku.edu/graduate-school-forms> (<http://gradschool.eku.edu/graduate-school-forms/>))
4. Must maintain an overall undergraduate and graduate grade point average (GPA) of at least 3.0 to continue in the 3+2 program.

### Program Requirements

CIP Code: 15.1299

#### University Graduation Requirements

General Education 36

#### Student Success Seminar

SCO 100 Student Success Seminar (waived for transfers with 30+ hrs.) 1

Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)

#### Major Requirements

##### Core Courses

AEM 202 Introduction to Quality 3

AEM 310W Technical Communication 3

AEM 408 Human Resource Development 3

EET 252 Digital Electronics 3

NET 302 PC Troubleshooting & Construction 3

NET 303 LANs & PC Communications 3

NET 343 Network Switches & Routers 3

NET 349 Applied Learning in NET 1

NET 354 Microcomputer & Network Security 3

NET 403 Advanced LANSs and PC Communication 3

NET 361 Cloud Technology Foundations 3

NET 499 Senior Capstone 3

##### Major Electives

AEM 407 Fundamentals of Project Management 3  
or CIS 410 Project Management and Practice

AEM 352 Robotics and Automated Systems 3  
or EET 253 Microprocessor Control Systems

or EET 351 Programmable Logic Controllers  
or NET 440 Wired/Wireless Communications

TEC 161 Computer Applications in Technology 3

or INF 104 Computer Literacy with Software Applications

#### Concentrations

Students must select one of the following Concentrations:

Network Security & Electronics 24

Tech Systems

**Supporting Course Requirements**

ECO 120	Economic Reasoning and Issues (or higher) (Element 5B) <sup>G</sup>	
MAT 112A & MAT 112B	Algebra: Polynomials and Algebra: Functions & Matrices (or higher) (Element 2) <sup>G</sup>	
PHY 101	Conceptual Physics (or higher) (Element 4) <sup>G</sup>	
STA 215 or STA 270	Introduction to Statistical Reasoning Applied Statistics	3-4
Choose from three hours of ACC, AEM, CCT, CIS, FIN, MGT, MKT, or RMI electives as approved by major advisor		3

**Free Electives**

Choose from 9-10 hours of free electives		9-10
(Up to five semester hours of Upper Division courses, including Cooperative Education, may be needed for meeting the 42 hour requirement. Students with an ACT Math sub-score of 19-21 may consider taking CSC 101 (The World of Code) to build computing competencies early in the degree program.)		

**Exit Requirements**

NET 467	Exit Exam for BS in NET (CR only, no hours)	0
<b>Total Hours</b>		<b>120</b>

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above.

**Concentration**

Code	Title	Hours
<b>Concentration Courses</b>		
EET 251	Electricity and Electronics	3
EET 257	Electronic Devices and Circuits	3
NET 344	Advanced Network Devices	3
NET 395	Special Topics in NET	3
NET 454	Wireless/WAN Security	3
Choose from nine hours of CSC, CIS, or INF courses of the following:		9
CSC 160	Introduction to Web Programming (or higher)	
CIS 215	Introduction to Business Programming (or higher)	
INF 130	3D Printing (or higher)	
<b>Total Hours</b>		<b>24</b>

## Cyber Systems Technology, Bachelor of Science with a Concentration in Tech Systems (B.S.)

The Cyber Systems Technology degree program has an articulation agreement for transfer of credit and cooperation with Bluegrass Community and Technical College's Associate in Applied Science Degree in Engineering Technology with Electrical Specialization.

Prerequisites may be required for some course selections.

Students must take at least one computer systems, networking, security, electronics, or telecommunications technology certification or license exam approved by the advisor.

Students must take a Cyber Systems Technology exit examination before graduation. Graduates must have an overall GPA of 2.25 in major requirements.

The Cyber Systems Technology program is accredited by the Association of Technology, Management, and Applied Engineering (ATMAE).

## Digital Forensics and Cybersecurity, Bachelor of Science (B.S.)

### Program Mission

The mission of the Bachelor of Science program in Digital Forensics and Cybersecurity is to provide students with an education that will prepare them to build a solid foundation of knowledge and skills in digital forensics and cybersecurity and develop a career in the related professional fields.

1. Our graduates will be productive professionals in the digital forensics and cybersecurity fields.
2. Our graduates will develop professionally through continued formal education and/or professional activities.
3. Our graduates will demonstrate leadership skills at work.
4. Our graduates will contribute to community as digital forensic and cybersecurity professionals.

May include MAT 112A Algebra: Polynomials/MAT 112B Algebra: Functions & Matrices or higher as a prerequisite

## Department of Mathematics and Statistics

### Chair

Dr. Shane Redmond  
(859) 622-5942  
Wallace 312

### Faculty

C. Applegate, S. Bandyopadhyay, R. Bishop-Ross, P. Coen, M. Cropper, K. Fair, J. Grogan, R. Hasneaur, B. Hibbard, J. Johnston, S. Kakraba, L. Kay, C. Liu, D. Lotz, J. Neugebauer, V. Modisette, M. Osborne, S. Redmond, M. Smith, J. Stevens, S. Szabo, K. Whaley, and B. Xu.

The Department of Mathematics and Statistics offers degrees and minors in these disciplines, as well as providing college readiness and general education mathematics and statistics courses.

### Bachelor's

- Data Science and Statistics, Bachelor of Science (B.S.) (p. 506)
- Mathematics, Bachelor of Science with a Concentration in General Mathematics (B.S.) (p. 509)
- Mathematics, Bachelor of Science with a Concentration in Mathematics Teaching (B.S.) (p. 510)

## Accelerated

- Data Science and Statistics, Bachelor of Science (B.S.) & Applied Mathematics, Master of Arts (M.A.) Accelerated 3+2 Dual Degree Program (p. 507)

## Associate's

*No results were found.*

## Minor

- Actuarial Science, Minor (p. 505)
- Mathematical Sciences, Minor (p. 509)
- Mathematics, Minor (p. 512)
- Mathematics/Teaching, Minor (p. 512)
- Statistics, Minor (p. 512)

## Certificate

- Applied Data Science, University Certificate (p. 505)

## Courses

### Mathematics

#### **MAT 105. Mathematics with Applications. (3 Credits)**

I, II. Prerequisite: Satisfaction of English and reading academic readiness indicators and either satisfaction of mathematics academic readiness indicators\* or concurrent enrollment in MAT 105P. This course is designed to strengthen computational skills, mathematical reasoning, problems-solving skills, and mathematical reading/ communication skills while focusing on real-world problems. The mathematical topics may include the mathematics of finance, statistics, geometry, combinatorics, mathematical modeling, and algorithms. Use of calculators. Gen. Ed. E-2 [QR].

#### **MAT 105P. Quantitative Support for MAT 105. (1 Credit)**

(1) I, II. Corequisite: MAT 105. Corequisite support for students in MAT 105. Emphasis placed on prerequisite skills such as real number sense and operations, problem solving, analyzing graphs, mathematical modeling, and critical thinking. 2 Lab.

#### **MAT 106. Applied Mathematics:\_\_\_\_. (3 Credits)**

I, II. Prerequisite: Satisfaction of English and reading academic readiness indicators\* and either satisfaction of mathematics academic readiness indicators or concurrent enrollment in MAT 106P. The introduction to the application of mathematics to real-world problems. Topics are from various branches of mathematics such as graph theory, game theory, probability, geometry, and problems from the social sciences. 3 Lec. Gen. Ed. E-2 [QR].

#### **MAT 106P. Quantitative Support for MAT 106. (1 Credit)**

I, II. Corequisite: MAT 106. Corequisite support for students in MAT 106. Emphasis placed on prerequisite skills such as real number sense and operations, problem solving, analyzing graphs, mathematical modeling, and critical thinking. 2 Lab.

#### **MAT 110. Intro to Algebraic Functions. (3 Credits)**

I, II. Prerequisite: Completion of all University developmental requirements. Algebraic modeling with linear, quadratic, polynomial, rational, exponential and logarithmic functions, equations, and inequalities. 3 Lec/1 Lab. Gen Ed. E-2 [QR].

#### **MAT 111A. Quantitative Support: MAT 112A. (0.5 Credits)**

I, II. Formerly MAT 112AP. Corequisite: MAT 112A. Corequisite support for students in MAT 112A. Emphasis placed on prerequisite skills such as real number sense and operations, problem solving, analyzing graphs, factoring, exponents, mathematical modeling, and critical reading and thinking. Credit will not be awarded to students who have credit for MAT 112AP. 2 Lab.

#### **MAT 111B. Quantitative Support: MAT 112B. (0.5 Credits)**

I, II. Formerly MAT 112BP. Corequisite: MAT 112B. Corequisite support for students in MAT 112B. Emphasis on prerequisite skills including real number sense and operations, problem solving, graphs, factoring, exponents, logarithms, matrices, sequences, mathematical modeling, and critical reading and thinking. Credit will not be awarded to students who have credit for MAT 112BP. 2 Lab.

#### **MAT 112. Algebra with Applications. (3 Credits)**

(3) I, II. Prerequisite: MAT 098 or MAT 110 with a minimum grade of "C", a minimum score of 22 on the mathematics portion of the ACT, a minimum score of 510 on the mathematics portion of the SAT, or a passing score on an algebra placement test. Students will solve application problems involving linear and quadratic equations, matrices, systems of linear equations, series and sequences, logarithmic and exponential equations; and analyze graphs of linear, quadratic, exponential, logarithmic and power functions. 3 Lec/1 Lab. Gen. Ed. E-2.

#### **MAT 112A. Algebra: Polynomials. (1.5 Credits)**

I, II. Prerequisite/ Corequisite: Satisfaction of English and reading academic readiness indicators and either satisfaction of algebra readiness indicators\* or concurrent enrollment in MAT 111A. Students will solve application problems involving linear, quadratic, and power equations and analyze graphs of linear, quadratic, and power functions. Credit will not be awarded to students who have credit for MAT 112. 3 Lec /1 Lab. Gen. Ed. E-2 [QR]. General Education credit will not be awarded until after successful completion of both MAT 112A and MAT 112B.

#### **MAT 112AP. Quantitative Support for MAT 112A. (0.5 Credits)**

(.5) I, II. Corequisite: MAT 112A. Corequisite support for students in MAT 112A. Emphasis placed on prerequisite skills such as real number sense and operations, problem solving, analyzing graphs, factoring, exponents, mathematical modeling, and critical reading and thinking. 2 Lab.

#### **MAT 112B. Algebra: Functions & Matrices. (1.5 Credits)**

I, II. Prerequisite/Corequisite: MAT 112A (C) and either satisfaction of algebra readiness indicators\* or concurrent enrollment in MAT 111B. Students will solve application problems involving matrices, systems of linear equations, series and sequences, logarithmic and exponential equations; and analyze graphs of exponential and logarithmic functions. Credit will not be awarded to students who have credit for MAT 112. 3 Lec /1 Lab. Gen. Ed. E-2 [QR]. General Education credit will not be awarded until after successful completion of both MAT 112A and MAT 112B.

#### **MAT 112BP. Quantitative Support for MAT 112B. (0.5 Credits)**

(.5) I, II. Corequisite: MAT 112B. Corequisite support for students in MAT 112B. Emphasis on prerequisite skills including real number sense and operations, problem solving, graphs, factoring, exponents, logarithms, matrices, sequences, mathematical modeling, and critical reading and thinking. 2 Lab.

**MAT 114. College Algebra. (3 Credits)**

(3) I, II. Formerly MAT 107. Prerequisite: MAT 098 or MAT 110 with a minimum grade of "C", a minimum score of 22 on the mathematics portion of the ACT, a minimum score of 530 on the mathematics portion of the SAT, or a passing score on an algebra placement test. Real and complex numbers, integer and rational exponents, polynomial and rational equations and inequalities, graphs of functions and relations, exponential and logarithmic functions. Use of graphing calculators. Credit will not be awarded to students who have credit for MAT 107. 3 Lec/1 Lab. Gen Ed. E-2.

**MAT 115. Introduction to Mathematica. (1 Credit)**

I, II. Prerequisite: MAT 112 or 114 with a minimum grade of "C", or a minimum score of 23 on the mathematics portion of the ACT or a minimum score of 550 on the mathematics portion of the SAT. Use of Mathematica. Numeric, algebraic, and symbolic capabilities, two and three dimensional graphics with animation, decisions, looping, and list manipulation.

**MAT 116. Problem Solving with Math. (2 Credits)**

A. Prerequisite: MAT 115. Basic concepts include functional programming, procedural programming, rule-based programming, recursion, numerics, and graphics programming.

**MAT 120. Trigonometry. (3 Credits)**

I, II. Prerequisite: Prerequisite: MAT 112 or 112B or 114 with a grade of "C" or better, or a Math ACT score of 22 or higher, or a Math SAT score of 560 or higher. Radians and degrees, graphs of trigonometric functions, inverse functions, right and oblique triangles, vectors, and real-world applications. Gen. Ed. E-2 [QR].

**MAT 122. Precalculus Mathematics. (5 Credits)**

(5) I, II. Formerly MAT 109. Prerequisite: MAT 112 or 114 with a grade of "C" or better, a minimum score of 23 on the mathematics portion of the ACT, or a minimum score of 550 on the mathematics portion of the SAT. Polynomial, rational, exponential, logarithmic, and trigonometric functions and inverses. Sequences and series, systems of linear and nonlinear equations and inequalities, the complex number system, vectors, the binomial theorem, mathematical induction, and conic sections. Use of graphing calculators. Credit will not be awarded to those students who have credit for MAT 109. Gen. Ed. E2.

**MAT 201. Mathematical Concepts for Middle and Elementary School Teachers I. (3 Credits)**

I, II. Prerequisites: MAT 112 or higher with a grade of "C" or better, and a passing score on a Mastery Exam. (The prerequisite course requirement can be met by a combination of MAT 106 and a 23 or higher on the mathematics portion of the ACT.) Concepts beyond algorithmic computation are emphasized. Sets and functions, whole numbers, integers, rational numbers, decimals and real numbers, numeration, and elementary number theory.

**MAT 202. Mathematical Concepts for Middle and Elementary School Teachers II. (3 Credits)**

I, II. Prerequisites: MAT 201 and another MAT course numbered 112 or higher with a C or better in each and a passing score on a mastery test. (The MAT requirement of a MAT course numbered 112 or higher can be met by a combination of MAT 106 and a 23 or higher on the mathematics portion of the ACT.) Concepts stressed over manipulation. Geometry, measurement, metric system, probability and basic statistics.

**MAT 203. Geometry for 7-12 Teachers. (3 Credits)**

II. Prerequisites: admission to a teacher certification program; and either MAT 244 with a grade of C or better or a combination of four courses: MAE 201; MAE 202; MAE 302 or EME 301; and one of MAT 112, MAT 114, MAT 211, or MAT 234 or 234 H, with a grade of C or better in each course and a combined grade point of 2.75 in the four courses. Angles and their measurement, right triangle trigonometry, perpendicular lines, congruent triangles, circles, arcs, and angles, constructions and loci, area and volume, similarity, graphing, selected topics from analytic geometry.

**MAT 211. Applied Calculus. (3 Credits)**

A. Prerequisite: MAT 112 or 112B or 114 or 120 or 122 with a grade of "C" or better, or a minimum score of 23 on the mathematics portion of the ACT or a minimum score of 550 on the mathematics portion of the SAT. Functions and graphs, differentiation, integration, exponential and logarithmic functions, and applications for business, economics, and science. Credit will not be awarded to students who have credit for MAT 261. Gen. Ed. Element 2.

**MAT 211L. Applied Calculus Lab. (1-2 Credits)**

I, II. Formerly MAT 217. Prerequisite or Corequisite: MAT 211. This optional lab is to accompany a regular lecture class in Applied Calculus. 2-4 Lab. Credit will not be awarded to students who have credit for MAT 217.

**MAT 234. Calculus I. (4 Credits)**

Formerly MAT 124. Prerequisite: MAT 122 with a grade of "C" or better, a minimum score of 27 on the mathematics portion of the ACT, or a minimum score of 640 on the mathematics portion of the SAT or a passing score on a calculus placement test. Functions, limits, and continuity, derivatives and applications, integration, and introduction to and use of the computer package Mathematica or other appropriate technology. Credit will not be awarded to students who have credit for MAT 124. Gen. Ed. E-2.

**MAT 234L. Calculus I Lab. (1-2 Credits)**

I, II. Formerly MAT 217. Prerequisite or Corequisite: MAT 234. This optional lab is to accompany a regular lecture class in Calculus I. 2-4 Lab. Credit will not be awarded to students who have credit for MAT 217.

**MAT 239. Linear Algebra and Matrices. (3 Credits)**

(3) I, II. Formerly MAT 214. Prerequisite: MAT 234 or 234H with a grade of "C" or better. Real and complex vector spaces, linear transformations, matrix theory, with applications, through the introduction of eigenvalues and eigenvectors, determinants, inner product spaces, the use of technology. Credit will not be awarded to students who have credit for MAT 214.

**MAT 244. Calculus II. (4 Credits)**

I, II. Formerly MAT 224. Prerequisite: MAT 234, or 234H with minimum grade of "C" or better. Fundamental integration techniques, numerical integration, applications of integration, improper integrals, differential equations, infinite series, polar and parametric equations, and use of Mathematica or other appropriate technology. Credit will not be awarded to students who have credit for MAT 224, 224H, or 244N.

**MAT 244L. Calculus II Lab. (1-2 Credits)**

I, II. Formerly MAT 218. Prerequisite or Corequisite: MAT 244. This optional lab is to accompany a regular lecture class in Calculus II. 2-4 Lab. Credit will not be awarded to students who have credit for MAT 218.

**MAT 254. Calculus III. (4 Credits)**

I, II. Formerly: MAT 225. Prerequisite: MAT 244 with a minimum grade of "C" or better. Functions of several variables, limits and continuity, partial derivatives, multiple integrals, vector calculus including Green's, Divergence, and Stoke's theorems, cylindrical and spherical coordinates and use of Mathematica. Credit will not be awarded to students who have credit for MAT 225, 225H.

**MAT 254L. Calculus III Lab. (1-2 Credits)**

I, II. Formerly MAT 219. Prerequisite or Corequisite: MAT 254. This optional lab is to accompany a regular lecture class in Calculus III. 2-4 Lab. Credit will not be awarded to students who have credit for MAT 219.

**MAT 301. Logic and Set Theory. (3 Credits)**

A. Prerequisites: MAT 214, 224 or 224H with minimum grades of  $\geq C$  and a grade point average of at least 2.5 in MAT 124, 214, and 224, or departmental approval. Logic, proof techniques, set theory, relations, functions, cardinality, introduction to advanced mathematics.

**MAT 303. Mathematical Models and Applications. (3 Credits)**

II. Prerequisite: A grade of C or higher in MAT 112, 114, 211, 234, or 234H. Prerequisites or Corequisites: MAT 203 with a grade of C or better. The course emphasizes conceptual understanding and communication of mathematical topics through modeling, problem solving, and technology. Topics include algebra, geometry, probability, statistics, and real-world situations. Credit does not count toward the B.S. in mathematics nor the B.S. in mathematics teaching nor the mathematics minor.

**MAT 306. Discrete Mathematics. (3 Credits)**

II. Prerequisites: MAT 239 and 244 each with with a minimum grade of "C" and at least 2.5 GPA in all mathematics courses. Counting principles, permutations, combinations, recurrence relations, graphs, representations of graphs as matrices, trees, networks, difference equations, and linear programming.

**MAT 308. Modern Algebra I. (3 Credits)**

I. Prerequisite: MAT 301 with a minimum grade of "C" (2.0). Groups, cyclic and permutation groups, homomorphisms, subgroups and factor groups, Fundamental Theorem of Finite Abelian Groups, rings, fields, integral domains, and ideals.

**MAT 315. Introduction to Analysis. (3 Credits)**

II. Prerequisite: MAT 301, 225 or MAT 225H with a minimum grade of "C". Real number system, sets and functions, limits, continuity, uniform continuity, Taylor's theorem, laws of the mean, the Riemann integral, allied topics.

**MAT 334. Modern College Geometry I. (3 Credits)**

A. Prerequisite or Corequisite: MAT 301 with a minimum grade of  $\geq C$ .  $\geq$  Euclid's parallel postulate, axiom systems, finite geometries.

**MAT 349. Applied Learning in Mathematics. (0.5-8 Credits)**

I, II; (1-6) SUMMER ONLY. Prerequisite: departmental approval. Work in placements related to academic studies. Credit does not apply to major or minor requirements. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours of employment are required for each semester hour of academic credit.

**MAT 349A. Cooperative Study: Mathematics. (0.5-8 Credits)**

(1-8) I, II; (1-6) SUMMER ONLY. Prerequisite: departmental approval. Work in placements related to academic studies. Credit does not apply to major or minor requirements. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours of employment are required for each semester hour of academic credit.

**MAT 349B. Cooperative Study: Mathematics. (0.5-8 Credits)**

Work in placements related to academic studies. Credit does not apply to major or minor requirements.

**MAT 349C. Cooperative Study: Mathematics. (0.5-8 Credits)**

Work in placements related to academic studies. Credit does not apply to major or minor requirements.

**MAT 349D. Cooperative Study: Mathematics. (0.5-8 Credits)****MAT 349E. Cooperative Study: Mathematics. (0.5-8 Credits)**

Work in placements related to academic studies. Credit does not apply to major or minor requirements.

**MAT 349F. Cooperative Study: Mathematics. (0.5-8 Credits)**

Work in placements related to academic studies. Credit does not apply to major or minor requirements.

**MAT 353. Differential Equations. (3 Credits)**

A. Prerequisite: MAT 224 or 224H with a minimum grade of  $\geq C$ .  $\geq$  Differential equations of first order, applications, singular solutions, linear equations with constant coefficients, miscellaneous methods for equations of higher order, solution in series, total differential equations, qualitative methods, systems of linear differential equations, the computer algebra systems.

**MAT 380. Mathematics in a Historical. (3 Credits)**

A. Prerequisite or Corequisite: MAT 301 or departmental approval. The history of mathematics from ancient beginnings until modern times is studied through problems and through the lives and times of mathematicians.

**MAT 408. Modern Algebra II. (3 Credits)**

A. Prerequisite: MAT 308 with a minimum grade of  $\geq C$ .  $\geq$  Ring homomorphisms, polynomial rings, unique factorization domains, principal ideal domains, finite fields, field extensions, algebraic extensions, Galois theory, and geometric construction.

**MAT 415. Analysis. (3 Credits)**

A. Prerequisite: MAT 315 with a minimum grade of  $\geq C$ .  $\geq$  The Riemann integral, the Lebesgue integral, metric spaces, differentiation, sequences and series of functions, allied topics.

**MAT 480. Seminar in:\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Advanced topics in undergraduate mathematics. May be retaken to a maximum of nine hours, provided the topics are different.

**MAT 495. Independent Work. (1-3 Credits)**

A. Prerequisite: departmental approval. Directed study/ research on a problem or area chosen in consultation with instructor. Final paper required. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to maximum of six hours.

**MAT 498. Mathematics Capstone. (1 Credit)**

A. Prerequisite: senior status as a Mathematics major. Designed to enable students to synthesize and integrate their mathematical and statistical knowledge. Students will learn how to conduct research and present the results.

**MAT 501. Applicant of Math for P-9 Teach. (3 Credits)**

A. Prerequisite: MAT 303. Topics in the application of mathematical models appropriate for teachers of grades P-9. Credit does not apply toward B.S. or degree requirements for programs offered within this department.

**MAT 502. Geom with Tech for P-9 Teach. (3 Credits)**

A. Prerequisites: MAT 203 and MAE 305. Topics in geometry appropriate for teachers of grades P-9. Credit does not apply toward either B.S. degree requirements for programs offered within this department.

**MAT 505. Foundations of Mathematics. (3 Credits)**

A. Prerequisite: MAT 308 with a minimum grade of  $\zeta$ C.  $\zeta$  The nature of mathematical thought; logical systems; axiomatic concepts and methods; consideration of the work of Hilbert, Peano, Whitehead, Russell, and others.

**MAT 506. Number Theory. (3 Credits)**

Fundamental properties of integers, linear Diophantine equations, linear and quadratic congruences, famous problems of number theory.

**MAT 507. Seminar in Mathematics:\_\_\_\_. (1-3 Credits)**

Topics vary with offering. May be retaken with advisor approval, provided the topics are different. Credit towards degree requirements will depend on course content.

**MAT 520. Mathematical Statistics I. (3 Credits)**

I. Cross listed as STA 520. Prerequisite: STA 215 or 270. Prerequisite or Corequisite: MAT 254 or 254H. Descriptive statistics, discrete and continuous probability distributions for one and two variables, functions of random variables, sampling distributions, expectations and generating functions. Credit will not be awarded to students who have credit for STA 520.

**MAT 525. Vector Analysis with Applications. (3 Credits)**

A. Prerequisite: MAT 225 or 225H with a minimum grade of  $\zeta$ C.  $\zeta$  Algebra and geometry of vectors; vector functions of a single variable; line, surface, and volume integrals; Divergence Theorem, Stokes  $\zeta$  Theorem, Green  $\zeta$ s Theorem; generalized orthogonal coordinates; Fourier Series; solutions to boundary value problems.

**MAT 527. Cryptology. (3 Credits)**

(3) A. Prerequisites: Senior standing and MAT 301. Classical cryptosystems, basic number theory, DES, Advanced Encryption Standard, RSA, discrete logs, digital signatures, elliptic curve cryptosystem, lattice methods. It is strongly recommended that students have completed a course in proof writing.

**MAT 535. Principles of Geometry. (3 Credits)**

A. Prerequisite: MAT 334 with a minimum grade of "C." Two- and three-dimensional analytical Euclidean geometry, alternate geometries such as hyperbolic, Riemannian, taxicab and affine.

**MAT 540. Applications of Partial Differential Equations. (3 Credits)**

A. Prerequisite: MAT 353 with a minimum grade of "C". Wave, heat/diffusion and potential/Laplace equations, separation of variables, orthogonal sets of functions. Fourier series, boundary value problems, Fourier integrals, maximum principles, the Cauchy problem.

**MAT 550. Applications of Complex Analysis. (3 Credits)**

A. Prerequisite: MAT 225 or 225H or 353 with a minimum grade of  $\zeta$ C.  $\zeta$  Continuity, differentiation, integration, series, residues, and applications to the evaluation of real integrals. Applications of conformal mappings to boundary value problems in heat, electrostatic potential, and fluid flow. Emphasis throughout on computational techniques and applications.

**MAT 555. Graph Theory. (3 Credits)**

A. Prerequisite: MAT 308 or CSC 320 with a minimum grade of  $\zeta$ C.  $\zeta$  Introduction to the theory and applications of graph theory. Topics will include trees, planarity, connectivity, flows, matching, and coloring.

**MAT 560. Point Set Topology. (3 Credits)**

An introduction to topology with emphasis on Euclidean and other metric spaces. Mappings, connectivity, compactness, formation of new spaces, relationship to analysis.

**MAT 565. Mathematics of Structural Bioinformatics. (3 Credits)**

(3) A. Prerequisite: Senior standing, MAT 239, 254 and three hours from CSC 160, 174, 177, or 190. Mathematical and computational approaches to analyze and understand macromolecular structure data. Methods for protein structure determination, refinement, evaluation, comparison, and visualization. Protein surface representation and shape comparison. Structure databases.

**MAT 577. Introduction to Algebraic Coding Theory. (3 Credits)**

(3) A. Prerequisites: Senior standing; MAT 301, or both MAT 214 and departmental approval. Introduction to basic concepts of coding theory, linear codes, perfect codes, cyclic codes, BCH codes, and Reed Solomon codes. Additional topics as time permits. It is strongly recommended that students have completed a course in linear algebra and a course in proof writing.

**Statistics****STA 215. Introduction to Statistical Reasoning. (3 Credits)**

I, II. Prerequisite: Satisfaction of English and reading academic readiness indicators and either satisfaction of mathematics academic readiness indicators\* or concurrent enrollment in STA 215P. Introduction to descriptive statistics, normal distributions, correlation and linear regression, sampling, experiments, chance phenomena, one- and two-sample estimation and hypothesis testing, chi-square tests, and use of statistical software. Gen. Ed. E-2 [QR].

**STA 215L. StatLab for STA 215. (1 Credit)**

A. Corequisite: STA 215. This optional lab is to accompany a regular lecture class in STA 215; topics will vary. 2 Lab.

**STA 215P. Quantitative Support for STA 215. (1 Credit)**

(1) I, II. Corequisite: STA 215. Corequisite support for students concurrently enrolled in STA 215. Emphasis on prerequisite skills needed for statistics, such as real number sense and operations, equations, analyzing graphs, modeling, critical thinking, and use of statistical software. 2 Lab.

**STA 230. Probability and Statistics for Middle Grades Teachers. (3 Credits)**

Prerequisite: MAT 112, 114, 211, or 234 with a minimum grade of "C". Pre- or Co-requisite: MAE 201. Sampling graphs, percentiles, measures of center and variability, mean absolute deviation, correlation, lines of best fit, probability, geometric probability, independence, simulations, contingency tables, counting, binomial uniform, and normal probability distributions, one-sample inference, manipulatives, presentations, technology.

**STA 260. Business Statistics. (3 Credits)**

A. Descriptive statistics, probability, discrete and continuous distributions, normal distributions, sampling distributions, one- and two-sample estimation and hypothesis testing, correlation, linear regression, analysis of variance, business applications, and use of Excel.

**STA 270. Applied Statistics. (4 Credits)**

I, II. Prerequisite: MAT 112 or 112B higher with a minimum grade of "C", or a Math SAT score of 23 or higher, or a Math SAT math score of 560 or higher. Descriptive statistics, probability, counting techniques, discrete and continuous distributions, binomial distributions, normal distributions, sampling distributions, one- and two-sample estimation and hypothesis testing, chi-square tests, correlation, linear regression, analysis of variance, and use of statistical software. Gen. Ed. E-2 [QR].

**STA 270L. StatLab for STA 270:\_\_\_\_. (1 Credit)**

A. Prerequisite/Corequisite: STA 270. This optional lab is to accompany a regular lecture class in STA 270: topics will vary. 2 Lab.

**STA 340. Applied Regression Analysis. (3 Credits)**

I, II. Prerequisite: STA 270 with a minimum grade of "C"; or STA 215 with a minimum grade of "B" and one of the following: MAT 112 or 112B or higher with a Grade of "C" a Math ACT score of 23 or higher, or a Math SAT score of 560 or higher; or departmental approval. Simple and multiple regression, model building, variable screening methods, detection and management of multicollinearity, residual analysis, logistic regression, classical time series analysis, and use of statistical software. Credit will not be awarded to students who have credit for STA 320.

**STA 349. Applied Learning in Statistics. (0.5-8 Credits)**

I, II; (1-6) SUMMER ONLY. Prerequisite: departmental approval. Work in placements related to academic studies. Does not apply to major or minor requirements. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours of employment is required for each semester hour of academic credit.

**STA 349A. Cooperative Study: Statistics. (0.5-8 Credits)**

I, II. (1-6) SUMMER ONLY. Prerequisite: departmental approval. Work in placements related to academic studies. Does not apply to major or minor requirements. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours of employment is required for each semester hour of academic credit.

**STA 349B. Cooperative Study: Statistics. (0.5-8 Credits)**

Work in placements related to academic studies. Does not apply to major or minor requirements.

**STA 349C. Cooperative Study: Statistics. (0.5-8 Credits)**

Work in placements related to academic studies. Does not apply to major or minor requirements.

**STA 349D. Cooperative Study: Statistics. (0.5-8 Credits)**

Work in placements related to academic studies. Does not apply to major or minor requirements.

**STA 349E. Cooperative Study: Statistics. (0.5-8 Credits)**

Work in placements related to academic studies. Does not apply to major or minor requirements.

**STA 375. Sampling Methods. (3 Credits)**

A. Prerequisite: STA 270 with a minimum grade of "C"; or STA 215 with a minimum grade of "B", and one of the following: MAT 112 or 112B or higher with a minimum grade of "C" or a Math ACT score of 23 or higher, or a score of 560 or higher; or departmental approval. Basic concepts of sampling theory, simple random sampling, stratified random sampling, cluster sampling, systematic sampling, ratio and regression estimation, applications to surveys, and use of statistical software. Written and/or oral presentations required.

**STA 380. Nonparametric Statistics. (3 Credits)**

Prerequisite: STA 270 with a minimum grade of "C"; or STA 215 with a minimum grade of "B" and one of the following: MAT 112 or 112B or higher with a Grade of "C" a Math ACT score of 23 or higher, or a Math SAT score of 560 or higher; or departmental approval. Simple, efficient nonparametric methods without normality assumptions. Tests, estimation of proportions, medians, two-sample location/dispersion, one and two-way layout, independence, regression, and use of statistical software. Credit will not be awarded to students who have credit for STA 501.

**STA 382. Probability for Actuaries. (1 Credit)**

A. Prerequisite: STA 370 or 520. Review of elementary probability theory, univariate and multivariate probability distributions, moment generating functions, transformations, order statistics, and applications of probability concepts in a risk management context. Preparation for Exam P.

**STA 470. Applied Probability. (3 Credits)**

Formerly STA 370. Prerequisites: Mat 244 of 244H or 254 or 254H; and STA 215 or 270; or departmental approval. Intuitive and axiomatic development of probability, set theory, counting techniques, conditional probability, Bayes Theorem, discrete distributions including univariate and bivariate cases, multinomial distributions, Markov Chains, and emphasis on applications. Credit will not be awarded to students who have credit for STA 370.

**STA 480. Seminar in \_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topic announced at the time of offering. May be retaken to a maximum of 12 hours, provided the topics are different.

**STA 485. Probability for Actuaries. (2 Credits)**

A. Formerly STA 385. Prerequisite: STA 470, MAT 520 or STA 520. Review of elementary probability theory, univariate and multivariate probability distributions, moment generating functions, transformations, order statistics, and applications of probability concepts in a risk management context. Preparation for Actuarial Exam P. Credit will not be awarded to students who have credit for STA 385.

**STA 495. Independent Work. (1-3 Credits)**

A. Prerequisite: departmental approval. Directed study/ research on a problem or area chosen in consultation with instructor. Final paper required. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of six hours.

**STA 498. Statistics Capstone. (3 Credits)**

A. Prerequisite or corequisite: MAT 520 (C) or STA 520 (C), senior standing, Statistics majors only. Careers in statistics, advanced topics in statistics, statistical research, statistical consulting, written and verbal communication skills, use of presentation software, and use of statistical software. Credit will not be awarded to students who have credit for STA 498W.

**STA 498W. Statistics Capstone. (3 Credits)**

A. Prerequisite or corequisite: MAT 520 (C) or STA 520 (C), senior standing, Statistics majors only. Careers in statistics, advanced topics in statistics, statistical research, statistical consulting, written and verbal communication skills, use of presentation software, and use of statistical software. Credit will not be awarded to students who have credit for STA 498.

**STA 507. Seminar in Statistics:\_\_\_\_\_. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics vary with offering. May be retaken with advisor approval, provided that the topics are different. Credit toward degree requirements will depend on the course content.

**STA 520. Mathematical Statistics I. (3 Credits)**

I. Cross-listed as MAT 520. Prerequisites: STA 215 or 270. Prerequisite or Corequisite: MAT 254 or 254H. Descriptive statistics, discrete and continuous probability distributions for one and two variables, functions of random variables, sampling distributions, expectations and generating functions. Credit will not be awarded to students who have credit for MAT 520.

**STA 521. Mathematical Statistics II. (3 Credits)**

II. Prerequisites: MAT 239; MAT 520 or STA 520. A continuation of STA 520. Estimation theory, hypothesis testing, linear regression analysis of variance, and allied topics.

**STA 570. Quality Control & Reliability. (3 Credits)**

(3) A. Prerequisites: Senior standing, MAT 234 or 234H, and STA 340. Analysis of six sigma techniques, statistical analysis of process capability, statistical process control using control charts, quality improvement, acceptance sampling, and an introduction to product reliability.

**STA 575. Statistical Methods Using SAS. (3 Credits)**

A. Prerequisite: STA 270 with a minimum grade of "C"; or STA 215 with a minimum grade of "B", and one of the following: MAT 112 or 112B or higher with a minimum grade of "C" or a Math ACT score of 23 or higher, or a Math SAT score of 560 or higher; or departmental approval. Data set manipulation, application of statistical techniques in SAS, and statistical programming.

**STA 580. R and Introductory Data Mining. (3 Credits)**

A. Cross-listed as DSC 580. Prerequisite: STA 270 with a minimum grade of "C", or 215 with a minimum grade of "B", and CSC 170 or 174 or 189 or 190. Data set manipulation, application of statistical techniques in R, statistical programming, and data mining skills. Credit will not be awarded to students who have credit for DSC 580.

**STA 585. Experimental Design. (3 Credits)**

A. Prerequisites: STA 270 or departmental approval. Completely randomized designs, factorial experiments, multiple comparisons, model diagnostics, randomized blocks, latin squares, fixed and random models, nested-factorial experiments, 2<sup>f</sup> factorial experiments, and split-plot designs. Emphasis on applications and use of statistical software.

## Actuarial Science, Minor Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
MAT 234	Calculus I	4
MAT 244	Calculus II	4
MAT 520 or STA 520	Mathematical Statistics I	3
STA 270	Applied Statistics	4
STA 340	Applied Regression Analysis	3
STA 470	Applied Probability	3
STA 485	Probability for Actuaries	2
<b>Total Hours</b>		<b>23</b>

## Applied Data Science, University Certificate

### Program Requirements

CIP Code: 27.9999

Code	Title	Hours
<b>Certificate Requirements</b>		
<i>Introductory Statistics Requirements</i>		
STA 270 or STA 215	Applied Statistics Introduction to Statistical Reasoning	3-4
<i>Core Courses</i>		
MAT 234	Calculus I	4
DSC 580	R and Introductory Data Mining	3

or STA 580	R and Introductory Data Mining	
Choose from one of the following:		3
CSC 170	Intro to Game Programming	
CSC 174	Introduction to Programming for Science & Engineering	
CSC 189	Computing Concepts and Programming	
CSC 190	Object-Oriented Programming I	
MAT 239 or STA 340	Linear Algebra and Matrices Applied Regression Analysis	3
<i>Statistics/Data Science Elective</i>		
Choose from three hours of the following:		3
DSC 390	Sports Analytics	
STA 375	Sampling Methods	
STA 480	Seminar in ____ (approved topics)	
STA 570	Quality Control & Reliability	
STA 575	Statistical Methods Using SAS	
<i>Domain Knowledge Electives</i>		
Choose two courses from one of the following categories:		6-7
<i>Anthropology and Sociology:</i>		
ANT 371	Primate Ecology & Sociality	
SOC 232	Social Statistics	
SOC 310	Population and Society	
SOC 395	Research Methods in Sociology	
<i>Biology and Environmental Health Sciences:</i>		
EHS 280 & EHS 370	One Health: Global Environmental Public Health and Environmental Disease Detectives: Epidemiology	
BIO 315 & BIO 533	Genetics and Bioinformatics: Principles and Applications <sup>1</sup>	
BIO 316 & BIO 532	Ecology and Conservation Biology <sup>1</sup>	
<i>Computer Information Systems:</i>		
CIS 335	Data Base Management <sup>1</sup>	
CIS 430 or BUS 304	Business Data Mining Essentials of MIS	
<i>Computer Science and Informatics:</i>		
CSC 310	Data Structures <sup>1</sup>	
CSC 313	Database Systems <sup>1</sup>	
CSC 581	Machine Learning	
INF 314	MS Office & Data Analysis <sup>1</sup>	
<i>Government:</i>		
POL 280	Research and Writing in Political Science <sup>1</sup>	
POL 400W	Capstone Course in Political Science	
POL 440	Public Opinion & Voting Behavior	
<i>Geosciences:</i>		
GEO 351	Geoscience Data and Techniques <sup>1</sup>	
GEO 353	Geographic Information Systems	
GEO 453	Advanced GIS	
GEO 456	Remote Sensing	
GEO 458	Advanced Geographic Imagery	
<i>Physics:</i>		
PHY 315	Electrical Circuits <sup>1</sup>	
PHY 406	<sup>1</sup>	

PHY 460	Classical Mechanics
Psychology:	
PSY 240	Scientific Literacy in Psychology <sup>1</sup>
PSY 315	Sensation and Perception or PSY 315L Sensation and Perception Lab
PSY 340W	Research Literacy in Psychology
PSY 590	Tests and Measurements

**Total Hours** **25-27**

<sup>1</sup>

Requires a pre-requisite course

## Data Science and Statistics, Bachelor of Science (B.S.)

### Program Objectives

Upon successful completion of this program, the graduate will:

1. understand the applications and use of data science and statistics in everyday life;
2. be able to apply a wide variety of statistical techniques;
3. be able to analyze large, complex data sets;
4. use computer packages to perform statistical analyses;
5. be well qualified for employment in industry, government, and the actuarial profession; and
6. be prepared to pursue graduate work in data science or statistics.

### Program Requirements

CIP Code: 27.0501

#### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

### Major

Only courses completed with a grade of at least a "C" will count toward the major requirements.

Code	Title	Hours
<b>University Graduation Requirements</b>		
General Education		36
<i>Student Success Seminar</i>		
SCO 100M	Student Success Seminar in Mathematics and Statistics (waived for transfers with 30+ hrs.)	1
Upper division courses (42 hours distributed throughout Major/Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>		
MAT 239	Linear Algebra and Matrices	3
MAT 244	Calculus II	4
STA 270	Applied Statistics	4
STA 340	Applied Regression Analysis	3
STA 498W	Statistics Capstone	3
Choose from nine hours of the following:		9
DSC 390	Sports Analytics	
DSC 580	R and Introductory Data Mining <sup>1</sup>	
STA 375	Sampling Methods	
STA 380	Nonparametric Statistics	
STA 470	Applied Probability	
STA 520	Mathematical Statistics I <sup>2</sup>	
STA 521	Mathematical Statistics II <sup>2</sup>	
STA 570	Quality Control & Reliability	
STA 575	Statistical Methods Using SAS <sup>1</sup>	
STA 580	R and Introductory Data Mining <sup>1</sup>	
STA 585	Experimental Design	
Choose from three hours of CSC, DSC, MAT, STA courses numbered 300 or above <sup>3</sup>		3
<i>Major Electives</i>		
Choose from one of the following combinations: <sup>4</sup>		6
<i>Data Science:</i>		
CSC 210 & CSC 581	Data Structures and Programming and Machine Learning	
<i>Discrete Mathematics:</i>		
MAT 306 & STA 470	Discrete Mathematics and Applied Probability	
<i>Statistics:</i>		
STA 521	Mathematical Statistics II <sup>2</sup>	
STA 585	Experimental Design	
<i>Supporting Course Requirements</i>		
Choose from one of the following:		3
CSC 170	Intro to Game Programming	
CSC 174	Introduction to Programming for Science & Engineering	
CSC 189	Computing Concepts and Programming	
CSC 190	Object- Oriented Programming I	
ENG 300 or ENG 300S	Introduction to Technical and Professional Writing or Intro to Tech/Prof Writing	3
MAT 234	Calculus I (Element 2) <sup>6,5</sup>	4

Choose from one of the following: 0-3

PHI 130	Beginning Ethics (Element 3B) <sup>G</sup>
PHI 130S	Beginning Ethics (Element 3B) <sup>G</sup>
PHI 362	Technology and Values

*Domain Knowledge Component*

Choose two courses from one of the following categories: 6-7

Anthropology and Sociology:

ANT 371	Primate Ecology & Sociality
SOC 232	Social Statistics
SOC 310	Population and Society
SOC 395	Research Methods in Sociology

Biology and Environmental Health Sciences:

EHS 280 & EHS 370	One Health: Global Environmental Public Health and Environmental Disease Detectives: Epidemiology
BIO 315 & BIO 533	Genetics and Bioinformatics: Principles and Applications <sup>2</sup>
BIO 316 & BIO 532	Ecology and Conservation Biology <sup>2</sup>

Computer Information Systems:

CIS 335	Data Base Management <sup>2</sup>
CIS 430 or BUS 304	Business Data Mining Essentials of MIS

Computer Science and Informatics:

CSC 310	Data Structures <sup>2</sup>
CSC 313	Database Systems <sup>2</sup>
INF 314	MS Office & Data Analysis <sup>2</sup>

Government:

POL 280	Research and Writing in Political Science <sup>2</sup>
POL 400W	Capstone Course in Political Science <sup>2</sup>
POL 440	Public Opinion & Voting Behavior

Geosciences:

GEO 351	Geoscience Data and Techniques <sup>2</sup>
GEO 353	Geographic Information Systems
GEO 453	Advanced GIS
GEO 456	Remote Sensing
GEO 458	Advanced Geographic Imagery

Physics:

PHY 315	Electrical Circuits <sup>2</sup>
PHY 406	<sup>2</sup>
PHY 460	Classical Mechanics <sup>2</sup>

Psychology:

PSY 240	Scientific Literacy in Psychology <sup>2</sup>
PSY 315	Sensation and Perception
	or PSY 315L Sensation and Perception Lab
PSY 340W	Research Literacy in Psychology
PSY 590	Tests and Measurements

Advisor-Approved:

Two advisor-approved courses from a department other than the Department of Mathematics and Statistics

*Free Electives*

Choose from 32-35 hours of free electives 32-35

<b>Total Hours</b>	<b>120</b>
--------------------	------------

1 Must include at least one of DSC 580 R and Introductory Data Mining or STA 575 Statistical Methods Using SAS or STA 580 R and Introductory Data Mining

2 Requires a pre-requisite course

3 Excluding: any 349 courses, MAT 303 Mathematical Models and Applications, STA 500 . STA 480 Seminar in \_\_\_ will count for only approved topics.

4 Courses will not count in both the Core and Major Electives categories.

5 Three hours count toward Element 2<sup>G</sup>

**G**  
Course also satisfies a General Education element. Hours are included within the 36 hours in General Education.

## Data Science and Statistics, Bachelor of Science (B.S.) & Applied Mathematics, Master of Arts (M.A.) Accelerated 3+2 Dual Degree Program

Students accepted to the 3+2 Accelerated Dual Degree Option are able to complete their BS degree and MS degree within 5 calendar years because of the accelerated curriculum; nine semester hours of graduate coursework will apply to both the undergraduate BS degree and the graduate MS degree. Only undergraduate students of proven academic ability will be considered for the program. Students should be aware that, in order to maintain their progress in the accelerated 3+2 program, careful coordination with their advisor is required. Depending upon undergraduate progress at the time of 3+2 admission, some summer school classes may be needed.

### Admission Requirements for the 3+2 Program:

**Students interested in this program must satisfy all the following conditions:**

1. Have Junior or Senior standing
2. Have an overall grade point average (GPA) of at least 3.0 at the time of admission to the 3+2 program
3. Be approved by both the Department of Mathematics and Statistics and the Graduate School (see the 3+2 Enrollment Approval Form at <http://gradschool.eku.edu/graduate-school-forms>)
4. Maintain an overall undergraduate and graduate GPA of at least 3.0 to continue each semester with 3+2 coursework

5. Have an institutional undergraduate and graduate GPA of at least 3.0 to be allowed to move into graduate student status after earning the B.S. Data Science and Statistics degree.

## Program Requirements

CIP Code: 27.0501

Students in the 3+2 Accelerated Dual Degree Option must complete the Data Science and Statistics (B.S.) program requirements listed below, with at least a 3.0 GPA, and must apply and be approved to graduate with that degree before being admitted as a graduate student and allowed to proceed to the M.A. in Applied Mathematics program. Nine credit hours of graduate coursework (MAT/STA 720, STA 775, and MAT 865) will be applicable to the undergraduate degree.

Upon successful completion of this program, the graduate will: (1) understand the applications and use of data science and in data science or statistics in everyday life; (2) be able to apply a wide variety of statistical techniques; (3) be able to analyze large, complex data sets; (4) use computer packages to perform statistical analyses; (5) be well qualified for employment in industry, government, and the actuarial profession; and (6) be prepared to pursue graduate work in data science or statistics.

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

### Major

Only courses completed with a grade of at least a "C" will count toward the major requirements.

Code	Title	Hours

### Applied Mathematics, Master of Arts (M.A.)

See Applied Mathematics, Master of Arts with a Concentration in Applied Mathematics and Statistics (M.A.) (p. 789), Applied Mathematics, Master of Arts with a Concentration in Data Science (M.A.) (p. 790), or Applied Mathematics, Master of Arts with a Concentration in Secondary Mathematics (M.A.) (p. 791)

## Mathematical Sciences, Minor

### Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
Choose from six hours of the following:		6
CSC 170	Intro to Game Programming	
CSC 174	Introduction to Programming for Science & Engineering	
CSC 189	Computing Concepts and Programming	
CSC 190	Object- Oriented Programming I	
CSC 191	Object- Oriented Programming II	
MAT 234	Calculus I	4
MAT 244	Calculus II	4
STA 270	Applied Statistics	4
STA 340	Applied Regression Analysis	3
<b>Total Hours</b>		<b>21</b>

## Mathematics, Bachelor of Science with a Concentration in General Mathematics (B.S.)

### Program Objectives

Upon successful completion of this program, the graduate will:

1. be able to apply mathematical techniques to social, economic, and scientific problems;
2. understand the importance and power of mathematics in our rapidly changing technological age;
3. be prepared to pursue a graduate program in this or a related area; and
4. be well qualified for employment in any position requiring undergraduate training in mathematics.

In addition, students in the Teaching concentration will be prepared for certification to teach mathematics at the secondary level. Refer to the College of Education section of this *Catalog* regarding several teacher certification requirements associated with this degree program.

Choose from 10 hours of the following:		10
MAT 239	Linear Algebra and Matrices	
MAT 254	Calculus III	
STA 470	Applied Probability <sup>1</sup>	
STA 520	Mathematical Statistics I <sup>1</sup>	
Any MAT course numbered 300 or above <sup>1,2</sup>		
<b>Total Hours</b>		<b>18</b>

1

Only one of MAT 520 Mathematical Statistics I, STA 470 Applied Probability, and STA 520 Mathematical Statistics I may count toward the minor.

2

Except for MAT 303 Mathematical Models and Applications, MAT 349 Applied Learning in Mathematics, and MAT 480 Seminar in:\_\_\_

MAT 480 Seminar in:\_\_\_ may be approved to count toward the minor depending on the topic chosen .

## Mathematics/Teaching, Minor

All courses must be completed with a grade of at least "C" and the GPA in the courses used for the minor must be at least 2.75. The teaching minor in mathematics must be coupled with a secondary teaching major in another discipline. Students enrolled in another teaching program who desire teaching certification in mathematics will be required to take MAE 550 Teaching Mathematics in the Secondary School or ESE 550 Teaching Mathematics in the Secondary School and student teach in mathematics. Appropriate PRAXIS exams must be completed for each area of certification being recommended. The PRAXIS exams must be taken prior to student teaching.

## Courses

### Astronomy

#### AST 130. Introductory Astronomy. (3 Credits)

I, II. Prerequisite: MAT 105 or higher. Elementary survey course; study of Moon, Sun, and eclipses; Solar System; near stars and Milky Way. Non-laboratory. Credit will not be awarded for students who have have credit for AST 135.

#### AST 133. Astronomy Transition Lab. (1 Credit)

(1) I,II. Prerequisite: AST 130 or departmental approval. A transition laboratory that will allow students with credit for AST 130 to gain credit for a laboratory science course that is equivalent to AST 135. 2 Lab. Gen. Ed. E4B [NS].

#### AST 135. Introductory Astronomy. (3 Credits)

I, II. Prerequisite: Completion of all academic readiness requirements. Conceptual survey course; topics include backyard astronomy, motion of the Moon and stars, the use of light in astronomy, telescopes, the Solar System, and the Sun. 4 Lec/Lab. Gen. Ed. E-4B.

#### AST 335. Stars, Galaxies, & Cosmology. (3 Credits)

(3) A. Prerequisite: MAT 105 or higher or STA 215 or higher or departmental approval; and ENG 102 or ENG 105(B) or HON 102. A survey course describing the origin and evolution of stars, including black holes, galaxies, and the Universe. We will demonstrate how observations, models and quantitative analysis with graphs lead to the current state of knowledge. Credit will not awarded for both AST 335 and AST 330. 4 Lec/Lab. Gen. Ed. E-4.

### Geography

#### GEO 100. Regions and Nations of the World. (3 Credits)

I, II. Survey of the physical, cultural, and economic geography of the world's major regions, with an emphasis on regions undergoing change and currently of international concern. Gen. Ed. 5B (SBS).

#### GEO 110. Environmental Geography. (3 Credits)

(3) A. Prerequisites: Freshman and Sophomore standing. A focus on ecological function and the physical and human dynamics contributing to environmental change across the globe and at various geographical scales. Environmental issues are examined through a geographical lens, and include clean air and water, energy systems, biodiversity, natural hazards, climate change, and food production. 2Lec/2Lab. Gen. Ed. E-4.

#### GEO 115. Hollywood Weather. (3 Credits)

A. This non-technical introduction to atmospheric processes examines how meteorological events are portrayed in popular movies. Topics may include severe weather events, climate change, and weather's impact on human systems.

#### GEO 210. Introduction to Physical Geography. (3 Credits)

I, II. Study of natural processes operating at the earth's surface with special emphasis on weather and climate and landforms as explanations for how and why physical and human phenomena vary from place to place. 2 Lec/2 Lab. Gen. Ed. IVB or VII (NS).

#### GEO 302. Global Environmental Problems. (3 Credits)

A. Course will be offered every odd Spring semester. Prerequisite: GEO 100, 110, or 210.; ENG 102, ENG 105 (B), or HON 102; MAT 105 or higher; or departmental approval. Examination of environmental problems and conservation strategies in the context of global change, with case studies from exemplary world religions, including rainforest, mountain, desert, and island biomes. Credit will not be awarded to students who have credit for GEO 302 or ENV 302.

**GEO 315. Meteorology. (3,4 Credits)**

I, II. Prerequisite: MAT 112 (A and B), 114, 122, 211 or 234. This course focuses on important phenomena and physical processes that occur in Earth's atmosphere, including atmospheric dynamics, radiation, stability, moisture, wind systems and severe storms.

**GEO 321. Urban Geography. (3 Credits)**

A. Prerequisites: GEO 100, 110, or 210; ENG 102 or ENG 105 (B) or HON 102. Study of city functions, patterns, and past and current problems confronting the city, including the problems of planning, zoning, community housing, shopping centers, and urban renewal.

**GEO 325. Environment Land Use Planning. (3 Credits)**

A. Prerequisites: Prerequisites: GEO 100, 110, or 210; ENG 102 or ENG 105 (B) or HON 102; ENG 102 or ENG 105 (B) or HON 102, and MAT 105. Examines how principles of landscape ecology, resource conservation, and environmental impact analysis are incorporated into land use decisions and public policy. Emphasizes practical application at the site and regional scales. Credit will not be awarded for both GEO 325 and GEO 325S, ENV 325 or ENV 325s.

**GEO 325S. Environmental Land Use Planning. (3 Credits)**

(3) A. Course will be offered every even Spring semester. Prerequisite: GEO 100, 110, or 210; ENG 102, 105(B), or HON 102; MAT 105 or higher, or departmental approval. Examines how principles of landscape ecology, resource conservation, and environmental impact analysis are incorporated into land use decisions and public policy. Emphasizes practical application at the site and regional scale. Credit will only be awarded for GEO 325S or GEO 325 or ENV 325 or ENV 325S.

**GEO 351. Geoscience Data and Techniques. (3 Credits)**

Prerequisites: GEO 100, 110, 210, GLY 104, 107, 108 or 109; MAT 105 and above, STA 215 or 217. Introduction to geoscience data, quantitative and qualitative analysis, hypothesis testing, and appropriate representations of specific data types. Includes exposure to techniques used in geoscience research and applications, including mapping, GIS, GPS, field work, remote sensing, library and Internet research, and others. Practical experience focus. 2 Lec/2 Lab.

**GEO 353. Geographic Information Systems. (3 Credits)**

(3) I, II. Prerequisite: (One of the following): AGR 216, CSC 315, GEO 100, 110, 210, GLY 102, 107, or 108. Introduction to GIS principles, methods, operations, mapping, and applications. Topics include spatial data, databases, GIS analysis, models, site suitability, environmental and social applications, and more. Hands-on emphasis using ArcGIS. 2 Lec/2 Lab.

**GEO 450. Field Studies. (3 Credits)**

(3) A. Prerequisite: GEO 100, 110, or 210. Field techniques and applied case studies of geographic topics in local and regional environs.

**GEO 453. Advanced GIS. (3 Credits)**

I, II. Prerequisite: GEO 353 or departmental approval. Advanced concepts, operations, and applications of raster and vector GIS. Spatial analysis using scanning, imagery, GPS, global data sets, and derived data for natural and social applications. Use of standards, megadata, openGIS, and other advances. 2 Lec/2 Lab.

**GEO 455. GIS Cartography. (3 Credits)**

I. Prerequisite: (One of the following): GEO 100, 110, 210, GLY 102, 107, or 108. Principles of cartographic design for GIS applications. Hands-on emphasis using ArcGIS. 2 Lec/2 Lab.

**GEO 456. Remote Sensing. (3 Credits)**

A. Prerequisite: GEO 100, 110, 210, GLY 102, 107, or 108. Principles, data sources, acquisition, interpretation, analysis, and application of geographic imagery, including maps, air photos, shuttle photography, and satellite digital data. Hands-on computer GIS techniques. 2 Lec/2 Lab.

**GEO 458. Advanced Geographic Imagery. (3 Credits)**

II. Prerequisite: GEO 353 and GEO 456. Characteristics, interpretation, integration and applications of advanced geographic imagery, including remote sensing and GIS digital data. Attention on satellite and multispectral imagery, including image processing. Hands on emphasis. 2 Lec/2 Lab.

**GEO 501. Advanced Geography. (3 Credits)**

A. Prerequisite: departmental approval. In-depth study of geoscience themes using geospatial techniques. May be retaken to a maximum of nine hours if subject matter differs each time.

**Geology****GLY 102. Earth Science for Elementary Teachers. (3 Credits)**

I, II. Prerequisite: Elementary, special education elementary, and elementary DHH education majors only or departmental approval. This inquiry-based course for elementary teachers integrates content, pedagogy and technology to explore Earth as an integrated set of systems and as part of the Solar System. 1 Lec/4 Lab. Gen. Ed. IVB or VII (NS).

**GLY 103. Earth Science for Middle Grades Teachers. (3 Credits)**

II. Prerequisite: Middle grades, special education middle grades, and DHH middle grade education majors only or Earth Science Teaching minors or departmental approval. This inquiry-based course for middle grades teachers integrates content, pedagogy, and technology to explore earth science content aligned with relevant standards in the Next Generation Science Standards and the Praxis Middle School Science exam. 1 Lec/ 4 Lab.

**GLY 104. The Ocean World. (3 Credits)**

(3) Formerly GLY 304. I, II. Investigation of the geologic, physical, biogeochemical, and biologic processes that occur within the oceans of the world. The course emphasizes connections between these processes, and how those connections interact with our planet's life. 2 Lec/2 Lab. Gen Ed E-4. Credit will not be awarded to students who have credit for GLY 304.

**GLY 107. Gold and Diamonds. (3 Credits)**

A. The geology of gold and diamonds, including mineralogy, natural occurrence, exploration, and mining. The impact of gold, diamonds, and other important earth materials on the environment, history, and society will also be discussed. 2 Lec/2 Lab. Gen. Ed. IVB or VII (NS).

**GLY 108. Earthquakes and Volcanoes. (3 Credits)**

I, II. Investigation of the Earth as it exists and functions today, the materials that compose the Earth, the processes that act upon and within the Earth, and the interrelationship of both materials and processes with human activity. 2 Lec/2 Lab. Gen. Ed. IVB or VII (NS).

**GLY 109. Great Moments in Earth History. (3 Credits)**

I, II. Investigation of the origin of the Earth as a planet and its evolutionary development of physical and biological systems through time. Important turning points in the Earth's history will be emphasized. 2 Lec/2 Lab. Gen. Ed. IVB or VII (NS).

**GLY 210. Introduction to Geochemistry. (3 Credits)**

I. Prerequisite or Corequisite: ACT math score of 22, or SAT math score of 530, or passing algebra placement test scores (KYOTE algebra domain KAD score of 14 or higher). or MAT 112, 114, or departmental approval. An introduction to the application of fundamental concepts and skills in chemistry (nomenclature, stoichiometry, bonding, chemical change) to geology, including the distribution of the elements, mineral chemistry, and radiometric dating.

**GLY 302. Earth Science. (3 Credits)**

(3) A. Prerequisite: GLY 102, 104, 107, 108, or 109. Study of the universe and our solar system, the Earth's atmospheric and climatic elements, its physical processes and features, organic development, and natural resources.

**GLY 303. Environmental Geoscience. (3 Credits)**

A. Prerequisite: GLY 103, 104, 107, 108, or 109; or GEO 100, 110, or 210; or departmental approval. Investigation of the Earth as a complex set of interconnected systems that cycle elements, water, and earth materials over geologic and human times scales. The course emphasizes global environmental changes that occur on the planet because of human actions. Credit will not be awarded for both GLY 303 or ENV 303.

**GLY 305. Dinosaurs. (3 Credits)**

(3) A. Prerequisites: GLY 102, 104, 107, 108, 109; ENG 102, ENG 105(B) or HON 102; or departmental approval. The rise, diversification, and extinction of this prominent group of organisms. This course attempts to explore how scientists make inferences about the past, including the use and limitations of physical evidence and the nature of science.

**GLY 307. Exploring the Dynamic Earth. (3 Credits)**

Formerly GLY 107. Planet Earth: origin, composition, and evidence of activity and energetic recycling of Earth materials via plate tectonics.

**GLY 309. Mineralogy. (4 Credits)**

A. Course will be offered every even Fall semester. Prerequisites: GLY 104, 107, 108, or 109; MAT 112 (A and B) or higher; or departmental approval. Study of minerals commonly encountered in rocks and soils with minor emphasis on ore deposits: mineral geochemistry, crystal structure, classification, physical properties, optical properties, and geologic environment. Laboratory develops the ability to identify minerals in hand specimens and thin sections. 3 Lec/2 Lab.

**GLY 315. Hydrology. (3 Credits)**

A. Course will be offered every even Fall semester. Prerequisites: One from GLY 104, 107, 108, or 109; and MAT 114 or both MAT 112A and MAT 112B or ACT 23 and above or SAT 550; or departmental approval. Interrelationships between Earth's systems and the occurrence and character of water in streams, lakes, and groundwater. Focuses on fundamental understanding of hydrologic processes and reservoirs, interaction between surface waters and groundwater and relationships between human activity and these reservoirs. 2 Lec/ 2 Lab.

**GLY 349. Applied Learning in Geology. (0.5-8 Credits)**

I, II. Work in placements related to academic studies. Total hours for baccalaureate, sixteen. A minimum of 80 hours of employment required for each semester hour of academic credit. May not be used to satisfy area, major, or minor requirements.

**GLY 349A. Cooperative Study: Geology. (0.5-8 Credits)**

I, II. Work in placements related to academic studies. Total hours for baccalaureate, sixteen. A minimum of 80 hours of employment required for each semester hour of academic credit. May not be used to satisfy area, major, or minor requirements.

**GLY 349B. Cooperative Study: Geology. (0.5-8 Credits)**

I, II. Work in placements related to academic studies. Total hours for baccalaureate, sixteen. A minimum of 80 hours of employment required for each semester hour of academic credit. May not be used to satisfy area, major, or minor requirements.

**GLY 351. Field Methods. (3 Credits)**

A. Prerequisites: GLY 104, 107, 108, or 109; or departmental approval. Methods of field geology including description and measurement of rock sequences, introduction to geological mapping and writing geological reports. 1 Lec/4 Field.

**GLY 398. Independent Studies in Geology. (1-6 Credits)**

A. Prerequisite: departmental approval. Topic determined by student and instructor. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of six hours provided topic is different each time.

**GLY 408. Process Geomorphology. (3 Credits)**

A. Prerequisite: GEO 110 or 210, 104, 107, 108, 109; or departmental approval. An in-depth study of the geologic processes involved in landform development.

**GLY 409. Igneous & Metamorphic Petrology. (4 Credits)**

A. Course will be offered every odd Fall semester. Prerequisites: GLY 309 and MAT 112 or higher. Nature and origin of common igneous and metamorphic rocks, with emphasis on crystalline rocks. Lab develops the ability to analyze and classify rocks in hand sample and in thin section using a petrographic microscope. 3 Lec/2 Lab.

**GLY 410. Structural Geology. (4 Credits)**

A. Course will be offered every odd Fall semester. Prerequisites: GLY 104, 107, 108, or 109; and MAT 112 (A and B) or higher. Deformation of Earth's crust across a wide range of scale with emphasis on plate tectonics and its consequences. Lab develops the ability to analyze the geometry of deformed rock bodies and solve common structural problems. Course includes a MANDATORY field trip during Fall Break. 3 Lec/2 Lab.

**GLY 415. Sedimentary Geology. (4 Credits)**

A. Course will be offered every odd Fall semester. Prerequisite: GLY 104, 107, 108, 109; MAT 112 (A and B) or higher; or departmental approval. Examination of sedimentary processes and products, the characteristics and origins of sedimentary rocks and their related depositional environments, and application of these principles to solving geological problems. Laboratory develops techniques for describing and interpreting sedimentary rocks, structures, and stratigraphy. Course includes a MANDATORY field trip during Fall Break. 2 Lec/4 Lab.

**GLY 420. Stratigraphy. (4 Credits)**

A. Course will be offered every even Spring semester. Prerequisites: GLY 415 and MAT 112B or higher with a grade of C or better. Description, correlation, and interpretation of stratified sedimentary sequences; basic identification and interpretation of the fossils they contain. Emphases: rock-vs. time-stratigraphy, facies relationships, sequence stratigraphy, event stratigraphy, biostratigraphy, well log correlation. Course includes a mandatory, overnight, weekend field trip. 2 Lec/4 Lab.

**GLY 450. Evolution of the Earth. (3 Credits)**

A. Course will be offered every odd Spring semester. Prerequisite: ENG 102 or 102R or 105 or HON 102 and GLY 309, 409, 410, 415, or 420, or departmental approval. Overview of geological principles from the perspective of the Earth's history, physical and biological. Emphasis on critical thinking and expressive writing. Credit will not be awarded to students who have credit for GLY 450W or 550.

**GLY 450W. Evolution of the Earth. (3 Credits)**

A. Course will be offered every odd Spring semester. Prerequisite: ENG 102 or 102R or 105 or HON 102 and GLY 309, 409, 410, 415, or 420, or departmental approval. Overview of geological principles from the perspective of the Earth's history, physical and biological. Emphasis on critical thinking and expressive writing. Credit will not be awarded to students who have credit for GLY 550.

**GLY 451. Field Camp. (6 Credits)**

SUMMER ONLY. Prerequisites: GLY 409 and 410. Field-training course in the northern and central Rocky Mountains (6 weeks). Analysis of rock sequences; geologic mapping of sedimentary, metamorphic, and igneous terrains; interpretation of complex rock deformation; regional geological synthesis with emphasis on tectonics; and visits to many instructive geologic localities, including national parks and monuments.

**GLY 460. Aqueous Geochemistry. (3 Credits)**

A. Prerequisite: GLY 210 or CHE 111 and 111L. Reactions between natural waters, atmospheric gasses and earth materials in surface and near surface environments. Emphasis is placed on consequences of chemical weathering, composition of surface and near surface water, geochemical cycles, and natural and anthropogenic geochemical events. 2 Lec/2 Lab.

**GLY 480. Petroleum Geology. (3 Credits)**

A. Pre/Corequisites: GLY 410 and GLY 420. Use of the petroleum systems paradigm to explore characteristics of economically-viable petroleum accumulations. Examines fundamental activities such as electric logging, mudlogging, and drilling. Exercises and projects model industry practices in recognizing and understanding petroleum accumulations. 2 Lec/ 2 Lab.

**GLY 482. Paleoclimate. (3 Credits)**

A. Prerequisite: GLY 104, 109, 415, GEO 115, 210, or 315; or departmental approval. How the interaction of ocean and atmosphere creates climate in the planet today and leaves its record in geologically accessible Earth materials, with an emphasis on the interpretation of the geological record and how we learn how the Earth's climate has changed in the past.

**GLY 498. Capstone Project in Geology. (3 Credits)**

A. Prerequisite: senior standing and departmental approval. A capstone experience for geology majors that integrates a research experience with the students' professional development and the production of a substantive deliverable product (e.g. poster, conference presentation, geologic map.) Student must have the independent study form approved by faculty supervisor and department chair prior to enrollment.

**GLY 499. Senior Thesis. (3 Credits)**

A. Prerequisites: senior standing and department approval. Supervised, independent thesis project for majors in geology. Thesis project must be approved by faculty supervisor and department committee prior to enrollment in the course. Student must have the independent study form approved by faculty supervisor and department chair prior to enrollment.

**GLY 535. Hydrogeology. (3 Credits)**

A. Course will be offered every odd Spring semester. Prerequisite: GLY 104, 107, 108, or 109; and MAT 112 or higher. Origin, occurrence, movement, utilization, and conservation of groundwater. Qualitative and quantitative presentation of geological, physical, and geochemical aspects of groundwater hydrology. 2 Lec/2 Lab.

**GLY 580. Selected Topics: \_\_\_. (1-3 Credits)**

A. Prerequisite: senior standing or departmental approval. Designed to explore specific aspects of geology. May be retaken to a maximum of six hours provided topic is different each time.

**Physics****PHY 101. Conceptual Physics. (3 Credits)**

I, II. Prerequisite: MAT 105 or higher or departmental approval. Conceptual approach to topics such as kinematics, Newtonian mechanics, electricity, magnetism, and optics. Not intended for science majors. Credit will not be awarded to students who have credit for PHY 102. 4 Lec/Lab. Gen. Ed. E-4.

**PHY 102. Inquiry Physics for MS Teachers. (3 Credits)**

I, II. Prerequisite: MAT 105 or higher and pre-teaching or teaching middle school education, special education middle grades, or DHH middle grade education majors or departmental approval. An inquiry-based, conceptual approach physical science course for middle school teaching majors. Topics include kinematics, matter and heat, optics, electricity, and magnetism. Credit will not be awarded for both PHY 101 and 102. 4 Lec/Lab. Gen. Ed. E-4 [NS].

**PHY 104. Inquiry Physical Science for Elementary Teachers. (3 Credits)**

I, II. Cross-Listed with CHE 104. Prerequisite: Elementary, special education elementary, and DHH elementary education majors only, sophomore standing, and MAT 112 or higher. An activity-oriented conceptual course in the physical sciences. Topics include the structure and properties of matter, heat and temperature, forces, motion, magnets, energy, and sound waves. Credit will not be awarded for students who have credit for CHE 104. 2 Lec/2 Lab.

**PHY 131. College Physics I. (5 Credits)**

I, II. Prerequisite: MAT 112 or higher or departmental approval. MAT 120 or higher is recommended. Algebra and trigonometry based approach to Newtonian mechanics, including Kinematics, Newton's laws, momentum, energy, and rotation. Credit will not be awarded to students who have credit for PHY 201. 6 Lec/Lab. Gen. Ed. IVB or VII (NS).

**PHY 132. College Physics II. (5 Credits)**

I, II. Prerequisite: PHY 131 with a grade of "C" or better or departmental approval. Algebra and trigonometry based approach to electromagnetic phenomena, including electric forces and fields, simple DC circuits, magnetic forces and fields, magnetic induction, and optics. Credit will not be awarded to students who have credit for PHY 202. 6 Lec/Lab.

**PHY 200. Volunteering in Physics and Astronomy. (0 Credits)**

A. An exposure to physics and astronomy activities, including, but not limited to, exploring physical and astronomical research projects, organizing physics and astronomy community service, and assisting at other physics and astronomy departmental events. Students can choose the focus of the volunteering in each semester. Passing grade achieved for attending 80% of the designated activities in each semester.

**PHY 201. University Physics I. (5 Credits)**

I. Prerequisite: MAT 211, 234 or 234H or departmental approval. Composition and resolution of forces, laws of equilibrium, Newton's laws of motion, work and energy, momentum, simple harmonic motion, hydrodynamics, heat phenomena. Credit will not be awarded to students who have credit for PHY 131 and PHY 201. 6 Lec/Lab. Gen. Ed. IVB or VII (NS).

**PHY 202. University Physics II. (5 Credits)**

II. Prerequisite: PHY 201 with a grade of "C" or better. Prerequisite or Corequisite: MAT 244 or 244H or departmental approval. Electrostatics, electric potential, dielectrics, A.C. and D.C. circuits, magnetic fields, Faraday's Law, sound, wave motion, geometrical and physical optics. Credit will not be awarded to students who have credit for PHY 132. 6 Lec/Lab.

**PHY 211. Intermediate Physics. (4 Credits)**

A. Prerequisites: PHY 201 with a grade of "C" or better or PHY 131 with a minimum grade of "B" or better; MAT 234 or 234H; or departmental approval. Applications of calculus to physical principles. Topics include fluid mechanics, thermodynamics, and wave optics.

**PHY 221. Statics. (3 Credits)**

A. Prerequisite: PHY 201. Prerequisite/Corequisite: MAT 244 or 244H or departmental approval. Study of force systems on bodies at rest, descriptions of force systems, distributed and internal forces, frames and trusses, beams.

**PHY 302. Modern Physics. (4 Credits)**

(4) A. Prerequisites: PHY 132 or PHY 202; MAT 211 or MAT 234 or MAT 234H or departmental approval. Physics of the 20th century. Topics include special relativity, quantum effects, wave theory, Bohr theory, nuclear structure, nuclear reactions, and other topics related to 20th century modern physics. Credit will not be awarded to students who have credit for PHY 302W.

**PHY 302W. Modern Physics. (4 Credits)**

(4) A. Prerequisites: ENG 102, 105(B) or HON 102; PHY 132 or PHY 202; MAT 211, MAT 234 or MAT 234H or departmental approval. Physics of the 20th century. Topics include special relativity, quantum effects, wave theory, Bohr theory, nuclear reactions, and other topics related to 20th century modern physics. Credit will not be awarded to students who have credit for PHY 302.

**PHY 303. Introduction to Laser Physics. (3 Credits)**

A. Prerequisite: PHY 132 or PHY 202 and instructor approval. An introduction to the theory and application of different types of lasers such as dye, nitrogen, He/Ne, diode, and mercury vapor; the characteristics of laser light, and optical measuring devices. 2 Lec/2 lab.

**PHY 306. Classical Physics Laboratory. (2 Credits)**

I. Prerequisite: PHY 132 or 202. Experiments in mechanics, optics, and electricity. Simulation of physical situations using a spreadsheet. Techniques of interfacing scientific equipment to microcomputers. 4 Lab.

**PHY 307. Electronics. (4 Credits)**

A. Prerequisite: PHY 132 or 202. Theory of solid state devices, power supplies, transducers, operational amplifiers, solid state switches, flip-flops, counters, digital devices, logic families. 3 Lec/3 Lab.

**PHY 310. Theoretical Methods in Physics. (3 Credits)**

(3) A. Prerequisites: MAT 254 with a grade of "C" or better; CSC 174, or departmental approval. Analytical methods for characterizing physics models and solving physics problems in advanced topics are discussed, including vector analysis, linear algebra, complex analysis, infinite series, waves and Fourier series, differential equations and other techniques.

**PHY 315. Electrical Circuits. (4 Credits)**

A. Prerequisite: PHY 202. Prerequisite or Corequisite: MAT 244 or 244H. Fundamental laws and principles for linear circuits whose elements consist of passive and active components used in present day practice. Determination of the sinusoidal steady state responses using the algebra of complex numbers.

**PHY 349. Applied Learning in Physics. (0.5-8 Credits)**

A. Work in placements related to academic studies. A minimum of 80 hours employment is required for each semester hour of academic credit. Total hours: eight, associate; sixteen, baccalaureate. Hours earned in PHY 349 will not apply toward a physics major or minor.

**PHY 349A. Cooperative Study: Physics. (0.5-8 Credits)**

A. Work in placements related to academic studies. A minimum of 80 hours employment is required for each semester hour of academic credit. Total hours: eight, associate; sixteen, baccalaureate. Hours earned in PHY 349 will not apply toward a physics major or minor.

**PHY 349B. Cooperative Study: Physics. (0.5-8 Credits)**

Work in placements related to academic studies. Hours earned in PHY 349 will not apply toward a physics major or minor.

**PHY 349C. Cooperative Study: Physics. (0.5-8 Credits)**

Work in placements related to academic studies. Hours earned in PHY 349 will not apply toward a physics major or minor.

**PHY 349D. Cooperative Study: Physics. (0.5-8 Credits)**

Work in placements related to academic studies. Hours earned in PHY 349 will not apply toward a physics major or minor.

**PHY 360. Engineering Dynamics. (3 Credits)**

A. Prerequisite: PHY 221 and MAT 244. Newtonian dynamics of particles and rigid bodies. Engineering applications of equations of motion, work and energy, conservative forces, acceleration, relative motion, and plane motion, including solving systems in multiple coordinate systems.

**PHY 375. Engineering Thermodynamics. (3 Credits)**

A. Prerequisite: PHY 202. Prerequisite or Corequisite: MAT 244 or 244H. Study of temperature, thermodynamic systems, ideal gases, first and second law of thermodynamics, Carnot cycle, Kelvin temperature scale, entropy, including thermodynamic analysis of engineering devices.

**PHY 380. Fluid Mechanics. (3 Credits)**

A. Prerequisite: PHY 360, PHY 375, and MAT 353. Properties of fluids, fluid statics, inviscid fluid dynamics, fluid kinematics, thermodynamic principles, mass momentum and energy principles, and viscous effects. Flow through pipes and around bodies.

**PHY 402. Modern Optics. (3 Credits)**

A. Prerequisite: PHY 211 or departmental approval. Prerequisite or Corequisite: MAT 244. Wave motion, interference, diffraction, electromagnetic radiation, dispersion, polarization, and lasers.

**PHY 406W. Advanced Physics Laboratory. (3 Credits)**

Prerequisite: ENG 102, 105(B), or HON 102; PHY 302 or 302W, or departmental approval. Experiments in mechanics, optics, electricity, and nuclear physics, computer simulations of physical situations. Measurement and data analysis techniques, including error analysis. May be repeated up to a maximum of six hours provided content different each time. 5 Lec/Lab.

**PHY 410. Independent Study in Physics:\_\_\_\_. (1-6 Credits)**

(1-6) A. Prerequisite: PHY202 or departmental approval. May be retaken to a maximum of six hours provided subject matter is different each time. Student must have the independent study form approved by faculty supervisor and department chair prior to enrollment.

**PHY 411. Special Topics in Physics:.. (1-6 Credits)**

(1-6) A. Prerequisite: PHY 202 or departmental approval. Special topics in physics of current interest to faculty and students will be presented through lecture, discussion, and reports. May be retaken to a maximum of six hours provided subject matter is different each time.

**PHY 412. Directed Research in Physics:.. (1-6 Credits)**

A. Prerequisite: PHY 302 and departmental approval. A directed research experience for physics majors that may include laboratory experiments, development of new equipment, physics education research, or computational solutions of special problems related to physics. May be retaken to a maximum of six hours. Student must have the independent study form approved by faculty supervisor and department chair prior to enrollment.

**PHY 421. Electricity and Magnetism I. (3 Credits)**

(3) I. Prerequisites: PHY 310 with a grade of "C" or better or departmental approval. Electrostatics in vacuum and dielectrics, solutions of Laplace's and Poisson's equations, magnetic fields, induced EMF's, magnetic materials, and Maxwell's equations.

**PHY 422. Electricity and Magnetism II. (3 Credits)**

(3) II. Prerequisites: PHY 421 or departmental approval. Maxwell's equations, electromagnetic waves in insulators and conductors, energy and momentum, electromagnetic radiation, dipole radiation, special relativity, special applications.

**PHY 456. Statistical and Thermal Physics. (3 Credits)**

A. Prerequisites: PHY 302; PHY 310 with a grade of "C" or better; or departmental approval. Microscopic approach to thermal processes. Topics include probability, entropy, the canonical ensemble, blackbody radiation, and quantum statistics including Bose-Einstein and Fermi-Dirac statistics.

**PHY 460. Classical Mechanics. (4 Credits)**

(4) A. Prerequisite: PHY 310 with a grade of "C" or better or departmental approval. Prerequisite/Corequisite: MAT 353. Applications of calculus to the principles of classical mechanics. Topics include rectilinear motion in 1-D, motion in 3-D, non-inertial frames, central forces, many-bodied systems, rigid bodies, Lagrangian mechanics, and other topics related to classical mechanics.

**PHY 470. Quantum Mechanics. (3 Credits)**

A. Prerequisites: PHY 310 and PHY 460, or departmental approval. Basic principles of wave mechanics, solutions of Schrodinger wave equation for simple systems, interpretation of solutions and application to atomic and molecular problems.

**PHY 506. Physics for High School Teachers. (3 Credits)**

A. Credit given toward major or minor only in teaching programs. Topics from general and modern physics to prepare teachers to teach high school physics and give classroom demonstrations. 2 Lec/3 Lab.

## Earth Science/Teaching, Minor

The teaching minor in earth science must be coupled with a secondary teaching degree in another discipline to teach earth science at the secondary level. Students enrolled in a teaching program other than science who desire teaching certification in earth science will be required to complete ESE 561 Teaching Science in Secondary School and student teach in earth science. Please note that the earth science minor GPA must be 2.75 or greater to seek certification in earth science. The minor certification cannot be recommended until the secondary teaching program is completed and a recommendation for certification has been processed. Appropriate PRAXIS exams must be completed for each area of certification being recommended.

## PRAXIS Examination

Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education requirements. Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

## Program Requirements

A student may minor in earth science (teaching) by completing a minimum of 21 semester hours as follows:

Code	Title	Hours
<b>Required Courses</b>		
GLY 104	The Ocean World	3
GLY 103	Earth Science for Middle Grades Teachers	3
or GLY 108	Earthquakes and Volcanoes	
GLY 109	Great Moments in Earth History	3

GEO 315	Meteorology	3
AST 135	Introductory Astronomy	3
Choose from two of the following:		6-8
GLY 303	Environmental Geoscience	
GLY 309	Mineralogy	
GLY 351	Field Methods	
GLY 408	Process Geomorphology	
GLY 410	Structural Geology	
GLY 415	Sedimentary Geology	
GLY 420	Stratigraphy	
GLY 450W	Evolution of the Earth	
Approved electives from astronomy or geography		

**Total Hours****21-23**

## Environmental and Applied Geology, Bachelor of Science with a Concentration in Academic (B.S.)

Geology is the study of Earth; we study the processes, behavior and materials of Earth, its water and its atmosphere both in recent times and in the geologic past. Through understanding how Earth formed, how it changed over billions of years, and how it continues to function today, we can look forward in time to predict how natural processes and human actions will interact to impact Earth in the future. Knowledge of geological concepts and processes helps scientists, politicians, and business professionals make decisions about the use of Earth's natural resources, protection of humans against natural disasters, and wise stewardship of our environment.

For students wishing to enter the professional world immediately upon graduation, the Professional Concentration prepares our students to become competent professionals with the requisite knowledge and skills necessary to successfully pass the initial certification exam to eventually obtain their Professional Geologist designation. Students will have the opportunity to gain knowledge and skills in each of the eight areas of professional geology and geotechniques, as well as develop critical research skills through a senior thesis or field camp experience.

Students in the Academic Concentration will gain the foundational knowledge and skills in geology, mathematics and natural sciences necessary to be successful in graduate school, as well as to explore potential areas of geologic specialization through independent research or a field camp experience and elective courses.

## Program Requirements

1

Preparatory course in mathematics may be required before admission to MAT 122 Precalculus Mathematics, or MAT 234 Calculus I.

## Environmental Geosciences, Minor

The minor in Environmental Geosciences emphasizes:

- Scientific understanding of the natural laws that govern the functioning of the Earth as a system;
- Human connections to the physical and natural world;
- Environmental ethics, values and behavior and how they are expressed in individuals, communities, societies, and institutional structures
- Technological and economic applications of environmental geosciences; and
- Practical applications of environmental geosciences to the real world, and to the student's major and career plans

## Program Requirements

The minor in Environmental Geosciences requires a minimum of 18 credit hours.

Code	Title	Hours
<b>Required Courses</b>		
<i>Core Courses</i>		
GEO 353	Geographic Information Systems	3
Choose from a minimum of three hours from five of the six following content areas:		
Human Connections to the Physical and Natural World:		
Choose from one of the following:		
GEO 110	Environmental Geography (Element 4) <sup>G</sup>	
GLY 303	Environmental Geoscience	
BIO 500	Environmental Issues	

ANT 370	Primate Conservation
EHS 425	One Health: Planning to Practical Application
SOC 383	Environment and Society
Environmental Behaviors, Values, and Ethics:	
Choose from one of the following:	
GEO 302W	
ENG 208W	(Element 3B) <sup>G</sup>
REC 290	Adventure Programming
AGR 345	Sustainable Agroecosystems
PHI 385	Environmental Ethics

**Natural Systems Function:**

Choose a minimum of three hours of the following:	
GEO 315	Meteorology
GLY 315	Hydrology
GLY 415	Sedimentary Geology
WLD 317	Conservation of Wildlife Resources
BIO 590	Ecology for Teachers
BIO 112	Ecology and Evolution (Element 4) <sup>G</sup>

**Technological and Economic Applications:**

Choose from one of the following:	
AGR 319	Renewable and Sustainable Energy Systems
ECO 340	Environmental Economics
or APP 340	Environmental Economics
AGR 340	Conservation of Agricultural Resources
GEO 325	Environment Land Use Planning
or GEO 325S	Environmental Land Use Planning
GEO 430	
or APP 430	Sustainability in Appalachia
GLY 535	Hydrogeology

**Applied Studies:**

Choose from one of the following:	
GEO 349	
GEO 349	(A-N)
GEO 435	
GLY 408	Process Geomorphology
EMS 561	Environmental Education Essentials
EMS 564S	Service Learning as Pedagogy

**Geospatial Techniques:**

Choose from one of the following:	
GEO 453	Advanced GIS
GEO 455	GIS Cartography
GEO 456	Remote Sensing

**Total Hours** 18-19**G**

Course satisfies a General Education element.

## Geographic Information Systems, University Certificate

### Program Requirements

CIP Code: 45.0702

Code	Title	Hours
<b>Certificate Requirements</b>		
<i>Core Courses</i>		
GEO 353	Geographic Information Systems	3
GEO 455	GIS Cartography	3
GEO 456	Remote Sensing	3
GEO 453	Advanced GIS	3
<i>Electives</i>		
Choose from six hours of the following:		6
GEO 351	Geoscience Data and Techniques	
GEO 458	Advanced Geographic Imagery	
GEO 501	Advanced Geography:___	
GLY 351	Field Methods	
AEM 195	Computer Aided Drafting	
CON 221	Plane Surveying	
HLS 461	Disaster Resilience	
HLS 491	Disaster Planning and Exercises	
Choose from one of the following:		
GEO 398		
GLY 498	Capstone Project in Geology	
GLY 499	Senior Thesis (if topic is appropriate)	
Choose from one of the following:		
STA 215	Introduction to Statistical Reasoning	
STA 270	Applied Statistics	
STA 500		
Choose from one of the following:		
CSC 160	Introduction to Web Programming	
CSC 174	Introduction to Programming for Science & Engineering	
CSC 177	Introduction to Visual Basic	
CSC 190	Object- Oriented Programming I	
<b>Total Hours</b>		<b>18</b>

## Geography, Minor

### Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
GEO 100	Regions and Nations of the World	3
GEO 210	Introduction to Physical Geography	3
GEO 353	Geographic Information Systems	3
Choose from nine hours of geography electives, six of which must be at the 300-level or above		9
<b>Total Hours</b>		<b>18</b>

## Geology, Minor

### Program Requirements

A student may minor in Geology by completing a minimum of 18 semester hours as follows:

Code	Title	Hours
<b>Required Courses</b>		
Choose from a maximum of six hours of the following:		6
GLY 102	Earth Science for Elementary Teachers	
GLY 104	The Ocean World	
GLY 107	Gold and Diamonds	
GLY 108	Earthquakes and Volcanoes	
GLY 109	Great Moments in Earth History	
Choose from a minimum of additional 12 hours of upper-division geology courses		12
<b>Total Hours</b>		<b>18</b>

## Physics, Bachelor of Science with a Concentration in Engineering Physics (B.S.)

### Program Objectives

Upon completion of this program the graduate will:

1. be able to apply mathematics to analyze problems in Physics;
2. be able to use fundamental physical results, such as conservation laws, to study physical systems;
3. be able to analyze important processes occurring in physical systems.

Additionally, graduates of this program will:

1. be prepared for employment in Physics or a related field in the public or private sector;
2. be prepared for admission to a graduate program in Physics or a related field;
3. be prepared to take and pass the Praxis exam in Physics; and physics teaching majors will be prepared to teach Physics in a secondary school.

## Program Requirements

SCO 100P	Student Success Seminar in Physics (waived for transfers with 30+ hrs.)	1
Upper division courses (42 hrs. distributed throughout Major/Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>		
PHY 201 or PHY 131	University Physics I <sup>1</sup> College Physics I	5
PHY 202 or PHY 132	University Physics II <sup>2</sup> College Physics II	5
PHY 211	Intermediate Physics	4
PHY 302 or PHY 302W	Modern Physics Modern Physics	4
PHY 406 or PHY 406W	Advanced Physics Laboratory	3
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
Physics (General)		
Engineering Physics		
	Physics Teaching	54
<i>Free Electives</i>		
	Choose from 8 hours of free electives <sup>3</sup>	8
<b>Total Hours</b>		<b>120</b>

1

At the discretion of the chair, PHY 131 College Physics I may be substituted for PHY 201 University Physics I.

2

For teaching majors PHY 132 College Physics II may be substituted for PHY 202 University Physics II.

3

Students who are interested in Medical Physics graduate programs are encouraged to take EHS 510 Radiological Health and Safety as a free elective.

### Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
AST 135	Introductory Astronomy	3
AST 335	Stars, Galaxies, & Cosmology	3
Choose from three hours of PHY courses numbered 300 and above		3
<i>Supporting Course Requirements</i>		
BIO 100 or BIO 102	Introductory Biology (Element 4) <sup>G</sup> Inquiry Biology for Teachers	
CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
MAT 234	Calculus I (Element 2) <sup>G,1</sup>	
MAT 244	Calculus II	4
<i>Professional Education Requirements</i>		
EDC 300	Differentiation in Inclusive Classrooms	3
EDF 203	Educational Foundations	3
EDF 204	Emerging Instructional Technologies	2

EDF 219	Human Development and Learning	3
EDF 413	Assessment in Education	3
EMS 300W	Curriculum and Instructional Design	3
EMS 474	Disciplinary Literacy	3
EMS 490	Classroom & Behavior Management	3
ESE 561	Teaching Science in Secondary School	3
SED 104	Special Education Introduction (Element 6) <sup>G</sup>	
Clinical Experiences:		
CED 100	Clinical I: Introduction to the Education Profession	0
CED 200	Clinical II: Understanding the Learner	0
CED 300	Clinical III: Curriculum and Instructional Design	0.5
CED 400	Clinical IV: Diagnosis and Prescription	0.5
CED 450	Clinical V: Practicing Teaching	1
CED 499	Clinical VI: The Professional Semester	9

**Exit Requirements****PRAXIS Examination**

Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education requirements. Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

**Total Hours** **54**

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above. Note that a max of 3 credit hours from one course may be applied each to any Gen. Ed. element.

1

A preparatory course (MAT 122 Precalculus Mathematics) in mathematics may be required before admission to MAT 234 Calculus I.

## Physics, Minor

### Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
PHY 201	University Physics I <sup>1</sup>	5
or PHY 131	College Physics I	
PHY 202	University Physics II <sup>2</sup>	5
or PHY 132	College Physics II	
PHY 211	Intermediate Physics	4
Choose from a minimum of additional four hours of PHY 300-level or above		4
<b>Total Hours</b>		<b>18</b>

1

PHY 131 College Physics I may be substituted for PHY 201 University Physics I

2

PHY 132 College Physics II may be substituted for PHY 202 University Physics II

## Physics/Teaching, Minor

The teaching minor in physics must be coupled with a teaching major in biology, chemistry, or mathematics to qualify students to teach physics at the secondary level. Students enrolled in a teaching program other than science who desire teaching certification in physics will be required to take ESE 561 Teaching Science in Secondary School. Please note the physics minor GPA must be 2.75 or greater, and student teaching in physics is required. The minor certification cannot be recommended until the secondary teaching program is completed and a recommendation for certification has been processed. Appropriate PRAXIS exams must be completed for each area of certification being recommended.

### PRAXIS Examination

Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education requirements. Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

### Program Requirements

PHY 211	Intermediate Physics	4
PHY 302	Modern Physics	4
or PHY 302W	Modern Physics	
<b>Total Hours</b>		<b>18</b>

1

PHY 131 College Physics I may be substituted for PHY 201 University Physics I

2

PHY 132 College Physics II may be substituted for PHY 202 University Physics II

## Division of Natural Areas

Dr. Stephen Richter, Director  
Dr. Kelly Watson, Associate Director  
Science Building 3106  
(859) 622-1476

Eastern Kentucky University owns three natural areas available for use by faculty, staff, and students across campus and for use by the public: Lilley Cornett Woods Appalachian Ecological Research Station (Letcher County), Maywoods Environmental and Educational Laboratory (Garrard and Rockcastle counties), and Taylor Fork Ecological Area (Madison County). As a unit, these Natural Areas function as a continuum of natural habitats found in the Commonwealth. They also serve as base stations for engaging regional communities. Our Natural Areas are used extensively by ECU, other universities, and elementary and secondary schools as outdoor classrooms. The Division is responsible for stewardship and management of the areas collectively for

1. place-based education, research, recreation, and regional outreach by ECU personnel and

- providing infrastructure and expertise to the public for nature-based learning, research, recreation through K-12 programming, public events, and open hours activities such as hiking, fishing, and wildlife photography.

Lilley Cornett Woods, the oldest and most studied tract of old-growth forest in eastern Kentucky, is a Registered Natural Landmark (U.S. Department of Interior) and is operated as a nature preserve. Onsite facilities, including visitor center, research and learning laboratory, bunkhouse, manager's home, outdoor teaching pavilion, and maintenance building, offer an excellent off-campus venue for meetings, classes, and workshops. The property is 659 acres, and public use is limited to facilities and guided hikes in this unique forest.

Maywoods Environmental and Educational Laboratory is 1,700 forested-acres, with a 13-acre lake and is a wildlife refuge that provides protective habitat for native species. Onsite facilities, including a lodge with classroom and sleeping space, manager's home, outdoor classroom shelter, amphitheater, and maintenance building, also offer a venue for meetings, classes, and workshops. The site is open to the public for fishing, and hiking on any of the six self-guiding trails.

Taylor Fork Ecological Area is a 60-acre restoration site at the south end of ECU's main campus in Richmond. The Area's habitat is primarily old pastureland with fence row strips of trees and small patches of woods and canebrakes. Developed as a site for experiential learning, research, and restoration, Taylor Fork was conceived by students in ECU's Wildlife Management Program and includes the adjacent American Chestnut Orchard. The site currently has no facilities and is open to the public for hiking on the designated trails.

In addition to managing ECU's Natural Areas, the Division houses the Center for Environmental Education. The Center is involved in a variety of community and educational outreach programs through the University, public school districts, and the Kentucky University Partnership for Environmental Education, which includes all eight state universities and the Kentucky Community and Technical College System. The Division administers a certificate in environmental education that is available to students of all majors.

For further information about the use and availability of ECU's Natural Areas for research, education, leisure or educational programming, please call (859) 622-1476 or visit the website, [www.naturalareas.eku.edu](http://www.naturalareas.eku.edu) (<http://www.naturalareas.eku.edu>).

## The Institute of Agriculture, Natural Resources, and the Environment

The Institute of Agriculture, Natural Resources, and the Environment is comprised of the Department of Agriculture, the Center for Environmental Education, and the Division of Natural Areas. Consistent with Eastern Kentucky University's long and successful history of managing agricultural and natural resources for the greater benefit of the campus and local community, the Institute will enhance opportunities for collaborative growth and program support in developing interdisciplinary programs and administering ECU's farms and natural areas for land stewardship and resource management. The Institute offers associate, baccalaureate, and university certificate programs.

The Institute also supports a broad range of interdisciplinary activities, programs, and opportunities for students, including (1) applied learning through internships in agriculture, natural resource management, and environmental education at ECU farms and natural areas; (2) courses, educational programming, and public engagement at our six field

stations totaling over 3,200 acres: Meadowbrook Farm, Lilley Cornett Woods Appalachian Research Station, Maywoods Environmental and Educational Laboratory, Taylor Fork Ecological Area, Cardinal Lane Outdoor Laboratory, and Gladie Cultural and Environmental Learning Center; and (4) job-placement opportunities with state, federal, and non-governmental organizations; and (5) interdisciplinary university certificates that will enrich their degree programs.

## Certificate

- Environmental Education, University Certificate (p. 528)
- Environmental Science, Departmental Certificate (p. 528)

## Courses

### GEO 100. Regions and Nations of the World. (3 Credits)

I, II. Survey of the physical, cultural, and economic geography of the world's major regions, with an emphasis on regions undergoing change and currently of international concern. Gen. Ed. 5B (SBS).

### GEO 110. Environmental Geography. (3 Credits)

(3) A. Prerequisites: Freshman and Sophomore standing. A focus on ecological function and the physical and human dynamics contributing to environmental change across the globe and at various geographical scales. Environmental issues are examined through a geographical lens, and include clean air and water, energy systems, biodiversity, natural hazards, climate change, and food production. 2Lec/2Lab. Gen. Ed. E-4.

### GEO 115. Hollywood Weather. (3 Credits)

A. This non-technical introduction to atmospheric processes examines how meteorological events are portrayed in popular movies. Topics may include severe weather events, climate change, and weather's impact on human systems.

### GEO 210. Introduction to Physical Geography. (3 Credits)

I, II. Study of natural processes operating at the earth's surface with special emphasis on weather and climate and landforms as explanations for how and why physical and human phenomena vary from place to place. 2 Lec/2 Lab. Gen. Ed. IVB or VII (NS).

### GEO 302. Global Environmental Problems. (3 Credits)

A. Course will be offered every odd Spring semester. Prerequisite: GEO 100, 110, or 210.; ENG 102, ENG 105 (B), or HON 102; MAT 105 or higher; or departmental approval. Examination of environmental problems and conservation strategies in the context of global change, with case studies from exemplary world religions, including rainforest, mountain, desert, and island biomes. Credit will not be awarded to students who have credit for GEO 302 or ENV 302.

### GEO 315. Meteorology. (3,4 Credits)

I, II. Prerequisite: MAT 112 (A and B), 114, 122, 211 or 234. This course focuses on important phenomena and physical processes that occur in Earth's atmosphere, including atmospheric dynamics, radiation, stability, moisture, wind systems and severe storms.

### GEO 321. Urban Geography. (3 Credits)

A. Prerequisites: GEO 100, 110, or 210; ENG 102 or ENG 105 (B) or HON 102. Study of city functions, patterns, and past and current problems confronting the city, including the problems of planning, zoning, community housing, shopping centers, and urban renewal.

**GEO 325. Environment Land Use Planning. (3 Credits)**

A. Prerequisites: Prerequisites: GEO 100, 110, or 210; ENG 102 or ENG 105 (B) or HON 102; ENG 102 or ENG 105 (B) or HON 102, and MAT 105.

Examines how principles of landscape ecology, resource conservation, and environmental impact analysis are incorporated into land use decisions and public policy. Emphasizes practical application at the site and regional scales. Credit will not be awarded for both GEO 325 and GEO 325S, ENV 325 or ENV 325s.

**GEO 325S. Environmental Land Use Planning. (3 Credits)**

(3) A. Course will be offered every even Spring semester. Prerequisite: GEO 100, 110, or 210; ENG 102, 105(B), or HON 102; MAT 105 or higher, or departmental approval. Examines how principles of landscape ecology, resource conservation, and environmental impact analysis are incorporated into land use decisions and public policy. emphasizes practical application at the site and regional scale. Credit will only be awarded for GEO 325S or GEO 325 or ENV 325 or ENV 325S.

**GEO 351. Geoscience Data and Techniques. (3 Credits)**

Prerequisites: GEO 100, 110, 210, GLY 104, 107, 108 or 109; MAT 105 and above, STA 215 or 217. Introduction to geoscience data, quantitative and qualitative analysis, hypothesis testing, and appropriate representations of specific data types. Includes exposure to techniques used in geoscience research and applications, including mapping, GIS, GPS, field work, remote sensing, library and Internet research, and others. Practical experience focus. 2 Lec/2 Lab.

**GEO 353. Geographic Information Systems. (3 Credits)**

(3) I, II. Prerequisite: (One of the following): AGR 216, CSC 315, GEO 100, 110, 210, GLY 102, 107, or 108. Introduction to GIS principles, methods, operations, mapping, and applications. Topics include spatial data, databases, GIS analysis, models, site suitability, environmental and social applications, and more. Hands-on emphasis using ArcGIS. 2 Lec/2 Lab.

**GEO 450. Field Studies. (3 Credits)**

(3) A. Prerequisite: GEO 100, 110, or 210. Field techniques and applied case studies of geographic topics in local and regional environs.

**GEO 453. Advanced GIS. (3 Credits)**

I, II. Prerequisite: GEO 353 or departmental approval. Advanced concepts, operations, and applications of raster and vector GIS. Spatial analysis using scanning, imagery, GPS, global data sets, and derived data for natural and social applications. Use of standards, megadata, openGIS, and other advances. 2 Lec/2 Lab.

**GEO 455. GIS Cartography. (3 Credits)**

I. Prerequisite: (One of the following): GEO 100, 110, 210, GLY 102, 107, or 108. Principles of cartographic design for GIS applications. Hands-on emphasis using ArcGIS. 2 Lec/2 Lab.

**GEO 456. Remote Sensing. (3 Credits)**

A. Prerequisite: GEO 100, 110, 210, GLY 102, 107, or 108. Principles, data sources, acquisition, interpretation, analysis, and application of geographic imagery, including maps, air photos, shuttle photography, and satellite digital data. Hands-on computer GIS techniques. 2 Lec/2 Lab.

**GEO 458. Advanced Geographic Imagery. (3 Credits)**

II. Prerequisite: GEO 353 and GEO 456. Characteristics, interpretation, integration and applications of advanced geographic imagery, including remote sensing and GIS digital data. Attention on satellite and multispectral imagery, including image processing. Hands on emphasis. 2Lec/2Lab.

**GEO 501. Advanced Geography.\_\_\_\_. (3 Credits)**

A. Prerequisite: departmental approval. In-depth study of geoscience themes using geospatial techniques. May be retaken to a maximum of nine hours if subject matter differs each time.

## Environmental Education, University Certificate

This Environmental Education Certificate does not lead to teacher certification or to a professional teaching license, although some of these courses can be used towards licensure.

### Program Requirements

CIP Code: 13.1338

Code	Title	Hours
<b>Certificate Requirements</b>		
<i>Core Courses</i>		
BIO 590	Ecology for Teachers	3
EMS 561	Environmental Education Essentials	3
<i>Electives</i>		
Choose from six hours of the following:		6
BIO 500	Environmental Issues or GEO 302W	
CHE 501	Chemtopics: _____	
ELE 424	Advanced Science Pedagogy and Assessment	
EMG 492	Science in the Middle Grades	
EMS 563	Teaching Environmental Education	
ESE 561	Teaching Science in Secondary School	
REC 590	Special Topics:____	
UNP 500	Study Abroad:____	
Or choose from one three hour co-op or internship program with Natural Areas of the following:		
BIO 349	Applied Learning in Biology	
GEO 349		
HIS 349	Applied Learning in History	
REC 463	Internship	
SCO 349	Applied Learning in Science	
<b>Total Hours</b>		<b>12</b>

## Environmental Science, Departmental Certificate

For further information about the certificate or the use and availability of EKU's Natural Areas for research, education, programming, recreation, or meetings, please call (859) 622-1476 or visit [www.naturalareas.eku.edu](http://www.naturalareas.eku.edu) (<http://www.naturalareas.eku.edu>).

## Pre-Professional Health Advising

Sabrina Moore  
Science Building Room 1234  
(859) 622-7894

EKU has a number of programs that will help prepare students for professional schools following graduation. These schools generally do not require a specific major, provided that their prerequisite courses are taken. All professional schools are highly competitive in their admissions process. Thus, students should aim for strong GPA and professional school admission test scores. Students are encouraged to seek a major that they feel comfortable with, that they have a strong aptitude for, that is interesting and challenging, and that provides additional career concentrations. All students, regardless of GPA or admission test scores, will be provided with resources and assistance needed to apply for professional school that wish to do so. Additional information may be found at [www.preprofessional.eku.edu](http://www.preprofessional.eku.edu) (<http://www.preprofessional.eku.edu>)

## Biomedical/Health-Related Research

Students with an interest in careers in biomedical/health-related research should consider a B.S. in Chemistry (Biochemistry concentration) or a B.S. in Biomedical Sciences (Research concentration). With these B.S. degrees, students may work in academic and industry research laboratories. Some students may choose to earn an advanced degree at either the M.S. or Ph.D. level. Both the Chemistry major and the Biomedical Sciences major will prepare students for these advanced degrees. There are also programs that offer an MD to PhD pathway, allowing you to earn both a PhD and an MD.

## Pre-Pharmacy

It is recommended for students interested in pharmacy to complete a four-year degree with a B.S. (Pre-Pharmacy Concentration) in chemistry. The chemistry pages in this Catalog list the appropriate courses for this concentration. The Pre-professional advisor, who is familiar with the pharmacy admissions process, will be assigned as a supplemental advisor. Students interested in pharmacy may major in any subject provided certain pre-requisite courses are taken. While it is possible for students to be admitted to a pharmacy school after just two years of undergraduate training, the competitive nature of these programs suggests students should complete their major in preparation for pharmacy school.

Pharmacy schools differ in their individual requirements, so students should check the web pages of the pharmacy school of their choice, and then determine which courses to take after consulting the pre professional health advisor. The application process typically begins in the fall of the senior year. Pharmacy schools require the PCAT and they look for students with leadership potential, a strong sense of empathy, a community and university service record, and extensive experience shadowing pharmacists or working as a pharmacy technician. Admission to pharmacy schools depends on a good balance among each of these areas in addition to strong PCAT scores and a high GPA.

## Pre-Physician Associate

(Formerly Physician Assistant) Physician associate professional schools are primarily in university schools of medicine and allied health. Although programs vary in length, most physician associate programs require 24-28 months to complete. Most programs require applicants to have completed a minimum of three years of college prior to admission and to have had previous health care experience. Most successful applicants to PA programs have earned a bachelor's degree, and have accumulated a significant number of hours shadowing a Physician Associate and working with patients in a clinical setting.

Prerequisite course requirements vary from school to school. Students are encouraged to consult with the pre-professional health advisor to determine which physician associate programs are of interest, and pattern their course work to fulfill these specific program requirements. It is recommended that students complete a 4 year degree majoring in BS Biomedical Sciences with a concentration in Pre-PA.

## Pre-Medical Science

Students with career interests in allopathic medicine or osteopathic medicine may achieve admission to professional schools by graduating in any major, provided certain prerequisites are met. Typically, 75% of students that enter medical school majored in the physical, natural, or social sciences, with the remaining 25% from other disciplines.

The College of STEM offers both the Biomedical Sciences (Pre-Medical Concentration) and Chemistry (Pre-Health Concentration) Bachelor of Science degrees. Students pursuing degrees in either department will complement their studies with appropriate courses in humanities, social sciences, and communications. Courses in mathematics and physics will also be required. All students interested in these areas are urged to visit the Department pages in this Catalog, or go on-line to find details of these major programs. More information may be found at the EKU pre-professional web page at [preprofessional.eku.edu](http://preprofessional.eku.edu) (<http://preprofessional.eku.edu>).

Students interested in medical school should consult the medical school admission requirements for their schools of interest or those published in the MSAR (Medical School Admissions Requirements) book.

Students in Biomedical Sciences or Chemistry pre-med concentrations are assigned to a supplemental Pre-Professional Health advisor. These advisors work closely with each student to help plan programs of study and prepare for the process of gaining admission to the chosen professional school. EKU also has a University Pre-Med Committee. This committee assists students in their application process and prepares committee letters of evaluation for them. It is important for students to contact the chair of the University Pre-Med Committee and the pre-professional health advisor at the beginning of the academic year in which they plan to apply to medical school.

Each medical school requires an admission exam, called the MCAT. These professional schools also look for students with leadership potential, a strong sense of empathy, a community and university service record, and extensive experience shadowing professionals in these fields. Admission to professional schools is highly competitive and depends on a good balance among each of these areas, in addition to a strong MCAT score and a high GPA.

## Pre-Dentistry

Students interested in dentistry can major in either Chemistry (B.S., Pre-Dental Concentration) or Biomedical Sciences (B.S., Pre-Dental Concentration), although dental schools will accept students from any academic background, provided certain prerequisites are met. Students are encouraged to check individual dental schools for details of their requirements.

Students majoring in either Biomedical Sciences or Chemistry will be assigned an advisor in their department who is familiar with dental-school admissions procedures, as well as the pre-professional health advisor as a supplemental advisor.

Most Dental schools require the DAT admission exam, and they look for students with leadership potential, a strong sense of empathy, a community and university service record, and extensive experience shadowing dentists. Admission to dental schools is highly competitive and depends on a good balance among each of these areas, in addition to strong DAT scores and a high GPA.

## Pre-Optometry

Students interested in admission to optometry school may complete any degree program, but typically they major in either Chemistry (B.S.) or Biomedical Sciences (Pre-Optometry concentration). See the Department pages in this Catalog for details of these programs. Refer to specific optometry school admission requirements for listings of appropriate prerequisite courses. Students in Biomedical Sciences or Chemistry will be assigned an advisor knowledgeable about optometry admissions procedures who will assist them in their application process, as well as the pre-professional health advisor as a supplemental advisor. This process typically begins in the fall of the junior year. Optometry schools require the OAT exam, and look for students with leadership potential, a strong sense of empathy, a community and university service record, and extensive experience shadowing optometrists.

Admission to optometry schools is highly competitive and depends on a good balance among each of these areas in addition to strong OAT scores and a high GPA.

## Pre-Veterinary Medicine

Students who have a career interest in veterinary medicine may fulfill admission requirements of specific veterinary schools by pursuing either the Biomedical Sciences major (Pre-Veterinary Medicine concentration) or the Agriculture major (B.S.). See the Department pages in this Catalog for details of these programs. Refer to specific veterinary schools for listings of appropriate prerequisite courses. Students should complement their studies with appropriate courses in humanities, social sciences, communications, and agriculture. Courses in mathematics and physics will also be required.

Students in Biomedical Sciences will be assigned an advisor knowledgeable about veterinary school admissions procedures who will assist them in their application process. Applications generally must be submitted by October 1st of the senior year. Veterinary schools typically require the GRE, and they look for students with leadership potential, a strong sense of empathy, a community and university service record, and extensive experience shadowing veterinarians. Admission to these schools is highly competitive, more so than admission to medical schools, and depends on a good balance among each of these areas in

addition to strong GRE scores and a high GPA. For more information, please refer to [preprofessional.eku.edu](http://preprofessional.eku.edu) (<http://preprofessional.eku.edu>).

No Kentucky institution has a program in veterinary medicine; however, the Commonwealth has contracts to allocate a limited number of places in Auburn University's College of Veterinary Medicine to Kentucky residents. Students accepted under this program are exempt from the out-of-state tuition charge at these schools. For residents of Kentucky to be accepted under the Kentucky quota, application must be made directly to one or both of the contract schools.

## Pre-Engineering

There is a pre-engineering curriculum offered by the College of STEM, described below. Students interested in a particular engineering program should see the pre-engineering advisor in the Department of Physics and Astronomy. Many students also choose to complete their B.S. in Physics/engineering physics major at EKU.

In the pre-engineering curriculum, referred to as the **Dual Degree Option**, students spend two or three years at EKU taking basic science, mathematics, and general-education courses. Students then transfer their credits to the University of Kentucky, Auburn University, the University of Louisville or another university with an accredited engineering program earning both a baccalaureate degree from EKU in Physics and an engineering degree from the engineering school.

All students pursuing a Dual-Degree Engineering Program in the Department of Physics and Astronomy should pursue the Engineering Physics Concentration of the Physics B.S. program. Because preferred general education and supporting courses may vary depending upon the partner engineering school, it is essential that students pursuing the Dual-Degree Program in Engineering work closely with their departmental advisors.

After the first year of study, students transfer the work back in order to secure a Bachelor of Science degree from Eastern Kentucky University. This plan may shorten, by one year, the time needed to obtain both a baccalaureate and an engineering degree.

## Minor

- Pre-Professional Health, Minor (p. 530)

## Pre-Professional Health, Minor

Students who want to pursue a career in a medical profession must prepare themselves for admission to a professional school or graduate program in their area of interest. Students are not required to complete a science-oriented degree, but they must have completed certain pre-requisite courses for admission to these programs. The purpose of this minor is to provide the background that a non-science major must have to complete a successful application to medical school or other professional programs in dentistry, optometry, physician associate, pharmacy, and other health programs.

Students pursuing a degree in Biomedical Sciences or Chemistry (pre-health concentration) may not declare the Pre-Professional Health minor.

## Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
BIO 111	Cell and Molecular Biology <sup>1</sup>	4

BIO 307	Human Anatomy and Physiology I	3
BIO 308 or BIO 348	Human Anatomy and Physiology II Vertebrate Physiology	3
BIO 332	Careers in Biomedical Sciences	1
CHE 111 & 111L	General Chemistry and General Chemistry Lab I <sup>1</sup>	4
CHE 112 & 112L	General Chemistry II and General Chemistry Lab	4
CHE 361 & 361L	Organic Chemistry I and Organic Chemistry Lab I	4

CHE 362 & 362L	Organic Chemistry II and Organic Chemistry Lab II	
CHE 430	Biochemistry of Macromolecules	
PHI 383	Health & Biomedical Ethics	3
PHY 131 or PHY 201	College Physics I University Physics I	5
PHY 132 or PHY 202	College Physics II University Physics II	5
<b>Total Hours</b>		<b>39-40</b>

1

May fulfill General Education Element 4 requirements.

Other recommended courses from General Education: 6 credits of ENG (AP credit is not accepted at some medical schools), CMS 210 Public Speaking, SOC 131 Introductory Sociology, PSY 200 Introduction to Psychology and higher, MAT 120 Trigonometry or MAT 234 Calculus I depending on the program, ANT course.

BIO 112 Ecology and Evolution, BIO 320 Principles of Microbiology, and STA 270 Applied Statistics may also be required for admission to some professional schools. Students will need to check with each program for their particular entrance requirements. Certain schools may require more courses than are in this minor.

## The School of Engineering, Aviation, Construction, and Technology

### Interim Chair

Dr. Michael "Sean" June  
(859) 622-3232  
Whalin 302

### Faculty

A. Al-Helu, J. Dodd, B. Dyer, M. Farris, D. Field, K. Foltz, J. Glass, M.S. June, K. Knezevich, R. Richardson, L. Ross, D. Sinnett, N. Wang, and J. Wilson.

The School of Engineering, Aviation, Construction, and Technology: Manufacturing Engineering, Aviation, Construction Management, and Engineering Technology Management.

### Department Goals

The School of Engineering, Aviation, Construction, and Technology seeks to provide an educational experience relevant to current and future societal needs to meet global economic and industrial trends. Programs in Applied Engineering and Technology prepare professionals for careers in Aviation, Construction and Engineering Technology

Management through the Bachelor of Science degree programs; prepare technicians for careers in Applied Engineering and Computer Electronics Technology through concentrations in the Associate of Applied Science in Technology degree program; and to provide programs of quality instruction and professional services to the University and to the community.

### Manufacturing Engineering

The Bachelor of Science degree in Manufacturing Engineering (MFE) at Eastern Kentucky University is designed to prepare graduates to become practicing manufacturing engineers. The program provides students with the skills to design, analyze and modify the processes and systems used to make products in the most time-efficient, cost-effective way possible while maintaining safety and product quality in environmentally friendly ways.

Students will gain expertise and practical knowledge in the major areas of manufacturing materials and processes, design for manufacturability, lean manufacturing, quality and process control, safety, automation and robotics. Graduates will be able to employ a strong base of fundamental engineering and management skills to effectively integrate people, technology, machines and capital to create positive change as they are involved in the manufacturing process from design to production to finished product.

The program offers a variety of concentrations to choose from:

- **Quality and Lean Manufacturing**  
Quality and Lean Manufacturing prepares students for careers as quality engineers, automation engineers, controls engineers and engineering managers.
- **Advanced Manufacturing**  
Advanced Manufacturing prepares students for careers as manufacturing systems design engineers, robotics engineers, additive manufacturing engineers and automation engineers.
- **Industrial Health and Safety**  
Industrial Health and Safety prepares students for careers as safety engineers, facility design engineers, communication engineers and engineering managers.

### Aviation

The EKU aviation program offers a Bachelor of Science degree in Aviation with four concentrations: Aerospace Management, Aerospace Technology, Unmanned Aircraft Systems, and Professional Flight. These concentrations combine courses in business management, communication, math, computer science and general education. The Aerospace Management concentration prepares students for exciting professional careers in all aspects of the aerospace industry from a management perspective whereas the Professional Flight concentration prepares students for careers as pilots.

The Professional Flight concentration Program is an FAA Part 141 approved Flight School and the only university program in Kentucky to offer the 1000-hour Restricted ATP certificate. This program provides future pilots with the flight time needed to join the rewarding world of professional aviation.

Starting with the fall 2022 semester, the Unmanned Aircraft Systems (UAS) concentration will prepare students for careers in the rapidly expanding area of UAS, including detailed knowledge of UAS-specific operations, safety, technology, regulations and industry uses. The demand for certification in this area is high as there were more than

488,000 commercial UAS registered in the United States by the end of 2021. Industries that utilize drone technology include agriculture, construction, law enforcement and more.

The Aerospace Technology (AT) degree is a degree-completion concentration. By adding upper division aerospace management and operations studies, the Bachelor's degree AT concentration is specifically designed to complete a two-year community college degree with a heavy technical aviation course load. Examples of aviation technical degrees include Airframes & Power Plants (A&P), a two-year helicopter and/or airplane proflight degree, any two-year career technical (CTE) degree partnered with a local flight school, any two-year air traffic control program, and/or any two-year aerospace management program, and/or two-year Unmanned Aircraft Systems (UAS) programs.

Additionally, non-degreed airline pilots with the Airline Transport Pilot (ATP) certificate may complete their bachelor's degree with this concentration.

## Construction Management

Graduates of the Construction Management program are prepared for careers with general contracting firms, starting in a variety of management positions. Typical entry-level positions include: assistant project manager, estimator, superintendent, project scheduler, cost engineer, and field engineer. The Construction Management program is accredited by the American Council for Construction Education. Graduates of this program will have oral, written and graphic communication skills for successful performance in a construction environment; possess functional computer skills including the utilization of general and construction application software; apply mathematical and scientific skills in the management and execution of construction projects; apply the concepts of management, accounting, economics and ethics in the management and execution of construction projects; possess a basic understanding of the science of materials and the methods by which they are placed into service; possess the essential plan reading, quantity takeoff and pricing skills to function as a junior estimator; be able to prepare a project budget, analyze cost reports and make cash flow projections for a project; be able to prepare a project schedule, monitor progress toward completion, and update the schedule as needed; possess a basic knowledge of OSHA standards and be able to establish and enforce a safety plan on a job site, be able to interpret site plans, establish horizontal and vertical control on a site, and perform layout for buildings and utilities; be able to administer situations on a project site, including evaluation of subcontractor pay requests, writing of purchase orders, and recording change orders, subcontracts, shop drawings, and daily reports; and perform in an acceptable manner in internship work assignments.

## Engineering Technology Management

Graduates of the Engineering Technology Management Program are prepared for professional careers in technology related businesses. These businesses offer many opportunities to pursue exciting, challenging and rewarding careers that require technical knowledge and managerial skills. Engineering Technology Management prepares individuals for entry-level positions that may include: manufacturing engineer, production engineer, industrial supervisor, industrial engineer, industrial technician, and quality engineer.

Graduates of Engineering Technology Management will be able to relate terminology, techniques and methodology to technical managerial concepts; demonstrate the ability to formulate and apply technical problem solving and managerial concepts; and be able to

apply the concepts of mathematics and the physical sciences to solve technical problems. The BS degree program in Engineering Technology Management is accredited by the Association of Technology, Management, and Applied Engineering.

## Associate of Applied Science

The Department of Applied Engineering and Technology also offers an Associate of Applied Science degree programs (two-year programs) in Technology. The Associate of Applied Science degree in Technology offers the student a choice of technical concentration in: Applied Engineering or Computer Electronics. The AAS degree program in Technology is accredited by the Association of Technology, Management, and Applied Engineering.

## Associate of Applied Science - Technology

### Applied Engineering Concentration

Graduates of this program concentration are prepared to become applied engineering technicians who work in product design, research and development, manufacturing, and service related jobs. Students will become familiar with the technologies that are essential for business and industry wanting to remain competitive in a global economy.

Graduates will demonstrate proficiency in the fundamentals of chemistry/physics, electricity and electronics, manufacturing processes, lean, quality, practical statistical methods, and computer aided drafting or design applications to communicate and solve design problems.

### Computer Electronics Concentration

Graduates of the Computer Electronics (CE) program concentration are prepared for rewarding careers as computer electronic technicians in the public and private sector. Computer Electronics program graduates are qualified to obtain jobs in a wide variety of information technology, manufacturing and service industries. These jobs require skilled technicians for installing, troubleshooting and maintaining microprocessor-based systems, programmable logic controllers, computer hardware and software.

Graduates of the CE concentration of the AAS in Technology program will demonstrate fundamental knowledge in electricity/electronics at the technician's level; demonstrate proficiency in basic computing skills; demonstrate proficiency in basic networking skills relevant to LAN/WAN environments; and demonstrate effective communication skills while conveying information to technical and non-technical audiences.

## Bachelor's

- Aviation, Bachelor of Science with a Concentration in Aerospace Management (B.S.) (p. 543)
- Aviation, Bachelor of Science with a Concentration in Aerospace Technology (B.S.) (p. 545)
- Aviation, Bachelor of Science with a Concentration in Professional Flight (B.S.) (p. 546)
- Aviation, Bachelor of Science with a Concentration in Unmanned Aircraft Systems (B.S.) (p. 547)
- Construction Management, Bachelor of Science (B.S.) (p. 549)
- Engineering Technology Management, Bachelor of Science with a Concentration in Manufacturing (B.S.) (p. 552)
- Engineering Technology Management, Bachelor of Science with a Concentration in Technology (B.S.) (p. 553)

- Management Information Systems, Bachelor of Science with a Concentration in Business Analytics (B.S.) (p. 555)
- Management Information Systems, Bachelor of Science with a Concentration in Security Systems (B.S.) (p. 556)
- Manufacturing Engineering, Bachelor of Science with a Concentration in Advanced Manufacturing (B.S.) (p. 557)
- Manufacturing Engineering, Bachelor of Science with a Concentration in Industrial Health and Safety (B.S.) (p. 558)
- Manufacturing Engineering, Bachelor of Science with a Concentration in Quality and Lean Manufacturing (B.S.) (p. 559)

## Accelerated

- Engineering Technology Management, Bachelor of Science (B.S.) and Technology Management Master of Science (M.S.) [Manufacturing Concentration] Accelerated 3+2 Dual Degree Program (p. 550)
- Engineering Technology Management, Bachelor of Science (B.S.) and Technology Management Master of Science (M.S.) [Technology Concentration] Accelerated 3+2 Dual Degree Program (p. 551)

## Associate's

- Technology, Associate of Applied Science (A.A.S.) (p. 560)

## Minor

- Aerospace Management, Minor (p. 543)
- Aviation (Flight), Minor (p. 543)
- Computer Electronics Technology, Minor (p. 548)
- Construction Management, Minor (p. 550)
- Engineering Technology Management, Minor (p. 554)
- Land Surveying, Minor (p. 555)
- Quality Assurance Technology, Minor (p. 560)
- Unmanned Aircraft Systems, Minor (p. 561)

## Certificate

- Land Surveying, University Certificate (p. 555)

## Courses

### Applied Engineering Management

#### AEM 195. Computer Aided Drafting. (3 Credits)

I, II. An introductory course in freehand sketching and computer-aided drafting/design. Students will be taught basic CAD commands, tools, multi-view drawings and dimensioning techniques. 2 Lec/2 Lab.

#### AEM 201. Metallic Material Processes. (3 Credits)

I, II. Formerly INT 201. Introduction to manufacturing processes involving metallic materials. Families of processes covered are casting, molding, forming, separating, conditioning, assembling, and finishing. 2 Lec/2 Lab.

#### AEM 202. Introduction to Quality. (3 Credits)

I, II. Formerly INT 202. Prerequisite: STA 215 or 270 and MAT 114 or higher mathematics. Role of statistical thinking in modern quality control. Methods for problem solving, data collection, and process improvement. Deriving actionable conclusions from data analyses. Understanding, quantifying, and reducing variation to improve business performance.

#### AEM 242. Furniture and Cabinet Construction. (3 Credits)

A. Formerly INT 242. Prerequisite: TEC 141. Principles of furniture and cabinet construction, elements of structural design, advanced woodworking operations; care and sharpening of tools related technical information; furniture and cabinet construction and finishing. 2 Lec/2 Lab.

#### AEM 301. Non-Metallic Material Processes. (3 Credits)

II. Formerly INT 301. Introduction to manufacturing processes used to shape or form wood, plastic, and composite materials. Families of processes covered are casting, molding, forming, separating, conditioning, assembling, and finishing. 2 Lec/2 Lab.

#### AEM 308. Methods of Lean Operations. (3 Credits)

I, II. Prerequisite: STA 215 or 270 and MAT 114 or higher. Examination of lean principles, such as value mapping, continuous flow, continuous improvement, determination of customer demand, and standard work. Concepts and implementation of pull, line balancing, lean accounting, FMEA, time studies, and total productive maintenance.

#### AEM 310. Technical Communication. (3 Credits)

I. Prerequisites: ENG 102 and TEC 161. Formerly INT 310. A conceptual approach to computer aided communication systems typically applied in industrial environments. Emphasis will be placed on utilizing computer technology to integrate text and graphics in the preparation of documents and presentation materials. Credit will not be awarded for both AEM 310 and AEM 310W.

#### AEM 310W. Technical Communication. (3 Credits)

I. Prerequisites: ENG 102 or ENG 105 (B) or HON 102, TEC 161. An approach to computer aided written communication typically applied in industrial environment. Emphasis will be placed on utilizing computer technology to integrate text and graphics in the preparation of documents and presentation materials. Credit will not be awarded for both AEM 310 and AEM 310W.

#### AEM 320. Warehousing and Material Handling. (3 Credits)

A. Pre/Corequisites: AEM 202 or INT 202 and AEM 308 or INT 308. Formerly INT 320. A laboratory oriented course that examines basic warehouse layout configurations, material flow, and a critical evaluation of the application of computers to control material flow, plus the use of computer simulation to analyze various warehouse layout options for scheduling, picking and material tracking. 2 Lec/2 Lab.

#### AEM 330. Material Testing and Metrology. (3 Credits)

A. Prerequisites: AEM195, 201 and MAT120. A study of geometric dimensioning and tolerancing as used in detail working drawings and the principles, standards, equipment, and techniques of precision electronic and mechanical measurement. 2 Lec/2 Lab.

#### AEM 332. Process Control and Auditing. (3 Credits)

A. Prerequisite: AEM 202 or INT 202. Formerly INT 332. An advanced study of the Statistical Process Control methods and procedures in industry, and auditing as a method of evaluating the documentation, implementation, and effectiveness of a Quality System.

#### AEM 336. Reliability and Sampling. (3 Credits)

A. Prerequisite: AEM 202 or INT 202. Formerly INT 336. An overview of reliability, testing, and sampling theories. Topics include component and system reliability, product safety, sampling plans, control charts, and standards.

#### AEM 338. Engineered Materials Testing. (4 Credits)

A. Prerequisites: AEM 201, MAT 120 and TEC 190. Structure, composition, properties, tolerances, standards, and common applications of engineering materials. Use of GD&T and techniques for precision electronic and mechanical measurement and testing.

**AEM 349. Applied Learning in Industrial Technology. (0.5-8 Credits)**

I, II. Prerequisite: departmental approval. Formerly INT 349. Work under faculty and field supervisors in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: eight, associate, sixteen, baccalaureate. A minimum of 80 hours work required for each academic credit.

**AEM 352. Robotics and Automated Systems. (3 Credits)**

A. Prerequisite: EET 251. Formerly INT 352. Introduction to fixed and flexible automation equipment with an emphasis placed on industrial robot systems. Topics include robot safety, programming and operation, and effector design, programmable logic controllers, interfacing devices, and sensors. 2 Lec/2 Lab.

**AEM 367. Comp Exam for AAS in Technology, Applied Engineering . (0 Credits)**

Prerequisite: Departmental Approval. Registration is required of all A.A.S. Technology, Applied Engineering majors during their last semester. A comprehensive assessment exam is required.

**AEM 371. Hydraulics and Pneumatics. (3 Credits)**

II. Formerly INT 371. Principles of the operation, construction, control and application of hydraulic and pneumatic components and circuits. The study of control applications includes manual, mechanical, fluid, electrical, and computer controlled fluid circuits. 2 Lec/2 Lab.

**AEM 382. Advanced Material Processing. (3 Credits)**

A. Prerequisites: AEM 201 or INT 201 and AEM 301 or INT 301. Formerly INT 382. A laboratory course involving advanced material processing which includes project planning and management, machining, welding, precision layout, and measuring. Students will design and fabricate projects that include two-part mold designs, CNC machining, and multi-process welding. 2 Lec/ 2 Lab.

**AEM 383. CAD/CAM Integration. (3 Credits)**

A. Prerequisites: AEM 201 or INT 201. Formerly INT 383. The use of computer application software to link data bases created with computer aided design software to computer numerical controlled machine tools. 2 Lec/2 Lab.

**AEM 390. 3-D Parametric Solid Modeling. (3 Credits)**

A. Prerequisites: AEM 195 or INT 195. Formerly INT 390. A study of advanced topics in three-dimensional computer aided design. The content will include advanced modeling and rendering. 2 Lec/2 Lab.

**AEM 392. Computer Aided Machine Drawing. (3 Credits)**

I. Prerequisite: AEM 195 or INT 195. Formerly INT 392. Computer generated detail and assembly drawings. Topics include threads and fasteners, gearing and cams, and dimensioning and tolerancing. 2 Lec/2 Lab.

**AEM 395. Special topics in AEM:\_\_. (2-3 Credits)**

Prerequisite: AEM202. Departmental approval, junior or higher standing. Explores emerging technologies in the area of applied engineering. May be repeated up to a maximum of 9 hours provided subject matter is different each time.

**AEM 397. Advanced Machine Drawing. (3 Credits)**

A. Prerequisites: AEM 390 or INT 390 or MFG 390 and AEM 392 or INT 390 or MFG 392. Formerly INT 397. Advanced machine drawing applications to include detail and assembly drawings, threads and fasteners, gearing and cams. Emphasis on shape description. 2 Lec/Lab 2.

**AEM 406. Integrated Materials Mgmt.. (3 Credits)**

I, II. Prerequisites: AEM 202. Formerly INT 406. A senior course which examines consumer demand characteristics, product bill materials, establishing sales and operations plans, planning and controlling inventory in the supply chain.

**AEM 407. Fundamentals of Project Management. (3 Credits)**

(3) I. Prerequisite: AEM 202. Introduction to project selection, life cycle, planning using scope of work, WHS, CPM, scheduling, execution, resource allocation, expediting and clothing.

**AEM 408. Human Resource Development. (3 Credits)**

I, II. Formerly INT 408. Topics in human relations and production management. To be scheduled the semester before graduation.

**AEM 467. Comprehensive Exam for BS in ETM. (0 Credits)**

A. Prerequisite: Consent of Advisor. Registration is required of all Applied Engineering Management and Engineering Technology Management B.S. majors during their last semester. A comprehensive assessment exam is required.

**AEM 499. Senior Capstone Project. (3 Credits)**

A. Prerequisite: AEM 310, 352, 407 and Senior Standing. Formerly INT 499. A synthesis experience involving the application of theory in solving a realistic industrial problem. Emphasis is placed upon project setup, solution, justification, report and presentation. 2 Lec/2 Lab.

**AEM 506. Six Sigma Quality. (3 Credits)**

A. Formerly INT 506. Prerequisite: AEM 202. A study of six sigma methodology and current practices with an emphasis on key quality drivers and statistical methods for world-class products and companies.

**AEM 530. Design of Experiments. (3 Credits)**

A. Formerly INT 530. Prerequisite: AEM 202. Principles and practices of efficient experiment design for industry. Topics include the philosophy of experiment design, comparison of various designs, hypothesis testing, and the analysis of data.

## Aviation

**AVN 105. UAS Safety and Regulations. (3 Credits)**

This course provides an overview of small Unmanned Aircraft Systems (sUAS). Topics include the history of UAS, regulations, remote sensors, imagery equipment, industry and societal implications, career outlooks, ethical considerations, and the basic components required to operate an UAS. This course will prepare students for real-world safe operation of sUAS, and will provide basic understanding of the regulations in preparation for small Unmanned Aircraft Systems FAA 107 certification test. [CFR Part 107 are the Federal Aviation Administration regulations for the certification and operation of small Unmanned Aircraft Systems].

**AVN 150. Introduction to Aviation. (3 Credits)**

A. An introductory course specifically designed for students to obtain a broad understanding of the aviation world including varying aspects of space exploration. Includes a study of aviation history and the general aviation environment.

**AVN 161. Private Pilot- Airplane: Ground (Part 61). (4 Credits)**

A. Prerequisite: MAT 105 or higher with a minimum grade of "C", a minimum score of 22 on the mathematics portion of the ACT, a minimum score of 510 on the mathematics portion of the SAT, or a passing score on an algebra placement test. . Provides aeronautical knowledge and 5 hours flight simulation necessary to prepare student pilots to successfully complete FAA Private Pilot-Airplane written examination.

**AVN 161A. Private Pilot- Airplane (Part 61): Flight I. (1 Credit)**

A. Prerequisite or Corequisite: AVN 161 with "C" grade or better and overall 2.0 GPA. Students receive dual and/or initial solo flight instruction as part of the FAA private pilot SEL certification using FAA part 61 Rules.

**AVN 162A. Private Pilot- Airplane (Part 61): Flight II. (1 Credit)**

Prerequisite: Dept. approval (i.e student must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Students receive remaining flight hours as part of the curriculum leading to FAA private pilot SEL certification using FAA part 61 rules.

**AVN 170. Introduction to Unmanned Aircraft Systems. (3 Credits)**

(3) A. This course provides an introduction to Unmanned Aircraft Systems (UAS). A history of UAS, typical applications and an overview of regulations, airframe and powerplant systems, sensors, ground control stations, airspace, weather, and other foundational skills needed to safely operate UAS in the U.S. airspace systems will be covered.

**AVN 192. Private Pilot- SEL: Ground. (4 Credits)**

A. Provides aeronautical knowledge and 5 hours flight simulation necessary to prepare student pilots to successfully complete FAA Private Pilot written examination.

**AVN 192A. Private Pilot-SEL: Flight I. (1 Credit)**

A. Prerequisite or corequisite: AVN 192 with "C" or better and overall 2.0 GPA. Students receive solo and/or dual flight hour instruction as part of the private pilot SEL certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 193A. Private Pilot- SEL: Flight II. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive remaining flight hours leading to FAA private pilot SEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 194A. Private Pilot: Flight. (1 Credit)**

A. Prerequisite or Corequisite: AVN 192 with a grade of C or better, and an overall GPA of 2.0. This course consists of the dual and solo flight hours and experiences required for the private pilot certification with the Federal Aviation Administration.

**AVN 195. Pvt Pilot-Heli:Grnd(R-22/R-44). (4 Credits)**

A. Prerequisite: Math ACT of 22 or higher or place in math placement test at Math 098 or higher with "C" grade or higher. Provides aeronautical knowledge and 5 hours flight simulation necessary to prepare student pilots to successfully complete FAA Private Pilot-Helicopter written examination.

**AVN 195A. Pvt Pilot-Heli: Flight I(R-22). (1 Credit)**

A. Prerequisite or Co-requisite: AVN 195 with "B" grade or better and overall 2.0 GPA. First Robinson 22 Helicopter flight lab for pilots weighing less than 185 pounds leading to FAA private pilot helicopter certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 196A. Pvt Plt-Heli:Flight II(R-22). (1 Credit)**

(1) A. Prerequisite: AVN 195A with "S" grade and overall 2.0 GPA. Second Robinson 22 Helicopter flight lab for pilots weighing less than 185 pounds leading to FAA private pilot helicopter certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 197A. Pvt Plt-Heli:Flight III(R-22). (1 Credit)**

(1) A. Prerequisite: AVN 196A with "S" grade and overall 2.0 GPA. Third Robinson 22 Helicopter flight lab for pilots weighing less than 185 pounds leading to FAA private pilot helicopter certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 198A. Pvt Plt-Heli:Flight I(R-44). (1 Credit)**

(1) A. Prerequisite; corequisite: AVN 195 with "B" grade or better and overall 2.0 GPA. First Robinson 44 Helicopter flight lab for pilots weighing more than 185 pounds leading to FAA private pilot helicopter certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 199A. Pvt Plt-Heli:Flight II(R-44). (1 Credit)**

(1) A. Prerequisite: AVN 198A with "S" grade and overall 2.0 GPA. Second Robinson 44 Helicopter flight lab for pilots weighing more than 185 pounds leading to FAA private pilot helicopter certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 200A. Pvt Plt-Heli:Flight III(R-44). (1 Credit)**

(1) A. Prerequisite: AVN 199A with "S" grade and overall 2.0 GPA. Third Robinson 44 Helicopter flight lab for pilots weighing more than 185 pounds leading to FAA private pilot helicopter certification using FAA-approved Part 141 flight training syllabus (Lab).

**AVN 205A. Inter Supervised Flight I. (1 Credit)**

A. Prerequisites: departmental approval and an overall GPA of 2.0. This course is designed to permit students holding the private pilot license to acquire additional supervised flight time. This course includes approximately 24 flight hours.

**AVN 206A. Inter Supervised Flight II. (1 Credit)**

A. Prerequisites: departmental approval and an overall GPA of 2.0. This course is designed to permit students holding the private pilot license to acquire additional supervised flight time. This course includes approximately 24 flight hours.

**AVN 220. Instrument Pilot: Ground. (4 Credits)**

A. Prerequisites: AVN 161A or AVN 192A and an overall 2.0 GPA. Provides aeronautical knowledge necessary to prepare student pilots to successfully complete the FAA Instrument Pilot written examination. 3 Lec/2 Lab.

**AVN 220A. Instrument Pilot: Flight. (1 Credit)**

A. Prerequisites: departmental approval and an overall GPA of 2.0. A course designed to permit the student to gain instrument flight training.

**AVN 221A. Instrument Pilot: Flight I. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs.). Students receive flight and simulator hours leading to the FAA instrument pilot certification using FAA-approved Part 141 flight training syllabus.

**AVN 222A. Instrument Pilot: Flight II. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Students receive remaining flight hours leading to the FAA instrument pilot certification using FAA-approved Part 141 flight training syllabus.

**AVN 225. Instrument Pilot-Heli: Ground. (4 Credits)**

A. Prerequisite: AVN 197A or 200A with "S" grade and overall 2.0 GPA. Provides aeronautical knowledge and 20 hours flight simulation necessary to prepare student pilots to successfully complete the FAA Instrument Helicopter Pilot written examination. 3 Lec/2 Lab.

**AVN 225A. Instrmnt Pilot: Heli Flight I. (1 Credit)**

(1) A. Prerequisite or corequisite: AVN 225 with "B" grade or better, prerequisite 197A or AVN 200A with "S" grade, and overall 2.0 GPA. First Robinson R-44 flight lab leading to the FAA instrument helicopter pilot certification using FAA-approved Part 141 flight training syllabus.

**AVN 226A. Instrmnt Pilot: Heli Flight II. (1 Credit)**

(1) A. Prerequisite: AVN 225A with "S" grade, and overall 2.0 GPA. Second Robinson R-44 helicopter flight lab leading to the FAA instrument helicopter pilot certification using FAA-approved Part 141 flight training syllabus.

**AVN 229A. Advanced Supervised Flight I. (1 Credit)**

A. Prerequisites: departmental approval and an overall GPA of 2.0. This course is designed to provide students flight training and experience for FAA Commercial Pilot License.

**AVN 230A. Advanced Supervised Flight II. (1 Credit)**

A. Prerequisites: departmental approval and an overall GPA of 2.0. This course is designed to provide students flight training and experience for FAA Commercial Pilot License.

**AVN 231A. Instrument Pilot- MEL: Flight I. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student receives MEL flight hours leading to the FAA instrument pilot certification using FAA-approved Part 141 flight training syllabus.

**AVN 232A. Instrument Pilot- MEL: Flight II. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student receives remaining MEL flight hours leading to the FAA instrument pilot certification using FAA-approved Part 141 flight training syllabus.

**AVN 250. Air Transportation. (3 Credits)**

A. Prerequisite AVN 150. A survey of the historical development of the air transportation system covering facilities, impact of regulations, problems encountered, and future requirements. Formerly AVN 350.

**AVN 280. Glass Cockpit Technology. (1 Credit)**

A. Prerequisite: AVN 220. Course provides instruction in operation of the Garmin G1000 glass cockpit to prepare students for operation of a G1000-equipped airplane in the Commercial Pilot Syllabus. Course includes 3 hours in a Garmin G1000 training device.

**AVN 290. UAS Flight Operations. (3 Credits)**

This course covers the techniques and best practices required to safely and successfully utilize and operate drones for commercial purposes. Every aspect of flight operation is covered, from equipment, preflight planning and legal compliance to operational procedures, flight training, and data collection. Students work through the entire mission cycle, starting with legal compliance, planning, and then pre and post flight operations. Students will gain hands-on experience using the drone flight simulators in the Drone Lab. In-class simulation training is to prepare them for an outdoor real flight experience.

**AVN 300. Commercial Pilot: Ground. (2 Credits)**

A. Prerequisites: AVN 221A. Provides aeronautical knowledge to prepare student pilots to successfully complete FAA Commercial Pilot written examination.

**AVN 300A. Commercial Pilot: Flight. (1 Credit)**

A. Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). The course consists of all or part of the dual and solo flight hours required for FAA commercial pilot certification.

**AVN 301A. Commercial Pilot- SEL: Flight I. (2 Credits)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive 32 dual and solo flight hours as part of the curriculum leading to the FAA commercial pilot SEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 302A. Commercial Pilot- SEL: Flight II. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive additional dual and solo flight hours as part of the FAA commercial pilot SEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 303A. Commercial Pilot- SEL: Flight III. (1 Credit)**

A. Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs.) Student will fly additional dual and solo flight hours as part of the FAA commercial pilot SEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 304A. Commercial Pilot- SEL: Flight IV. (2 Credits)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will fly remaining dual and solo hours flight hours as part of the curriculum leading to the FAA commercial pilot SEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 305. Multi- Engine Pilot (MEL): Ground. (1 Credit)**

A. Prerequisite: AVN 301A. Provides multi-engine aeronautical knowledge to facilitate successful completion of multi-engine practical examination.

**AVN 305A. Multi- Engine: Flight. (1 Credit)**

A. Prerequisite: AVN 304A. Student will complete the multi-engine land (MEL) flight training required to earn the FAA (MEL) pilot certification.

**AVN 310. UAS Ground/Flight Operations. (3 Credits)**

This course instructs the student in the mission planning, preflight, ground control, mission execution, and data analysis of UAS specific missions such as, Agriculture, Power/Wind Turbine/Railroad/Pipeline Inspections, Infrastructure Security, and other mission types as required.

**AVN 310A. Flight Training Techniques I. (1 Credit)**

A. Prerequisites: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Flight training to prepare students for FAA examinations.

**AVN 312. UAS Commercial Single/Multi En. (3 Credits)**

This course instructs the student in the mission planning, preflight, ground control, mission execution, and data analysis of UAS specific missions such as, Search & Rescue, Geosciences, Environmental, Anti-Poaching, Homeland Security, Videography, Construction, and Surveying.

**AVN 315. Aviation Safety Programs. (3 Credits)**

I, II. A. Prerequisite: AVN 150. A presentation of factors, procedures, and aircraft accident investigation case studies relating to aviation safety, including risk management assessment, hazard identification analysis, safety programs-development-called Safety Management Systems (SMS) by the Federal Aviation Administration, and evaluation of outcomes.

**AVN 320. Flight Training Analysis II. (2 Credits)**

A. Prerequisite: appropriate flight credentials. A study of aeronautical information and instructional background necessary for becoming instrument flight instructors. Included in the course is teaching methodology, instrument interpretations, and instrument flight procedures.

**AVN 320A. Flight Training Techniques II. (1 Credit)**

A. Prerequisites: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Flight training to prepare students for FAA examinations.

**AVN 325. Aircraft Systems. (3 Credits)**

I,II. Prerequisite AVN 150. A study of electrical, mechanical and hydraulic systems, design and performance standards, capabilities and limitations, and conformance to FAA specifications.

**AVN 329. Aviation Human Factors. (3 Credits)**

A Prerequisites: AVN 315. ENG 102 or 102R, 105(B), or HON 102. A study of human factors that affect and influence behavior, with application to aviation safety and its connection to all disciplines within the aviation industry.

**AVN 329W. Aviation Human Factors. (3 Credits)**

(3) A Prerequisites: AVN 315. ENG 102 or 102R, 105(B), or HON 102. A study of human factors that affect and influence behavior, with application to aviation safety and its connection to all disciplines within the aviation industry.

**AVN 330. Crew Resource Management. (3 Credits)**

(3) A. Prerequisite: AVN 315 and 329W. A survey of crew resource management history and development in commercial aviation with emphasis on the myriad factors that influence crew interaction and performance.

**AVN 331A. Commercial Pilot- MEL: Flight I. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student receives initial dual flight hours as part of the FAA commercial pilot MEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 332A. Commercial Pilot- MEL: Flight II. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student CRM time building flight hours leading to the FAA commercial pilot MEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 333A. Commercial Pilot- MEL: Flight III. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student CRM time building flight hours leading to the FAA commercial pilot MEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 334A. Commercial Pilot- MEL: Flight IV. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student CRM time building flight hours and ten PDPIC dual flight hours leading to the FAA commercial pilot MEL certification using FAA-approved Part 141 flight training syllabus.

**AVN 335. Weather Reporting/Analysis. (3 Credits)**

I, II. Prerequisite: PHY 101 or higher. A comprehensive analysis of weather conditions and patterns as they apply to flight.

**AVN 340. Airport Management I: Operations and Security. (3 Credits)**

I, II. Prerequisite AVN 150. An in-depth overview of airport operational issues, unmanned systems integration, air traffic control issues, safety, security, and planning.

**AVN 341. Airport Management II: Planning and Administration. (3 Credits)**

(3). I, II. Prerequisite AVN 340. An in-depth overview of airport administration, finance, marketing, airfield design, planning, construction, air service development, and community relations.

**AVN 349. Cooperative Study: Aviation. (0.5-8 Credits)**

A. Prerequisite: coordinator approval. Work under faculty and field supervisors in placements related to academic studies. One to eight hours credit per semester or summer. A minimum of 80 hours work required for each academic credit.

**AVN 350. Air Transportation. (3 Credits)**

A. A survey of the historical development of the air transportation system covering facilities, impact of regulations, problems encountered, and future requirements.

**AVN 360. General Aviation Management. (3 Credits)**

I, II. Prerequisite AVN 150. Designed to provide students with an understanding of an airport Fixed Base Operator's role and also of Aviation Service Businesses in the aviation industry, to include managerial and operational problems.

**AVN 370. Aviation Supervision and Leadership. (3 Credits)**

I, II. Prerequisite: AVN 150. A study of effective supervisory and leadership techniques, with application to practical situations in the aviation industry.

**AVN 390. Aviation Decision Making. (3 Credits)**

A. Prerequisite AVN 150. A study of decision theory and its application to aviation decision-making and problem solving.

**AVN 399. Aviation Prof Skills Seminar. (0 Credits)**

I, II. Required of all Aviation students who have earned at least 60 hours. Credit (CR) will be given when students have attended and/or completed department-sponsored activities regarding professional skills and careers.

**AVN 400. Multi-Engine Pilot: Ground. (1 Credit)**

A. Prerequisite: appropriate flight credentials. The course is designed to provide appropriate aeronautical knowledge about multi-engine aircraft to facilitate successful completion of the multi-engine flight component.

**AVN 400A. Multi-Engine Pilot: Flight. (1 Credit)**

A. Prerequisites: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). A one hour laboratory course integrated with AVN 400 consisting of the dual and solo flight hours required for FAA certification.

**AVN 401. Airline Management. (3 Credits)**

A. Prerequisite: AVN 250 or AVN 350 and junior standing (at least 60 hours). Acquaint student with the development, administrative and operational factors peculiar to FAR Part 121 Airline Operations. Emphasis is placed on proper market analysis, financial matters, the company plan, aircraft selection, aircraft acquisition, route structure, timetable and pertinent regulatory requirements.

**AVN 402. Corporate and Business Aviation. (3 Credits)**

A. Prerequisite AVN 250 or 350 and junior standing (at least 60 hours). The study of the operation of a corporate flight department. Course includes the value of management mobility, aircraft and equipment evaluation, maintenance, flight operations, administration and fiscal considerations.

**AVN 410. Air Traffic Control. (3 Credits)**

I, II. Prerequisite AVN 250 or 350 and junior standing (at least 60 hours). A study of the national air traffic control system with emphasis on basic air traffic control procedures; the role of centers, approach control, towers, and flight service centers; communications; navigation procedures, radar operations, facilities.

**AVN 412. Counter UAS Operations. (3 Credits)**

Course is designed to educate and explore the emerging threat of unmanned aircraft systems to the nation's airspace and infrastructure. This course will be divided into four sections (overview, detect, identify and defeat), to cover all current and future lines of effort in a unified approach to counter UAS.

**AVN 415. Instructor Pilot- SEL: Ground. (3 Credits)**

A. Prerequisite: AVN 161, AVN 220, and AVN 300 with "C" grade or better and overall 2.0 GPA. Prepares student pilots for the FAA Certified Flight Instructor (CFI) & Fundamentals of Instruction (FOI) written exams.

**AVN 415A. Instructor Pilot- SEL: Flight. (1 Credit)**

A. Prerequisite: AVN 304A with "S" grade. Prerequisite or corequisite: AVN 415 with "C" or higher, and overall 2.0 GPA. Fifteen dual flight hours and 5 hours flight simulation leading to the FAA instructor pilot (SEL) certification using FAA-approved Part 141 flight training syllabus.

**AVN 416A. Instructor and Commercial Pilot- SEL: Flight. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive dual flight hours and simulation hours leading to the FAA Instructor Pilot (IP) SEL and Commercial Pilot-SEL certifications using FAA-approved Part 141 flight training syllabus.

**AVN 420. Flight Training Analysis III. (2 Credits)**

A. Prerequisite: appropriate flight credentials. Principles and methodology of teaching multi-engine flight and includes ground instruction required by the FAA in preparation for a flight instructor multi-engine rating.

**AVN 420A. Flight Training Techniques III. (1 Credit)**

A. Prerequisites: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Flight preparation for FAA CFI Multi-Engine flight test.

**AVN 421. Instrument and Multi-Engine IP: Ground. (2 Credits)**

A. Prerequisite: AVN 415 with "C" grade or better and overall 2.0 GPA or an Instructor Pilot-SEL rating. Provides study of aeronautical information for becoming instrument and multi-engine flight instructor, and preparation for FAA Instrument Instructor written.

**AVN 421A. Instrument and Multi-Engine IP: Flight. (1 Credit)**

A. Prerequisite Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive required flight hours and simulation hours leading to the FAA Instrument Instructor Pilot (IP) SEL rating using FAA-approved Part 141 flight training syllabus.

**AVN 422A. Commercial and Instructor Pilot-MEL: Flight. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive required dual flight hours and simulation hours leading to the FAA commercial multi-engine add-on and multi-engine instructor ratings using FAA-approved Part 141 flight training syllabus.

**AVN 423A. Instructor Pilot--Multi-Engine: Flight. (1 Credit)**

A. Prerequisite: Dept. approval (i.e. students must make satisfactory flight progress, as determined by the Aviation Coordinator, before being allowed to register into subsequent AVN flight labs). Student will receive additional dual flight hours and simulation hours leading to the FAA Multi-Engine instructor rating using FAA-approved Part 141 flight training syllabus.

**AVN 425. Applied Aerodynamics. (3 Credits)**

A. Prerequisite: PHY 101. Applied theories of flight and flight factors, including a study of the principles of performance, stability and control, and operational data.

**AVN 435. Turbine Aircraft Systems. (3 Credits)**

A. Prerequisite: AVN 325 with a "C" or better or instructor approval. A study of the functioning theory and integral components of gas turbine (jet) engines. Additionally, provides a study of electrical, mechanical and hydraulic systems as they relate to turbine engine aircraft.

**AVN 460. Aviation Law. (3 Credits)**

I, II. Prerequisite: AVN 250 or 350 and junior standing (at least 60 hours). A study of civil law as it pertains to aviation and includes the historic development of United States and international aviation law while surveying governmental responsibility for aviation accidents.

**AVN 467. Comprehensive Exam for BS in Aviation. (0 Credits)**

(0) A. Prerequisite: Consent of Advisor. Registration in AVN 467 is required of all undergraduate B.S. (Aviation) students for the term in which they wish to take their comprehensive examination, including the exit exam and advisor approved certification or license.

**AVN 470. National Air Space System. (3 Credits)**

A. An overview of the National Air Space System with emphasis on problems of implementation, safety considerations, and social/economic impact.

**AVN 480. Glass Flight Deck Technologies. (1 Credit)**

(1) A. Prerequisite: AVN 222A or AVN 232A and AVN 330. Provides an integrated approach to the theory, technology, and operations of "Glass" flight deck technologies to prepare student pilots to successfully operate "glass" flight deck aircraft. Course includes 5 hours in "Glass" capable AATD flight simulator.

**AVN 490. Airline Flight Operations. (3 Credits)**

A. Prerequisite(s): AVN 330, 435, and 480. Provides an academic and AATD flight simulation-based transition from the general aviation reciprocal engine flight operations at 130 KIAS to airline turbojet flight operations at 350 KIAS or faster. Actual airline flight operations, to include flight deck flows and checklist usage will be introduced. Student pilots will fly 10 hours of AATD jet transition flight simulation as a 2 person crew. 2 Lec/2 lab.

**AVN 495. Internship. (1-3 Credits)**

Prerequisite: departmental approval. Students will work under departmental supervision in a private or public agency engaged in aviation activities.

**AVN 498. Independent Study. (1-3 Credits)**

A. Prerequisite: AVN major with senior standing. Student must have the independent study proposal form approved by faculty supervisor and program coordinator prior to enrollment. May be retaken to a maximum of six hours.

**AVN 499. Aviation Careers Seminar. (0 Credits)**

II. Prerequisite: AVN 399 or BTS 300. Required of all Aviation students who have earned at least 90 hours. Credit (CR) will be given when students have attended the annual Aviation Career Day and completed all related assignments.

**Career and Technical Education****CTE 164. Orientation to Career and Technical Education. (3 Credits)**

A. Instruction to new technical teachers in areas of principles of instruction, lesson planning, oral instruction, instructional media, demonstrations, evaluation and follow-up. Satisfactory-unsatisfactory grading.

**CTE 204. Related Sci Math & Tech: Occ I. (3 Credits)**

Offered only through written examination; applicant must be eligible for vocational/technical teaching certificate.

**CTE 205. Manipulative Skills: Occ I. (3 Credits)**

A. Offered only through technical competence examination; applicant must be eligible for vocational/technical teaching certificate.

**CTE 206. Related Knowledge: Occ I. (3 Credits)**

A. Offered only through written examination; applicant must be eligible for vocational/technical teaching certificate.

**CTE 261. Foundations of Career and Technical Education. (3 Credits)**

A. For in-service career and technical teachers. A study of the historical, philosophical, economical, sociological, and psychological foundations of career and technical education related to elementary, secondary, and post-secondary education. Credit will not be awarded for both CTE 261 and 262.

**CTE 262. Foundations of Career and Technical Education (Pre-Service). (3 Credits)**

A. Co-Requisite: EDF 310 (1)-Enrollment in a late term section is preferred. For pre-service career and technical teachers. A study of the historical, philosophical, economical, sociological, and psychological foundations of career and technical education related to elementary, secondary, and post-secondary education. Credit will not be awarded for both CTE 262 and 261.

**CTE 302. New Developments in Industry. (1-6 Credits)**

A. Concurrent enrollment in approved industry sponsored course. One hour credit for each week of enrollment (minimum of 20 class hours per week). Student required to present proof of completion and to develop a teaching unit on the new development. May be retaken provided the industry sponsored school is different. Graded on a satisfactory-unsatisfactory basis. Only in-service vocational education teachers may enroll.

**CTE 303. Career and Technical Education Staff Exchange. (2-9 Credits)**

A. Prerequisite: departmental approval. For in-service career and technical teachers enrolled in an approved staff exchange program designed to update technical skills and knowledge in an occupational setting. Assignments include verifying contact hours, site visit, narrative summary, and lesson development. First week of exchange is equal to two semester hours of credit with one additional hour of credit for each additional week. Satisfactory-unsatisfactory grading.

**CTE 304. Rel Sci Math & Tech in Occ. (3 Credits)**

A. Offered only through written examination; applicant must be eligible for vocational/technical teaching certificate.

**CTE 305. Manip Skills Occupation II. (3 Credits)**

A. Offered only through technical competence examination; applicant must be eligible for vocational/ technical teaching certificate.

**CTE 306. Related Knowledge: Occ II. (3 Credits)**

A. Offered only through written examinations; applicant must be eligible for vocational/technical teaching certificate.

**CTE 361. Course Materials in Career and Technical Education. (3 Credits)**

A. The preparation of instructional materials and instructional techniques, including the development and use of instructional media. The content will include the development of curricula at appropriate levels of education and appropriate laboratory activities.

**CTE 363. Evaluation in Career and Technical Education. (3 Credits)**

A. Methods of evaluation, preparation of measuring devices; methods of assessing technical competency; interpretation of standardized test results; statistical analysis of test data and the improvement of instruction.

**CTE 364. Methods in Career and Technical Education. (3 Credits)**

A. Presentation and application of instructional materials, methods, techniques, and devices relevant to teaching technical subjects.

**CTE 463. Practicum in Career and Technical Education. (4-12 Credits)**

A. Prerequisites: CTE 361, 363, 364. Observation, participation and supervised teaching in vocational and technical education. Includes experiences in lesson planning, classroom management, record keeping, development and use of instructional materials and directed teaching in approved centers. Students are graded on a satisfactory-unsatisfactory basis.

**Construction Management****CON 121. Introduction to Construction. (3 Credits)**

I, II. A survey of the construction industry. Nature, scope, and general characteristics of the industry with an emphasis on careers, safety, and typical contracting methods.

**CON 201. Materials and Methods of Construction. (3 Credits)**

I, II. Composition, manufacture and grades of construction materials and building products with emphasis on wood, metal, glass, roofing, finishing, and plastic materials. Methods, including safety, involved in the placement and installation of these materials.

**CON 202. Materials and Methods of Construction II. (3 Credits)**

II. Composition, manufacture, and grades of construction materials and building products with an emphasis on concrete and masonry. Methods, including safety, involved in the placement and installation of these materials. 2 Lec/2 Lab.

**CON 221. Plane Surveying. (3 Credits)**

I, II. Prerequisite: MAT 120 with a minimum grade of "C". Principles of surveying, including the measurement of distances, elevations, and angles. Calculations for the various operations, including traverse computations. Introduction to the use of surveying instruments and note keeping. 2 Lec/2 Lab.

**CON 250. Structural Systems & Material. (3 Credits)**

I. Prerequisite: DES 122. Emphasis on building systems and materials for residential structures. An understanding of the properties of structural materials and their appropriate applications. Laws, codes, and standards will be addressed along with instruction in blueprint reading.

**CON 294. Construction Graphics. (3 Credits)**

A. Basic principles of residential and small commercial planning; styles of architecture; a comparative study of structural systems and the preparation of working drawings. 2 Lec/2 Lab.

**CON 303. Statics and Strength of Materials. (3 Credits)**

I, II. Prerequisites: MAT 120 or 234 (4) with a minimum grade of "C", and PHY 131 or 201. Study of loads, forces and their effects on rigid bodies and structures at rest. Computation of equilibrium reactions, internal forces, shear, moments, couples, friction, stress, strain, and deformation. Finding centroids and moments of inertia.

**CON 307. Soils and Foundations. (3 Credits)**

I. Prerequisite: CON 303. A study of soil mechanics as it relates to foundation construction. Topics include soil classification, engineering properties, compaction testing, types of foundation systems, and methods of foundation construction.

**CON 320. Construction Surveying. (3 Credits)**

I, II. Prerequisite: CON 221. The application of surveying skills as they relate to horizontal and vertical control on construction projects. Activities include building layout, centerline staking, earthwork computations, and slope staking. The use of electronic instruments is emphasized. 2 Lec/2 Lab.

**CON 321. Boundary Surveying. (3 Credits)**

I. Prerequisite: CON 221. This course introduces students to the principles of boundary surveying and provides them with the basic knowledge and skill to practice boundary surveying under the supervision of a registered professional surveyor.

**CON 322. Construction Structural Design. (3 Credits)**

I, II. Prerequisites: CON 303 and MAT 211 or MAT 234 and MAT 217. A study of the design of beams and columns using steel and wood. Principles of structural design related to the design of temporary structures used in the construction process.

**CON 323. Estimating I. (3 Credits)**

I, II. Prerequisites: CON 201, 202 and MAT 120 with a grade of "C". A study of the materials and labor required in the construction of commercial projects. Experience is gained in reading drawings, calculating material quantities, and listing work items in a standardized format. 2 Lec/2 Lab.

**CON 324. Mechanical/Electrical Systems. (3 Credits)**

II. Prerequisites: CON 201 and 21 additional hours of CON courses. A study of plumbing, heating, air-conditioning, electrical power distribution, and lighting for vertical and horizontal construction. Basic fundamentals of water supply, waste drainage, electrical circuits, and heat loss/gain calculations are studied. 2 Lec/2 Lab.

**CON 325. Construction Estimating. (4 Credits)**

(5) I, II. Prerequisite: CON 201, 202; MAT 120 with a minimum grade of "C"; and TEC 161. A study of estimating construction materials, equipment, labor, and costs, through reading drawings and calculating quantities and costs. Estimating software and cost databases are utilized to list work items in standardized format. 4 Lec/2 Lab.

**CON 326. Horizontal Construction. (3 Credits)**

(3) A. A study of construction equipment, roadwork, bridge construction and various other topics involved in horizontal construction means and methods.

**CON 349. Applied Learning in Construction Management. (0.5-8 Credits)**

A. Prerequisites: 30 hours of credit including 9 credit hours of CON courses with a 2.0 GPA and departmental approval. Transfer students must have completed at least one semester of full-time work at ECU. Work under faculty and field supervisors in placements related to construction management.

**CON 401. Spec Prob in Constr Tech. (1-3 Credits)**

A. An independent study course for exceptional upper division undergraduate students. A study proposal will be developed by the student and approved by the faculty supervisor and department chair prior to enrollment. May be retaken provided the topic of study is different.

**CON 420. Engineering Economy. (3 Credits)**

I, II. Junior Class Restriction. A systematic application of engineering economy to design, selection of construction materials, and construction methods. A study of first costs, operating and maintenance costs, service life, and replacement costs.

**CON 421. Construction Contracts. (3 Credits)**

I. Prerequisite: CON 325. Contract documents, drawings, and specifications and their impact on the construction process. A study of the types and organization of construction contracts, and the roles and responsibilities of the parties involved.

**CON 423. Estimating II. (3 Credits)**

I, II. Prerequisite: CON 323 and TEC 161. Construction projects of moderate complexity are divided by scope, then materials are quantified and costed. Cost databases are utilized for estimating labor, materials, equipment, and overhead. Emphasis is placed on the use of estimating software. 2 Lec/2 Lab.

**CON 425. Project Organization and Supervision. (3 Credits)**

II. Prerequisites: MGT 300 or MGT 301 or INT 408 or AEM 408 and CON 421. A study of principles of construction project administration, systems for efficient operation of office and field personnel, and dispute avoidance and resolution procedures. The construction process is followed from project inception to closeout.

**CON 426. Scheduling. (3 Credits)**

I, II. Prerequisites: ACC 201 or FIN 310 and CON 325. A study of the planning and control of construction activities and project costing. Topics include critical path method scheduling, metric based progress monitoring, cash flow analysis, and cost control. Standard scheduling software is used. 2 Lec/2 Lab.

**CON 428. Construction Sustainability. (3 Credits)**

(3) A. A study focused on understanding the concept of sustainability in construction, which uses the requirements and procedures for obtaining Leadership in Energy and Environmental Design (LEED) professional accreditation.

**CON 480. Construction Management Graduate Preparation. (1-6 Credits)**

Prerequisite: Admission to MS program in Applied Engineering and Technology Management, Construction Management concentration, and departmental approval. A guided study of construction management modules meant for graduate students who have an undergraduate degree in an unrelated field but who have a minimum of 3 years of verifiable construction experience.

**CON 499. Construction Mgt. Capstone. (4 Credits)**

(4) II. Co-requisites and/or prerequisites: CON 425, CON 426. A project-based capstone course for senior-level construction management students under the direction of the construction management faculty. This course integrates applied components of undergraduate construction courses and incorporates online environmental and safety certifications. 3 Lec/2 Lab.

## Electricity/Electronics

### EET 251. Electricity and Electronics. (3 Credits)

I, II. Prerequisite: Grade of at least "C" in MAT 095 or a minimum math ACT score of 18 or a minimum SAT math score of 490. Principles of basic electricity, circuit operation, and electronics. Topics include electrical components, measurements, power, characteristics of AC-DC, basic circuit laws, circuit simulation, magnetism, energy conversion, and sources. 2 Lec/2 Lab.

### EET 252. Digital Electronics. (3 Credits)

I, II. Prerequisite: grade of at least "C" in MAT 090 or equivalent. A survey of digital electronics fundamentals and applications. Topics include number systems, digital mathematics, logic families, logic gates, multiplexers, demultiplexers, comparators, counters, decoders, displays, and converters. 2 Lec/2 Lab.

### EET 253. Microprocessor Control Systems. (3 Credits)

A. Prerequisite: EET 251 and 252. The operation and application of microprocessor-based control systems in electro-mechanical project environments. Topics include data, address, and control signals; memory software; interfacing digital and analog devices; ports; and data communications. 2 Lec/2 Lab.

### EET 254. Machine Language/Microcontroll. (3 Credits)

A. Prerequisite/Corequisite: EET 252. Machine language programming for ROM based microprocessor based industrial controllers. Emphasis on software manipulation of I/O control devices in real-time, interrupt driven, process control environments. 2 Lec/2 Lab.

### EET 257. Electronic Devices and Circuits. (3 Credits)

A. Prerequisite: EET 251. An analysis of the characteristics of solid state devices and the common circuits that utilize these devices. Emphasis on problem solving supplemented by laboratory activities and demonstration of electronic circuits and devices. 2 Lec/2 Lab.

### EET 349. Co-op or Appl Lrn: CET/CEN. (1-8 Credits)

II. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies in Computer Electronics Technology (CET) or Computer Electronic Networking (CEN). Transfer students must have completed at least 12 hours of coursework at EKU. A minimum of 80 hours work required for each academic credit.

### EET 350. Industrial Electronics I. (3 Credits)

A. Prerequisite: EET 257. Principles of timing, power control circuitry, transducers, and programmable controllers in commercial and industrial applications. 2 Lec/2 Lab.

### EET 351. Programmable Logic Controllers. (3 Credits)

A. Prerequisite: EET 251 or 252. The study of programmable logic controllers (PLCs). PLC functioning theory, selection, wiring, and programming. 2 Lec/2 Lab.

### EET 452. Electrical Power & Drives. (3 Credits)

A. Prerequisites: EET 257; MAT 120 or higher and PHY 101. Principles of electromagnetic induction as applied to the generation, distribution, conversion, control, and measurement of electrical power. Analysis of the electronics used for electrical drives. Installation, programming and maintenance of digital drives. 2 Lec/2 Lab.

## Networking

### NET 302. PC Troubleshooting & Construction. (3 Credits)

I, II. Prerequisite: TEC 161 or (INF 104 or higher) or (CSC 140 or higher) or (CIS 212 or higher). Construction, operation and troubleshooting microprocessors, system memory, computer architecture, video types, monitors, hard drives, mice, cabling, notebook computers and printers modern operating systems, and application programs. Building computer systems to specific requirements. 2 Lec/2 Lab.

### NET 303. LANs & PC Communications. (3 Credits)

I, II. Formerly EET 303. Prerequisite: TEC 161 or (INF 104 or higher) or (CSC 140 or higher) or (CIS 212 or higher) and (a grade of at least "C" in MAT 095 or a minimum math ACT score of 18 or a minimum SAT math score of 490). Installing, configuring, managing, and troubleshooting network and computer systems communications hardware and software. 2 Lec/2 Lab.

### NET 343. Network Switches & Routers. (3 Credits)

A. Formerly EET 343. Prerequisite: NET 303 or EET 303 or CIS 375. Cisco internetworking, switching, IOS, routing, VLAN's, access lists, and WAN protocols are covered in a combination of lecture, demonstration, and laboratory. 2 Lec/2 Lab.

### NET 344. Advanced Network Devices. (3 Credits)

A. Prerequisite: NET 343. Configure and troubleshoot network-aware devices/objects in small- to mid-sized LANs. Principles of network device/object startup, configuration and management, VLAN, advanced network communications and security. 2 Lec/2 Lab.

### NET 349. Applied Learning in NET. (0.5-8 Credits)

I, II. Prerequisite: departmental approval, Sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors.

### NET 349A. Cooperative Study: CET/CEN. (0.5-8 Credits)

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

### NET 349B. Cooperative Study: CET/CEN. (0.5-8 Credits)

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

### NET 349C. Cooperative Study: CET/CEN. (0.5-8 Credits)

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

### NET 349D. Cooperative Study: CET/CEN. (0.5-8 Credits)

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349E. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349F. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349G. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349H. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349I. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349J. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349K. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349L. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349M. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 349N. Cooperative Study: CET/CEN. (0.5-8 Credits)**

I, II. Formerly EET 349 A-N. Prerequisite: departmental approval, sophomore (30-59 hours) or higher standing and minimum of 2.0 GPA. Work under faculty and field supervisors in placements related to academic studies. 1-8 credit hours semester. Transfer students must have completed at least 12 hours of coursework at EKU. Minimum 80 hours work required per credit hour.

**NET 354. Microcomputer & Network Security. (3 Credits)**

I, II. Formerly EET 354. Prerequisite: NET 303 or EET 303 or CIS 375. Security considerations in computer systems and networks using appropriate hardware and software. Topics include malware, encryption, VPNs, ACLs, firewalls, Wi-Fi, and secure protocols. Testing configuring, managing and troubleshooting security in network systems. 2 Lec/2 Lab.

**NET 361. Cloud Technology Foundations. (3 Credits)**

A. Prerequisite: NET 303 or CIS 375. Cloud computing configurations and deployments. Definition, models, characteristics, testing, security, and management, business cases, and emerging technologies from the perspective of a cloud practitioner. Case studies of cloud computing across various industries. 2 Lec/2 Lab.

**NET 367A. Exit Exam for AAS in Tech, with Computer Electronics. (0 Credits)**

(0) A. Prerequisite: Consent of Advisor. Registration in NET 367A is required of all undergraduate A.A.S. students in the Technology program specializing in Computer Electronics program for the term in which they wish to take their comprehensive examination.

**NET 367B. Exit Exam for Minor in Computer Electronics Technology. (0 Credits)**

(0) A. Prerequisite: Consent of Advisor. Registration in NET 367B is required of all undergraduate students in the Minor for Computer Electronics Technology program for the term in which they wish to take their comprehensive examination.

**NET 367C. Exit Exam for University Certificate in Cyber Systems and Network Security. (0 Credits)**

A. Prerequisite: A minimum of 9 semester hours of NET courses completed, and EET 252. Registration in NET 367c is required of all students in the Cyber Systems and Network Security Technology university certificate, for the semester in which they wish to take their comprehensive exit examination.

**NET 385. Advanced Switches & Routers. (3 Credits)**

(3) A. Prerequisite: NET 343. Configure and troubleshoot small to mid-sized switched LANs. Principles of switch and router startup, configuration and management, VLAN, trunking, STP, advanced routing, WAN, scaling IP address space. Configure, apply and verify Access Control Lists. 2 Lec/2 Lab.

**NET 395. Special Topics in NET. (2-3 Credits)**

A. Formerly EET 395. Prerequisite: 30 credit hours or more completed, and (EET 252 or NET 303). Emerging technologies in the area of Network security and electronics (NET). May be retaken up to a maximum of 9 hours provided subject matter differs each time. Lec/Lab.

**NET 399. Associate Degree Capstone. (3 Credits)**

II. Formerly EET 399. Prerequisite: 30 credit hours or more completed, with a minimum of 9 semester hours of NET coursework completed, and a minimum of 6 semester hours of EET coursework completed. A project and research oriented course which serves as a capstone experience at the Associate Degree level. Design, implementation, analysis, and troubleshooting of electronic and computer technology related systems, and managing a technical.

**NET 403. Advanced LANSs and PC Communication. (3 Credits)**

A. Formerly EET 403. Prerequisite: NET 303 or EET 303 or CIS 375. This course will cover installation, configuration, troubleshooting and maintaining common server platforms. The participants will be given the opportunity to setup and manage network hardware, operating systems and applications. 2 Lec/2 Lab.

**NET 440. Wired/Wireless Communications. (3 Credits)**

A. Prerequisite: EET 257; MAT 112B or higher and PHY 101. Principles of communication over fiber and other wired/wireless media; digital and analog data transmission; modulation and multiplexing of data. Communication system components, safety, testing and troubleshooting. 2 Lec/2 Lab.

**NET 454. Wireless/WAN Security. (3 Credits)**

A. Prerequisites: ((NET 303 or CIS 375) and NET 354) or CSC 338. Security considerations in wireless and WANs. Wi-Fi, 802. 11x, WPA, RADIUS, encryption, VPNs, VLANs, AAA authentication, Network Security Appliances, and secure protocols. Laboratory based configuration and security testing of WAPs, appliances and servers. 2 Lec/2 Lab.

**NET 467. Exit Exam for BS in NET. (0 Credits)**

(0) A. Prerequisite: Consent to advisor. Registration in NET 467 is required of all undergraduate B.S. (NET) students for the term in which they wish to take their comprehensive examination, including the exit exam and advisor approved certification or license.

**NET 499. Senior Capstone. (3 Credits)**

II. Formerly EET 499. Prerequisite: 90 credit hours or more completed, with a minimum of 18 semester hours of NET coursework completed, and a minimum of 9 semester hours of EET coursework completed, and AEM 310W. A project and research oriented course which serves as a capstone experience at the Bachelor Degree level. Design, implementation, analysis, and troubleshooting of networking, computers and electronics technology related systems, and managing a technical project.

## Aerospace Management, Minor Program Requirements

A student may minor in aerospace management by completing a minimum of 18 semester hours as follows:

Code	Title	Hours
<b>Required Courses</b>		
AVN 150	Introduction to Aviation	3
AVN 315	Aviation Safety Programs	3
AVN 340	Airport Management I: Operations and Security	3
AVN 350	Air Transportation	3
AVN 460	Aviation Law	3
Choose from one of the following:		3
AVN 341	Airport Management II: Planning and Administration	
AVN 349	Cooperative Study: Aviation	

AVN 360	General Aviation Management	
<b>Total Hours</b>		<b>18</b>

## Aviation (Flight), Minor Program Requirements

A student may minor in aviation (flight) by completing a minimum of 23 semester hours as follows:

Code	Title	Hours
<b>Required Courses</b>		
AVN 150	Introduction to Aviation	3
AVN 161	Private Pilot- Airplane: Ground (Part 61)	4
AVN 161A	Private Pilot- Airplane (Part 61): Flight I	1
AVN 162A	Private Pilot- Airplane (Part 61): Flight II	1
AVN 220	Instrument Pilot: Ground	4
AVN 221A	Instrument Pilot: Flight I	1
AVN 222A	Instrument Pilot: Flight II	1
AVN 300	Commercial Pilot: Ground	2
AVN 315	Aviation Safety Programs	3
GEO 315	Meteorology	3
or AVN 335	Weather Reporting/Analysis	
<b>Total Hours</b>		<b>23</b>

## Aviation, Bachelor of Science with a Concentration in Aerospace Management (B.S.)

### Note: VA Regulations for Aviation Courses

Students using GI Bill® benefits to fund an aviation course must complete each course and/or flight lab within one year of initial registration; failure to do so will result in the student being assigned a grade of NC (No Credit). Students using GI Bill® benefits must repay to the VA the cost (including a portion of stipends for living expenses) related to any course in which a grade of NC is earned. All student participants receiving Veterans Administration benefits have 19 calendar weeks from the date of the first flight event to complete an Aviation flight lab.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at <http://www.benefits.va.gov/gibill> (<http://www.benefits.va.gov/gibill/>)

### Aviation Flight Hours & Costs/Fees

A complete listing of aviation related fees for the current academic year is published on the EKU Aviation Flight Fees website (<http://aviation.eku.edu/aviation-flight-fees>), and included in materials provided by the flight instructors.

Additionally, all VA funded flight students receive this information from the EKU and Veteran Affairs during their enrollment certification process. Students should verify through their regional Department of Veterans Affairs processing office if they have questions regarding their eligibility

to use VA resources to complete the requirements of the EKU Aviation program.

## Program Requirements

CIP Code: 49.0101

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		
	Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>		<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

### Major

All aviation courses (AVN prefix) must be completed with a grade of "C" or above.

Code	Title	Hours
<b>University Graduation Requirements</b>		
	General Education	36
<i>Student Success Seminar</i>		
SCO 100	Student Success Seminar	1
Upper division courses (42 hrs. distributed throughout Major/ Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>

AVN 401	Airline Management	3
AVN 402	Corporate and Business Aviation	3
AVN 410	Air Traffic Control	3

AVN 460	Aviation Law	3
AVN 467	Comprehensive Exam for BS in Aviation	0
AVN 499	Aviation Careers Seminar	0

### Concentrations

Students must select one of the following Concentrations: <sup>1</sup>

Professional Flight		
Aerospace Management		21
Aerospace Technology		
Unmanned Aircraft Systems		
<i>Supporting Course Requirements</i>		
AVN 335	Weather Reporting/Analysis	3
or GEO 315	Meteorology	
ECO 230	Fundamentals of Microeconomics (Element 5B) <sup>G</sup>	
MAT 112	Algebra with Applications (or higher) (Element 2) <sup>G</sup>	
BIO 307	Human Anatomy and Physiology I	3
or MGT 300	Principles of Management	
PHY 101	Conceptual Physics (or higher)(Element 4)	
TEC 161	Computer Applications in Technology	3
Choose from one of the following:		
CMS 100	Introduction to Human Communication (Element 1C) <sup>G</sup>	
CMS 210	Public Speaking (Element 1C) <sup>G</sup>	
EES 250	Basic Social Intelligence Skills (Element 1C) <sup>G</sup>	

### Free Electives

Choose from 17 hours of free electives		17
--	--	----

### Exit Requirements

Students must take an Aviation exit examination before graduation.

AVN 467	Comprehensive Exam for BS in Aviation (CR only)	0
---------	---	---

**Total Hours** **120**

<sup>1</sup>

Note: selecting only lower division courses may result in additional course work being needed to meet the University requirement of 42 hours of upper division credits. Students are referred to Degree Works to check for course pre-requisites and monitor upper division hours.

<sup>G</sup>

Course also satisfies a General Education element. Supporting hours are included within the 36 hr. General Education requirement above.

### Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
ACC 200	Survey of Accounting	3
AVN 341	Airport Management II: Planning and Administration	3
AVN 360	General Aviation Management	3

A complete listing of aviation related fees for the current academic year is published on the EKU Aviation Flight Fees website (<http://aviation.eku.edu/aviation-flight-fees> (<http://aviation.eku.edu/aviation-flight-fees/>)), and included in materials provided by the flight instructors.

Additionally, all VA funded flight students receive this information from the EKU and Veteran Affairs during their enrollment certification process. Students should verify through their regional Department of Veterans Affairs processing office if they have questions regarding their eligibility to use VA resources to complete the requirements of the EKU Aviation program.

## Program Requirements

CIP Code: 49.0101

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3
C:	Oral Communication (p. 63)	3
<b>Element 2</b>		
	Quantitative Reasoning (p. 63)	3
<b>Element 3</b>		
A:	Arts (p. 63)	3
B:	Humanities (p. 63)	3
<b>Element 4</b>		
	Natural Sciences (p. 64)	6
<b>Element 5</b>		
A:	Historical Science (p. 65)	3
B:	Social Behavioral Science (p. 65)	3
<b>Element 6</b>		

Diversity of Perspectives Experiences (p. 65)	6
<b>Total Hours</b>	<b>36</b>

Students are expected to complete Elements 1 and 2 within their first 60 hours of college credit.

## Major

All aviation courses (AVN prefix) must be completed with a grade of "C" or above.

Code	Title	Hours
<b>University Graduation Requirements</b>		
General Education		36
<i>Student Success Seminar</i>		
SCO 100	Student Success Seminar	1
Upper division courses (42 hrs. distributed throughout Major/ Supporting/Gen Ed/Free Electives categories)		
<b>Major Requirements</b>		
<i>Core Courses</i>		
AVN 150	Introduction to Aviation	3
AVN 250	Air Transportation	3
AVN 315	Aviation Safety Programs	3
AVN 325	Aircraft Systems	3
AVN 329	Aviation Human Factors	3
AVN 340	Airport Management I: Operations and Security	3
AVN 370	Aviation Supervision and Leadership	3
AVN 390	Aviation Decision Making	3
AVN 399	Aviation Prof Skills Seminar	0
AVN 401	Airline Management	3
AVN 402	Corporate and Business Aviation	3
AVN 410	Air Traffic Control	3
AVN 460	Aviation Law	3
AVN 467	Comprehensive Exam for BS in Aviation	0
AVN 499	Aviation Careers Seminar	0

### Concentrations

Students must select one of the following Concentrations:<sup>1</sup>

Professional Flight		
Aerospace Management		
Aerospace Technology		
Unmanned Aircraft Systems		39
<i>Supporting Course Requirements</i>		
AVN 335	Weather Reporting/Analysis	3
or GEO 315	Meteorology	
ECO 230	Fundamentals of Microeconomics (Element 5B) <sup>G</sup>	
MAT 112	Algebra with Applications (or higher) (Element 2) <sup>G</sup>	
BIO 307	Human Anatomy and Physiology I	3
or MGT 300	Principles of Management	
PHY 101	Conceptual Physics (or higher)(Element 4) <sup>G</sup>	
TEC 161	Computer Applications in Technology	3
Choose from one of the following:		
CMS 100	Introduction to Human Communication (Element 1C) <sup>G</sup>	
CMS 210	Public Speaking (Element 1C) <sup>G</sup>	
EES 250	Basic Social Intelligence Skills (Element 1C) <sup>G</sup>	

<i>Free Electives</i>	0
-----------------------	---

### Exit Requirements

Students must take an Aviation exit examination before graduation.		
AVN 467	Comprehensive Exam for BS in Aviation (CR only)	0
<b>Total Hours</b>		<b>121</b>

1

Note: selecting only lower division courses may result in additional course work being needed to meet the University requirement of 42 hours of upper division credits. Students are referred to Degree Works to check for course pre-requisites and monitor upper division hours.

G

Course also satisfies a General Education element. Supporting hours are included within the 36 hr. General Education requirement above.

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
AVN 105	UAS Safety and Regulations	3
AVN 170	Introduction to Unmanned Aircraft Systems	3
AVN 290	UAS Flight Operations	3
AVN 310	UAS Ground/Flight Operations	3
AVN 312	UAS Commercial Single/Multi En	3
AVN 330	Crew Resource Management	3
AVN 412	Counter UAS Operations	3
AVN 425	Applied Aerodynamics	3
GEO 110	Environmental Geography (Element 4)	3
or GEO 210	Introduction to Physical Geography	
GEO 353	Geographic Information Systems	3
GEO 456	Remote Sensing	3
GEO 458	Advanced Geographic Imagery	3
GEO 501	Advanced Geography:___	3
<b>Total Hours</b>		<b>39</b>

## Computer Electronics Technology, Minor

### Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
EET 251	Electricity and Electronics	3
EET 252	Digital Electronics	3
Choose from one of the following:		
EET 253	Microprocessor Control Systems	
EET 351	Programmable Logic Controllers	
AEM 352	Robotics and Automated Systems	
NET 302	PC Troubleshooting & Construction	3
NET 303	LANs & PC Communications	3
Choose from one of the following:		
NET 343	Network Switches & Routers	
NET 354	Microcomputer & Network Security	
NET 395	Special Topics in NET	
Upper-division NET course approved by advisor		

*Exit Requirements*

Students must take an assessment examination for completing the minor.		
NET 367B	Exit Exam for Minor in Computer Electronics Technology (CR only, no hours)	0
<b>Total Hours</b>		<b>18</b>

Prerequisites may be required for some course selections.

# Construction Management, Bachelor of Science (B.S.)

The Construction Management program is accredited by the American Council for Construction Education.

## Program Requirements

CIP Code: 52.2001

### Summary Checklist for General Education

Code	Title	Hours
<b>Element 1</b>		
A:	Written Communication (p. 63)	3
B:	Written Communication (p. 63)	3

MGT 301	Principles of Management (NB)	3
ECO 230	Fundamentals of Microeconomics (Element 5B) <sup>G</sup>	
BUS 204	Fundamentals of Business Law and Ethics	3
GLY 108	Earthquakes and Volcanoes (Element 4) <sup>G</sup>	
	Take the following MAT sequence or Or choose from seven hours of higher-level MAT courses:	7
MAT 120	Trigonometry (Element 2) <sup>G</sup>	
MAT 211 & MAT 217	Applied Calculus and	
TEC 161	Computer Applications in Technology	3
PHY 131	College Physics I (Element 4) <sup>G</sup>	

Choose three hours of ACC, CCT, CIS, ECO, FIN, GBU, RMI, MGT, MKT, or RST electives as approved by major advisor <sup>2,3</sup>

*Exit Requirements*

Students must take a construction assessment examination before graduation. An exam fee is required.

<b>Total Hours</b>		<b>121</b>
--------------------	--	------------

**G**

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above. A maximum of six hours will count toward Element 4.

**1**

Three separate enrollments of CON 349 Applied Learning in Construction Management are recommended in order to achieve a total of 3 cr. hrs.

**2**

Business electives may be upper or lower division as necessary in order to complete upper division requirement.

**3**

Students wishing to pursue the Minor in Business must confer with their major advisor to make substitutions to the supporting course requirements. QMB, RMI, and RST courses do not apply to the Minor in Business.

## Construction Management, Minor

The Construction Management minor provides technical and managerial knowledge about the construction industry. It is an appropriate supplement to a student who is majoring in a profession affiliated with construction. This minor is particularly relevant to students majoring in business, insurance, management, manufacturing, and marketing.

### Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
CON 121	Introduction to Construction	3
CON 201	Materials and Methods of Construction	3
CON 202	Materials and Methods of Construction II	3
CON 294	Construction Graphics	3
CON 325	Construction Estimating	4
CON 324	Mechanical/Electrical Systems	3
CON 421	Construction Contracts	3
<b>Total Hours</b>		<b>22</b>

No more than nine hours of courses taken for a major may be counted toward this minor.

## Engineering Technology Management, Bachelor of Science (B.S.) and Technology Management Master of Science (M.S.) [Manufacturing Concentration] Accelerated 3+2 Dual Degree Program

Students accepted to the 3+2 Accelerated Dual Degree Program are able to complete their B.S. degree and M.S. degree within five calendar years because of the accelerated curriculum and because nine semester hours of graduate coursework will apply to both the undergraduate B.S. degree and the graduate M.S. degree. Only undergraduate students of proven academic ability will be considered for the program. Students should be aware that, in order to maintain their progress in the accelerated 3+2 program, careful coordination with their advisor is required. Depending upon undergraduate progress at the time of 3+2 admission, some summer-school classes may be needed.

### Admission Requirements

Students interested in this option must satisfy all of the following conditions:

1. Junior or Senior standing
2. Overall grade point average (GPA) of at least 3.0 at the time of admission to the 3+2 program
3. Approval from department and Graduate School (see the form at <http://gradschool.eku.edu/graduate-school-forms> (<http://gradschool.eku.edu/graduate-school-forms/>))
4. Must maintain an overall undergraduate and graduate grade point average (GPA) of at least 3.0 to continue in the 3+2 program.

## Program Requirements

CIP Code: 15.1501

CHE 101 & 101L	Introductory Chemistry and Introductory Chemistry Lab (Element 4) <sup>G</sup>	
CHE 111 & 111L	General Chemistry and General Chemistry Lab I (Element 4) <sup>G</sup>	
Choose from 0-3 hours of the following:		0-3
ECO 120	Economic Reasoning and Issues (Element 5B) <sup>G</sup>	
ECO 230	Fundamentals of Microeconomics (Element 5B) <sup>G</sup>	
ACC 200	Survey of Accounting	
Choose from 3-6 hours of the following:		3-6
MAT 120	Trigonometry (Element 2) <sup>G</sup>	
MAT 211	Applied Calculus	
Or choose from six hours of higher level MAT courses		
PHY 131	College Physics I (Element 4) <sup>G</sup>	
<i>Exit Requirements</i>		
Students must take an AEM assessment examination before graduation (CR only, no hours). An exam fee is required.		
AEM 467	Comprehensive Exam for BS in ETM	0
<i>Free Electives</i>		
Choose from 6-10 hours of free electives		6-10
<b>Total Hours</b>		<b>120</b>

### G

Course also satisfies a General Education element. Hours are included within the 36 hr. General Education requirement above. A maximum of 6 hours can apply toward Element 4.

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
Choose from 33 hours of approved technical electives		33
<b>Total Hours</b>		<b>33</b>

Transfer students with an associate degree in a technical related field may not need to take these 12 hours of electives if upper division requirement can be completed.

# Engineering Technology Management, Minor

## Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
AEM 195	Computer Aided Drafting	3
AEM 201	Metallic Material Processes	3
AEM 202	Introduction to Quality <sup>1</sup>	3
AEM 308	Methods of Lean Operations	3
Choose from six hours of AEM upper division electives		6
<b>Total Hours</b>		<b>18</b>

### 1

MAT 112A Algebra: Polynomials and MAT 112B Algebra: Functions & Matrices or higher and STA 215 Introduction to Statistical Reasoning or STA 270 Applied Statistics are prerequisites for AEM 202 Introduction to Quality.

No more than nine hours of courses taken for a major may be counted toward this minor.

## Land Surveying, Minor

Designed to prepare students to take the Fundamentals of Land Surveying Examination (administered by the Kentucky State Board of Licensure for Professional Engineers & Land Surveyors) upon completion of the core curriculum in land surveying or during final year in a Baccalaureate Degree program if twelve (12) hours or more of the core curriculum in land surveying have been completed. This minor program includes all requirements of the core curriculum in land surveying.

### Program Requirements

Code	Title	Hours
<b>Required Courses</b>		
CON 221	Plane Surveying	3
CON 294	Construction Graphics	3
CON 320	Construction Surveying	3
CON 321	Boundary Surveying	3
GEO 353	Geographic Information Systems	3
GEO 453	Advanced GIS	3
GEO 455	GIS Cartography	3
<b>Total Hours</b>		<b>21</b>

Non-Construction Management majors must also take BUS 204 Fundamentals of Business Law and Ethics.

## Land Surveying, University Certificate

The curriculum for the Land Surveying Certificate is aimed at students who have, or are pursuing, a four-year degree in a program other than land surveying from a college or university of recognized standing. This certificate program includes all requirements of the Kentucky core curriculum in Land Surveying. Upon completion of this curriculum, students will receive a certificate permitting them to take the Kentucky Fundamentals of Land Surveying Examination.

### Program Requirements

CIP Code: 15.1102

<b>Total Hours</b>		<b>21-24</b>

## Management Information Systems, Bachelor of Science with a Concentration in Business Analytics (B.S.)

### Overview

A Bachelor of Science degree in Management Information Systems (MIS) focuses on the applications and implications of computing in the world of business. This program prepares graduates for employment in many job opportunities in the local and regional job market. The BS in MIS will provide a positive impact on economic growth in the state of Kentucky by preparing knowledge workers with IT skills and business analytics skills. These high-tech and high-demand skills will lead to greater success as graduates enter the Kentucky workforce. There are two choices of major elective areas: Business Analytics or Security Systems.

### Business Analytics Concentration

The Business Analytics Concentration prepares students for careers as Data Analyst, Business Intelligence Analyst, Data Architect, Business Systems Analyst, Data Warehousing, and Data Consultant. Students learn skills such as data visualization, data cleaning, statistical analysis, and data-driven decision making.

### Security Systems Concentration

The Security Systems Concentration prepares students for careers as IT Manager, Project Manager, Business Analyst, Systems Analyst, Data Base Engineer, and Programmer/Analyst. Students learn skills such as business programming, e-business technology, database management systems, and IT project management.

### Program Requirements

100-199	are primarily for freshmen
200-299	are primarily for sophomores
300-399	are primarily for juniors
400-499	are primarily for seniors
500-599	are primarily for seniors and are linked with 700 level graduate courses

A student may not take a course numbered more than one year above his/her classification level without advisor permission. To take courses numbered 300 and above in The School of Business see the College of Business and Technology section for requirements for BBA degree.

Special approval must be obtained from the dean of the college offering a 500#level course in order for junior-level students to enroll. (Students of less than junior status or unapproved juniors cannot be admitted to a 500-level course and will be disenrolled by the Registrar if such an enrollment occurs.)

**G**  
Course satisfies a General Education element.

## Unmanned Aircraft Systems, Minor

### Program Requirements

A student may minor in aerospace management by completing a minimum of 18 semester hours as follows:

Code	Title	Hours
<b>Required Courses</b>		
AVN 105	UAS Safety and Regulations	3
AVN 150	Introduction to Aviation	3
AVN 170	Introduction to Unmanned Aircraft Systems	3
AVN 290	UAS Flight Operations	3
GEO 110	Environmental Geography	3
or GEO 210	Introduction to Physical Geography	
GEO 353	Geographic Information Systems	3
<b>Total Hours</b>		<b>18</b>

## Course Numbering

### Course Numbering

Courses are numbered according to the following plan:

Number	Description
000-099	are remedial non-degree credit courses

# GRADUATE

*This publication was prepared by Eastern Kentucky University and paid from state funds.*

## Eastern Kentucky University Graduate Catalog 2023-2024

### President

Dr. David T. McFaddin

### Board Of Regents

#### Board of Regents Membership

Michael Eaves, Richmond, Kentucky (Chair)

Laura Babbage, Lexington, Kentucky

Juan Castro, Lexington, Kentucky

Jeremiah Duerson, Berea, Kentucky (Staff Regent and Board Secretary)

Alan Long, Richmond, Kentucky (Vice Chair)

Jason Marion, Richmond, Kentucky (Faculty Regent)

Camden Ritchie, Frankfort, Kentucky (Student Regent)

### Notifications

All statements in this publication are announcements of present policy only and are subject to change without prior notice. Nothing contained in this publication is intended to create nor shall be construed as creating a contract, either express or implied, or guarantee for any term or for any specific procedures.

Eastern Kentucky University is an Equal Opportunity/Affirmative Action employer and educational institution and does not discriminate on the basis of age, race, color, religion, sex, sexual orientation, disability, national origin or Vietnam era or other veteran status in the admission to, or participation in, any educational program or activity which it conducts. Any complaint arising by reason of alleged discrimination should be directed to the Office of Institutional Equity of Eastern Kentucky University or to the Director of the Office for Civil Rights, U.S. Department of Education, Philadelphia, PA.

Office of Institutional Equity of Eastern Kentucky University  
Jones Building, Room 416, CPO 37A  
Richmond, KY 40475-3102  
859-622-8020 v/tdd

The Board of Regents of Eastern Kentucky University does hereby reaffirm the University's commitment to providing educational opportunities to all qualified students regardless of economic or social status and ensuring that participation in all University sponsored activities will be administered in a way that furthers the principles of equal employment and educational opportunities.

Eastern Kentucky University does not discriminate on the basis of disability in the admission or access to educational opportunities, programs or activities. The Director of The Center for Student Accessibility, Whitlock Building 361, CPO 66, Eastern Kentucky University, Richmond, Kentucky 40475, coordinates compliance with all federal, state and local laws and regulations concerning access for disabled individuals. Requests for information concerning the Americans with Disabilities Act and other federal and state laws relating to

disabilities and the rights provided thereunder, as well as all requests for accommodations based upon disability should be directed to this office.

Eastern Kentucky University is committed to providing a healthy and safe environment for its students, faculty and staff through its compliance with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act Amendment of 1989. In accordance with these laws, students, faculty and staff are hereby notified of the standards of conduct which shall be applicable while on University property, on University business or at University sponsored activities.

By University rules and regulations, federal laws, state laws, and local ordinances, students, faculty and staff are prohibited from the unlawful possession, use, dispensation, distribution, or manufacture of illicit drugs on University property, on University business and/or at University sponsored activities.

Any member of the student body, faculty or staff who violates the University's standards of conduct shall be subject to appropriate disciplinary action up to and including suspension and/or termination. In addition to disciplinary sanctions, students or employees may face prosecution and imprisonment under federal and/or state laws which make such acts felony or misdemeanor crimes. The specifically defined standards of conduct, the disciplinary procedures and possible sanctions appear in the *Student Handbook* and the *Faculty Handbook*.

Continuous efforts are made to make students, faculty and staff aware of the on-campus and off-campus programs which provide information and professional services on matters related to the abuse of alcohol and drugs. For additional information individuals should contact the Eastern Kentucky University Counseling Center.

## Federal Regulations

### Provisions of the Family Educational Rights and Privacy Act of 1974 (as amended) Public Law 93-380

This is to serve notice to all students of Eastern Kentucky University of the rights and restrictions regarding the maintenance, inspection, and release of student records contained in the Family Educational Rights and Privacy Act of 1974 (FERPA), as amended. The University is composed of five colleges and offers a wide variety of services to students. Each college and service requires the maintenance of some records concerning students enrolled in a particular college or participating in a nonacademic service. The location and type of record maintained by the University depends upon the field of study or service in which the student is enrolled. The following is a list of the types of records maintained by the University for students:

1. Grade reports
2. Transcripts
3. Curriculum information
4. Applications for graduation
5. Correspondence with students, if any
6. Withdrawal records, if applicable
7. Admission forms
8. ACT test scores
9. Student teacher evaluations, if applicable
10. Letters of recommendation, if applicable
11. Nominations for awards, if applicable
12. Biographical data
13. Evaluation forms, if applicable

14. Weekly student teacher logs, if applicable
15. Mid-term evaluation, if applicable
16. Records of school visitations, if applicable
17. Physical education requirement waivers
18. Field training evaluations and correspondence, if applicable
19. Professional conduct agreements and liability insurance coverage

1. **Access to Records:** In general, the records maintained by the University are available only to the student, to University personnel with legitimate educational interests, to other institutions where the student is seeking financial aid, and to authorized representatives of the Comptroller General of the U.S., the Secretary of Education, or an administrative head of an education agency, in connection with an audit or evaluation of federally support programs, and as provided by Section 164.283 of the Kentucky Revised Statutes. However, information may be released by the institution to appropriate persons in connection with an emergency if the knowledge of such information is necessary to protect the health or safety of a student or other persons. Records may also be furnished in compliance with a judicial order or pursuant to a subpoena or with the consent of the student.

Students may inspect and review all records pertaining to them within forty-five (45) days of making request for same, except for

- a. records created or maintained by a physician, psychiatrist, psychologist or other recognized professional or paraprofessional acting or assisting in a professional capacity in connection with treatment of the student (except that the student may have these records reviewed by a physician or appropriate professional designated by the student),
- b. financial records of the student's parents,
- c. confidential letters and recommendations put in the files prior to January 1, 1975, and
- d. confidential recommendations relating to admission, applications for employment, or honors, if the student has waived his/her right to review such records.

Where a particular record cannot be reviewed by a student without revealing confidential information relating to other students, the records custodian will inform the student, upon request, of the contents of the record pertaining to that student.

Parents who claim a student as a dependent may present their federal tax declaration, in lieu of having the student's written consent, to gain access to information concerning their children's grades.

2. **Procedures for Challenge:** A student who believes that any record maintained by the University pertaining directly to that student is inaccurate, misleading, or otherwise violative of the right of privacy of the student as provided by Title IV of Pub. L. 90-247, as amended, and Publ. L. 93-380 as amended by Senate Joint Resolution 40 (1974) may request a hearing before a panel of three persons appointed by the President of the University. The panel may direct that appropriate action be taken to correct, explain, or expunge the record(s) challenged.

Request for hearings should be addressed to the

Office of University Counsel  
Eastern Kentucky University  
Coates Room 212, CPO 40A  
521 Lancaster Avenue

Richmond, Kentucky 40475-3102.

3. **Directory Information:** The University may release information without the student's consent where the information is classified as "directory information." The following categories of information have been designated by the University as directory information: name, address, telephone listing, email address, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous education institution attended by the student. Students who do not wish such information released without their consent should notify the Student Records Office in writing. Any such request should be sent to

Office of the Registrar, Office of Academic Records/Transcripts  
Eastern Kentucky University  
Whitlock Building Room 239, CPO 58  
521 Lancaster Avenue  
Richmond, Kentucky 40475-3158.

4. **Notification of Rights Under FERPA for Postsecondary Institutions:**

The Family Educational Rights and Privacy Act affords students certain rights with respect to their education records. They are:

- a. The right to inspect and review the student's education records within 45 days of the day the University receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
- b. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. Students may ask the University to amend a record that they believe is inaccurate or misleading. They should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading.

If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

- c. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate education interest

if the official needs to review an education record in order to fulfill his or her professional responsibility.

Upon request, the University discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

- d. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA are:

Family Policy Compliance Office  
U.S. Department of Education  
600 Independence Avenue SW  
Washington, DC 20202-4605.

## Student Right-To-Know Act (Pub. L. 101-542)

### Eastern Kentucky University 1999-2000

Section 103 of the Student Right-To-Know and Campus Security Act of 1990 (Public Law 101-542) as amended by the Higher Education Technical Amendments of 1991 (Public Law 102-26) requires public disclosure of relevant graduation rate information for students enrolled in colleges and universities receiving federal financial assistance annually beginning July 1, 1993. Graduation rate information is published each year in the *University Handbook for Students* or may be obtained upon request from the

Office of the Executive Vice President for Academics and Provost  
Coates Administration Building  
Room 110, CPO 30A  
521 Lancaster Avenue  
Richmond, Kentucky 40475-3102.

## About Eastern Kentucky University Introduction

Eastern Kentucky University is a regional, coeducational, public institution of higher education offering general and liberal arts programs, pre-professional and professional training in education and various other fields at both the undergraduate and graduate levels. Located in Richmond, Madison County, Kentucky, Eastern Kentucky University has a distinguished record of more than a century of educational service to the Commonwealth.

Situated near the heart of the Bluegrass, Richmond is served by a network of major highways which makes Eastern Kentucky University easily accessible from all parts of Kentucky and surrounding states. Richmond is 26 miles southeast of Lexington, Kentucky. Interstate Highways I-75 (north-south) and I-64 (east-west) make the metropolitan areas of Cincinnati, 112 miles to the north, and Louisville, 110 miles to the west, within convenient distance by automobile. Richmond is also served by U.S. Route 25 from south Eastern Kentucky and Kentucky Route 52 from the east and west. The Kentucky Turnpike and the Mountain, Hal Rogers, and Cumberland Parkways provide even greater accessibility by automobile since the city is located near the convergence of these arterial highways into the interstate system.

Richmond, the county seat of Madison County, is an expanding community of approximately 30,000 population.

In and around Richmond are many areas of historic and scenic interest. Boonesborough State Park, birthplace of Kentucky, is located 12 miles to the north. Many other historical places are within easy driving distance. Scenic and recreational areas surround this section of the state.

## History

The Kentucky General Assembly of 1906 enacted legislation establishing the Eastern Kentucky State Normal School. Governor J. C. Beckham signed the bill into law on March 21, 1906. On May 7 of that year, the Normal School Commission, meeting in Louisville, selected the campus of the old Central University, founded in 1874, in Richmond, Kentucky, as the site of the new school. On June 2, 1908, Ruric Nevel Roark was chosen President of the Normal School and the training of teachers was begun.

In 1922, Eastern Kentucky University became a four-year institution known as the Eastern Kentucky State Normal School and Teachers College. The first degrees were awarded by this institution in 1925. In 1928, the College was accredited by the Southern Association of Colleges and Secondary Schools. In 1930, the General Assembly renamed the school the Eastern Kentucky State Teachers College.

In 1935, a graduate program was approved at Eastern, leading to the Master of Arts degree in Education. In 1948, the General Assembly removed the word "Teachers" from the name of the college and granted the college the right to award nonprofessional degrees.

The most significant day since its founding came for Eastern on February 26, 1966, when Governor Edward T. Breathitt signed into law a bill renaming the institution Eastern Kentucky University (EKU) and sanctioning the awarding of graduate degrees in academic fields other than education.

During this period of time, Eastern Kentucky University has increased rapidly in size and stature. Beginning with a few students engaged in short review and certificate courses, the University today serves thousands of Kentuckians. The curriculum leads to associate degrees, baccalaureate degrees, and an expanding graduate program that currently offers degrees at the master's level in many other fields as well as the already well-established Master of Arts degree in Education and the various fifth- and sixth-year leadership programs in education. Specialist degree programs have been implemented in education and psychology.

In 2008, EKU offered its first doctoral degree, the Doctor of Education (Ed.D.). In addition to these programs, Eastern Kentucky University offers cooperative doctoral programs with cooperating institutions.

Ever-mindful of the purpose of its founding, Eastern continues to recognize its historic function of preparing quality teachers for the elementary and secondary schools of the Commonwealth. However, a strong liberal arts curriculum leading to appropriate degrees, together with pre-professional courses in several areas and graduate programs, enable Eastern to serve the Commonwealth as a regional comprehensive university.

## Experience Excellent: EKU's 2022-2030 Strategic Plan

### Mission Statement

Eastern Kentucky University is the School of Opportunity where everyone belongs. World class faculty and staff create opportunities for personal

growth through exceptional experiences, to ensure students realize their fullest potential and achieve excellence. EKU graduates shape the success and vitality of their professions and communities.

## Vision

Eastern Kentucky University will be excellent in all that we choose to do.

## Strategic Priorities

### Goal 1: Knowledge

Knowledge is at the center of EKU's commitment to serve as the School of Opportunity. From academic teaching and learning to experiential co- and extracurricular activities, EKU strategically advances academic and student success programs that support EKU's diverse learners.

### Goal 2: Innovation

Innovative thinking and bold action will elevate and differentiate EKU. Innovation will enhance organizational stewardship, intellectual and creative capacity, and economic vitality within EKU and the communities we serve.

### Goal 3: Transformation

EKU is dedicated to transforming lives and communities. EKU's learning environments support intellectual growth, creativity, empowerment, and life-changing experiences by centering access, equity, dignity, respect, and inclusivity.

## Guiding Values

**Inclusion:** Community engagement, Diversity of people and perspectives, Professional growth, Hospitality, Celebration

**Trust:** Consistency, Effective communication, Accountability, Efficiency, Leadership

Since its inception in 1874, Eastern Kentucky University (then known as Central University) has been driven by core values. Although its mission has evolved and expanded to meet the changing needs of citizens of the Commonwealth (and increasingly other places in the world), core values are still an integral part of the University community. Values are the code of organizational conduct. They guide decision-making in all parts of the University. They direct our actions and must inspire all of us in the EKU community to be true to them. The EKU community is committed to embodying these values in our policies and procedures in our day-to-day activities to accomplish our mission and achieve our vision. EKU has been and will continue to be guided by the following values when planning strategies and implementing decisions regarding the University community's teaching, scholarly, and service activities.

## Accreditations

### Accreditations

Eastern Kentucky University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate, baccalaureate, masters, educational specialist, and doctorate degrees. Degree-granting institutions also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Eastern Kentucky University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website ([www.sacscoc.org](http://www.sacscoc.org)) (<https://nam02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.sacscoc.org%2F&data=05%7C01%7CShannon.Tipton%40eku.edu%7C5b4c19b0db8c4055dae208daf32e8cc1%7Ce23043271af04dee83fbc1b2fd6db0%7C0%7C0%7C638089678497515429%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Ikl1haWwiLCJlIjoiMC4wLjAwMDAiLCJYIjoiZW50cm9udC4wLjAwMDA%7C%7C&sdata=EE0tqD%2BWJJ9rOKG7NJvd%2B58whs6dioBYboY%2BwI0t1Jg%3D&reserved=0>).

## EKU Branch Campuses

Accreditation by SACSCOC of the Corbin branch campus of Eastern Kentucky University is dependent on the continuing accreditation of the University's main campus in Richmond, KY.

Accreditation by SACSCOC of the Manchester branch campus of Eastern Kentucky University is dependent on the continuing accreditation of the University's main campus in Richmond, KY.

### Specialized Accreditations

AACSB International – The Association to Advance Collegiate Schools of Business (AACSB International) (<http://www.aacsb.edu/>) for Master of Business Administration, Bachelor of Business Administration in Accounting, Computer Information Systems, Risk Management & Insurance, General Business, Management, and Marketing.

Accreditation Commission for Education in Nursing (ACEN) (<http://www.acenursing.org/>) for Associate Degree in Nursing.

Accreditation Council for Education in Nutrition and Dietetics (ACEND) (<https://www.eatrightpro.org/acend/>) of the Academy of Nutrition and Dietetics for Didactic Program in Dietetics for Bachelor of Science in Food and Nutrition, Dietetics concentration.

Accreditation Council for Occupational Therapy Education (ACOTE) (<https://acoteonline.org/>) for the Master of Science and Doctorate in Occupational Therapy.

American Academy of Forensic Sciences – Forensic Science Education Programs Accreditation Commission (AAFS-FEPAC) (<http://www.aafs.org/fepac/>) for Bachelor of Science in Digital Forensics and Cybersecurity and Bachelor of Science in Forensic Science Program (Forensic Biology and Forensic Chemistry concentrations).

American Bar Association (ABA) (<http://www.americanbar.org/aba.html>) for Associate of Applied Science in Paralegal Studies, Bachelor of Arts in Paralegal Science, and Undergraduate Certificate in Paralegal Science.

American Council for Construction Education (ACCE) (<http://www.acce-hq.org/>) for Bachelor of Science in Construction Management.

American Psychological Association (APA) (<https://www.apa.org/ed/accreditation/programs/>) for Doctor in Psychology.

American Speech-Language-Hearing Association (ASHA) (<http://www.asha.org/>) for Masters of Arts in Communication Disorders.

Association of Technology, Management, and Applied Engineering (ATMAE) (<http://www.atmae.org/>) for Bachelor of Science in Engineering Technology Management, Bachelor of Science in Cyber Systems Technology, and Associate of Applied Science in Technology.

Commission on Accreditation of Allied Health Education Programs – Joint Review Committee on Educational Programs for EMT Paramedic

(CAAHEP-EMT) (<http://www.caahep.org/>) for Bachelor of Science in Emergency Medical Care and Associate of Science in Paramedicine.

Commission on Accreditation of Athletic Training Education (CAATE) (<http://caate.net/>) for Master of Science in Athletic Training.

Commission on Collegiate Interpreter Education (CCIE) (<http://www.ccie-accreditation.org/>) for Bachelor of Science in ASL and English Interpretation.

Commission on Collegiate Nursing Education (CCNE) (<http://www.ccneaccreditation.org/>) for Bachelor of Science in Nursing; Master of Science in Nursing; Doctor of Nursing Practice.

Commission on Health Informatics and Information Management Education (CAHIIM) (<http://www.cahiim.org/>) for Bachelor of Science in Health Services Administration.

Computing Accreditation Commission of ABET (ABET-CAC) (<http://www.abet.org/>) for Bachelor of Science in Computer Science (with Concentration in General Computer Science).

Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (<https://caa.asha.org/>) for Master of Arts in Communication Disorders.

Council on Accreditation of Parks, Recreation and Tourism (<https://accreditationcouncil.org/>) for Bachelor of Science in Recreation and Parks Administration.

Council for Accreditation of Counseling and Related Educational Programs (CACREP) (<http://www.cacrep.org/>) for Master of Arts in Clinical Mental Health Counseling, the Master of Arts Education in School Counseling Programs, and the Doctor of Education (Concentration in Counselor Education and Supervision).

Council for the Accreditation of Educator Preparation (CAEP) (<http://caepnet.org/>) (formerly the National Council for Accreditation of Teacher Education) for CARES (formerly Teacher Education Services), for Bachelor of Science in Elementary Education, Bachelor of Science in Middle Grade Education, Master of Arts Teaching, Master of Arts Education in Elementary Education, Master of Arts Education in Middle Grade Education, Master of Arts Education in Secondary Education, Master of Arts Education in Library Science, Master of Arts Education in Literacy, Master of Arts Education in Gifted Education, Rank I Elementary Education, Rank I Middle Grade Education, Rank I Secondary Education, Rank I Library Science, Business and Marketing Education/Teaching, Career and Technical Education/Teaching, School Psychology – Specialist in Psychology Degree Program, Physical Education/Teaching, Health Education/Teaching, and Family & Consumer Science Education/Teaching Programs.

Council on Education for Public Health (CEPH) (<http://ceph.org/>) for Bachelor of Science in Public Health and Master of Public Health.

Council on Social Work Education (CSWE) (<http://www.cswe.org/>) for Bachelor of Social Work.

Education of the Deaf and Hard of Hearing Program (<http://councilondeafed.org/>) for Bachelor of Science in Education of the Deaf and Hard of Hearing, Master of Arts Education (Graduate Deaf and Hard of Hearing Certification), Master of Arts Teaching (Deaf and Hard and Hard of Hearing Education).

Engineering Technology Accreditation Commission of ABET (ABET-ETAC) (<https://www.abet.org/>) for Bachelor of Science in Fire Protection and Safety Engineering Technology.

International Fire Service Accreditation Congress (IFSAC) (<https://ifsac.org/>) for Bachelor of Science in Fire Protection Administration, Bachelor of Science in Fire Arson and Explosion Investigation, and Bachelor of Science in Fire Protection, and Safety Engineering Technology.

Kentucky Board of Nursing (KBN) (<http://www.kbn.ky.gov/>) for Associate of Science in Nursing, Bachelor of Science in Nursing, Master of Science in Nursing, and Doctor of Nursing Practice.

National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (<http://www.naacls.org/>) for Bachelor of Science in Medical Laboratory Science.

National Association of Schools of Music (NASM) (<http://nasm.arts-accredit.org/>) for Master of Music and Bachelor of Music.

National Association of School Psychologists (NASP) (<http://www.nasponline.org/>) for Specialist in School Psychology Program.

National Environmental Health Science and Protection Accreditation Council (EHAC) (<https://www.nehspac.org/>) for Bachelor of Science in Environmental Health Science and Sustainability and Master of in Public Health.

Network of Schools of Public Policy, Affairs, and Administration (NSPPAA) (<http://www.nasppaa.org/>) (formerly National Association of Schools of Public Affairs and Administration) for Master of Public Administration.

North American Association for Environmental Education (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnaaee.org%2F&data=04%7C01%7CJennifer.Wies%40eku.edu%7C9f6062c638e14c198ec108d9b4fc26d2%7Ce23043271af04dee83fbc1b2fd6db0%7C0%7C0%7C637739817334393485%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Ikh1haWwiLCJ%7C3000&sdata=LdV1glrtG2g6U%2Bh0Xh6%2BYepLQgt%2Fi8XHN4u2BCTv9hk%3D&reserved=0>) for the Undergraduate Certificate in Environmental Education and the Graduate Certificate in Environmental Education.

Professional Golfers Association of America (PGA) (<http://www.pga.com/home/>) for Bachelor of Business Administration in Marketing (PGA Golf Management Concentration).

Public Relations Society of America (Certification) (PRSA) (<http://www.prsa.org/>) for Bachelor of Arts in Public Relations Program.

### Recognitions and Certifications

Accreditation Council for Cooperative Education (ACCE) (<http://www.co-opaccreditation.org/>) for Co-Operative Education Programs.

American Chemical Society (Certification) (ACS) (<http://www.acs.org/content/acs/en.html>) for Bachelor of Science in Chemistry (all options) Program.

Federal Aviation Administration (Certification) (FAA) ([http://www.faa.gov/licenses\\_certificates/](http://www.faa.gov/licenses_certificates/)) for Aviation Part 141 Professional Flight Program.

International Association of Counseling Services (IACS) (<http://www.iacsinc.org/>) for Counseling Center.

National Association for the Education of Young Children (NAEYC) (<http://www.naeyc.org/>) for Burrier Child Development Center.

## Residency

- Student Residency (p. 567)
- Residency Appeals Policy and Procedures (p. 571)

## Student Residency

Since registration and other fees and residence hall room rents are subject to change periodically, no attempt is made in this publication to itemize these costs. This information is available from the Office of Admissions prior to the beginning of each academic year.

Any veteran of the Armed Forces of the United States or National Guard who is eligible for Post-9/11 GI Bill<sup>®</sup> benefits who enrolls as a student in the university as a non-Kentucky resident will be charged no more than the maximum tuition reimbursement provided under the Post-9/11 GI Bill<sup>®</sup> to public universities for eligible Kentucky residents. Veterans must submit a DD-214 or VA Certificate (Letter) of Eligibility for Post 9-11 (Chapter 33) GI Bill<sup>®</sup> benefits through the Office of Military and Veterans Affairs to the Office of Admissions to validate their eligibility for this provision.

**13 KAR 2:045. Determination of residency status for admission and tuition assessment purposes.**

**Relates to:** KRS 13B, 164.020, 164.030, 164A.330(6), 38 U.S.C. 3301-3325

**Statutory Authority:** KRS 164.020(8)

## Necessity, Function, and Conformity

KRS 164.020(8) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state-supported postsecondary education institution and authorizes the Council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedure and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported postsecondary education institution.

### Section 1. Definitions

1. "Academic term" means a division of the school year during which a course of studies is offered, and includes a semester, quarter, or single consolidated summer term as defined by the institution.
2. "Continuous enrollment" means enrollment in a state-supported postsecondary education institution at the same degree level for consecutive terms, excluding summer term, since the beginning of the period for which continuous enrollment is claimed unless a sequence of continuous enrollment is broken due to extenuating circumstances beyond the student's control, such as serious personal illness or injury, or illness or death of a parent.
3. "Degree level" means enrollment in a course or program which could result in the award of a:
  - a. Certificate, diploma, or other program award at an institution;
  - b. Baccalaureate degree or lower, including enrollment in a course by a non-degree-seeking post-baccalaureate student;
4. "Dependent person" means a person who cannot demonstrate financial independence from parents or persons other than a spouse and who does not meet the criteria for independence established in Section 5 of this administrative regulation.
5. "Determination of residency status" means the decision of a postsecondary education institution that results in the classification of a person as a Kentucky resident or as a nonresident for admission and tuition assessment purposes.
6. "Domicile" means a person's true, fixed, and permanent home and is the place where the person intends to remain indefinitely, and to which the person expects to return if absent without intending to establish a new domicile elsewhere.
7. "Full-time employment" means continuous employment for at least forty-eight (48) weeks at an average of at least thirty (30) hours per week.
8. "Independent person" means a person who demonstrates financial independence from parents or persons other than a spouse and who meets the criteria for independence established in Section 5 of this administrative regulation.
9. "Institution" means an entity defined by KRS 164.001(12) if the type of institution is not expressly stated and includes the Kentucky Virtual University, the Council on Postsecondary Education, and the Kentucky Higher Education Assistance Authority.
10. "Kentucky resident" means a person determined by an institution for tuition purposes to be domiciled in, and a resident of, Kentucky as determined by this administrative regulation.
11. "Nonresident" means a person who:
  - a. Is domiciled outside Kentucky;
  - b. Currently maintains legal residence outside Kentucky; or
  - c. Is not a Kentucky resident as determined by this administrative regulation.
12. "Parent" means one (1) of the following:
  - a. A person's father or mother; or
  - b. A court-appointed legal guardian if:
    - i. The guardianship is recognized by an appropriate court within the United States;
    - ii. There was a relinquishment of the rights of the parents; and
    - iii. The guardianship was not established primarily to confer Kentucky residency on the person.
13. "Preponderance of the evidence" means the greater weight of evidence or evidence that is more credible and convincing to the mind.
14. "Residence" means the place of abode of a person and the place where the person is physically present most of the time for a non-educational purpose in accordance with Section 3 of this administrative regulation.
15. "Student financial aid" means all forms of payments to a student if one (1) condition of receiving the payment is the enrollment of the student at an institution, and includes student employment by the institution or a graduate assistantship.
16. "Sustenance" means:
  - a. Living expenses, such as room, board, maintenance, and transportation; and
  - b. Educational expenses, such as tuition, fees, books, and supplies.
17. "Graduate degree or graduate certification other than a first-professional degree in law, medicine, dentistry, or "Pharm. D"; or
18. "Professional degree in law, medicine, dentistry, or "Pharm. D".

## Section 2. Scope

1. State-supported postsecondary education institutions were established and are maintained by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to a qualified individual who is domiciled in Kentucky and who is a resident of Kentucky.
2. In accordance with the duties established in KRS 164.020, the Council on Postsecondary Education may require a student who is neither domiciled in, nor a resident of, Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.
3. Unless otherwise indicated, this administrative regulation shall apply to all student residency determinations, regardless of circumstances, including residency determinations made by:
  - a. The state-supported institutions for prospective and currently-enrolled students;
  - b. The Southern Regional Education Board for contract spaces;
  - c. Reciprocity agreements, if appropriate;
  - d. The Kentucky Virtual University;
  - e. Academic common market programs;
  - f. The Kentucky Educational Excellence Scholarship Program; and
  - g. Other state student financial aid programs, as appropriate.

## Section 3. Determination of Residency Status; General Rules

1. A determination of residency shall include:
  - a. An initial determination of residency status by an institution:
    - i. During the admission process;
    - ii. Upon enrollment in an institution for a specific academic term; or
    - iii. For admission into a specific academic program;
  - b. A reconsideration of a determination of residency status by an institution based upon a changed circumstance; or
  - c. A formal hearing conducted by an institution upon request of a student after other administrative procedures have been completed.
2. An initial determination of residency status shall be based upon:
  - a. The facts in existence when the credentials established by an institution for admission for a specific academic term have been received and during the period of review by the institution;
  - b. Information derived from admissions materials;
  - c. If applicable, other materials required by an institution and consistent with this administrative regulation; and
  - d. Other information available to the institution from any source.
3. An individual seeking a determination of Kentucky residency status shall demonstrate that status by a preponderance of the evidence.
4. A determination of residency status shall be based upon verifiable circumstances or actions.
5. Evidence and information cited as the basis for Kentucky domicile and residency shall accompany the application for a determination of residency status.
6. A student classified as a nonresident shall retain that status until the student is officially reclassified by an institution.

7. A student may apply for a review of a determination of residency status once for each academic term.
8. If an institution has information that a student's residency status may be incorrect, the institution shall review and determine the student's correct residency status.
9. If the Council on Postsecondary Education has information that an institution's determination of residency status for a student may be incorrect, it may require the institution to review the circumstances and report the results of that review.
10. An institution shall impose a penalty or sanction against a student who gives incorrect or misleading information to an institutional official, including payment of nonresident tuition for each academic term for which resident tuition was assessed based on an improper determination of residency status. The penalty or sanction may also include:
  - a. Student discipline by the institution through a policy written and disseminated to students; or
  - b. Criminal prosecution.

## Section 4. Presumptions Regarding Residency Status

1. In making a determination of residency status, it shall be presumed that a person is a nonresident if:
  - a. A person is, or seeks to be, an undergraduate student and admissions records show the student to be a graduate of an out-of-state high school within five (5) years prior to a request for a determination of residency status;
  - b. A person's admissions records indicate the student's residence to be outside of Kentucky when the student applied for admission;
  - c. A person moves to Kentucky primarily for the purpose of enrollment in an institution;
  - d. A person moves to Kentucky and within twelve (12) months enrolls at an institution more than half time;
  - e. A person has a continuous absence of one (1) year from Kentucky; or
  - f. A person attended an out-of-state higher education institution during the past academic year and paid instate tuition at that institution.
2. A presumption arising from subsection (1) of this section shall only be overcome by preponderance of evidence sufficient to demonstrate that a person is domiciled in and is a resident of Kentucky.

## Section 5. Determination of Whether a Student is Dependent or Independent

1. In a determination of residency status, an institution shall first determine whether a student is dependent or independent. This provision shall be predicated on the assumption that a dependent person lacks the financial ability to live independently of the person upon whom the student is dependent, and therefore, lacks the ability to form the requisite intent to establish domicile.
 

A determination that a student is independent shall be one (1) step in the overall determination of whether a student is or is not a resident of Kentucky.
2. In determining the dependent or independent status of a person, the following information shall be considered, as well as other relevant information available when the determination is made:
  - a.
    - i. Whether the person has been claimed as a dependent on the federal or state tax returns of a parent or other person for the

- year preceding the date of application for a determination of residency status; or
  - ii. Whether the person is no longer claimed by a parent or other person as a dependent or as an exemption for federal and state tax purposes; and
  - b. Whether the person has financial earnings and resources independent of a person other than an independent spouse necessary to provide for the person's own sustenance.
3. An individual who enrolls at an institution immediately following graduation from high school and remains enrolled shall be presumed to be a dependent person unless the contrary is evident from the information submitted.
  4. Domicile may be inferred from the student's permanent address, parent's mailing address, or location of high school of graduation.
  5. Marriage to an independent person domiciled in and who is a resident of Kentucky shall be a factor considered by an institution in determining whether a student is dependent or independent.
  6. Financial assistance from, or a loan made by, a parent or family member other than an independent spouse, if used for sustenance of the student:
    - a. Shall not be considered in establishing a student as independent; and
    - b. Shall be a factor in establishing that a student is dependent.

### **Section 6. Effect of a Determination of Dependent Status on a Determination of Residency Status**

1. The effect of a determination that a person is dependent shall be:
  - a. The domicile and residency of a dependent person shall be the same as either parent. The domicile and residency of the parent shall be determined in the same manner as the domicile and residency of an independent person; and
  - b. The domicile and residency of a dependent person whose parents are divorced, separated, or otherwise living apart shall be Kentucky if either parent is domiciled in and is a resident of Kentucky regardless of which parent has legal custody or is entitled to claim that person as a dependent pursuant to federal or Kentucky income tax provisions.
2. If the parent or parents of a dependent person are Kentucky residents and are domiciled in Kentucky, but subsequently move from the state:
  - a. The dependent person shall be considered a resident of Kentucky while in continuous enrollment at the degree level in which currently enrolled; and
  - b. The dependent person's residency status shall be reassumed if continuous enrollment is broken or the current degree level is completed.

### **Section 7. Member or Former Member of Armed Forces of the United States, Spouse and Dependents; Effect on a Determination of Residency Status**

1. A member, spouse, or dependent of a member whose domicile and residency was Kentucky when inducted into the Armed Forces of the United States, and who maintains Kentucky as home of record and permanent address, shall be entitled to Kentucky residency status:
  - a. During the member's time of active service; or
  - b. If the member returns to this state within six (6) months of the date of the member's discharge from active duty.
2.
  - a. A member of the armed services on active duty for more than thirty (30) days and who has a permanent duty station in

Kentucky shall be classified as a Kentucky resident and shall be entitled to in-state tuition as shall the spouse or a dependent child of the member.

- b. A member, spouse, or dependent of a member shall not lose Kentucky residency status if the member is transferred on military orders while the member, spouse, or dependent requesting the status is in continuous enrollment at the degree level in which currently enrolled.
3. Membership in the National Guard or civilian employment at a military base alone shall not qualify a person for Kentucky residency status under the provisions of subsections (1) and (2) of this section. If a member of the Kentucky National Guard is on active duty status for a period of not less than thirty (30) days, the member shall be considered a Kentucky resident, as shall the spouse or a dependent child of the member.
4. A person eligible for benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, 38 U.S.C. 3301-3325, or any other educational benefits provided under Title 38 of the United States Code shall be entitled to Kentucky resident status for purposes of tuition charged at state-supported institutions.
5. A person's residency status established pursuant to this section shall be reassessed if the qualifying condition is terminated.

### **Section 8. Status of Nonresident Aliens; Visas and Immigration**

1.
  - a. A person holding a permanent residency visa or classified as a political refugee shall establish domicile and residency in the same manner as another person.
  - b. Time spent in Kentucky and progress made in fulfilling the conditions of domicile and residency prior to obtaining permanent residency status shall be considered in establishing Kentucky domicile and residency.
2. A person holding a nonimmigrant visa with designation A, E, G, H-1, H-4 if accompanying a person with an H-1 visa, I, K, L, N, R, shall establish domicile and residency the same as another person.
3.
  - a. An independent person holding a nonimmigrant visa with designation B, C, D, F, H-2, H-3, H-4 if accompanying a person with an H-2 or H-3 visa, J, M, O, P, Q, S, TD, or TN shall not be classified as a Kentucky resident because that person does not have the capacity to remain in Kentucky indefinitely and therefore cannot form the requisite intent necessary to establish domicile as defined in Section 1(6) of this administrative regulation.
  - b. A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.
  - c. A dependent person holding a visa described in subsection (2) of this section or paragraph (a) of this subsection, if a parent is a citizen of the United States and is a resident of and domiciled in Kentucky, shall be a resident of Kentucky for the purposes of this administrative regulation.
4. A person shall be a Kentucky resident for the purpose of this administrative regulation if the person graduated from a Kentucky high school and:
  - a. Is an undocumented alien;
  - b. Holds a visa listed in subsections (2) or (3)(a) of this section; or

- c. Is a dependent of a person who holds a visa listed in subsections (2) or (3)(a) of this section.
- 5.
- a. Except as provided in paragraph (b) of this subsection, a person who has petitioned the federal government to reclassify visa status shall continue to be ineligible until the petition has been granted by the federal government.
  - b. A person who has petitioned the federal government to reclassify his or her visa status based on marriage to a Kentucky resident and who can demonstrate that the petition has been filed and acknowledged by the federal government, may establish Kentucky domicile and residency at that time.

## Section 9. Beneficiaries of a Kentucky Educational Savings Plan Trust

A beneficiary of a Kentucky Educational Savings Plan Trust shall be granted residency status if the beneficiary meets the requirements of KRS 164A.330(6).

## Section 10. Criteria Used in a Determination of Residency Status

1.
  - a. A determination of Kentucky domicile and residency shall be based upon verifiable circumstances or actions.
  - b. A single fact shall not be paramount, and each situation shall be evaluated to identify those facts essential to the determination of domicile and residency.
  - c. A person shall not be determined to be a Kentucky resident by the performance of an act that is incidental to fulfilling an educational purpose or by an act performed as a matter of convenience.
  - d. Mere physical presence in Kentucky, including living with a relative or friend, shall not be sufficient evidence of domicile and residency.
  - e. A student or prospective student shall respond to all requests for information regarding domicile or residency requested by an institution.
2. The following facts, although not conclusive, shall have probative value in their entirety and shall be individually weighted, appropriate to the facts and circumstances in each determination of residency.
  - a. Acceptance of an offer of full-time employment or transfer to an employer in Kentucky or contiguous area while maintaining residence and domicile in Kentucky;
  - b. Continuous physical presence in Kentucky while in a nonstudent status for the twelve (12) months immediately preceding the start of the academic term for which a classification of Kentucky residency is sought;
  - c.
    - i. Filing a Kentucky resident income tax return for the calendar year preceding the date of application for a change in residency status; or
    - ii. Payment of Kentucky withholding taxes while employed during the calendar year for which a change in classification is sought;
  - d. Full-time employment of at least one (1) year while living in Kentucky;
  - e. Attendance as a full-time, nonresident student at an out-of-state institution based on a determination by that school that the person is a resident of Kentucky;

- f. Abandonment of a former domicile or residence and establishing domicile and residency in Kentucky with application to or attendance at an institution following and incidental to the change in domicile and residency;
  - g. Obtaining licensing or certification for a professional and occupational purpose in Kentucky;
  - h. Payment of real property taxes in Kentucky;
  - i. Ownership of real property in Kentucky, if the property was used by the student as a residence preceding the date of application for a determination of residency status;
  - j. Marriage of an independent student to a person who was domiciled in and a resident of Kentucky prior to the marriage; and
  - k. The extent to which a student is dependent on student financial aid in order to provide basic sustenance.
3. Except as provided in subsection (4) of this section, the following facts, because of the ease and convenience in completing them, shall have limited probative value in a determination that a person is domiciled in and is a resident of Kentucky.
    - a. Kentucky automobile registration;
    - b. Kentucky driver's license;
    - c. Registration as a Kentucky voter;
    - d. Long-term lease of at least twelve (12) consecutive months of non-collegiate housing; and
    - e. Continued presence in Kentucky during academic breaks.
  4. The absence of a fact contained in subsection (3) of this section shall have significant probative value in determining that a student is not domiciled in or is not a resident of Kentucky.

## Section 11. Effect of a Change in Circumstances on Residency Status

1. If a person becomes independent or if the residency status of a parent or parents of a dependent person changes, an institution shall reassess residency either upon a request by the student or a review initiated by the institution.
2. Upon transfer to a Kentucky institution, a student's residency status shall be assessed by the receiving institution.
3. A reconsideration of a determination of residency status for a dependent person shall be subject to the provisions for continuous enrollment, if applicable.

## Section 12. Student Responsibilities

1. A student shall report under the proper residency classification, which includes the following actions:
  - a. Raising a question concerning residency classification;
  - b. Making application for change of residency classification with the designated office or person at the institution; and
  - c. Notifying the designated office or person at the institution immediately upon a change in residency.
2. If a student fails to notify an institutional official of a change in residency, an institutional official may investigate and evaluate the student's residency status.
3.
  - a. If a student fails to provide, by the date specified by the institution, information required by an institution in a determination of residency status, the student shall be notified by the institution that the review has been canceled and that a determination has been made.

- b. Notification shall be made by registered mail, return receipt requested.
  - c. Notification shall be made within ten (10) calendar days after the deadline for receipt of materials has passed.
- 4.
- a. The formal hearing conducted by an institution and the final recommended order shall be a final administrative action with no appeal to the Council on Postsecondary Education.
  - b. A formal administrative hearing conducted by the Council on Postsecondary Education for residency determinations related to eligibility for the Academic Common Market and Regional Contract Programs shall be conducted pursuant to the provisions of KRS Chapter 13B and 13 KAR 2:070. The recommended order issued by the President of the Council shall be a final administrative action.
5. A student shall not be entitled to appeal a determination of residency status if the determination made by an institution is because a student has failed to meet published deadlines for the submission of information as set forth in subsection (3) of this section. A student may request a review of a determination of residency status in a subsequent academic term.

### Section 13. Institutional Responsibilities

Each institution shall:

1. Provide for an administrative appeals process that includes a residency appeals officer to consider student appeals of an initial residency determination and which shall include a provision of fourteen (14) days for the student to appeal the residency appeals officer's determination;
2. Establish a residency review committee to consider appeals of residency determinations by the residency appeals officer. The residency review committee shall make a determination of student residency status and notify the student in writing within forty-five (45) days after receipt of the student appeal;
3. (Establish a formal hearing process as described in Section 14 of this administrative regulation; and
4. Establish written policies and procedures for administering the responsibilities established in subsections (1), (2), and (3) of this section and that are:
  - a. Approved by the institution's governing board;
  - b. Made available to all students; and
  - c. Filed with the council.

### Section 14. Formal Institutional Hearing

1. A student who appeals a determination of residency by a residency review committee shall be granted a formal hearing by an institution if the request is made by a student in writing within fourteen (14) calendar days after notification of a determination by a residency review committee.
2. If a request for a formal hearing is received, an institution shall appoint a hearing officer to conduct a formal hearing. The hearing officer shall:
  - a. Be a person not involved in determinations of residency at an institution except for formal hearings; and
  - b. Not be an employee in the same organizational unit as the residency appeals officer.
3. An institution shall have written procedures for the conduct of a formal hearing that have been adopted by the board of trustees or regents, as appropriate, and that provide for:

- a. A hearing officer to make a recommendation on a residency appeal;
  - b. Guarantees of due process to a student that include:
    - i. The right of a student to be represented by legal counsel; and
    - ii. The right of a student to present information and to present testimony and information in support of a claim of Kentucky residency; and
  - c. A recommendation to be issued by the hearing officer.
4. An institution's formal hearing procedures shall be filed with the Council on Postsecondary Education and shall be available to a student requesting a formal hearing.

### Section 15. Cost of Formal Hearings

1. An institution shall pay the cost for all residency determinations including the cost of a formal hearing.
2. A student shall pay for the cost of all legal representation in support of the student's claim of residency.

Adopted effective April 5, 1991; Amended effective May 16, 1996; Amended effective June 16, 1997; Amended effective July 13, 1998; Amended effective June 7, 1999; Amended effective November 12, 2002; Amended effective April 2, 2010; Amended effective June 9, 2015.

## Residency Appeals Policy and Procedures

### 1. Basis for Residency Classification

The Commonwealth of Kentucky has established a process and corresponding criteria for the determination of residency classification for students seeking admission to, or enrolled in, public institutions of higher education. The Council on Postsecondary Education (hereinafter referred to as "CPE") has established Kentucky Administrative Regulation 13 KAR 2:045 (hereinafter referred to as "the Regulation") to be followed by all public institutions of higher education in the Commonwealth concerning residency classification. This Regulation can be found in the current Undergraduate Catalog and the current Graduate Catalog and copies are available upon request from the Office of Admissions, located in the Whitlock Building, Room 112 or by calling (859) 622-21-6 or 1-800-465-9191.

### 2. Institutional Administration of the Residency Policy

The Council on Postsecondary Education authorizes each institution to establish a procedure for the determination of residency classification based upon the Regulation.

#### 2.1 Office of Admissions

The Office of Admissions  
Whitlock Building, Room 112, CPO 54  
521 Lancaster Avenue  
Richmond, KY 40475-3154

The Office of Admissions at Eastern Kentucky University serves as the coordinating office for institutional implementation of the Regulation. Instructions for filing applications for reclassification and copies of the Regulation are available in this office. Also, Admissions staff members are available to answer questions regarding policy and procedures.

## 2.2 Initial Classification

The initial determination of residency status is made by the University based upon the credentials submitted by an applicant for admission to the University in accordance with the Regulations.

## 2.3 Appeal of Residency Status

Once an initial classification of residency is made by the Office of Admissions, it is the student's responsibility to initiate an appeal of such classification. Request for reclassification must be filed with the Dean of Students Office **no later than thirty (30) calendar days** after the first full day of classes of the fall or spring academic term for which reclassification is sought or not later than ten (10) calendar days after the first day of class for the summer term. Requests for reclassification are to be made in affidavit form on the form available from the Office of Admissions or the Dean of Students Office. A student may apply only once during an academic term. A student classified as a non-resident will retain that status until a change is brought about by successful appeal. If an appeal results in a change of classification, the change will not be effective earlier than the semester during which the appeal is filed. If a student is initially classified non-resident but does not enroll the semester for which the student originally applied, the residency classification will be reassessed for subsequent semesters.

## 2.4 Affidavit (Application for Reclassification)

Affidavits will not be accepted unless the form is fully completed, properly signed and notarized. In no case will a decision be granted without an affidavit and all required supporting documentation.

## 2.5 Documentation

Because of the variety of factors related to establishing residency for tuition purposes, the number of documents required to complete an appeal may vary from case to case. In all cases, the University may require certification of authenticity of documents.

It is the appealing student's responsibility to provide sufficient documentation to clarify circumstances related to the appeal. In all cases, circumstances related to establishing domicile must be verifiable.

## 2.6 Review of the Residency File by the Residency Appeals Officer

A Residency Appeals Officer designated by the University shall review the affidavit and documentation and notify the student, in writing, within fourteen (14) days of making a determination. Students who do not agree with the Residency Appeals Officer's determination may appeal his/her residency status to the University's Residency Review Committee within fourteen (14) days of the Residency Appeals Officer's determination.

## 3. University Residency Review Committee

Pursuant to the Regulation, Eastern Kentucky University has a Residency Review Committee (hereinafter referred to as the "Committee") to review and evaluate student affidavits for reclassification and to consider changes in the residency classification.

### 3.1 Timely Appeal

The Student must notify the Residency Appeals Officer in writing, if he or she wishes his/her case to be reviewed by the Committee, within fourteen (14) calendar days after notification of the Residency Appeals Officer's

determination. The Residency Appeals Officer shall immediately forward the request and the student's residency file to the Chair of the Committee.

### 3.2 Committee Membership

The Residency Review Committee shall be comprised of three members: the Executive Director for Enrollment Management; a member of the Faculty-at-Large, who shall be appointed annually by the Faculty Senate; and a member of the student body, who shall be appointed by the Office of the Vice President for Student Affairs from a list of students recommended by the Student Association.

### 3.3 Determination of the Committee

The Committee shall issue a written decision citing the section of the Regulation on which the decision is based. The Committee may vote to defer a case for additional documentation, or the Committee may make a decision contingent upon conditions prescribed by the Committee. The Chair of the Committee will then determine when and whether contingencies are met.

### 3.4 Notification of Decision

The Committee shall make a determination of student residency status and notify the student, in writing, within forty-five (45) days after receipt of the student appeal. Decisions denying appeals are communicated to the student by certified mail, return receipt requested. In all cases where the Committee reaches a determination granting in-state residency status, copies of the letter of notification will be sent to the Office of Admissions, Student Accounting Services, the Registrar's Office, and Student Financial Assistance.

## 4. Request for Formal Hearing

Pursuant to the Regulation, the University shall provide a formal hearing in the event a student wishes to appeal the determination of the Residency Review Committee.

### 4.1 Timely Request

A student who wishes to appeal the determination of the Committee shall be granted a formal hearing by the University if the student notifies the Executive Director for Enrollment Management, Whitlock Building, Room 436, CPO 69, Richmond, KY 40475-3163 in writing, within fourteen (14) calendar days after notification of the Residency Review Committee's determination. The Executive Director for Enrollment Management shall immediately forward the request and the student's residency file to the Office of the President.

### 4.2 The Hearing Officer

Upon receipt of a request for a formal hearing, the University President shall appoint a Hearing Officer to conduct the hearing. The Hearing Officer shall not be a person involved in determinations of residency at a public institution of higher education in Kentucky (including the Kentucky Commonwealth Virtual University) and shall not be an employee of the same organizational unit as the Residency Appeals Officer.

### 4.3 Formal Hearing Procedures

The hearing shall be conducted in accordance with the following procedures:

#### 4.3.1. Notice of Hearing

4.3.1.a. The University shall conduct the hearing as soon as practicable and shall give notice of the hearing to the parties not less than twenty (20) days in advance of the date set for the hearing. A reasonable effort

shall be made to schedule the hearing on a date that is convenient to all parties involved.

**4.3.1.b.** The hearing notice shall be served on all parties by certified mail, return receipt requested, to the last known addresses of the parties, or by personal service.

**4.3.1.c.** The notice shall be in plain language and shall include:

- the date, time and place of the hearing;
- the name, official title, and mailing addresses of the Hearing Officer;
- the names, official titles, mailing addresses, and, if available, telephone numbers of all parties involved in the hearing, including the counsel or representative of the University; and
- a statement advising the student of his/her right to legal counsel.

### **4.3.2. Hearing Procedure**

**4.3.2.a.** The Hearing Officer shall conduct the hearing and all related proceedings in a manner which will promote the orderly and prompt conduct of the hearing.

**4.3.2.b.** To the extent necessary for the full disclosure of all relevant facts and issues, the Hearing Officer shall give all parties the opportunity to respond, present evidence and argument, conduct cross-examination, and submit rebuttal evidence.

**4.3.2.c.** Any party to the hearing may participate in person or be represented by counsel. A student shall pay for the cost of all legal representation in support of the student's claim or residency. Legal counsel for the student must file a notice of appearance with the Hearing Officer prior to the date of the hearing.

**4.3.2.d.** The Hearing Officer may conduct all or part of the hearing by telephone, television, or other electronic means, if each party to the hearing has an opportunity to hear, and if technically feasible, to see the entire proceeding as it occurs, and if each party agrees.

**4.3.2.e.** The hearing shall be open to the public unless specifically closed pursuant to a provision of law. If the hearing is conducted by telephone, television, or other electronic means, and is not closed, public access shall be satisfied by giving the public an opportunity, at reasonable times, to hear or inspect the University's records.

## **4.4 Findings of Fact; Evidence; Recording of Hearing; Burden of Proof**

**4.4.1.** Findings of fact shall be based exclusively on the evidence on the record.

**4.4.2.** All testimony shall be made under oath or affirmation.

**4.4.3.** Objections to evidence presented may be made by any party and shall be noted in the record.

**4.4.4.** The University shall be responsible for having all testimony, motions and objections in a hearing accurately and completely recorded. Any person, upon request, may receive a copy of the recording or a copy of the transcript, if the hearing has been transcribed, at the discretion of the University, unless the hearing is closed by law. The University may prepare a transcript of a hearing or a portion of a hearing upon request but the party making the request shall be responsible for the transcription costs. The form of all requests and fees charged shall be consistent with KRS 61.870 to 61.884.

**4.4.5.** Unless otherwise provided by state or federal law, the student appealing the residency decision has the burden of proving the student's right to having his/her residency status changed. The student has the ultimate burden of proof of persuasion as to this issue to be shown by a preponderance of evidence in the record. Failure to meet the burden of proof is grounds for a recommended order from the Hearing Officer.

## **4.5 Prohibited Communications**

**4.5.1.** The Hearing Officer shall not communicate off the record with any party to the hearing or any other person who has a direct or indirect interest in the outcome of the hearing, concerning any substantive issue, while the hearing is pending.

## **4.6. Recommended Order**

**4.6.1.** The Hearing Officer shall complete and submit to the University President, no later than sixty (60) days following receipt of the student's residency file, a written recommended order which shall include the Hearing Officer's findings of fact, conclusion of law, and recommended disposition of the hearing.

**4.6.2.** A copy of the Hearing Officer's recommended order shall also be sent to each party in the hearing. Each party shall have fifteen (15) days from the date the recommended order is mailed within which to file exceptions to the recommendations with the University President. The recommended order may be sent by regular mail to the last known address of the party.

## **4.7. Final Order**

**4.7.1.** In making the final order, the University President shall consider the record including the recommended order and any exceptions filed by, or on behalf of, the student.

**4.7.2.** The University President may accept the recommended order of the Hearing Officer and adopt it as the University's final order, or he or she may reject or modify, in whole or in part, the recommended order, or he or she may send the matter, in whole or in part, back to the Hearing Officer for further proceedings as appropriate.

**4.7.3.** The final order shall be in writing. If the final order differs from the recommended order, it shall include separate statements of findings of fact and conclusions of law.

**4.7.4.** The University President shall render a final order within thirty (30) days after receipt of the recommended order unless the matter is sent back to the Hearing Officer for further proceedings.

**4.7.5.** A copy of the final order shall be transmitted to each party or to his/her attorney of record by certified mail, return receipt requested, sent to the last known address of the parties, or by personal service. A copy of the final order shall also be sent to the Office of Admissions, Student Accounting Services, the Registrar's Office, and Student Financial Assistance.

## **5. Records**

All official files and materials relating to a student's appeal of an initial residency determination shall be returned to the Office of Admissions to be placed with the application for admissions at whatever point in the process the appeals procedure is terminated.

## Student Support and Services

- Division of Finance & Administration & Treasurer (p. 574)
- Libraries (p. 576)
- Other Student Services (p. 576)

## Division of Finance & Administration & Treasurer

The Division of Finance and Administration coordinates the following areas of University operations:

1. Accounting and Financial Services,
2. Budgeting & Financial Planning,
3. Business Services,
4. ECU Center for the Arts,
5. Facilities Management,
6. Human Resources,
7. Information Technology Services,
8. Parking & Transportation,
9. University Police & Public Safety,
10. Environmental Health & Safety,
11. Purchases & Stores,
12. Sustainability,
13. Student Accounting Services, and
14. University Card Services.

Additionally, the following contractual departments report to the University through the Division of Finance and Administration:

1. ECU Dining Services,
2. ECU Bookstore, and
3. University pouring rights.

Students may view the mission statement of each of the above areas by visiting the Division of Finance and Administration web page at <http://www.financialaffairs.eku.edu>.

## Financial Obligations of the Student

Any student or former student who is indebted to the University and who fails to make satisfactory settlement within a time limit prescribed is liable for administrative action. Students who are indebted to the University may not register at the University nor will their transcript or diploma be released until the debt is paid. Any student indebted to the University who cannot meet his or her financial obligations within the time limit prescribed is responsible for calling on the division of Student Accounting Services and explaining the reasons for failure to pay. Students who fail to pay their account balance in a timely manner may also be liable for additional collection costs incurred by the University in collecting the amount owed.

## Refund Policy

No refund can be made on certain class fees and optional fees as established by the Eastern Kentucky University Board of Regents. Students wishing to withdraw from courses must do so online via EKUDirect (on the ECU home page at [www.eku.edu](http://www.eku.edu) (<http://www.eku.edu>)). When a student officially withdraws from the University

or from any course or courses for which hourly rates apply, tuition and fees will be adjusted in the following manner:

Time Period <sup>1</sup>	Refund
During add/drop period for any class (for full semester classes = 1st week)	100%
From end of 1st week through end of 2nd week of class	75%
From end of 2nd week through end of 3rd week of class	50%
From end of 3rd week through end of 4th week of class	25%
After the 4th week of class	0%

<sup>1</sup>

Partial semester courses vary in length and the percentage of refunds and the effective dates will be modified accordingly.

This policy applies to refundable fees only; non-refundable fees are not included. In no case shall a refund of rent be made to a person who remains a student but moves from University housing at his or her convenience.

## Financial Appeals

An appeals process exists for students who feel that individual circumstances warrant exceptions from published policy. Financial appeals may be submitted if a student had an unforeseeable and unavoidable situation during the semester the charges were incurred that prevented them from attending classes and completing the semester. All appeal letters should be submitted by the student in writing clearly stating the reason for the appeal.

Documentation should be attached to all appeal letters to validate the situation. Circumstances that do not qualify for financial appeal include pre-existing conditions, routine pregnancy, employment opportunities and financial hardship, including denial of financial aid. In most cases, any refund that is the result of an approved appeal will be returned to the source of the payment, the student, the financial aid lender, or a third party entity. Financial appeals should be submitted to the

Financial Appeals Committee  
Whitlock Building CPO 60  
521 Lancaster Avenue  
Richmond, KY 40475.

Any student whose appeal is denied by the initial Financial Appeals Committee may ask to have their appeal reviewed by a second, escalated Financial Appeals Committee.

## Barnes & Noble at ECU Bookstore

Powell Building  
Phone: (859) 622-2696  
Fax: (866) 504-8325  
[www.shopeku.com](http://www.shopeku.com) (<http://www.shopeku.com>)

Barnes & Noble is the University's partner in delivery of ECU BookSmart which provides free textbooks to all ECU undergraduate students. The Barnes & Noble at ECU Bookstore is located in the heart of campus on the Plaza Level of Powell Building (The Student Center). The Bookstore is the place for one-stop shopping for all ECU licensed merchandise, graduate

textbooks, and much more. It offers a wide variety of products, services, and events including:

- Class supplies
- Trade books, gift items, greeting cards, diploma frames, nursing shop.
- Convenience items
- Adidas, Under Armour, Nike, Champion, Cutter & Buck, and much more.
- Computers and computer supplies
- Backpacks
- Barnes & Noble gift cards
- Book signings
- Graduation regalia
- Faculty receptions

The Barnes & Noble at EKU Bookstore works diligently with departments, faculty and staff to ensure that the course materials required for each class are readily available to students either through the BookSmart program for purchase by graduate students. Textbook adoptions are required from departments and faculty by these dates:

- March 1 For the upcoming **SUMMER** sessions
- April 1 For the upcoming **FALL** semester
- October 1 For the upcoming **SPRING** semester

Regular EKU Bookstore hours are:

Day	Hours
Monday-Thursday	7:45 a.m. - 6:00 p.m.
Friday	7:45 a.m. - 5:00 p.m.
Saturday	11:00 a.m. - 3:00 p.m.

## Card Services

Powell 08-E (Plaza Level)  
Phone: (859) 622-2179  
Fax: (859) 622-8089  
<https://cardservices.eku.edu/>

Card Services provides students with a variety of services related to their EKU student identification card, the Colonel Card. This identification card is used for meal plans, Colonel Cash, campus vending machines, and the EKU Bookstore. In addition, EKU has partnered with US Bank to add optional banking solutions.

Card Services is responsible for issuing a new or a replacement identification card and will assist with troubleshooting potential card issues experienced by students, faculty, and staff. Students, faculty, and staff may purchase meal plans and add funds to their card accounts in the Card Services Office.

The Colonel Card will allow students access to the following:

- Athletic events
- University Library facilities

- Campus Recreation
- University sponsored events
- Student Health Services

The Colonel Card has three different associated accounts:

- Colonel Cash – This is a prepaid account that can be used at all EKU Dining Services locations, the EKU Bookstore, campus vending machines, and a select number of participating off-campus merchants. This account will carry balances over from semester-to-semester.
- Meal Plans – EKU Dining Services has several different meal plans to accommodate any student's needs. Meal plans can be used at any EKU Dining Services location. Students under the residential requirement must select a meal plan meeting the residential meal plan requirement

All other students enrolled in nine (9) or more credit hours are required to participate, at a minimum, in the \$300 Dining Dollar program (refundable). Meal plans may be upgraded any time during the semester and downgraded only within the first two (2) weeks of the semester.

- Optional Flex - This is a prepaid account that can be used at any EKU Dining Services location. Please check with EKU Dining Services regarding terms and conditions associated with this account.

Students may purchase meal plans by logging into MyEKU or add funds to their accounts by logging into *EKU GET Funds*. Acceptable methods of payment for meal plans, Optional Flex, or Colonel Cash accounts are Visa and MasterCard. Meal plans, when selected on MyEKU, will be assessed to the student account.

Card Services follows the University holiday schedule and is open daily during the University's normal business hours:

Monday through Friday 8:00 a.m. – 4:30 p.m.

The Colonel Card is property of Eastern Kentucky University and is issued for convenience. It must be presented (or surrendered) upon request by authorized officials of the University. Any expenditure associated with the use of this card is the responsibility of the holder until it is reported lost/stolen. A fee will be charged for damage made to the identification card or if the card is lost or stolen. The loss of a card must be reported immediately to Card Services, Powell 08-E, (859) 622-2179.

## EKU Dining Services

Case Dining Hall, 101  
Phone: (859) 622-3691  
Fax: (859) 622-6226  
[www.ekudining.com](http://www.ekudining.com) (<http://www.ekudining.com>)

EKU Dining Services offers a variety of dining alternatives including fresh food options, an assortment of national-brand restaurants, catering, and athletic concessions. It is the goal of EKU Dining Services to provide high quality and satisfying dining experiences for the entire campus community.

Case Kitchen and Stratton Café offer freshly cooked dining options in a comforting atmosphere. Lower Case Food Court offers Chick-fil-A, Moe's Southwest Grill, Panda Express, P.O.D. (Provisions on Demand) Express, and Subway.

In other areas of campus, EKU Dining Services boasts a variety of dining options including Java City in the Crabbe Library; Einstein Bros. Bagels in the Weaver Building offering gourmet coffees, bakery items, as well as grab & go salads and sandwiches; as well as Starbucks and The Corner, offering Zen Sushi and the Colonel's Grill, located in the Powell Student Center.

EKU Dining Services provides full-service catering and a dedicated catering staff for both on- and off-campus events. A special Student Catering Guide is available to accommodate the dynamic requests and requirements of students.

## Libraries

Julie George, Dean of Libraries

Library 202A

(859) 622-1778

library.eku.edu (<http://library.eku.edu>)

Eastern Kentucky University Libraries includes the John Grant Crabbe Main Library, centrally located on University Drive, and one branch location: the Rogow Business Library and Academic Commons in the Business and Technology Complex. EKU Libraries provides a wide range of support including research help, study spaces, collections, and technology designed to meet the evolving academic needs of EKU students. In support of online and distance learners, EKU Libraries provides a full range of help and collections services equivalent to those offered at the physical locations.

The Main Library offers a variety of study spaces, ranging from a large collaborative area on the first floor to the Silent Study Zone on the very top floor. Noise levels are also monitored on the fourth floor to ensure plenty of silent space for individual study. In addition to spaces designed for quiet and group study, an outdoor area is available on the Noel Reading Porch, adjacent to the Library Plaza. Refreshments are available in the Java City Library Café or the vending machines on the first floor. To learn more about EKU Libraries' spaces or to make a reservation, visit <https://libguides.eku.edu/reserve-room> (<https://libguides.eku.edu/reserve-room/>).

The Main Library also includes the Learning Resources Center in support of the College of Education; the Law Library; the Noel Studio for Academic Creativity; The Faculty Center for Teaching and Learning, Special Collections and Archives, The Student Success Center, The Bratzke Center and Education Abroad. EKU Libraries provides access to print and online books, videos, and other resources that best serve students, faculty, and staff. Visit [library.eku.edu](http://library.eku.edu) (<http://library.eku.edu>) to search and browse our collections. If you can't find the item you need, request it and our Library Express staff will get it to you.

Have a question about a library research assignment? One of our many qualified and friendly librarians is available to help you one-on-one in the library, via chat (<https://libanswers.eku.edu/>), or by scheduling a research appointment in advance (<http://libanswers.eku.edu/faq/176776/>). Prefer DIY help? Check out our Frequently Asked Questions (FAQ) (<https://libanswers.eku.edu/faq/176776/>). Tight on time? A library staff member can pull an item from their shelves and put it on hold for you to pick up at our Main Desk by using the "Request It" link (<https://libanswers.eku.edu/faq/218643/>). Taking classes online or at a distance? We have a vast array of online resources available 24/7 (<https://libguides.eku.edu/library/>), including books, articles, and videos. Also, if you need a print resource, we can mail items to off-campus students. For more details,

see our FAQ on checking out books (<https://libanswers.eku.edu/faq/334133/>).

## Other Student Services

### The International Alumni Association

Alumni Center at Blanton House

Phone: (859) 622-1260

Fax: (859) 622-6620

[www.alumni.eku.edu](http://www.alumni.eku.edu) (<http://www.alumni.eku.edu>)

The Eastern Kentucky University International Alumni Association serves as a link between the University and its alumni by maintaining records, fostering communication, and sponsoring programs and activities designed to enhance this relationship.

All Eastern Kentucky University degree recipients and former students with 25 or more credit hours are considered alumni of EKU. The International Alumni Association is served by a board of 30 alumni volunteers, representing the diversity of our alumni constituency, who meet three times annually. Their work includes selection of the Alumni Awards, Alumni Scholarship recipients and general committee work.

The Alumni Association coordinates multiple gatherings across the nation to encourage alumni and friends of EKU to come together. The greatest of these is Homecoming and Reunion Weekend held annually in the fall. This celebration brings alumni back to campus to reconnect with their classmates and learn more about University improvements and initiatives.

The International Alumni Association encourages fellow alumni to advocate in a positive way for EKU both online and among friends, attend EKU sponsored events, give back to the university financially, and volunteer your time by serving on an advisory board, referring a student, or assisting with an event. We encourage alumni from the past to complete these four fundamental actions to impact the future.

### Colonel's Cupboard

212 Commonwealth Hall

Phone: (859) 622-3855

Email: [food.pantry@eku.edu](mailto:food.pantry@eku.edu)

[www.communityservice.eku.edu/cupboard](http://www.communityservice.eku.edu/cupboard) (<http://www.communityservice.eku.edu/cupboard/>)

### Who We Are

The Colonel's Cupboard is an initiative of the Office of Student Life & First-Year Experience, opened in 2014. The Cupboard was started to fight the growing problem of food insecurity on campuses across the nation. Today, we strive to help students succeed by providing them with their basic needs of food, clothing, and toiletry items. We are entirely run off of donations from EKU students, faculty, and staff, as well as community members. All enrolled students at the university are eligible to use the Cupboard.

### What We Do

- Provide food, clothing, and toiletry items to any currently enrolled student who has a need.
- Connect students with other resources, on and off campus, to help with other needs.
- Provide educational materials about food insecurity, healthy eating, etc.

- Host volunteers, both groups and individuals, who want to give back on campus.
- Donate overstocked goods to other local food pantries in need.

## How it Works

- Complete the form at [communityservice.eku.edu/cupboard](http://communityservice.eku.edu/cupboard) (<http://www.communityservice.eku.edu/cupboard/>) or email [food.pantry@eku.edu](mailto:food.pantry@eku.edu) to make an appointment.
- Stop by the Colonel's Cupboard in Commonwealth Hall during open hours to "Shop" for your needs, or pick up a prepackaged food box at one of our partner locations

## EKU Police

EKU Police Department and 911 Center  
701 Vickers Drive  
Phone: (859) 622-1111  
Fax: (859) 622-2243  
[www.police.eku.edu](http://www.police.eku.edu) (<http://www.police.eku.edu>)

The EKU Police Department is a fully accredited law enforcement agency available 24-hours a day, 7 days a week. For emergencies from a campus phone, dial 911, or (859) 622-1919 from any phone. For non-emergencies please call (859) 622-1111. We recommend you program these numbers into your phone as favorites. You should call EKU Police to report all crimes and for any matters requiring a police, fire, medical, or hazardous materials response.

The mission of the Eastern Kentucky University Police Department is to enhance the quality of life by providing a safe and secure environment through professional service to the community. The success of our mission depends on this partnership utilizing a community policing philosophy. The Department places a high priority on honesty and integrity and values the need for effective and open communication with the community we serve. We value our employees and are committed to their professional development.

EKU Police provide 24-hour patrols of the EKU campus, including buildings, parking lots, residence halls, and grounds. EKU Police officers have county-wide law enforcement authority, although primary jurisdiction encompasses all University property and all roads and streets adjacent to the campus. The EKU Police also have the authority to investigate crimes anywhere in the state that were committed on University property.

The EKU Police Department includes 24 sworn police officers and seven dispatchers. EKU Police maintain high visibility on campus with motor vehicles, bicycles, and foot patrol. The EKU Police Department maintains a Daily Crime & Fire Log available to the public at <https://crimelog.eku.edu/> (<https://crimelog.eku.edu/>) Crimes occurring on EKU properties and fires occurring in student housing are listed here in an ongoing effort to help you make informed decisions regarding your safety and security.

The Eastern Kentucky University Police Department has an excellent working relationship with state, local, and federal law enforcement agencies, and other emergency providers. Visit the Department web page at <https://police.eku.edu/> to find links to the Daily Crime Log, the Annual Security and Fire Safety Report, Crime Prevention tips, and much more. You can also connect with EKU Police on Twitter, Facebook, and Instagram.

## Parking & Transportation Services

Commonwealth Hall, Room 212  
Phone: (859) 622-7275  
[www.parking.eku.edu](http://www.parking.eku.edu)

Eastern Kentucky University Parking & Transportation Services provides parking and transportation services in support of the University's mission, by providing quality customer service and proper management of parking and transportation resources. This mission is accomplished by enforcing applicable parking rules and regulations, providing safe and efficient transportation services, conveying a positive attitude, and requiring the highest standards of personal and professional conduct.

Parking Services provides parking information, registers vehicles for the campus community and visitors, coordinates parking for special events and enforces parking rules and regulations. Transportation Services provides day and evening transit services and motor pool/fleet services.

See the Parking and Transportation website ([www.parking.eku.edu](http://www.parking.eku.edu) (<http://www.parking.eku.edu>)) for additional parking and transportation information including parking regulations, transit schedules, and hours of operation.

### Student Automobiles

In order to facilitate parking for all students, faculty, and staff, Eastern Kentucky University requires the registration of all motor vehicles utilizing campus parking facilities. Vehicle registration information can be obtained by contacting Parking Services at (859) 622-7275 or by <https://eku.t2hosted.com> (<https://eku.t2hosted.com/Account/Portal/>) During the registration period, prior to the first day of classes, students registering for classes may park in any legal, non-reserved parking space in all areas, except employee parking lots (Zone E) which are marked by yellow signs.

After the commencement of classes, residential hall lots (Zone R), which are marked by blue signs, are restricted to residence hall permits 24-hours per day, seven days a week. Grand Campus Lot, which is marked by purple signs, is restricted to Grand Campus permits 24-hours per day, seven days a week. Enforcement of employee and commuter parking (Zone C) regulations begins at 2:00 a.m. Monday-Friday. Commuter permits are also valid from 4:30 p.m. to 7:00 p.m. in employee (Zone E) parking lots. The Jones Lot is an exception to this rule and is reserved for employees only until 9:00 p.m. Evening parking for unregistered vehicles without permits is available in the Alumni Coliseum Lot from 4:30 p.m. to 2:00 a.m., Monday through Friday, and all-day Saturday and Sunday. Visitors may register for temporary parking by visiting <https://eku.t2hosted.com> (<https://eku.t2hosted.com/Account/Portal/>) Visitors are permitted to park in the Alumni Coliseum Lot with a valid visitor permit.

## Speech-Language-Hearing Clinic

Wallace Building 245  
Phone: (859) 622-4444  
[www.slhclinic.eku.edu](http://www.slhclinic.eku.edu) (<http://www.slhclinic.eku.edu>)

The Communication Sciences and Disorders Department offers free therapy services to students, faculty, staff, and members of the community at the Speech-Language-Hearing Clinic in Wallace 245.

Diagnostic and clinical treatment services provided by the Clinic include the following:

1. Screening for speech, language, swallowing, and hearing problems.
2. Assessment and treatment of articulation disorders, phonological delays, delayed or disordered language, stuttering, voice disorders including laryngectomy, swallowing, speech and language problems resulting from stroke or head injury, language disorders related to learning disability, and speech and language problems of individuals in areas of exceptionality such as mental handicap, developmental delay, cerebral palsy, cleft palate, hearing impairment, autism spectrum disorder, and emotional/behavioral disorder.
3. Accent modification for speakers of English as a second language and those desiring Standard English skills.

Anyone interested in the above services should contact the Clinic Office Associate at (859) 622-4444, Wallace 245, or visit the Clinic website: [www.slhclinic.eku.edu](http://www.slhclinic.eku.edu) (<http://www.slhclinic.eku.edu>)

## Student Publications

Eastern Kentucky University provides a variety of laboratory experiences through student publications. The Eastern Progress Media Network has been established to provide professional involvement in the activities of The Eastern Progress, the University's student online and print publication. Academic and support units coordinate the institutional support of student publications but do not govern the content. The courts have consistently held that where a tradition of student decision making exists in student publications, those publications are afforded the same Constitutional First Amendment protection as other publications. Concomitant with those rights, go certain responsibilities, which also accrue to the student publications. Accordingly, the responsibility for the content of the publications is that of the student editors and writers and not Eastern Kentucky University or its Board of Regents.

The **Eastern Progress Media Network** is a learning lab for students interested in media, marketing and public relations. The EPMN produces a newspaper and online multimedia content and is the official student publication of the University. All students are encouraged to take advantage of the journalism and advertising training it offers. Since its establishment in 1922, The Progress has been rated as an All American Newspaper by Associated Collegiate Press and a Medalist paper by Columbia Scholastic Press Association. The Progress and its student journalists have won many state and national awards, including countless Kentucky Press Association honors, national Pacemakers and Gold Crown awards. In January 2019, student journalists at the Eastern Progress Media Network and other state campus publications were recognized as KPA's Most Valuable Member. Reach the Progress online at [www.easternprogress.com](http://www.easternprogress.com) (<http://www.easternprogress.com>).

**Aurora** is a magazine of student writings published by its student staff to encourage interest in literary activity. Aurora accepts poems, one-act plays, short stories, prose sketches, and essays from any Eastern student. Editions are published in the fall (online by the ENG 420 Stylistics, Editing, Publishing class) and spring (hard copy). Cash prizes are awarded for the best works (fiction and poetry) at the time of the spring publication.

## Technology and Related Resources

IT Service Desk & IT Geeks, Keen Johnson Basement  
 Phone: (859) 622-3000 | (859) 622-4335  
 Website: [it.eku.edu](http://it.eku.edu) (<http://it.eku.edu>) | [geeks.eku.edu](https://geeks.eku.edu) (<https://geeks.eku.edu>)

Password & Accounts are mailed or communicated through the Slate portal to all students admitted to EKU.

- Students receive a nine-digit EKU ID number which is their unique ID for all official records. This ID starts with "900" or "901".
- Each student also receives an EKU username. The username is based on your first name\_last name (e.g., John Smith = john\_smith12). Your username and password provide secure access to Wi-Fi, campus computers, and other electronic resources. Your single sign-on (SSO) for services like myEKU and Blackboard and email is YourUsername@mymail.eku.edu.
- Reset your password at the website <https://it.eku.edu/password> (<https://it.eku.edu/password/>)
- Reset your two-factor authentication (2FA) settings at the website [it.eku.edu/2FA](https://it.eku.edu/2FA)
- myMail (student email account) is provided through Microsoft. Students may retain their EKU email address upon graduation from EKU: [it.eku.edu/mymail](https://it.eku.edu/mymail) (<https://it.eku.edu/mymail/>)
- Microsoft Office 365 is free for all registered students and can download through their official myMail account. <https://it.eku.edu/support/office-365-education> (<https://it.eku.edu/support/office-365-education/>)
- Google Workspace (formerly G Suite) and Office 365 for Education are available to all employees and students while employed or a current student. <https://it.eku.edu/collaboration> (<https://it.eku.edu/collaboration/>)

IT Geeks are EKU students' first point of contact for all service issues, questions, troubleshooting, and consultation. Call 859-622-GEEK (4335) or email [geeks@eku.edu](mailto:geeks@eku.edu). The IT Geeks also offer electronic equipment checkouts (laptops, calculators, cameras, etc.). Visit the website [geeks.eku.edu](https://geeks.eku.edu)

Computer Labs are located across campus. For a list of all computer labs, visit the website [it.eku.edu/computer-labs-eku-campus](https://it.eku.edu/computer-labs-eku-campus) (<https://it.eku.edu/computer-labs-eku-campus/>)

The IT Website offers more than 300+ support articles about EKU technology. The IT Search is keyword specific. Visit [it.eku.edu](http://it.eku.edu) to view the support articles and learn more about IT at EKU.

Log in to EKU The EKU homepage has a menu for easy login access to myEKU, Blackboard, Student Email, and Degree Works.

myEKU provides access to a wide range of data for students from admission through graduation. Students register for classes, obtain parking permits, check grades, and more with myEKU. Log in to myEKU at [my.eku.edu](https://my.eku.edu). (<https://my.eku.edu>)

Blackboard is EKU's course management system. Students are automatically enrolled in Blackboard upon registration. Course sites do not appear for students until the instructor opens them. Blackboard is used for all online courses and many on-campus courses. Learn more at [it.eku.edu/blackboard](https://it.eku.edu/blackboard), and log in at [learn.eku.edu](https://learn.eku.edu).

Degree Works helps students plan an academic roadmap to graduation. Degree Works and your advisor will ensure you are on the right track to graduate. View Degree Works information at [registrar.eku.edu/DegreeWorks](https://registrar.eku.edu/DegreeWorks). (<https://registrar.eku.edu/DegreeWorks/>)

ResNet is the EKU residential network and provides high-speed wired and wireless internet access in all residence halls. Wired connections are recommended for devices that support that option. To connect to the

campus wireless (Wi-Fi) network, visit [it.eku.edu/getconnected](https://it.eku.edu/getconnected) (<https://it.eku.edu/getconnected/>). To connect wireless devices that do not support network login, visit [it.eku.edu/byod](https://it.eku.edu/byod). (Note: Students should connect to `eku_secure5GHz` instead of the guest Wi-Fi network. For connection support articles, visit [it.eku.edu/support/wireless-network](https://it.eku.edu/support/wireless-network) (<https://it.eku.edu/support/wireless-network/>.) To view all articles related to wireless at [it.eku.edu](https://it.eku.edu), type “wireless” into the IT website search bar.

Peer-to-peer software is not permitted on the EKU network. Downloading copyrighted materials is illegal and prohibited.

Acceptable Use of Information Technology Resources: [it.eku.edu/codeofethics](https://it.eku.edu/codeofethics/). (<https://it.eku.edu/codeofethics/>)

Phishing and Spam: IT @ EKU will NEVER request passwords or other personal information via email. Messages requesting such information are fraudulent. Forward all suspicious messages to [spam@eku.edu](mailto:spam@eku.edu). In the unlikely event, the message is legitimate, we will tell you.

## Emergency Management & Security

### Adams House

424 Lancaster Ave  
Division of Public Safety  
Phone: (859) 622-1111  
<http://emergency.eku.edu/>

### Emergency Notifications:

Rave Mobile Safety is EKU's primary mass notification system. The University has implemented a multi-modal emergency notification system to inform the community about incidents and emergencies affecting campus. Realizing that message redundancy is a necessity, EKU has seven primary notification methods available for the community. Any one, or a combination, of these alert methods may be used depending on the nature and severity of the event. More information about Situational Awareness, Emergency Notifications, and Timely Warnings can be found at the following web page: <https://emergency.eku.edu/situational-awareness-%E2%80%93-emergency-notifications-and-timely-warnings/> (<https://emergency.eku.edu/situational-awareness-%E2%80%93-emergency-notifications-and-timely-warnings/>)

### Systems Include:

- Sirens - Audible sirens can be broadcast over four loudspeakers strategically placed on campus. This system can be activated by the EKU Division of Public Safety as well as the Madison County Emergency Management Agency for weather and community emergency notifications.
- Text Messaging - An opt-out notification where a text message can be received on your mobile phone. EKU and Rave do not charge for this service; however, your carrier may have standard text messaging charges. (Note: Students should periodically check their mobile phone numbers when their numbers change and make corrections as necessary.)
- Voice Messaging - An opt-out notification where a voice message can be received on your mobile or home phone. (Note: Students should periodically check their mobile phone numbers when their numbers change and make corrections as necessary.)
- Email Messaging - This notification provides an email message about an event. Current students, faculty, and staff are automatically registered to receive notifications on their EKU email account and cannot opt-out of this type of notification. You can opt-in to

receive emails on other email accounts. Community members are encouraged to check their email frequently throughout the day to be sure they see any message sent by this alert method.

- RSS Feeds - A message can be posted on the Emergency Management, Police Department, or University web pages.
- Network Messaging - A visual notification can be made across computers connected to the EKU network. When an alert is sent out, a pop-up box appears on your screen. No personal information is gathered or transmitted with the use of this alerting system.
- Social Media - EKU can use Twitter and Facebook to send notifications to the community. These social systems require the user to check to receive any messages posted. Follow @EKUEmergency on Twitter and like EKU Emergency Management on Facebook.

Review your contact information in Rave Mobile Safety

### Rave Mobile Safety:

Current Students, Faculty, and Staff are Already Registered:

- Log on to MyEKU
- <https://experience.elluciancloud.com/eku/>
- Use your Single Sign On (SSO) authentication.
- Under the EKU Links Card, click on the Rave Emergency Notifications link.
- Under My Account you can check and edit your Mobile Phones, your Voice Only Line Contacts, and your Email. Click the Add Buttons to add additional Mobile Phones, Voice Only Line Contacts, and Emails.
- If you are affiliated with certain groups, like the EKU Regional Campuses, you can join them to receive notifications that they send out.
- Click the Groups tab, select the desired group(s) from the Official Groups list by clicking Action, and selecting Join at the Group Status.
- You can leave any group by selecting the group(s) and at the Group Status and clicking Leave.
- Email messages are automatically sent to all current EKU email addresses. You cannot opt-out of receiving messages on your EKU email account.
- Texts and voice calls are also automatically entered into the system and you can opt-out of these notifications if you desire. Please give careful consideration to opting-out, however, because once you opt-out, you will no longer receive important emergency information intended to help you to stay safe. (Note: Students should check their mobile phone numbers at the beginning of every semester and make changes as their circumstances change.)
- *Message and data rates may apply. Text messages are sent on an as-needed basis. This service is provided per the Terms of Use (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsafety.smart911.com%2Fterms-of-use%2F&data=05%7C01%7Cgary.folckemer%40eku.edu%7C28b59f6ab8da42d967d708db8873dd02%7Ce23043271af04dee83fbc1b2fd6%7C0%7C0%7C638253804725266245%7CUnknown%7CTWFpbGZsb3d8eyJWljoimc4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IkhWV%7C3000%7C%7C%7C&sdata=u94nXyvGgpfCul5xspZyBJJLMYqdcg5Y8w7cLTtUYLY%3D&reserved=0>) and Privacy Policy (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsafety.smart911.com%2Fprivacy-policy%2F&data=05%7C01%7Cgary.folckemer%40eku.edu%7C28b59f6ab8da42d967d708db8873dd02%7Ce23043271af04dee83fbc1b2fd6>)*

 (CAMPUS), 78015, or 77295 to cancel or HELP for tech support.

- EKU and Rave do not charge for text service; however, your carrier may have standard text messaging charges.

Other Community Members:

- While current EKU employees, and registered EKU students, are automatically enrolled in Rave Mobile Safety – Emergency Notifications. Other community members and visitors may SMS (Text) to opt-in. Be informed. Text “EKUAlerts” to 67283 (MRAVE), 226787 (CAMPUS), 78015, or 77295.
- *Message and data rates may apply. Text messages are sent on an as-needed basis. This service is provided per the Terms of Use (*
- Rave does not charge subscribers to send or receive text messages. Standard or other messaging charges may apply depending upon your wireless carrier plan and subscription details.

Living Safely at EKU

Life can be unpredictable. The Division of Facilities Management & Safety asks that all our community members download the EKU S.A.F.E. App.

For maximum utility, you must turn on location services for this app so that your location can be checked and sent to Public Safety, or to one of your Contacts. Privacy is your concern, and you decide whether to enable your location services. Enabling this feature, on your mobile phone, for this app, helps people get to you when you need assistance.

The free personal safety app is available for download on both the Apple and Android platforms at

Apple: <https://apps.apple.com/us/app/s-a-f-e-safety-app-for-eku/id1550124036> (<https://apps.apple.com/us/app/s-a-f-e-safety-app-for-eku/id1550124036/>) and

Android: <https://play.google.com/store/apps/details?id=com.cutcom.apparmor.eku> (<https://play.google.com/store/apps/details/?id=com.cutcom.apparmor.eku>)

The app puts various safety services at the fingertips of users:

- Push Notifications – Allows users to receive emergency notifications from Public Safety, via EKU Alerts, using our email alert method. (Note: Community members, who are not EKU employees or EKU students, can SMS to Opt-In for emergency notifications sent from Public Safety, using our text alert method. Be informed. Text “EKUAlerts” to 67283 (MRAVE), 226787 (CAMPUS), 78015, or 77295.)
- EKU News Feed – Displays recent tweets from @eku.
- Emergency HELP – Contains buttons to Call 911 if you are off the EKU Richmond Campus, Call EKU Police if you are on the Richmond Campus, chat with EKU Police via text for the deaf or hard of hearing or when it is not safe for you to speak. Emergency Call checks your physical location and determines that if you are inside the campus geofence, your call goes to EKU Police, and if you are outside the campus geofence, your call goes to 911 for help.
- Safety Escort/Friend Walk – Has options to contact the EKU Police, to request a safety escort on the Richmond Campus, or allows you to send your location in real-time to a friend, so they can watch you as you travel to your destination.
- Mobile BlueLight ALARM – Contains a button that simultaneously sends your location to EKU Police and makes a phone call to EKU Police. EKU Police can receive your location in real-time on their Dashboard and they can speak with you on the phone.
- WorkAlone – Allows you to start a session with either a personal contact, anywhere, or with Public Safety if you are on the Richmond Campus. This feature will automatically check in on you while working or studying alone and can automatically trigger a call to your personal contact or Public Safety if you fail to check-in at the allotted time, or if you press the emergency button.
- Report a Tip – Allows you to report tips on a variety of topics and gives you an option of attaching a photo or video. The tips are automatically routed to the appropriate office(s).
- Health & Safety Toolbox – Has options to contact the EKU Police, the Counselling Center, Student Health Services, and Center for Student Accessibility.
- Campus Maps – Provides access to a Parking Map, Enhanced Shelter In Place Buildings, and Evacuation Assembly Areas.
- Emergency Plans – Contains the University’s planned response to emergency situations. This is the content of the University Emergency Action Plan and provides important information about what you can do to protect yourself if an emergency does occur.
- Support Resources – Has options to contact University Housing, Facilities Management, Libraries, and Student Affairs.
- Manage Profile – Under the About/Preferences button, users can manage their profile and add information to help emergency responders. This information is only available to and used by the EKU Division of Public Safety for emergency purposes. It allows individuals to volunteer information to help us keep you safe. Items the user can volunteer include Allergies, Medications, On-Campus Primary Address/Location, Secondary or Additional Addresses/ Locations (for individuals whose work or studies take them to multiple locations on campus), Permanent Address, Additional Phone Numbers, Emergency Contact Name and Phone Number. The more information volunteered, the more effectively we can find you and help you should the need arise.

We are proud of our strong partnership with the Student Government Association as we collaborate to provide safety resources, such as this app, that benefits our entire campus community. Colonels care for one another and this app provides a platform for our community to look out

for one another by reporting issues, communicating directly with the EKU Police Department, providing tips, watching friends virtually walk, and other safety items.

## Office of Student Success

Dr. Tanlee Wasson

Vice President of Student Success, Engagement & Opportunity  
Whitlock Building 536  
(859) 622-8663

<https://studentsuccess.eku.edu/>

Student Success, Engagement, and Opportunity provides student support services and programming throughout the student enrollment life cycle. SSEO helps students blend their quest for academic knowledge with the development of life skills through experiential learning and engagement activities.

The Vice President for Student Success, Operations, and Engagement guides a student-centered, forward thinking, innovative and collaborative unit, assisted by the Executive Directors of Enrollment Management and Retention and Graduation, who strive to recruit, retain and service an expanding and more diverse student body.

- Bratzke Student-Athlete Academic Success Center (p. 581)
- Center for Student Accessibility (p. 581)
- Dean of Students (p. 581)
- Financial Aid (p. 581)
- NOVA Program (TRiO Student Support Services) (p. 584)
- Office of Admissions (p. 584)
- Student Conduct and Community Standards (p. 584)

## Bratzke Student-Athlete Academic Success Center

Mrs. Kate Johnson, Associate Director

Office: Library 207B

Mailing Address: Library 103

Email: [kate.johnson@eku.edu](mailto:kate.johnson@eku.edu)

Phone: 859-622-6648 ([kate.johnson@eku.edu](mailto:kate.johnson@eku.edu))

The Bratzke Student-Athlete Academic Success Center provides comprehensive academic support and resources for all student-athletes competing on NCAA varsity teams on EKU's campus. The Center provides opportunities and services to help student-athletes reach their academic goals from the time they arrive on campus through graduation. Our mission is to strive for academic excellence while focusing on a culture of integrity and accountability.

Bratzke Center programs include but are not limited to: academic advising, academic monitoring, mentoring, supervised study hall, tutoring, access to Learning Specialist, assistance with recruiting visits, as well as assisting with referrals to other academic resources on campus. Student-Athletes academic progress is monitored closely to ensure all academic eligibility requirements are met as determined by the NCAA, ASUN, and EKU.

In collaboration with the Athletic department the Bratzke Center also assists with student-athlete development programming to promote student-athlete growth in five commitment areas: academics, athletics, personal development, service, and career/professional development. Throughout the year the center and Athletics plans and coordinates outreach activities for student-athletes in support of the local community and Eastern Kentucky.

## Center for Student Accessibility

Dr. Kelly Cogar, Senior Director

Whitlock Building 361, CPO 66

Phone: (859) 622-2933

[www.accessibility.eku.edu](http://www.accessibility.eku.edu) (<http://www.accessibility.eku.edu>)

The Center for Student Accessibility (CSA) assists students by coordinating campus and program accessibility and providing support in attaining educational goals. CSA is located in the Whitlock Building, Room 361. Appointments are made by calling (859) 622-2933 or emailing at [accessibility@eku.edu](mailto:accessibility@eku.edu).

Students requesting services, including deaf and hard-of-hearing students, must submit a completed application for services and current health-related documentation. Applications, documentation guidelines, and additional information are available on the CSA website. Services are individualized and may include academic adjustments that do not impede the academic integrity of the course, digital books, equipment loans, interpreters, note-taking software, testing accommodations, and other services.

### ADA/504 Coordinator

The ADA/504 Coordinator serves the University by hearing individual ADA cases, including appeals for course substitutions, waivers, and other accessibility-related matters, and as a member of the ADA Appeals Committee. Appointments with the ADA/504 Coordinator are made by contacting Dr. John Dixon, [John.Dixon@eku.edu](mailto:John.Dixon@eku.edu).

## Dean of Students

Dr. Lara Vance, Dean

Whitlock Building 347

Phone: (859) 622-3436

Fax: (859) 622-2402

[www.dos.eku.edu](http://www.dos.eku.edu) (<http://www.dos.eku.edu>)

The Office of the Dean of Students promotes student success and development across all offices and serves as the primary contact point for students. The Dean of Students provides support for students to assist with their educational and personal growth by connecting them with resources, advocating for them, and helping them navigate situations that could impede their progress. The Dean collaborates with various departments, stays up-to-date on available student resources, and responds to student crises.

## Financial Aid

Whitlock Building 210

Phone: (859) 622-2361

<http://www.eku.edu/bigcentral> (<http://www.eku.edu/bigcentral/>)

## Big E Central

Hours of Operation: Monday – Friday, 8 a.m. – 4:30 p.m.

Walk-In Availability: Monday – Friday, 8 a.m. – 4:00 p.m.  
 Phone Hours: Monday – Friday, 9 a.m. – 4:00 p.m.  
 Email: bigcentral@eku.edu – Please include ECU Student ID number.  
 Request a Virtual (Zoom) Appointment (<https://success.eku.edu/register/becapptrequest/>)  
 Phone: 859-622-2361  
 Federal School Code: 001963  
 Address: 521 Lancaster Ave | Whitlock Room 210 CPO 63 | Richmond, KY 40475

- Check your ECU email account and myEKU (<https://it.eku.edu/myEKU/>) for regular messages regarding your financial aid and awards.
- FAFSA confirmation will be sent to students' ECU email account.
- Scholarship award notifications are mailed to new students' permanent addresses and available in myEKU (<https://it.eku.edu/myEKU/>).
- Many questions can be answered by visiting the Self-Service Portal (<https://success.eku.edu/portal/BigEcentral/?tab=home>)

Financial assistance is available to help students offset the cost of their college education. There are five types of financial aid: grants, loans, employment, entitlements, and scholarships. The grants, loans, and federal work study programs are need-based. To determine how much money and for which programs the student qualifies, he/she must complete the Free Application for Federal Student Aid each year.

Entitlements include but are not limited to resources from the Veterans Administration and Vocational Rehabilitation. Scholarships are awarded from the University as well as outside sources. For information regarding entitlements or scholarships, students should contact Big E Central at (859) 622-2361. This office can guide the student to the proper source depending on the type of entitlement or scholarship the student is interested in pursuing.

## Financial Aid Requirements

All applicants for financial aid are required to:

1. Apply for admission and be accepted to the University;
2. Be a degree seeking student enrolled or accepted for enrollment in an eligible degree or certificate program. Student auditors, dually enrolled high school students and special non-degree students are not eligible for federal financial aid; and
3. Complete, electronically sign, and submit a Free Application for Federal Student Aid (FAFSA) with the U.S. Department of Education (ED). Every student, and parent as applicable, must have a Federal Student Aid ID (FSA ID) to start and sign the FAFSA. Students are urged to apply early for optimum financial aid benefits. Students should complete the FAFSA at (FAFSA® Application | Federal Student Aid) and add ECU on the school selection page, so we receive the student's FAFSA record. Applicants are strongly encouraged to use the I.R.S. Data Retrieval Tool to transfer the requested tax information onto the FAFSA to ensure information on the FAFSA is accurate and to save time when completing the FAFSA. If unavailable, the applicant's I.R.S. Tax Return or Tax Return Transcript can be used to manually input the requested income information. If needed, a copy of the Tax Return Transcript can be obtained by going to the I.R.S.'s website at Get Transcript | Internal Revenue Service and selecting "Get a Tax Transcript" under Tools.

- The FAFSA is available at student [www.studentaid.gov](http://www.studentaid.gov) (<http://www.studentaid.gov>).
- For new students entering in the Spring semester, the ECU institutional deadline date to file the FAFSA is by October 1.
  - Fall Semester - As soon after October 1 as possible
  - Spring Semester - October 25
  - Summer Term - March 20
  - Complete FAFSA verification or any other aid reviews when required.

Once the completed FAFSA is received by the Department of Education, information provided by the student on the FAFSA is used to generate a Student Aid Report (SAR). The SAR indicates the amount of money the student and/or the student's family is expected to contribute towards the student's education. This is called the Expected Family Contribution (EFC) and is used to determine the student's financial need.

The student's financial 'need' is the difference between the Cost of Attendance and the EFC. The Cost of Attendance, regardless of the student's dependency status, includes the educational expenses of:

- Tuition and Fees;
- Living Expenses (food and housing for students living on and off campus);
- Loan Fees;
- Transportation; and
- Personal/Miscellaneous expenses.

The amounts for these five educational expenses are the student's estimated Cost of Attendance at Eastern Kentucky University, and they become the student's budget for financial aid purposes. Only the actual tuition, fees, and food and housing (for resident students living in campus housing) costs are charged on the student's University bill.

Financial aid recipients are selected based on demonstrated financial need, academic success, and other merits. Most ECU financial aid awards are based on full time enrollment in aid eligible courses, which is a minimum of 9 credit hours for a graduate student per semester. Federal student loans and federal grants usually require a minimum of half-time enrollment.

Each financial aid recipient is issued an official Financial Aid Offer, which is the University's official estimate of a student's financial aid and costs to attend for the academic year. Financial Aid Offers are emailed to the student's ECU email account. It is the student's responsibility to review the Financial Aid Offer and notify Big E Central of any additional aid being received and of any desired reduction or cancellation of the aid offered.

To continue to receive institutional or federal student aid, an ECU student must maintain Financial Aid Satisfactory Academic Progress (SAP).

## Academic Eligibility and Financial Aid

In the event Satisfactory Academic Progress (SAP) is not maintained, financial aid may be withheld. Eastern Kentucky University's SAP policy can be reviewed at: [www.eku.edu/bigcentral/sap/](http://www.eku.edu/bigcentral/sap/) (<https://www.eku.edu/bigcentral/sap/>).

## Grants and Loans

### Direct Unsubsidized Loans

Graduate students may be eligible to borrow Direct Unsubsidized Loans; however, they are not eligible to borrow Direct Subsidized Loans. There is no requirement to demonstrate financial need, and the student's institution will determine the amount the student can borrow based on the student's cost of attendance and other financial aid he or she receives.

The student is responsible for paying the interest on a Direct Unsubsidized Loan during all periods. If the student chooses not to pay the interest while in school and during grace, deferment, or forbearance periods, then interest will accrue and be added to the principal amount of the loan.

- Graduate students must be enrolled in a minimum of 4.5 credit hours to borrow a Direct Unsubsidized Loan.
- Generally, graduate students can borrow up to \$20,500 per academic year in Direct Unsubsidized Loans.
- Students cannot borrow over the aggregate limit of \$138,500 in Direct Unsubsidized Loans.
- The current interest rates for Direct Unsubsidized Loans can be found on <https://studentaid.gov/understand-aid/types/loans/interest-rates> (<https://studentaid.gov/understand-aid/types/loans/interest-rates/>).

#### Graduate PLUS loan

If students need to borrow more than what they have been offered in Direct Unsubsidized Loans, they may apply for a Graduate PLUS loan at [www.StudentAid.gov](http://www.StudentAid.gov) (<https://studentaid.gov/>)

- Graduate PLUS loans are subject to credit approval, and an additional Master Promissory Note (MPN) must be signed for that PLUS loan.
- PLUS loans can generally be awarded up to the student's cost of attendance, if approved for that much.

## Student Employment

**Graduate Assistantships:** Graduate assistantships are positions given to the most outstanding students. Duties may include laboratory supervision, teaching, and research related tasks. Stipends are competitive and assistantships supported through the Graduate School include a partial tuition waiver of six graduate hours per semester for a full-time appointment. Additional assistantships are available through the Office of Student Housing and other academic and administrative units and many of these also provide a partial tuition waiver.

Graduate Assistants (GAs) are appointed by the individual departments of each college and subject to the approval of the Graduate School. Questions regarding application for appointment should be directed to the graduate coordinators of that department.

- Graduate Assistants must be enrolled in a graduate degree program and must be enrolled in a minimum of 9 hours of graduate coursework applicable to their degree.
  - Students in their final semester of graduate study who have applied for graduation may hold an assistantship with less than full-time enrollment.
- Students admitted to the Graduate School on Probationary Admission are typically not eligible for Graduate Assistantships.
- Graduate assistants on part-time appointments are permitted to work up to 10 hours per week in other on-campus employment subject to approval by the Graduate School.
- Appointments are limited to no more than four academic terms (summers excluded).

- Exceptions to this may be considered for students enrolled in graduate program that exceed 36 hours.

**Institutional Work Study:** Eastern Kentucky University offers an institutional work program to employ students on a part-time basis, and students are paid every two weeks for the hours they have worked. Their job schedule is built around their class schedule. A variety of jobs are available including typing, filing, farm work, food service, resident hall assistants, tutorial work, as well as community service jobs. Student employment opportunities can be reviewed using the EKU human resources job search engine (<https://careers.eku.edu/jobs/search/>). Student employment processes and procedures can be reviewed here: <https://hr.eku.edu/student-employment-services> (<https://hr.eku.edu/student-employment-services/>)

## Other Assistance Programs

**SAFE Award:** The Student Assistance Fund for Eastern (SAFE) provides short-term financial assistance to Eastern Kentucky University students who are unable to meet immediate, essential expenses due to an unexpected emergency or crisis situation. More information can be found here: <https://retentiongraduation.eku.edu/student-assistance-fund-eastern> (<https://retentiongraduation.eku.edu/student-assistance-fund-eastern/>)

**Veterans Affairs:** The Veterans Program at Eastern Kentucky University is approved by the Kentucky Approving Agency for Veterans Education for the education of veterans and their eligible dependents. Students concerned with veterans training should have, at the time of registration, a certificate of eligibility. This is secured from the regional office of the Veterans Administration. The University is responsible for the completion of certain Veterans Administration forms and the other necessary information about students who receive this aid.

- Educational benefits for eligible students including Montgomery GI Bill, Chapter 30 (active duty), Chapter 33 (Post 9/11), Chapter 1606 (reserve/national guard), Chapter 35 (Dependents Educational Assistance Program), and Chapter 31 (Veteran Readiness and Employment VR&E).
- If you have completed courses while in the armed forces, ask the Office of Military and Veterans Affairs about the possibility of receiving credit for such courses.

**Veterans Administration Benefits:** War orphans, widows, children and wives of deceased and disabled veterans should contact the Veterans Administration, 600 Federal Place, Louisville, Kentucky (phone: 1-800-827-1000). Application forms are available in the EKU Office of Veterans Affairs. For information concerning tutorial assistance or refresher courses, contact the Office of Veterans Affairs at Eastern Kentucky University in the Whitlock Building, Room 442. The telephone number is (859) 622-7838.

**Vocational Rehabilitation (OVR):** EKU supports the efforts of OVR to serve eligible individuals with disabilities. The Kentucky Office of Vocational Rehabilitation provides vocational rehabilitation services to eligible individuals with disabilities. Individuals receiving OVR services may also contact the EKU Center For Student Accessibility for academic accommodation. For more information about eligibility criteria call the Office of Vocational Rehabilitation toll free at 1-800-372-7172 or (502) 564-7172, or visit the website at <https://kcc.ky.gov/>.

**O'Donnell Scholars:** The O'Donnell Scholarship provides an opportunity for persons aged 65 and older to become students at Eastern

Kentucky University by enrolling in any courses listed available via myEKU. O'Donnell Scholars are responsible for the cost of any required materials, parking permits and applicable income taxes. Tuition and fees are paid through funds authorized by the Commonwealth of Kentucky. For further information, please visit <https://www.eku.edu/scholarships/current-students/>

Students can contact Big E Central to learn more about other forms of financial assistance.

## Personal Financial Liability - Withdrawing or all failing grades

Students who withdraw from ECU before attending over 60 percent of the semester or who stop attending and therefore receive all failing grades may be financially liable to repay the student aid received. Persons desiring to withdraw from ECU must do so according to the university's withdrawal policy which can be found on the school's website (<https://registrar.eku.edu/reg-withdrawal-information> (<https://registrar.eku.edu/reg-withdrawal-information/>))

Return to Title IV policy- <https://www.eku.edu/bigecentral/return-title-iv-funds/>

## Payments of Awards

Financial aid awards are normally made on an academic year basis conditional with fulfilling academic and registration requirements. Financial aid is disbursed after the Last day to ADD or DROP a class (receiving a 100% refund for that course) for each semester and is applied directly to tuition and fees, housing, meal plans and any other applicable charges. Awarded amounts in excess of institutional charges are refunded electronically or by paper check sent by USPS to the student's primary mailing address. Student employment wages are distributed every two weeks.. Disbursement is different from refunds.

All first-time Stafford Loan recipients are required to complete an entrance counseling session and Master Promissory Note (MPN) prior to their loan funds being disbursed and an exit counseling session prior to graduation or withdrawing from the University. This can be done online at <http://studentaid.gov> (<http://studentaid.gov/>); under Complete Aid Process.

## Renewal Procedures

Financial aid awards are calculated on current financial information. Therefore, a new FAFSA must be filed each year. Students may apply online at <http://studentaid.gov> (<http://studentaid.gov/>); under Apply For Aid. Students will need an FSA ID in order to sign their FAFSA electronically. Apply for a FSA ID at <https://studentaid.gov/fsa-id/create-account/launch> (<https://studentaid.gov/fsa-id/create-account/launch/>).

## NOVA Program (TRiO Student Support Services)

Ms. Sierrah Anderson, Director  
Cammack 005  
Phone: (859) 622-1047  
[www.nova.eku.edu](http://www.nova.eku.edu) (<http://www.nova.eku.edu>)

The NOVA Program is a federal TRiO Student Support Services grant project committed to fostering the intellectual, personal, and professional

growth of first-generation and low-income students from Orientation to Graduation.

NOVA's retention model is comprehensive in design, providing targeted services designed to meet each student's individual needs.

Services include:

- Academic Advising
- Career Counseling
- Classroom Instruction
- Consulting
- Financial Aid and Financial Literacy
- Graduate School Preparation
- Personal Counseling
- Service Learning
- Living Learning Community
- Peer Mentoring
- Personal Counseling
- Registered Student Organization
- Service Learning Experience
- Scholarship Opportunities
- Supplemental Grant Aid Opportunities
- Tutoring Services
- Workshops...and much more!

Students who are interested in joining NOVA may apply online at [www.nova.eku.edu](http://www.nova.eku.edu) (<http://www.nova.eku.edu>) or stop by the NOVA office to obtain an application. For more information, please call (859) 622-1047 between the hours of 8:00-4:30, Monday-Friday.

## Office of Admissions

Whitlock 112  
Phone: (859) 622-2106

The Office of Admissions is responsible for recruitment and admission of qualified undergraduate students to ECU. This office is also responsible for the processing of applications for new as well as readmitted students and international students for undergraduate programs. Students who have questions regarding their residency status may address their inquiry to the Office of Admissions ([admissions@eku.edu](mailto:admissions@eku.edu)).

## Student Conduct and Community Standards

Emily Jo Davis, Director  
Whitlock 347  
Phone: (859) 622-1500

The Office of Student Conduct and Community Standards believes Eastern Kentucky University is a community of shared academic values, foremost of which is a strong commitment to intellectual honesty, honorable conduct, and respect for others. In order to meet these values, students at Eastern Kentucky University are expected to adhere to the highest standards of academic integrity. When becoming a part of the University community, the student enjoys social, cultural, and educational opportunities. The student also assumes the role of a citizen of the community and agrees to abide by the regulations and standards of conduct of the University community. The Office of Student Conduct

and Community Standards provides a fair and impartial student conduct system for students, faculty and staff of Eastern Kentucky University.

The Office of Student Conduct and Community Standards will:

- Provide information to all students relating to the General Regulations for Student Behavior,
- Adjudicate all reports of alleged violations of the General Regulations for Student Behavior and the Policy for Academic Integrity in a consistent manner,
- Facilitate due process rights set forth by the University Handbook for Students, and
- Ensure fair and impartial hearings.

## Division of Student Affairs

**Dr. Dannie Moore**

Vice President, Division of Student Affairs

Powell Building 100  
(859) 622-6587

The Division of Student Affairs strives to foster a vibrant and inclusive campus community where every student is supported and empowered to thrive academically, personally, and socially. Through collaborative and student-centered initiatives, we aim to cultivate a holistic learning environment that promotes a sense of belonging for all students. By providing comprehensive resources, meaningful engagement opportunities, and proactive support services, we strive to enhance each student's journey and prepare them to be leaders in their local communities. Together, we embrace the spirit of lifelong learning and work to ensure we are creating an Exceptional Eastern Experience that enables students to enjoy their college experience and to make a positive impact on our campus and beyond.

- Student Life and First Year Experience (p. 589)

## Campus Recreation

Justin Raymer, Director of Campus Recreation

Phone: (859) 622-6751

Fax: (859) 622-6755

[www.campusrec.eku.edu](http://www.campusrec.eku.edu) (<http://www.campusrec.eku.edu>)

The Department of Campus Recreation provides a variety of diverse facilities and recreational opportunities to the university community. The department promotes wellness for students, faculty and staff by encouraging the development of lifelong skills and positive attitudes through health education, fitness programs, adventure programs, and competitive sports.

Campus Recreation oversees the operation of the **Fitness & Wellness Center**. The Fitness and Wellness Center is a state-of-art facility which includes:

- Full line of weight and fitness equipment
- Locker Rooms
- Climbing Wall
- Bouldering Wall
- Group Exercise Room
- Multipurpose gymnasiums
- Indoor Track
- Student Lounge with computers
- Full Swing Golf Simulator

Coming in Fall 2019, the brand new state-of-the-art recreation center will include (in addition to the list above):

- An aquatic center
- Sauna
- Outdoor activity space
- 2 additional courts
- 2 additional group fitness studios

## Fitness Program

The Fitness Program offers a variety of group fitness classes each week and are taught by trained, motivated and friendly instructors. All fitness levels are welcome and each group fitness class is offered at no charge. Examples of group fitness classes are yoga, Pilates, group cycling, Zumba, and much more.

For those who need a more personal touch, we offer very affordable personal training by certified personal trainers. Personal training is a great way to attain one-on-one instruction incorporating exercise plans, goal-setting and health education.

## Adventure Programs

Adventure Programs offers a wide variety of trips and workshops each semester. Previous trips have included: hiking and camping, backpacking, kayaking/canoeing, spelunking, white water rafting, climbing, canyoneering. The climbing and bouldering walls are an exciting and engaging alternative to traditional exercise. In addition, Adventure Programs provides an extensive amount of outdoor equipment so you may embark on your own adventures. Examples of outdoor rental equipment are tents, mountain bikes, kayaks, cook stoves, canoes and much more.

## Competitive Sports

Competitive Sports have been a campus tradition at ECU for over 50 years. Students play with their friends or organizations and compete against fellow Eastern students. Examples of activities offered are flag-football, soccer, volleyball, corn hole, dodge ball, golf, basketball, and much, much more. There are also numerous individual and dual events. For the more competitive athlete, we also supervise student lead Sport Clubs. Clubs compete on a regional and national level against other universities and colleges.

## Health Promotion

Health Promotion is a peer education program geared towards empowering students with knowledge and facts concerning health

issues. Health Promotion presents information on alcohol, obesity, sex, drug abuse, eating disorders, tobacco, and much more. The aim is not to enforce ideas but to assist students in making better informed decisions by providing students with the proper tools, knowledge, and self-worth.

## Employment

EKU Campus Recreation is one of the largest student employers on campus. We have a variety of opportunities to join our dedicated and friendly staff! All open positions will be posted on careers.eku.edu (<https://careers.eku.edu/>). Here are some entry level positions we employ, and most have opportunities for advancement:

- Facility Attendant
- Group Exercise Instructor
- Marketing Assistant
- Intramural Referee
- Health Promotion Peer Educator
- Climbing Wall Attendant
- Personal Trainer
- Graphic Designer
- Lifeguard

## Center for Inclusive Excellence and Global Engagement

13 Powell Building

Phone: (859) 622-6775

<https://inclusive.eku.edu/> (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Finclusive.eku.edu%2F&data=05%7C01%7CRae.Loftis%40eku.edu%7C3e2ba58c86184513e33c08db8c5a291b%7Ce23043271af04dee83fbc1b2fd6db0bb%7C0%7C0%7C638258091087269258%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IkhawWlCjXyCl6Mj0%3D%7C3000%7C%7C%7C&sdata=SMOfHLRamMcRvULNsCqJNKi1aZCxKuMrRRCoXy4ZY8Y%3D&reserved=0>)

The Center for Inclusive Excellence and Global Engagement (CIEGE) is a student-centered campus hub in the lower level of the Powell Student Center. Through programming, mentorship, and co-curricular engagement, the CIEGE works to celebrate, affirm, support, and provide a sense of belonging for students at Eastern Kentucky University. CIEGE imagines and supports a campus environment where students will be inclusive thinkers that are confident, responsible, global minded with a strong sense of belonging from admission to graduation and beyond. The CIEGE promotes life-long learning and global citizenship by providing programs, workshops, study groups, panel discussions and events that celebrate our diverse community.

## Counseling Center

Dr. Kevin Stanley, Director

Whitlock Building 571

Phone: (859) 622-1303

Fax: (859) 622-1305

<https://counselingcenter.eku.edu/>

The University Counseling Center offers services designed to promote the success of students in achieving their academic, social and personal

goals. The Counseling Center staff consists of licensed clinicians who provide counseling both individually and in groups. Referral is provided when the need for counseling services is beyond the role and scope of the Counseling Center. Counseling relationships are considered confidential as delineated by the American Psychological Association (APA) Code of Ethics and, to the extent permitted by law, federal and Kentucky state laws.

## Counseling Services

Counseling is viewed as another form of learning while in college. Typical college student concerns that may result in counseling are: adjustment to college, interpersonal conflicts, dealing with loss, test anxiety, time management, stress, academic pressures, anxiety, depression, motivation, substance abuse, traumatic experiences, eating concerns and choice of a major.

## Rapid-Access Services

The EKU Counseling Center offers many services that are available on a drop-in basis, including: workshops, biofeedback, guided meditation, and drop-in groups. Be sure to check out our website: [counselingcenter.eku.edu](http://counselingcenter.eku.edu/) (<http://counselingcenter.eku.edu/>) for the semester schedule of services.

## QPR Suicide Prevention Training

The EKU Counseling Center offers training in suicide prevention and only takes an hour! Participants learn: warning signs that someone might be considering suicide, how to have a caring conversation with someone about whom they are concerned, how to persuade that person to get help, and where to refer them for that assistance. Everyone can be a partner in suicide prevention.

## Services for Faculty and Staff

The Counseling Center staff also provides consultation to the University community on referral and how to be most helpful to the distressed student. When a faculty member wishes to refer a student for immediate help, it is recommended that the faculty member call and speak with a staff member for consultation to discuss the appropriate action.

## EKU Housing and Residence Life

Karen Peavler Associate Vice President, Student Life

Whitlock Building 552

Phone: (859) 622-1515

Fax: (859) 622-8384

[www.housing.eku.edu](http://www.housing.eku.edu) (<http://www.housing.eku.edu>)

EKU Housing & Residence Life fosters the development, engagement, and success of our residential community by providing an inclusive home that enhances the collegiate experience. Campus living offers opportunities that will help you excel academically, develop leadership skills and connect with life-long friends. You will meet students from all walks of life gathered together as part of a vibrant, close-knit community.

We offer Living Learning Communities (LLCs), which consist of students with similar majors and interests who live on the same floor/floors of a residence hall. Live and learn with others who share your goals, career interests and life passions!

All single, full-time undergraduate students under the age of 21 prior to the first day of classes, having fewer than 60 credit hours, or having lived in a residence hall less than four academic semesters (fall/spring)

are required to live in University residence hall facilities. Exception is made for students residing with their parent(s) at their parent's principle residence within 50 miles of the Richmond campus. Students living with parents must submit a verification form which is available through the housing office or at [www.housing.eku.edu](http://www.housing.eku.edu) (<http://www.housing.eku.edu>). Students may request exemption to the residency requirement under specific circumstances to the Executive Director.

Each residence hall is equipped with the following services that come as part of the basic room rental rate:

## Laundry Rooms

Several washers and dryers are located in every residence hall. EKU Housing and Residence Life offers **free** laundry. Each student is given 96 credits each semester to use the machines. It averages out to 3 full washes and 3 full dries per week. While these credits do not roll over to a new semester, you will start each semester with 96 credits no matter your usage. All residence halls have their own laundry facility within the building.

## ResNet

All rooms come equipped with high-speed internet connections. Wireless network access is also available. For more information about equipping your computer for Internet access, visit [www.resnet.eku.edu](http://www.resnet.eku.edu) (<http://www.resnet.eku.edu>).

## Study Rooms

In most residence halls, are open, quiet rooms in which to study.

## Vending

All residence halls are serviced with a variety of drink and snack vending machines. The machines are coin operated, and many accept credit card processing as well.

Social, educational, and service-learning programs are offered and organized by Housing & Residence Life staff in all of our residence halls. These programs range from movie nights on the residence hall floors to volunteering for Habitat for Humanity. Most often, the RAs on each floor host social programming so that the residents can get to know each other and enjoy their housing experience even more. Many of the Housing & Residence Life programs are open to all campus residents.

EKU Housing & Residence Life has traditional residence halls, enhanced traditional halls, suite style halls, and apartment style halls.

### Features include:

- Large recreation rooms
- Indoor gas fireplaces
- Study rooms
- Computer labs
- Kitchen and laundry areas
- Indoor / Outdoor programming space
- Large and small classrooms space
- Leadership opportunities

Visit [housing.eku.edu](https://housing.eku.edu) (<https://housing.eku.edu>) for rates, floor plans and more details.

## Meditation Chapel

The Chapel of Meditation is the realization of a dream begun in 1968 when the Eastern Kentucky University Alumni Association adopted the Century Fun Project to finance a non-denominational chapel. The chapel stands as a testimonial of the love and devotion of the alumni, faculty, students, and friends, a fit to commemorate the 100th anniversary of higher education on the Eastern Kentucky University campus.

The chapel is non-sectarian and is open to students, faculty, staff, alumni, and friends of the University for meditation, prayer, and spiritual reflection.

## Office of International Student Scholar Services

Mr. Matthew Cox, Assistant Director

Powell Building 013

Phone: (859) 622-3446

[international@eku.edu](mailto:international@eku.edu)

[www.international.eku.edu](http://www.international.eku.edu) (<http://www.international.eku.edu>)

The Office of International Student and Scholar Services (OISSS) provides services, programs, and resources to assist international students and visitors with their transition to campus and to life in the United States.

Eastern Kentucky University has more than 150 international students studying at both the undergraduate and graduate levels. These students represent approximately 30 nations.

OISSS supports international students and works with campus partners in providing educational, social, and cultural programs which promote cross-cultural understanding and contribute to campus internationalization.

The office also has a dedicated staff who works directly with sponsored students studying at EKU through various governmental programs or scholarships. Finally, the office provides immigration visa advising to our international population and serves to keep the university and students in compliance with federal immigration regulations.

## Office of Military and Veterans Affairs

Vin Thomas, Director

Powell Student Center 137

Phone: (859) 622-2345

Fax: (859) 622-5076

[www.va.eku.edu](http://www.va.eku.edu) (<http://www.va.eku.edu>)

The Office of Military and Veterans Affairs serves veterans and military students by assisting with admissions, obtaining VA benefits and credit for military training, and serving as an advocate for veterans' issues throughout the campus community.

To utilize VA education benefits and to obtain a Certificate of Eligibility, eligible veterans and military students will need to apply directly to the Veterans Administration online at [www.vets.gov](http://www.vets.gov) (<http://www.vets.gov>). Upon receipt of the certificate, please upload a copy under the student document upload portal at [va.eku.edu](http://www.va.eku.edu) (<http://www.va.eku.edu>). Additionally, a Course Enrollment Form must be submitted online each

semester for which benefits will be used at [https://success.eku.edu/portal/omva\\_login](https://success.eku.edu/portal/omva_login) ([https://success.eku.edu/portal/omva\\_login/](https://success.eku.edu/portal/omva_login/)).

Covered individuals (defined by the VA as any individual who is entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill<sup>®</sup> benefits) may attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a Certificate of Eligibility (COE) for entitlement to educational assistance under chapter 31 or 33 (A "Statement of Benefits" obtained from the Department of Veterans Affairs' VA) website – eBenefits, or a VA Form 28-1905 form for chapter 31 authorization purposes can substitute for a COE) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the COE.

The University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds because of the inability to meet his or her financial obligations to the institution due to the delayed disbursement of funding from VA under chapter 31 or 33. If any late fees do appear, they will not be charged to the covered individual until after the 90-day period referenced above.

The Monthly Housing Allowance is calculated based upon the location of the campus where a student attends the majority of their classes, based upon Section 107 (FGIB). A "campus" may include internships, externships, training, practicums, etc. Students enrolled in 100% online programs will receive a reduced MHA amount, based upon their enrollment status. Hybrid courses must be certified at the on-campus rate, per VA regulations. All veterans and dependents who are eligible for benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008 (38 U.S.C. Section 3301 et seq.), or any other federal law authorizing educational benefits for veterans or dependents, will receive in-state tuition and fees.

Veterans needing assistance in obtaining a copy of their Joint Service Transcript or CCAF transcript should email [EKUVets@eku.edu](mailto:EKUVets@eku.edu) or call 859-622-2345.

## VA Regulations for Aviation Courses

Students using GI Bill<sup>®</sup> benefits to fund an aviation course must complete each flight lab within 19 weeks of initiation of the first flight event; failure to do so will result in the student being assigned a grade of NC (No Credit). Students using GI Bill<sup>®</sup> benefits must repay to the VA the cost (including a portion of stipends for living expenses) related to any course in which a grade of NC is earned. Important – All student participants receiving Veterans Administration benefits have 19 calendar weeks from the date of the first flight event to complete an Aviation flight lab.

GI Bill<sup>®</sup> is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at <http://www.benefits.va.gov/gibill> (<http://www.benefits.va.gov/gibill/>).

## Aviation Flight Hours & Costs/Fees

A complete listing of aviation related fees for the current academic year is published on the EKV Aviation Flight Fees website (<http://aviation.eku.edu/aviation-flight-fees> ([http://aviation.eku.edu/aviation-](http://aviation.eku.edu/aviation-flight-fees/)

[flight-fees/](http://aviation.eku.edu/aviation-flight-fees/))), and are included in materials provided by the flight instructors.

Additionally, all VA funded flight students receive this information from the EKV Office of Military and Veterans Affairs during their enrollment certification process. Students should verify through their regional Department of Veterans Affairs processing office if they have questions regarding their eligibility to use VA resources to complete the requirements of the EKV Aviation program.

## Kentucky National Guard Tuition Award Program

Active members of the Kentucky National Guard can utilize the Kentucky National Guard Tuition Award Program if they meet all eligibility criteria with the National Guard. Members must maintain all minimum standards, be eligible for all positive personnel actions, and have completed basic training or its equivalent. Eligible members will be awarded up to in-state tuition for full or part-time study at any Kentucky public college while funds are available. Members must apply to utilize the Kentucky National Guard Tuition Award Program each semester. The deadline to apply for the Fall semester is April 1, and the deadline to apply for the Spring semester is October 1. The application is available online at <https://ky.ngb.army.mil/tuitionstudent> (<https://ky.ngb.army.mil/tuitionstudent/>). For additional information, members can contact the Boone National Guard at (502) 607-1039.

## Survivors' and Dependents' Educational Assistance

DEA (Chapter 35) provides education and training opportunities to eligible dependents and survivors of certain veterans. For more information on DEA eligibility visit [www.vets.gov](http://www.vets.gov) (<http://www.vets.gov>).

## Kentucky Department of Veterans Affairs Tuition Waiver

If you are the child or spouse of a veteran who died while serving on active duty or is entitled to 100% VA disability, you may also be entitled to a tuition waiver in addition to your DEA benefits. Under the provisions of KRS 164.505, 164.507, and 164.515, children and spouses of Kentuckians who were killed in military action or who were permanently and totally disabled during military service are eligible for this waiver. For additional information contact the Kentucky Department of Veterans Affairs, Tuition Waiver Coordinator at (502) 503-7911. More information and the application form can be found at [veterans.ky.gov](http://www.veterans.ky.gov) (<http://www.veterans.ky.gov>).

## Student Health Services

Brenda Caudill, Director  
Rowlett 103

Phone: (859) 622-1761

Fax: (859) 622-1767

[www.healthservices.eku.edu](http://www.healthservices.eku.edu) (<http://www.healthservices.eku.edu/>)

The mission of Student Health Services at Eastern Kentucky University is to promote the mental and physical well-being of our students through disease prevention strategies and acute care of illness. Students are better equipped for academic success when they are physically and mentally healthy

Student Health Services has three primary goals: first, to address any acute medical condition that threatens health, interferes with function, reduces performance, and serves as an obstacle to learning and personal growth; second, to educate our student body on healthy lifestyle choices that promote wellness and reduce the chances of disease—the preventive approach; third, to serve as a source of information and access to community based assistance programs. Services provided at the Health Center include:

- Outpatient acute medical care
- Allergy shots
- Basic laboratory tests
- Certain immunizations
- Sexual health/STI testing and treatment\*
- Tuberculosis skin testing
- Gynecologic health\*
- Mental health

\*To make an appointment to see a provider for one of the starred issues above, please go to the SHS website and click on the icon at the bottom left corner of the home page: "Schedule Online Appointment". For all other appointments, call 859-622-1761.

## Student Life and First Year Experience

Dr. Loni Yost, Executive Director  
Powell 152  
Phone: (859) 622-3855  
[www.studentlife.eku.edu](http://www.studentlife.eku.edu) (<http://www.studentlife.eku.edu>)

The mission of Student Life & First-Year Experience is to enhance the quality of life of Eastern Kentucky University students by supporting the University's commitment to the academic success and holistic development of every Colonel. Our goal is to foster intellectual, physical, and social development through programs and direct services which challenge and support students as they develop attitudes, abilities, and skills for life-long learning within an ever-changing global environment. The first step to getting involved is visiting our website: [www.studentlife.eku.edu](http://www.studentlife.eku.edu) (<http://www.studentlife.eku.edu/>).

### Activities

At EKU, you'll do so much more than just go to classes and study. You'll meet new people. You'll have fun. You'll make lifelong memories. Check out upcoming events at [studentlife.eku.edu](http://studentlife.eku.edu) (<http://studentlife.eku.edu/>).

### First-Year Experience

First-Year Experience (FYE) serves to help you connect to EKU inside and outside the classroom and empower you with experiences and resources to make your first year a powerful, engaging experience. We strive to build all FYE programming on these three pillars:

- **Excite** your Colonel spirit by embracing EKU traditions and embarking on your individual "Eastern Experience."
- **Exchange** dialogue, ideas and perspectives with faculty, staff, and peers to connect with the greater EKU community.
- **Excel** inside and outside the classroom by establishing positive habits that will help make you a successful Colonel at EKU and beyond.

Our cornerstone FYE program, **Big E Welcome**, will allow you to build friendships and connections with other first-year students, equip yourself with skills to excel in the classroom, and truly welcome you into the EKU experience! Your Colonel Crew Leader (a current EKU student) will lead you through the festivities and share the weekend with you.

### Community Service

From disaster relief to blood drives, EKU students are changing the world one project at a time. Whether serving on an Alternative Break trip or right here on campus, our service projects offer you the opportunity to make new friends, build your network, and grow as an individual. Our projects fit perfectly into a wide variety of majors, minors, and concentrations to provide offerings that fit everyone's interests.

### Colonel's Cupboard

The Colonel's Cupboard is an on-campus food pantry that assists EKU students who may be experiencing food insecurity. We also offer toiletry items and clothing items through Closet TransForm housed within the Colonel's Cupboard.

### Fraternity & Sorority Life

EKU is home to a vibrant fraternity and sorority community with four governing councils: Multicultural Greek Council (MGC), National Pan-Hellenic Council (NPHC), Panhellenic Association (CPA), and Interfraternity Council (IFC).

Visit [greeklife.eku.edu](http://greeklife.eku.edu) (<http://greeklife.eku.edu/>) to learn more about the recruitment process and these values-based organizations focusing on scholarship, service, leadership, and life.

- **Scholarship** – Each chapter has scholastic standards members are required to meet.
- **Service** – Greeks regularly dedicate their time, talent, and treasure to bettering the world in which we live. This is accomplished through philanthropy and community service efforts.
- **Leadership** – Fraternity and sorority life provides a premier leadership opportunity on a college campus. Members have many opportunities to lead within the chapters and in the community.
- **Life** – Membership is a lifelong commitment. Fraternity and sorority members value brotherhood/sisterhood and being together for support and fellowship.

### Leadership

Cultivate your leadership skills to help you be successful during your time at EKU and beyond. Participate in leadership programs, workshops and conferences, and check out leadership lectures and special guest speakers throughout the year. Don't forget to check out the annual Student Excellence Awards recognition program!

### Parent & Family Programs

The EKU Parent & Family Network serves to empower EKU parents, family, and friends with resources, timely and important information, and programs to support the success of their Colonel. The network assists in helping families stay connected and informed on the EKU community. More information can be found at [www.familyprograms.eku.edu](http://www.familyprograms.eku.edu) (<http://www.familyprograms.eku.edu/>).

### Student Organizations

SL&FYE is home to a variety of Registered Student Organizations (RSO) that EKU students are welcome to get involved with at any time! RSOs at EKU include a group of 6 or more current EKU students who have formulated an organization for a common purpose. Student organization information can be found at [www.studentlife.eku.edu/student-organizations](http://www.studentlife.eku.edu/student-organizations) (<http://www.studentlife.eku.edu/student-organizations/>).

## General Academic Information

### The Office of Graduate Education and Research

Dr. Ryan Baggett, Dean  
Whitlock Building 310  
(859) 622-1744  
[gradschool.eku.edu](http://gradschool.eku.edu) (<http://gradschool.eku.edu>)

- Academic Information (p. 590)
- Academic Regulations (p. 591)
- Application and Admission to the Graduate School (p. 592)
- Degree Completion Requirements (p. 595)
- Grades (p. 597)
- Graduate Assistantships (p. 600)
- Registration (p. 600)

## Academic Information

### General Information

This section of the Graduate Catalog outlines the University's policies governing graduate programs. These policies are designed to assure academic integrity and the quality of graduate degrees attained through Eastern Kentucky University. All graduate students are expected to be familiar with these policies and to abide by them throughout their program of study at EKU.

Attendance in the Graduate School at Eastern Kentucky University is not a right. It is a privilege which may be withdrawn by the University or any area of graduate study if it is deemed necessary by the Office of Graduate Education and Research in order to safeguard the University's standards.

### Catalog Applicability

Students who are continuously enrolled in a graduate program will be governed by the catalog in force during the school year in which they were officially admitted to a graduate program. Graduate students who discontinue their enrollment for a period longer than 24 months must apply for re-entry to the Graduate School and be accepted for reinstatement by the graduate program. Students who are readmitted under these circumstances will be governed by the catalog in force at the time of re-entry.

Any currently active student may elect to comply with the catalog currently in force. Exceptions to this policy must be approved by the Office of Graduate Education and Research.

### Graduate Student Learning Outcomes

The Graduate School has adopted a core set of Graduate Student Learning Outcomes common to all graduate programs offered at EKU. While individual courses might not incorporate all of these, programs are

expected to demonstrate that they are contained in a graduate student's program of study.

When students graduate from EKU Graduate Programs, they will be informed, critical and creative thinkers who communicate effectively.

*Informed* thinkers demonstrate mastery of the significant ideas of, and skills and abilities demanded by, their discipline.

- SLO 1: Graduate students are able to explain, discuss, and apply clearly and accurately the key concepts and central theories, and demonstrate expertise appropriate to the discipline.

*Critical and creative thinkers* raise vital questions and problems with a clear and appropriate methodology; gather and assess relevant information in ways that distill accurate and appropriate meaning from abstract ideas; analyze assumptions through alternative systems of thought; and generate new knowledge or creative expressions through the self-reflective synthesis of problems, information, evaluation and analysis.

- SLO 2: Graduate students are able to formulate and express important/essential questions and issues related to the discipline with clarity and accuracy, and appropriate depth and breadth.
- SLO 3: Graduate students are able to identify, collect, analyze, and evaluate relevant information to understand essential questions and issues and to advance knowledge in the discipline.
- SLO 4: Graduate students are able to identify, analyze, and evaluate underlying assumptions of arguments, abstract ideas, and alternative perspectives and theories.
- SLO 5: Graduate students are able to generate new knowledge, application, or creative expressions through the self reflective synthesis of information, evaluation, and analysis of critical questions or issues/problems related to their discipline.

*Effective communicators* illustrate and successfully defend their point of view, information, analysis, and conclusions, using oral, visual, and written methods, in ways that demonstrate clearly and logically the appropriateness of their conclusions and the implications thereof.

- SLO 6: Graduate students are able to communicate clearly and logically using oral, written, and/or artistic forms.

### Class Attendance

Students must be registered in a class in order to attend and participate. Individuals not registered are prohibited from doing so.

Research shows that students who regularly attend class are more likely to succeed. EKU students are responsible for course work covered during all class periods, including the first class meeting. Each instructor will record absences and deal with them in a manner consistent with departmental policy for that course. Since attendance policies vary among departments and for courses within departments, students must be familiar with the policy printed on the course syllabus.

If a student presents the instructor with an adequate and documented reason for an absence, the instructor normally will give the student an opportunity to make up the work missed, if this is feasible. Adequate reasons involve circumstances beyond the student's control, such as personal illness, critical illness, or death in the immediate family, or participation in an approved University activity. No absence of any nature will be construed as relieving the student from responsibility for the

timely completion of all work assigned by the instructor. Initiating the request to make up class work is the student's responsibility.

### First Day of Class Attendance

This process is designed to ensure clear reinforcement of the message that class attendance at EKU is important. All faculty (undergraduate and graduate, online and all other modes of delivery) are required by the University to drop a student for being absent (or not participating online) on the first day of class/first week of class (as scheduled by the Registrar's Office). Students who know they will be absent should contact their instructor or the academic department office **prior to the 1st class meeting** to explain their absence and request that the instructor not drop them from the class.

Students are responsible for monitoring their class schedule and should never assume that missing the first day of class will automatically result in removal from that class. A student who never attends a class but remains enrolled will receive a failing grade in the course and is responsible for tuition and fees for that class.

### Graduate Cooperative Education

Graduate cooperative education provides the student with an opportunity to blend theory with practice resulting in a balanced education. Learning within the classroom is combined with practical on-the-job training in business, industry, and/or government.

The determination of eligibility for participation in the Graduate Cooperative Education Program is primarily an academic matter involving the department in which the student is majoring. Prior to enrolling in cooperative education, a graduate student should normally have completed nine (9) semester hours of graduate credit. All graduate students must have a 3.0 grade point average when applying for cooperative education.

Acceptance of a student into the program is also contingent upon the location of a suitable graduate level training site and an agreement with the employer to hire. The co-op student will normally be employed full-time for a period of one semester in accordance with the employer's schedule. The type of employment and the total hours of employment are determining factors in assigning co-op credit. The University requires a minimum of 80 hours of employment for each semester hour of academic credit for graduate co-op, field placement, practicum, internship and other such placements. The salary for each position is negotiable but must fall within state and federal wage guidelines. For additional information, contact the Office of Academic and Career Services at (859) 622-1296.

### Program Planning

At the time of admission to the Graduate School, each student shall be assigned an advisor by the department offering the degree program into which the student plans to matriculate. The student shall take the initiative to become familiar with the objectives of his/her particular degree program and pertinent regulations, as they are described in this Catalog, prior to scheduling a conference with the assigned advisor. Discussion of the student's personal and program objectives should take place prior to the first registration.

During the first term, the student must meet with his/her advisor as listed in DegreeWorks. Subsequent changes of the program plan are permissible, but must be approved on the appropriate exception form by the advisor, the department chair, and the Dean of the Graduate School.

## Student Responsibilities

Student success is an EKU priority. The General Academic Information section provides students with key information to help them succeed on the path toward completing a degree. All students should become familiar with the General Academic Information section of the Catalog as well as specific college and departmental program requirements. Being unaware of these regulations and requirements does not exempt a student from complying with the requirements. Only the Graduate Council has the authority to waive the basic requirements stated in this Catalog. No statements made by any person regarding waiver of admission/program requirements shall in anyway bind the Graduate Council.

### Use of Coursework from Non-Degree or Certification Programs on Degree Programs

Normally, no more than twelve semester hours of work earned as a certification or general non-degree student may be applied to a graduate degree. Only courses with 3.0 or above earned grade points may be applied, although a grade in any course taken as a certification or general non-degree student will be considered in computing a student's overall grade point average.

## Academic Regulations

### Academic Fresh Start

Academic fresh start allows graduate students who have been in a different graduate program from their current graduate program at EKU to void a portion of the work attempted during one or more semesters of the prior enrollment(s). EKU offers this option because it recognizes that some students fail to perform satisfactorily due to factors that interfere with their academic performance.

Students considering academic fresh start should make careful note of the following policy conditions:

1. The student must apply to a different graduate program than the one in which he or she was enrolled during the semester of the work to be considered for fresh start.
2. The student must have been out of the previously enrolled program for a period of at least one year after attempting the work to be considered for fresh start.
3. The student must not have previously participated in academic fresh start (or declared bankruptcy) of EKU work. Students can participate in Fresh Start only once.
4. Only semesters where the term GPA is below 2.0 will be considered for fresh start.
5. Within eligible terms (see d. above), only courses with grades of "C", "D", or "F" or the equivalent, may participate in fresh start.
6. Before formally requesting consideration for fresh start, the student must confer with experts in the Graduate School to determine which semesters may qualify for fresh start and the impact the fresh start program will have on the student's GPA. The student must then complete the graduate academic fresh start form indicating their intention to participate in academic fresh start to the Graduate School.

If fresh start is granted, the work will remain on the transcript but it will not be counted in the student's GPA and will not count toward degree requirements. Students admitted to a new degree program under this policy will only be admitted with probationary status and must meet the

requirements for probationary admission in order to maintain enrollment in the new graduate program.

## Academic Integrity

EKU students are expected to adhere to the highest standards of academic integrity. Students who are found guilty of academic dishonesty will be sanctioned in a manner that is appropriate to the infraction. Sanctions may range from receiving a failing grade on the assignment to being assigned a failing grade in the course. Stronger sanctions are possible in the event a case is assigned to the Student Disciplinary Council.

For a full description of academic dishonesty, including plagiarism, cheating, and fabrication, refer to the section entitled Academic Integrity Policy in the University Handbook for Students.

## Academic Load

The normal full-time course load for a graduate student is 9-12 credit hours. Exceptional graduate students may request permission from the Graduate Dean to register for additional course work, up to a maximum enrollment of 15 credit hours.

Graduate assistants are permitted to carry a maximum course load of 12 hours and a minimum load of nine hours of graduate work toward their program.

## Academic Probation and Dismissal

All graduate students are expected to maintain a 3.0 graduate grade point average at all times. Students falling below the 3.0 GPA will be placed on academic probation. One semester may be allowed for removing the GPA deficiency. Students who fail to achieve a graduate GPA of 3.0 or higher after their probationary semester will be dismissed from their graduate program. Students who wish to appeal their dismissal must do so within two year of the date of notification of dismissal. Reinstatement in the graduate program will be permitted only with the recommendation of the advisor and the department chair/program coordinator to the Office of Graduate Education and Research and approval by the Graduate Dean. Students on academic probation or who have been dismissed cannot take a course from another institution for the purpose of transferring the credit to their program.

## Cross Listed Courses

Some courses are offered under different prefixes with the same course content. Students will not be awarded credit in any course for which they have previously received credit under a cross listed prefix.

# Application and Admission to the Graduate School

## Application to the Graduate School

Students may apply to the Graduate School as either Degree-Seeking or Non-Degree students. The application and all supporting documents (transcripts, test scores, etc.) must be received at least two weeks prior to the beginning of the term in which the student wishes to enroll. Some graduate programs have earlier deadlines. Please check the Graduate School website for complete information regarding application deadlines.

## Required Application Materials: Degree-Seeking and Non-Degree Seeking

**Application**—Each student must submit a completed application with all requested information provided. Students may apply online at [gradschool.eku.edu/apply](http://gradschool.eku.edu/apply) (<http://gradschool.eku.edu/apply/>).

**Transcripts**—One official copy of transcripts from the degree-granting institution showing all grades received and any degrees or certificates that have been awarded must be provided by each applicant at the time of application. An official transcript must bear the seal and signature of the registrar from the sending institution. Graduates from all schools other than Eastern Kentucky University should contact their registrar(s) and request the official copy of their transcript be forwarded directly to:

Office of Admissions  
Eastern Kentucky University  
112 Whitlock Building CPO 54  
521 Lancaster Avenue  
Richmond, KY 40475-3154

If possible, submission of electronic transcripts through the National Student Clearinghouse is preferred. Official transcripts marked “Issued to student” or similar language, and submitted in an envelope sealed by the sending institution or certified in some other way may also be acceptable. Students seeking admission must be graduates of an accredited four-year institution of higher learning authorized to grant the degree.

## Required Application Materials: Degree-Seeking

**Entrance Examination Scores:** — At the time of their application for admission to degree programs, applicants must submit satisfactory official score reports from one of the following tests as required by their prospective program:

1. the general section of the Graduate Record Examination (GRE);
2. the Graduate Management Admissions Test (GMAT).

Please refer to the program areas for specific information on required tests and target scores. The GRE is required for all applicants wishing to be considered for Probationary Admission. See the section on Probationary Admission for additional information. All official test scores should be sent to:

Office of Admissions  
Eastern Kentucky University  
112 Whitlock Building CPO 54  
521 Lancaster Avenue  
Richmond, KY 40475-3154

Students can obtain GRE and GMAT information by visiting the Educational Testing Service at [www.ets.org](http://www.ets.org) (<http://www.ets.org>). GRE scores are valid for a period of 5 years following the date of test completion. Additional information for the GMAT and GRE can also be found at [www.mba.com](http://www.mba.com) (<http://www.mba.com>) and [www.gre.org](http://www.gre.org) (<http://www.gre.org>), respectively. The school code for Eastern Kentucky University is 1200. To schedule the Miller Analogies Test (MAT) students may contact the Office of Academic Testing at (859) 622-1281 or at [www.testing.eku.edu](http://www.testing.eku.edu) (<http://www.testing.eku.edu>).

**Letters of Recommendation**—Some graduate programs require letters of recommendation or will require applicants to provide contact references in support of an application. Requests for recommendation letters should be submitted within the application. Certain programs may withhold

admission until letters have been received. Please refer to program areas for specific requirements regarding letters of recommendation.

## Admission to the Graduate School

Admission to the Graduate School at Eastern Kentucky University is based upon evidence that the applicant has already attained a certain minimal academic proficiency and will be able to pursue creditably a program of graduate study in a given field. All programs assume certain formal and informal prerequisites. Normally any deficiencies in the program must be resolved at the time of admission.

Eligibility for admission to the Graduate School does not insure admission to a specific graduate program. Some programs may have additional requirements beyond the University minimums. All students who intend to pursue a particular graduate program should refer to the specific program requirements listed in the college and/or department section of this Catalog. In certain programs, the University may need to limit the number of students accepted for graduate work if the number of applicants exceeds the capacity of available facilities/faculty. In no case does meeting the minimum criteria for admission guarantee acceptance into the Graduate School or graduate program.

No student may receive graduate credit for a course without admission to the Graduate School. Attendance in the Graduate School at Eastern Kentucky University is not a right. It is a privilege which may be withdrawn by the University or any area of graduate study if it is deemed necessary by the Office of Graduate Education and Research in order to safeguard the University's standards.

### Categories of Admission for Degree-Seeking Students

After evaluation of an applicant's credentials by the appropriate department and by the Graduate School, the applicant will be notified by letter from the Office of Graduate Education and Research that

1. admission has been granted under one of the categories listed below, or
2. admission has been denied, or
3. a decision has been deferred.

The letter from the Graduate School will stipulate the conditions of admission and period of validity for the admission, or reasons for denial or deferral of admission. An applicant who has not received an admission, denial, or deferral notice 48 hours prior to the beginning of the final regular registration period should contact, in person, the Office of Graduate Education and Research for clarification.

### Clear Admission

Applicants who have submitted a complete application and meet the requirements for both general admission to the Graduate School and their selected graduate degree program are eligible for clear admission. The minimum requirements for clear admission to the Graduate School are:

1. A baccalaureate degree from an accredited institution.
2. An overall undergraduate grade point average (UGPA) of 2.5 (4.0 = A) of the baccalaureate program
3. Submission of acceptable official examination (GRE/MAT/GMAT) if required by the graduate program.

Individual programs may have additional or higher criteria for clear admission. A department may waive the requirements for clear admission

stipulated in 2 and 3 for applicants having earned a graduate degree from an accredited institution.

### Provisional Admission

An applicant unable to supply an official transcript showing the awarding of an undergraduate degree and/or official Entrance Examination scores, but who otherwise meets the admission requirements, may be granted provisional admission upon the recommendation of the appropriate department and approval of the Office of Graduate Education and Research. Complete and satisfactory credentials must be received by the Office of ECU Admissions before a student is permitted to register for any subsequent term.

A student will not be permitted to enroll in a graduate program with a provisional status for more than one semester. Provisional admission does not guarantee, in any way, subsequent clear admission. The Office of Graduate Education and Research reserves the right to withdraw without credit or refund any student for whom application is incomplete at the end of the first enrollment. International students may not be admitted on a provisional basis.

### Probationary Admission

An applicant who has submitted all required application materials but does not meet the minimum 2.5 cumulative GPA requirement may be considered for probationary admission. Applicants seeking probationary admission must submit valid GRE scores along with official transcripts at the time of application. To receive probationary admission, the applicant must show promise for successful graduate study and receive the recommendation of the appropriate department chair and approval of the Dean of the Graduate School. Students must be removed from probationary admission prior to registering in any graduate course work beyond an initial 12 hours. *Students who do not attain the required 3.0 GPA at the end of the term in which the nine-hour minimum was completed will be dismissed from the graduate program without appeal.*

After obtaining probationary admission, the minimum condition for transfer from probationary admission status to clear admission status is the successful completion of at least nine hours of approved graduate course work at Eastern Kentucky University with a graduate grade point average of at least 3.0 at the end of the term in which the nine-hour minimum was completed. Special course requirements or other conditions may be imposed by the department, College dean, and/or the Office of Graduate Education and Research.

The Office of Graduate Education and Research will inform the student of all conditions for consideration for clear admission at the time the student is granted probationary admission status. Since the transfer from a probationary admission status to a clear admission status requires the successful completion of graduate course work at Eastern Kentucky University, no student should attempt to take graduate course work for transfer from another school during the probationary admission period.

A student admitted under probationary admission may not attempt any graduate course work graded pass-fail. In the case where specific courses have been designated by a program for the satisfactory-unsatisfactory grading mode, a maximum of three hours of course work graded satisfactory-unsatisfactory may be permitted during the initial 12 hours. A student in probationary status may not hold an assistantship without first achieving clear admission status. International students may not be admitted on a probationary admission basis.

## Admission Appeals

Students who apply but are denied admission to the University may submit an online admissions appeal form to be reviewed by the Graduate Council Executive Subcommittee in consultation with the graduate program's coordinator. The subcommittee will carefully consider all aspects of the applicant's situation, including academic record, GRE or GMAT scores which indicate the applicant has met benchmarks in the academic readiness for graduate level education. If granted admission by the subcommittee, students will partner with their faculty advisor to develop an academic success plan, specifying academic expectations and requirements for remaining enrolled at the University. The link to the admission's appeal form and information regarding the appeals process can be found on the EKU Graduate School's website.

## Non-Degree Admission

### General Non-Degree Admission

An individual wishing to take graduate courses at Eastern Kentucky University for personal or professional development, but who does not plan to pursue a graduate degree program, may be admitted as a non-degree student with the approval of the Office of Graduate Education and Research. Non-degree students must hold a baccalaureate degree from an accredited institution and must have a minimum overall undergraduate grade point average of 2.0 (4.0 = A). Non-degree students are not eligible for graduate assistantships or financial aid offered through the University.

A former or currently enrolled non-degree student may apply as a degree-seeking student. The student must meet all criteria for clear admission as stipulated above. Students admitted as General Non-Degree are not eligible for any form of Financial Aid offered through the University.

### Certification Admission

An individual wishing to take graduate courses in the College of Education and Applied Human Sciences as a part of initial or additional certification programs, or Rank I classification programs, is eligible for certification admission. However, students pursuing only Rank I are not eligible for Financial Aid. Students seeking Certification Admission are strongly advised to contact Big E Central to determine their eligibility.

A former or currently enrolled certification student who wants to apply for admission to a graduate degree program must submit an application for admission and all supporting documents and any required entrance examinations as listed in this *Catalog* under the section **Application to the Graduate School**.

Admission as a certification or general non-degree student does not guarantee subsequent clear admission into a graduate program. Graduate credit earned as a certification or general non-degree student may be applied to a degree program only when the student meets all the minimum admission requirements; is granted clear admission after initial application; and approval is granted by the appropriate department, the college dean, and the Dean of the Graduate School. Normally, no more than twelve semester hours of work earned as a certification or general non-degree student may be applied to a graduate degree. Only courses with 3.0 or above earned grade points may be applied, although a grade in any course taken as a certification or general non-degree student will be considered.

## Visiting Student Admission

Because of its unique programs and facilities, faculty, diversified institutes and workshops, Eastern Kentucky University is attractive to many students who have been previously admitted to other accredited

graduate schools. In order for a visiting student to be officially enrolled for graduate credit at Eastern Kentucky University, the student must file an application form and submit an official Visiting Student Certificate. The Visiting Student Certificate must bear the seal of the Graduate School and the signature of the Graduate Dean where the student has been admitted.

## Concurrent Enrollment

An Eastern Kentucky University undergraduate student who needs 30 or fewer credit hours to complete all of the requirements of the baccalaureate degree may be considered for undergraduate concurrent enrollment to the Graduate School. To be eligible for undergraduate concurrent enrollment, the student must have an overall undergraduate grade point average of at least 3.0 at the time of review. The student must maintain an overall undergraduate grade point average of at least 3.0 and a graduate grade point average of at least 3.0 to continue in the undergraduate concurrent program. Students may earn a maximum of 9 graduate credit hours while holding undergraduate concurrent admission status. A maximum academic load of 15 hours during a regular fall or spring semester and of nine hours during the summer session is permissible when the student is concurrently enrolled in graduate and undergraduate level course work.

The concurrent enrollment form should be initiated by the student at least 30 days prior to requesting enrollment in any graduate classes. Undergraduate concurrent enrollment to Graduate School must be supported by all appropriate advisors and college deans, as well as the Dean of the Graduate School.

**Note:** Federal regulations permit undergraduate students to receive financial assistance **only** for coursework required for their current degree program. Students who are enrolled in both undergraduate and graduate course work in the same semester **may receive less financial aid** than if only enrolled for undergraduate course work. Students are advised to contact Big E Central to find how their financial aid amount would be adjusted for mixed enrollment.

## O'Donnell Scholarship

If you are at least 65 years old and hold a bachelor's degree from an accredited institution, you may be granted admission to a degree program with a waiver of tuition. Refer to the "Required Application Materials" section of the catalog.

## Readmission

All graduate students who have not been enrolled at Eastern Kentucky University for a period longer than 24 months, or have withdrawn from the University, must submit a new application to the Graduate School and be accepted for reinstatement by the graduate program before being permitted to register for graduate coursework. Please note that programs within the College of Education and Applied Human Sciences may require readmission after 12 months.

## International Student Admission

Eastern Kentucky University welcomes applications for graduate study from all qualified international students. The criteria for admission to the various programs of graduate study at this institution are the same for all students, but the United States Immigration laws impose certain additional requirements by which all U.S. institutions of higher education must abide in admitting international students.

Admission procedures for all international students are developed in compliance with existing laws of the United States Department of

Justice, Bureau of Citizenship and Immigration Services. International students are strongly encouraged to visit the Graduate School website at [www.gradschool.eku.edu](http://www.gradschool.eku.edu) (<http://www.gradschool.eku.edu>) for additional application materials and instructions.

Applications for admission of international students are not considered complete without:

1. Official transcripts (if in the States) or course-by-course foreign credential evaluation showing applicable U.S. baccalaureate equivalency. You must have a minimum cumulative GPA of 2.5 to be eligible for admissions review.
2. English Language Proficiency Exam: TOEFL (Test of English as a Foreign Language) - 550 Paper Based, 79 for Internet-Based, or 213 by Computer or IELTS (International English Language Testing System) - A minimum score of 5 on each section - Listening, Reading, Writing and Speaking and a minimum score of 6.5 on the overall band score. TOEFL and IELTS scores are valid for a period of two years from the date of test completion. ELS (English Language Services) - Students who receive conditional admission when applying to EKU Graduate School qualify to participate in the program. Students must obtain an ELS Level 112 Intensive English for Academic Purposes certificate in order to qualify for admission.
3. Official entrance exam (GRE, MAT, GMAT) scores. The target scores vary per program course of study.
4. Declaration and Certification of Finances. Must show financial support that covers cost of attendance for the academic year.
5. Bank or scholarship letter. Bank letters are valid six months and scholarship letters are valid one year from the date on the letter.

The completed application and all official admissions materials must be received by the Office of EKU Admissions within two weeks of the start date of any given semester. Appropriate I-20 forms will be issued after all official credentials have been received and admission is granted. The U.S. Bureau of Citizenship and Immigration Services requires certification that all standards for admission have been met before the I-20 form is issued. Please see below for additional information concerning international student admission to Eastern Kentucky University.

### Conditional Admission - International Students

International students who meet all graduate admission requirements except the English Language Proficiency (TOEFL, IELTS, or baccalaureate degree from Institution where English is the native language) may be eligible for Conditional Admission. Conditionally Admitted international students will be referred to the English Language Services (ELS) program. Students must then enroll in the ELS program and begin their intensive English language study. Students are eligible to enroll in graduate courses for the program to which they have been conditionally admitted upon successful completion of the ELS program with an Exit Exam Competency Level 112 Intensive English for Academic Purposes.

For students who do not meet the exemption requirements for Entrance Exams (GRE/MAT/GMAT), Conditionally Admitted students must successfully complete the Entrance Exam requirement established by the program before they can be moved to Clear Admission status.

Applicants are advised that not all programs will offer Conditional Admission. Please review the information on the ELS website for specific questions about the intensive English language program.

### Health Insurance Requirement

Health insurance coverage is mandatory for every international student on an F-1 or a J-1 visa enrolled at Eastern Kentucky University (EKU). All international students will be automatically enrolled in the Eastern Kentucky University's health insurance plan at the time of class registration. The charge for coverage will be automatically added to your bill each semester. For more information, contact [international@eku.edu](mailto:international@eku.edu)

### University Housing

For complete information on housing, contact the Housing Office, Whitlock Building 552 or email: [housing@eku.edu](mailto:housing@eku.edu)

### Visiting Scholars

Visiting scholars at the graduate level may be admitted as non-degree students on the strength of their academic credentials by submitting transcripts and certificates of degrees. Scholars who are applying for the J-1 visa program must satisfy their host department and the J-1 Responsible Officer as to their academic preparation and their English language ability. The TOEFL or IELTS tests are not a requirement for such candidates; instead, they must demonstrate to the host department their ability to use English as necessary in their specific field or discipline. Visiting scholars will be issued the form IAP-66 by the Responsible Officer and must follow the regulations of the State Department as regards J-1 visa holders.

## Degree Completion Requirements Application for Graduation

A student planning to receive a university certificate, master's, specialist's or doctoral degree must apply for graduation prior to the deadline established by the Office of Graduate Education and Research. Students will be billed a \$55.00 graduation fee. This graduation fee only partially offsets the full cost of commencement celebrations and production and mailing of diplomas and certificates. The University absorbs cap, tassel, and gown costs for degree-earners who participate in the Commencement ceremony. Only students who are participating at Commencement receive complimentary regalia. Complimentary regalia will not be mailed to students who graduate but choose not to walk at Commencement.

Applications received after the deadline will be assessed a late charge. For application deadlines and late charges see the Graduate School Graduation website: [gradschool.eku.edu/graduation-commencement](http://gradschool.eku.edu/graduation-commencement) (<http://gradschool.eku.edu/graduation-commencement/>). (<https://gradschool.eku.edu/graduation-commencement/>)

Candidates for Ed.D doctoral degrees are required to schedule their dissertation defense before applying for graduation. Candidates who are unable to complete thesis, dissertation, or other requirements for graduation during the term for which they have applied for graduation may have their application deferred for up to one year. Candidates who fail to complete all requirements within the year must reapply for graduation.

Students will be considered candidates for graduation only if they have an overall and program graduate grade point average of 3.0 or higher at the beginning of the term in which they wish to graduate. The Office of Graduate Education and Research may not accept an application for graduation from a student who is not eligible to be considered for graduation.

## Graduation Academic Regalia

Students order and pay for commencement regalia (cap, tassel, hood, and gown) through the EKU Barnes & Noble bookstore (<https://registrar.eku.edu/graduation-celebrations> (<https://registrar.eku.edu/graduation-celebrations/>)). Refer to the Graduation Information website for more details regarding graduation fees, Doctoral Participation and order form and/or commencement.

## Degree Conferral Dates

The Board of Regents of Eastern Kentucky University approves the conferring of degrees four times per year. These conferral dates represent confirmation that all degree and/or university certificate requirements have been met by that date. The formal conferral date is posted to the student's academic transcript and is the date printed on the diploma and certificate.

Below are the EKU degree conferral dates:

Semester	Date
Fall A (end of first 8 weeks)	October: Last day of Fall A Term
Fall (end of full semester)	December: Last Day of Full Semester
Winter	January: Last Day of Term
Spring A (end of first 8 weeks)	March: Last Day of Spring A Term
Spring (end of full semester)	May: Last Day of Full Semester
Summer A (end of first 6 weeks)	July: Last Day of Summer A Term
Summer (end of full semester)	August: Last Day of Full Semester

## Diploma and University Certificate Production

Diplomas and University Certificates are produced and mailed to students after all final grades are reviewed and it has been confirmed that all degree requirements have been met. The graduation confirmation process takes several weeks to complete. Therefore, students should expect to receive their diploma 6-8 weeks after the end of finals week. Students who are indebted to the University will not have their transcript or diploma released until the debt is paid. Any questions regarding student financial obligations should be directed to Big E Central.

## Locking Academic History

(After Degree Has Been Awarded)

Once a degree has been conferred the academic record of all work contributed to the awarded baccalaureate, master's, or doctoral degree is locked. No course grades may be repeated or replaced for any classes used toward the conferred degree.

The Office of the Registrar takes great care to ensure that each student's academic record is accurate. Any student who believes an error has occurred should immediately bring this to the attention of the Office of the Registrar. Students have one calendar year after a degree is awarded to identify any item on their academic record believed to be in error. After that time the record is considered to be permanent. Please note that grade challenges have a different timetable and must always be directed to the chair of the department which offered the course in question. For details regarding the timetable and process for grade challenges please refer to the student handbook at <http://studentaffairs.eku.edu/studenthandbook> (<https://dos.eku.edu/>).

## Time Requirements

For master's degree programs of 40 or fewer hours, a graduate student is expected to complete requirements for the master's degree no later than seven years after beginning course work (e.g., a student whose initial registration for courses was Fall 2018 must complete the program in order to include this course work by the end of the Summer term 2025). For degree programs of 41 or more hours, a graduate student is expected to complete requirements for the degree no later than ten years after beginning coursework. The minimum time interval required for completion of a graduate degree is two semesters of full-time study.

## Minimum Hours Required

All master's degree programs require a minimum of 30 semester hours. All specialist's degree programs require a minimum of 60 hours of approved graduate coursework beyond the baccalaureate degree. Some programs require additional hours that exceed this minimum.

At least half of the total course work, shall be in courses open only to graduate students (800 level).

## Theses and Dissertations

Students who submit a thesis in partial fulfillment of the master's or specialist's degree, or a dissertation in partial fulfillment of the doctoral degree must prepare it in conformity with the regulations approved by the Graduate Council. An approved template is available on the Graduate School website ([gradschool.eku.edu/thesis-guidelines](http://gradschool.eku.edu/thesis-guidelines) (<http://gradschool.eku.edu/thesis-guidelines/>)). The electronic copy of the thesis or dissertation in Microsoft Word document format must be submitted to the Office of Graduate Education and Research at least three weeks prior to the end of the term. Electronic copies will be posted in EKU's Encompass institutional repository and in the ProQuest EMI database.

Theses and dissertations must be developed under the direction of a committee consisting of at least three tenured, tenure-track, or retired faculty members who hold Graduate Faculty status at Eastern Kentucky University. Committees of larger than three are acceptable. However, the majority of faculty members serving on a committee must be EKU tenured, tenure-track, or retired faculty holding Graduate Faculty status. Comprehensive exam committees, and thesis/dissertation committees must be chaired by a Graduate Faculty member on tenure/tenure-track appointment.

## Exit Competency Requirement

All candidates for graduate degrees shall perform satisfactorily on the appropriate exit competency for their selected program of study. Exit competencies may be in the form of a thesis or dissertation, including an oral defense, a written or oral comprehensive examination, a capstone course, portfolio evaluation or other suitable project. Exit competencies are not to be given while the student's overall or program graduate grade point average is below 3.0.

Exit Competency requirements should be designed by the program in a manner that synthesizes central elements of the student's graduate program and should be aligned with the Graduate Student Learning Outcomes described elsewhere in the Graduate Catalog. Candidates for the exit competency must register for the appropriate section of GRD 8X7 or 8X8, a thesis or dissertation course, or a program capstone course in the term for which they wish to attempt the exit competency. Committee chairs shall certify the results of the completion of the exit competency

by submitting a grade of S, U, or IP for GRD 8X7 or 8X8, or grades for thesis, dissertation and capstone courses.

The department's comprehensive exam appropriate graduate committee must develop a remediation plan for any student who fails the program's exit competency requirement. The remediation plan must address all academic deficiencies identified in the exam exit competency and must be submitted to (approved by) the Office of Graduate Education and Research before a second attempt at the exit competency is permitted. Additional courses or thesis work may be required of a failing student. A review period of not less than 30 days nor more than one year is required of candidates who fail the exit competency requirement for Master's degrees or specialist credentials. Doctoral programs may establish more stringent requirements on the development of a remediation plan and review period, provided that they are published in the Exit Requirements section of the Graduate Catalog for the program.

## Continuing Enrollment

Graduate students who have completed all course requirements but have grades of IP (In Progress) for theses, dissertations, practicum and/or internships will be automatically enrolled in GRD 899 Continuing Enrollment. Continuing Enrollment allows students to access EKU Libraries, use lab facilities, etc. for up to one year while In Progress work is being completed. A Continuing Enrollment Fee will be assessed for each term in which a student is enrolled in GRD 899 Continuing Enrollment. While a student is enrolled in GRD 899 Continuing Enrollment, the student will remain in Active status and will be considered as being enrolled as a half-time student.

## Additional MBA Degree Requirements

According to AACSB International business accreditation standards, students enrolled in University graduate degree programs, other than those within the EKU Business, will not receive credit toward their degree completion requirements for more than 50 percent of their graduate programs in credit hours in courses offered through EKU Business and/or business courses (courses commonly taught in a college of business) transferred from other colleges and universities or taken from other units within EKU.

## Second Master's Degree Requirements

Graduate students seeking a second master's degree must file an application for admission to Graduate School for the new degree program. A student may apply for admission to a second graduate program any time after they have applied for graduation in their first program. Students are eligible for admission to a second degree program after they have been certified for completion of the first degree program by the Graduate School. Students may not register for coursework in the second degree program until they have been admitted to that program by the Graduate School.

Coursework taken in a prior graduate program may be applicable to a second master's degree. The maximum number of hours that can be used in a second program is subject to the limits set forth in the Graduate School's policy on transfer of credit. Prior coursework used toward a second degree must fall within the time-to-degree limits and must be approved by the faculty advisor, graduate program coordinator and/or department chair, and the Dean of the Graduate School.

## Specialist's Degree Requirements

The University offers advanced graduate work leading to the Specialist in Education. Beginning graduate students interested in two-year programs with special preparation for teaching or professional service opportunities in post-secondary technical school, junior or senior colleges should seek early advisement in order to assure proper program development. Students should refer to the appropriate college/department section for specific admission and program requirements.

## Grades

### Grading System

#### Graduate Letter Grades

Grade	Meaning	Grade Points per Hour
A	Excellent	4.00
B	Good	3.00
C	Average	2.00
D	Failure	0.00
F	Failure	0.00
FN	Failure <sup>1</sup> - Stopped Attending Class	0.00
FX	Failure - Academic Dishonesty	0.00
I	Incomplete	0.00
IM	Incomplete Due to Military Activation	0.00
P	Passing	0.00
S	Passing	0.00
U	Failure	0.00
UN	Failure <sup>1</sup> - Stopped Attending Class	0.00
W	Withdraw	0.00
WM	Withdraw Due to Military Activation	0.00
AU	Audit	0.00
CR	Credit Only	0.00
IP	In Progress	0.00
NC	No Credit	0.00
NR	Not Reported	0.00

<sup>1</sup>

FN/UN: Students who stop attending/participation in online courses and do not resume participation have unofficially withdrawn from the class. This act may have significant financial aid repercussions. EKU is required by the U.S. Department of Education to provide a last date of attendance/participation for such students.

Throughout this *Catalog*, specific grade requirements are to be interpreted precisely as stated. Thus, if a requirement specifies that a grade of at least "C" is required, a "C-" will not satisfy the requirement. If it is intended that "C-" is to be allowed, a "C-" will be listed rather than "C." This applies to all specific grade requirements.

The grade point average (GPA) is based on those courses in which a student earns a normal letter grade ("A"- "F", or "U"). The overall graduate grade point average includes all graduate course work taken by the student at any institution at any time unless specifically excluded. The

program graduate grade point average includes only those courses included as a part of the student's planned program.

### Incomplete Grade Agreement

When a student has extenuating circumstances that impede him/her from completing a course, an incomplete grade may be awarded as a temporary final grade. The incomplete grade cannot be used simply because a student has failed to complete the work in the course or as a means of raising the student's grade by doing additional work after the grade report time. Students must request an incomplete grade from the faculty member prior to the last day of class when a student wishes to pursue an incomplete grade. If the instructor agrees that the student has extenuating circumstances beyond his/her control and the instructor agrees to assign an incomplete grade, the instructor must complete an Incomplete Grade Agreement detailing all outstanding assignments and/or conditions needed to complete the course, and a due date for each assignment.

An incomplete grade may not be given as a midterm grade. Any student given an incomplete is expected to have satisfactorily completed at least 60% of the course.

The following procedure applies when an instructor has agreed to assign a grade of "I" for students who are unable to complete the course because of extenuating circumstances.

1. On the Incomplete Grade Agreement, the instructor will identify all outstanding assignments and/or other conditions needed to complete the course, and due dates for each assignment.
2. Faculty are strongly encouraged to give students the shortest reasonable time period in which to complete the work. The longest possible time period is the end of the next regular semester (fall/spring); however, typically it benefits students to complete work before they begin classes the next semester.
3. The Incomplete Grade Agreement must be signed by the faculty member, student, chair of the department offering the course, and dean of the college offering the course. Student approval of the terms of the Incomplete Agreement can be submitted electronically, and attached to the form. Chairs should assure that the Agreement includes reasonable due dates for completing the work, and all signatures.
4. The Incomplete Grade Agreement must be received by the Registrar's Office no later than 15 university business days past the deadline for final grade submission. While the faculty will be able to submit the "I" grade through the online grade submission process, any "I" grade that is not accompanied by an Incomplete Grade Agreement within 15 university business days of the advertised final grade submission deadline will be converted to an "F"
5. Outstanding work must be completed by the student and a Grade Change form must be submitted by the instructor to the Registrar's Office by the deadline noted on the Incomplete Grade Agreement. If a grade change is not submitted by the established deadline, the incomplete will automatically default to a failing ("F") grade.
6. If, due to extenuating circumstances, a student is unable to complete the contracted course work to fulfill the incomplete course by the deadline on the Incomplete Grade Agreement, the student has the option of requesting a one-time, one semester extension to the incomplete deadline. The student must initiate the request through the instructor before the original deadline. Approval of the extension of an incomplete grade is not automatic and depends on the student's unique circumstances.

A grade of "IP" is available for courses which the graduate faculty has anticipated may take more than the normal semester, such as thesis. "IP" grades are available only in courses which have been approved to receive "IP" grades by the Graduate Council and the Council on Academic Affairs. A student assigned an "IP" grade for internship, practicum or self-paced courses must complete requirements within the calendar year after the "IP" is awarded to receive credit for the course. If requirements are not completed, the Registrar will change the "IP" grade to "NC" (No Credit), and the student must register again for the course to receive credit. Grades of "IP" for thesis must be changed within seven years.

A degree cannot be awarded to a student with any incomplete or non-recorded (NR) grades for ECU courses on his/her record. Any student who is a pending graduate with unresolved ECU incomplete grades ("I") will be given the choice of either accepting an "F" for the course (or "NC" for unresolved "IP" grades) or being deferred to the next term for graduation consideration.

### Grade Appeals

If a student believes that the final grade assigned in a course is unjustified, that student should consult the instructor, seeking a satisfactory explanation. If, after doing so, the student still feels that the grade is unjustified, the student may appeal the grade, in writing, to the department chair. A written appeal must be filed with the chair within 30 days after the beginning of the next semester (exclusive of summer session). Refer to the University Handbook for Students for complete policy concerning grade appeals.

### Repeating Courses and Grade Calculation

Students may repeat a graduate course one time for the purposes of grade replacement, as long as the repeat is not prohibited by the policy of the graduate program. Individual graduate programs may impose limitations on course repetitions, and the student should consult with the advisor and/or graduate program coordinator/department chair for the program's policy regarding repeat of courses. An enrollment is counted as a repeat if previous enrollment in the course resulted in a passing or failing grade. For repeated courses, the best grade earned will replace a lower grade in calculations of the student's term and cumulative GPA. The grade replacement occurs irrespective of whether the lower grade was earned in the original taking of the course or in a repeat enrollment.

The repeated course and grade will still appear on the transcript but with the notation indicating whether the grade is included or excluded from the student's GPA. If a student attempts to repeat a course and replace the grade but then withdraws from the course, that course attempt will not be counted among those for which grade replacement is available.

Students who repeat a course in which they earned a failing grade, and fail the course again, will have the most recent failing grade included in the GPA.

A graduate student may enroll in a course for the third time (second repeat) only under unusual circumstances and with the written approval of the advisor, the department chair/program coordinator of the student's major, the dean of the college of the student's major, and the Dean of the Graduate School. If a student enrolls in a course for a third or subsequent time without approval, the student may be administratively withdrawn from the course. The grade earned in a course taken at another institution will not replace a grade earned at Eastern Kentucky University. A grade of "S," "CR," or "P" will not replace a letter grade.

## Grade Change

All grade changes must be made by the following deadlines:

- for fall semester grades—the last day of classes for the following spring semester; and
- for spring and summer semester grades the last day of classes for the following fall semester.

## Changes to Transcript

Once a degree has been posted to the transcript, changes will not be made to courses or grades earned prior to the posting of the degree. Transcript Notations

A student's academic standing (good standing, academic probation, academic suspension, or academic dismissal) is determined at the conclusion of each semester and is notated term by term on the student's transcript.

Expulsion is the permanent separation of a student from the institution. Expulsion at EKU is restricted to the most egregious academic or disciplinary offenses. Expulsion, due to its permanent nature, is notated on the official transcript with the comment, "Expelled – ineligible to return".

Details of due process that can lead to expulsion of a student can be found in the Eastern Kentucky University Handbook for Students. For process and sanction details refer to the Office of Student Conduct and Community Standards <http://studentrights.eku.edu/student-conduct>

## Pass-Fail Grades and Audit

The Pass-Fail and Audit options are available for students who wish to take graduate courses for their own professional growth or personal interest. Not all courses are approved to be taken as Pass-Fail or Audit. The Office of the Registrar will verify the course is approved to be taken as Pass-Fail or Audit. Courses taken Pass-Fail or Audit may not be used in any graduate program. Students may select the "Pass-Fail" option by completing the Audit/Pass-Fail registration form, available from the Office of the Registrar. Students may change to or from the Pass-Fail option by the date specified each semester in the *Colonel's Compass*. The student must submit to the Registrar's Office the completed form as authorization to change their registered course to Pass-Fail.

## Satisfactory-Unsatisfactory ("S"- "U") Grading System

Some courses are approved to be taught exclusively on a "Satisfactory" ("S") or "Unsatisfactory" ("U") basis. Each student enrolled in the class will receive either a grade of "S" or "U." Hours passed under the Satisfactory-Unsatisfactory option will not be used in the computation of GPAs; however, hours failed ("U") will be used. A few courses such as practicum, internship, and thesis, which have been specifically designated by the department for satisfactory-unsatisfactory grading only, may be used on any graduate program.

## Graduate Course Credit

All 700 level courses have undergraduate 500 level counterparts bearing the same last two digits. The 700 level courses are offered only for graduate level credit and require additional appropriate experiences for all students enrolled. Credit will not be awarded for both the 500 and 700 level of the same course. Students who have previously taken the undergraduate counterpart of these courses at the 500 level will not be permitted to enroll for graduate level credit in the 700 level counterpart. Courses numbered in the 700 and 800 series are open only to graduate

students or to undergraduate students granted concurrent enrollment or admitted to a 3+2 dual-degree program. Courses in the 900 series are open only to doctoral students.

Correspondence courses from any source are not applicable for graduate credit.

Graduate level courses are expected to require a minimum of four hours of outside preparation for every hour of lecture. Course syllabi are to reflect these expectations. Graduate courses other than those which are independently directed, shall be based upon a minimum of 12.5 clock hours of contact per hour of graduate credit. Workshop courses shall have a minimum of 25 clock hours of contact per hour of graduate credit. All credit producing experiences shall be based upon a minimum of one week of instruction per hour of graduate credit. The University requires a minimum of 80 hours of employment for each semester of academic credit for graduate co-op, field placement, practicum, internship and other such placements.

## Transfer of Credit

A student may transfer from other accredited or professional graduate schools up to 12 hours of course work that has been accepted by their Master's or Specialist degree program without transferring in all graduate course work taken at that institution. Up to 15 hours of coursework may be transferred into graduate degree programs requiring 45 or more hours and up to 18 hours for graduate degree programs requiring more than 54 hours. Only the transferred work for the degree program will be used to calculate the overall grade point average. Any programs covered by an articulation agreement between Eastern Kentucky University and other colleges or universities are excluded from the 12-hour transfer limit.

Official copies of transcripts must be submitted and evaluated before any transfer credit can be accepted. Certain courses submitted for transfer may not be considered equivalent to specified program requirements even though course titles are the same. Official requests for transfer of credits must be recommended by the student's advisor, the department chair, the college dean, and approved by the Office of Graduate Education and Research. Students who would like to enroll in courses at another institution while enrolled at EKU and expect to transfer credits to meet program requirements at EKU should obtain official approval prior to registration for the courses at the other institution. Official transcripts of approved transfer credits must be submitted to the Office of Graduate Education and Research within 30 days after the course has been completed.

Office of Graduate Education and Research  
Eastern Kentucky University  
Whitlock 310, CPO 68  
521 Lancaster Avenue  
Richmond, KY 40475-3168

Transfer credits taken during the final semester of a program will delay graduation and certification approval until official transcripts have been received in the Graduate School Office. If transfer work is taken during the semester in which a student is to graduate with a degree, the official graduate school transcript must be received in EKU's Office of Graduate Education and Research within two (2) weeks of the end of the semester.

Credits earned at other institutions may be transferred only when grade points of "B" (3.0 on a 4.0 scale) or above has been earned. The credit-producing experience must be taught by a graduate faculty member with scholarly competence in the subject matter area to be considered for transfer. Graduate credit for "special workshop courses" may be

considered for transfer only when it can be clearly documented that the course in question meets Eastern Kentucky University's graduate instructional standards and is clearly distinguishable from undergraduate work and from continuing education activities. Students on academic probation cannot take a course from another institution for the purpose of transferring the credit to their program.

## Graduate Assistantships

Graduate assistantships are positions given to the most outstanding students. Duties may include laboratory supervision, teaching, and research related tasks. Stipends are competitive and assistantships supported through the Graduate School include a partial tuition waiver of six graduate hours per semester for a full-time appointment. Additional assistantships are available through the Office of Housing & Residence Life and other academic and administrative units and many of these also provide a partial tuition waiver.

Graduate Assistants (GAs) are appointed by the individual departments of each college and subject to the approval of the Graduate School. Questions regarding application for appointment should be directed to the graduate coordinators of that department.

Graduate Assistants must be enrolled in a graduate degree program and must be enrolled in a minimum of 9 hours of graduate coursework applicable to their degree. Students in their final semester of graduate study who have applied for graduation may hold an assistantship with less than full-time enrollment. Graduate Assistants must maintain and overall graduate GPA of 3.0 or higher. Students admitted to the Graduate School on Probationary Admission are typically not eligible for Graduate Assistantships. Graduate Assistantship appointments are limited to no more than 4 academic terms, excluding summers. Exceptions may be granted for programs exceeding 40 semester hours. Students may receive support in a second subsequent graduate program provided that they have completed all requirements for their first degree. Assistantships will not be awarded for a third master's program.

Additional on-campus employment for graduate assistants is normally not allowed. Under exceptional circumstances, additional on-campus may be considered for students who have completed 18 or more hours toward their graduate program with a graduate GPA of 3.5 or above. Graduate assistants who meet these conditions may be eligible for additional employment of up to 7.5 hours/week (17.5 hours/week for graduate assistants on half-time appointments). Additional employment must be recommended by the student's academic advisor and department chair and are subject to approval by the Graduate Dean. Requests for additional employment and additional information are available on the Graduate School website. International students on student visas may not be eligible for additional employment.

## Registration

Graduate students may register via the Web at [www.eku.edu](http://www.eku.edu) (<http://www.eku.edu>) (click on **myEKU**) on the dates stipulated in the Colonel's Compass (also found at [www.eku.edu](http://www.eku.edu) (<http://www.eku.edu>); look underneath **myEKU**, and click on "Colonel's Compass"). Students should consult with their advisors. The student bears the responsibility for courses scheduled, subject to the policies and approval of the Office of Graduate Education and Research. The student is responsible for registering a motor vehicle, housing arrangements, and payments of all fees and assessments in accordance with prevailing University policy.

Students with interruptions of study on campus who wish to participate in registration should notify the Office of Graduate Education and Research of their plans to continue study, furnishing full names and social security numbers, at least two weeks in advance of the published registration dates.

## Change of Schedule

The University reserves the right to cancel a course when the registration is not sufficient to warrant its continuance, to divide classes if the enrollment is too large for efficient instruction, and to change instructors when necessary. Additional courses will be organized if the demand is sufficient.

The Graduate School reserves the right to suspend or alter registration orders not in consonance with the individual's planned program or in the instance of closed or canceled sections. Program modifications should be accomplished through the regular add-drop procedure on the dates designated.

Students who are assigned a grade of "F" in a course due to academic dishonesty will not be permitted to drop the course.

## Withdrawal From The University

Eastern Kentucky University is strongly committed to supporting students in achieving success in their intellectual and extracurricular endeavors. Students finding it necessary to withdraw from the University may withdraw from all courses online using myEKU until the end of the twelfth week for full semester classes. Classes of shorter duration have proportional withdrawal periods. Refer to the Colonels Compass for dates. Students enrolled in full semester classes are not allowed to withdraw from a course or from the University after the twelfth week of a regular term. A grade of "W" is assigned for each withdrawn class. Students are not allowed to withdraw from the University after the twelfth week of a regular term. Students who leave the University without an official withdrawal are subject to the grade of "F"

## Late Withdrawal

After the twelfth week, a student who is the victim of extraordinary circumstances which does not qualify them for a Medical Withdrawal may petition for a late withdrawal from the University. The student who wishes to withdraw after the deadline to do so must appeal through the Registrar's Office. The deadline for filing a Petition for Late Withdrawal for Extenuating Circumstances is the last day of the full semester following the term from which the student is seeking withdrawal. The student must complete a Petition for Late Withdrawal form and should include justification and documentation for the withdrawal. If approved, the Registrar will assign grades of "W" to the indicated courses. Students are still responsible for all tuition and fees.

For forms and more details, refer to the Registrar's website.

## State Authorization

### State Authorization

State authorization refers to Eastern Kentucky University's ability to enroll students into distance education out-of-state. Eastern Kentucky University is a State Authorization Reciprocity Agreement (SARA) member. Under the terms of SARA, ECU is authorized to offer most distance education programs in the 48 other SARA member states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. California

is currently not a member of SARA but EKU is permitted to offer most distance education programs to students residing in California. States and institutions who join SARA agree to operate under SARA standards when interacting with other member institutions and states. SARA's policies help protect students and provide benefits to both the states and institutions carrying out distance education in multiple states. Detailed information about SARA policy and procedures can be found on The National Council for State Authorization Reciprocity Agreements (NC-SARA) website. (<https://www.nc-sara.org/>)

## Professional Licensure Programs

SARA (State Authorization Reciprocity Agreement) has no bearing on state licensure boards. Licensure requirements are regulated by each state's respective board(s) and must be met in order to obtain a license. Eastern Kentucky University (EKU) reserves the right to offer program(s) that lead to licensure in the states where EKU has made every reasonable effort to determine its program(s) comply with each state's regulations for *educational requirements* for licensure in that state. Regulations often include but are not limited to, specific degree levels and types; program accreditation; field placements; supervision, or residency requirements. Regulations are ever-evolving and can change without any notification to higher education institutions. Students are encouraged to contact their applicable state licensing board(s) to determine whether the program continues to meet educational requirements for licensure in that state both before enrolling and during the learning experience.

Eastern Kentucky University provides general and direct disclosures related to the licensure programs we offer. General disclosures can be found on the EKU State Authorization and Professional Licensure webpage (<https://ekuonline.eku.edu/state-authorization/>) and can help students determine if the desired EKU program is best for them. The information provided on the State Authorization and Professional Licensure webpage is the most accurate information available to EKU at the time but could become outdated due to changes in state requirements for licensure that can change without notice.

## Student Location and Out-of-State Educational Activities

Authorization to enroll students in a program does not mean that all EKU programs can be offered in their entirety in every SARA member state. Some states have additional consumer protection laws or regulations that must be followed. As states with potential limitations become known, they will appear on the EKU State Authorization and Professional Licensure webpage (<https://ekuonline.eku.edu/state-authorization/>).

As part of EKU's concerted effort to adhere to known policies, regulations, or laws in other states the following expectations are in place. Students must: (1) report their current residential address on their application for admission, (2) notify EKU regarding any changes in where they will be located while enrolled at EKU, and (3) notify EKU of the physical location of supervised field placement activities that will occur outside of Kentucky. Examples of supervised field placements include but are not limited to cooperative education; internships; clinical rotations; student teaching; and fieldwork. Students should consult this list and speak to their advisor prior to ANY activity outside of Kentucky.

## Out-of-State Relocation

Students who are enrolled in a program leading to licensure, or any student intending to complete a supervised field placement (e.g. cooperative education, internship, student teaching, clinical, etc.)

outside of Kentucky must notify the university and/or their advisor in advance of any plans to relocate out of state. Advisors will help students determine authorization and licensure eligibility requirements if the student relocates during the course of the program. Licensure regulations vary by state and relocating could affect whether a student will meet eligibility requirements for licensure and/or remain eligible for federal financial aid. Students must check with the state/territory licensing board where they desire licensure before relocating to ensure that they will be eligible for licensure or reciprocity. NC-SARA maintains a list of state board contact information (<https://www.nc-sara.org/professional-licensure-directory/>) for some of the most common programs that require licensure.

## Complaints Related to Out-of-State Educational Activities

SARA defines a *complaint* as "a formal assertion in writing that a person, institution, state, agency, or other organization or entity operating under the provisions of the SARA Policy Manual has violated the policies set forth in the SARA Policy Manual or of laws, standards or regulations incorporated in the SARA Policy Manual". In accordance with SARA Policy 4.5, student complaints related to SARA activities must begin with the Eastern Kentucky University Student Complaint Process/Policy (<https://dos.eku.edu/student-complaints/>) A detailed description of the SARA student complaint process and related policy can be found on the NC-SARA Student Complaint webpage (<https://www.nc-sara.org/student-complaints/>).

## General Disclaimer Regarding Licensure

Please be advised that there may be other factors in addition to educational requirements that could prohibit your success in a program. Having a criminal record could affect your ability to successfully obtain professional licensure in many states and your ability to secure field placements, internships, externships, and/or practicums. Students may also be required by collaborating organizations to submit to a drug screen, criminal background check, sex offender registry search, OIG (Office of Inspector General) search, federal fingerprinting, and/or to submit copies of immunization records, including OSHA training certificates, HIPPA training certificates, and CPR certification. These tests are at the expense of the student. Collaborating organizations reserve the right to deny student field placements, internships, externships, and/or practicums for many reasons including but not limited to if a student has a criminal record or fails the drug screen standards as established by the collaborating organization. For more information on specific programs please reach out to the program advisor.

## Vision of EKU's College of Business

*"Leading transformative education, preparing innovative professionals for global impact."*

Foundational to our vision is the motto of former EKU Professor of Accounting, Dr. Jack L. Dyer, "We change lives for the better." A transformative education prepares students to be innovative, creative, and entrepreneurial in their professional and personal endeavors. Graduates enter the world with a global focus in order to serve the service region of EKU, the Commonwealth of Kentucky, and the world. This focus helps develop self-awareness of one's identity, culture, and beliefs, appreciating diverse cultures and perspectives that will make EKU graduates more competitive and successful.

### Mission of EKU's College of Business

*"We are a School of Opportunity with a student-centered commitment to developing leaders through applied and interdisciplinary instruction, research, and collaboration, that positively impacts the world."*

Our mission defines our purpose. We are a School of Opportunity, valuing who we include, not exclude. We provide access to education in business disciplines, delivering experiences that transform students into leaders with integrity and knowledge, adapting to changes in the global environment.

Our commitment to excellence is student-centered and made possible through collaboration and research with students, faculty, and the community.

### College of Business Core Values

#### CONNECTION AND COLLABORATION

- Excellence
  - Strive for the highest standard in all we do with a spirit of innovation and entrepreneurship
- Integrity
  - Maintain a culture of acting ethically, honestly, inclusively, and respectfully to all
- Service
  - Commit to the good we can do for others through educational opportunities and community engagement

### College of Business Core Competencies

Throughout the Business curriculum, students will be developing and building the following core competencies:

- Functions of Business - Demonstrate knowledge base and acumen in the functional areas of business with an interdisciplinary approach
- Sustainable Innovation – Apply quantitative analysis, critical thinking, and creative thinking in decision-making to design sustainable innovation.
- Interactive Communication – Communicate effectively and interactively with consideration of audience, message, and delivery
- Authentic Professional Brand – Achieve an authentic professional brand through self-development and the cultivation of emotional intelligence and a moral compass
- Systems Thinking – Recognize the impact of macro environment (global, societal, and regulatory) factors and trends

### Master's

- Master of Business Administration with a Concentration in Accounting (MBA) (p. 604)
- Master of Business Administration with a Concentration in Community Development (MBA) (p. 605)
- Master of Business Administration with a Concentration in Computer Science, Artificial Intelligence in Data Science (MBA) (p. 607)
- Master of Business Administration with a Concentration in Computer Science, Cybersecurity and Digital Forensics (MBA) (p. 608)
- MBA Program with a Concentration in Computer Science, Game Design (p. 610)
- MBA Program with a Concentration in Construction Management (p. 611)
- MBA Program with a Concentration in Corporate Securities Operations (p. 612)
- MBA Program with a Concentration in Emergency Management and Disaster Resilience (p. 613)
- MBA Program with a Concentration in Manufacturing Management (p. 614)
- MBA Program with a Concentration in Occupational Safety (p. 615)
- MBA Program with a Concentration in Organizational Psychology (p. 616)
- MBA Program with a Concentration in Public Administration (p. 617)
- MBA Program with a Customized Concentration (p. 618)

### Certificate

- Functions of Business, University Certificate (p. 603)

### Courses

#### MBA 800. MBA Bootcamp. (0 Credits)

I. Prerequisite: Admission to MBA Program. Introduction to technical topics as well as team- and culture-building activities.

#### MBA 812. Data, Decisions & Business. (2 Credits)

(2) I. Prerequisite or Co-requisite: MBA 800. This Course provides a foundation on developing, interpreting, and using data for business decisions. Course focuses on building data models, and utilizing them to improve decision making in a business context.

#### MBA 813. Empathic Interactive Comm. (2 Credits)

(2) I. Prerequisite or Co-requisite: MBA 800. Develop interactive communication strategies and methods critical to business leaders through discussion, examples, and practice. Includes oral and written assignments linked to career development, and a variety of interactive communication strategies.

#### MBA 814. Big Data Analytics. (2 Credits)

(2) I. Prerequisite or Corequisite: MBA 812. This Course introduces students to business application of data analytics techniques for increasing sales, identifying new customers, improving efficiencies, and automated decision making.

**MBA 815. Intro to Design Thinking. (1 Credit)**

(1) I. Prerequisite or Co-requisite: MBA 800. This course provides an in-depth orientation to the readings, theories, and examples of design thinking.

**MBA 822. Leading & Managing Human Cap. (2 Credits)**

(2) II. Prerequisite: MBA 812 and 815. Human capital management topics, applications, and development of personal competencies in acquiring and developing talent, recognizing and rewarding contribution, managing performance, measuring human capital outcomes, and making overall human capital strategy decisions.

**MBA 824. Auth Leadership & Des Emp Exp. (2 Credits)**

II. Prerequisite: MBA 813, 815, and 871. Advanced study of individual and team emotion, thought, and action in the workplace with the aim of authentic leadership skillset development and effective employee experience design.

**MBA 825. Design Thinking Applications. (1 Credit)**

(1) I. Prerequisite: MBA 815. This Course provides a unique series of immersive experiences in innovation and design thinking that prepares participants for real world innovation. Students will collaborate on projects with faculty from all disciplines and community leaders. May be repeated; Maximum of three credit hours.

**MBA 831. Corp Entrepren Ventures. (2 Credits)**

(2) I. Prerequisite: MBA 812. The examination and practice of generating, evaluating, and implementing entrepreneurial ideas within an organization using a design thinking approach, Explores trends in corporate entrepreneurship and the impact of entrepreneurship within an organization.

**MBA 833. Supp Chain as Driver Org Eff. (2 Credits)**

(2) I. Prerequisite: MBA 812. Enhanced exposure to essential supply chain concepts, encompassing the integration of key business processes from the end user through original suppliers that provides products, services and information that add value for customers and other stakeholders.

**MBA 834. Enterprise Risk Mgmt. (2 Credits)**

(2) I. Prerequisite: MBA 883. This course examines the way in which business and society assess, control, and transfer risk.

**MBA 841. Driving Strategic Impact. (2 Credits)**

(2) I. Prerequisite: MBA 822, 824, 831, 833, 834, 882 or 832, and 883 or 823. Prerequisite or Co-requisite: MBA 825. The course integrates knowledge from all business disciplines in relationships of helping organizations sustain competitive advantages.

**MBA 842. Impact Capstone. (3 Credits)**

I. Prerequisites: MBA 822, 824, 831, 833, 834, 871, 881, 882, and 883. Prerequisite or Co-requisite: MBA 825 and MBA 841. Synthesis and application of knowledge, skills, and abilities developed throughout the MBA program; students will be embedded with clients in EKU's Service Region to better understand the unique challenges and opportunities for business in Appalachia.

**MBA 860. MBA Seminar. (1-3 Credits)**

A. Selected advanced topics in business administration. May be retaken up to 3 hours provided the topic of study is different.

**MBA 870. Microecon and Stats for Mgrs. (3 Credits)**

Prerequisites: MBA status or instructor permission Practical business applications of microeconomic and statistical theory. Emphasis on decision making under uncertainty. Topics include: descriptive statistics, hypothesis testing, regression, optimization, demand estimation, forecasting, costs and production theory, pricing and output determination, and game theory.

**MBA 871. Managerial Communication. (3 Credits)**

Business research and report writing, communication strategies, and oral presentations for managers.

**MBA 874. Data Analytics for Managers. (3 Credits)**

This course focuses on data analytics from a managerial perspective, including: business analytics, data management and wrangling, data visualization and summary measures, probability and distributions, statistical inference, data mining, data forecasting, and prescriptive analysis.

**MBA 875. Leading Orgs Pple & Fut of Wrk. (3 Credits)**

Fundamentals of organizational behavior and human resources: resource allocation, human enterprise, employee experience, and the future of work. Topics include: strategic decision-making, competition, workforce development, talent utilization, workplace rewards, recognition, demographics, and the gig economy.

**MBA 881. Accounting for Managers. (3 Credits)**

This course focuses on financial and managerial accounting topics and tools relevant to a manager in the context of understanding accounting information and using it effectively to make business decisions.

**MBA 882. Marketing Management. (3 Credits)**

This course is oriented toward: assessing the dynamic business environment, identifying consumers' needs, selecting the appropriate market segment, and developing marketing strategy to satisfy consumers' need and maintain firm sustainable competitive advantages.

**MBA 883. Financial Mgmt & Decision Mkg. (3 Credits)**

Prerequisite or Co-requisite: MBA 881. This course provides managers at any level with analytical tools for financial management decisions, including financial statement interpretation, financial performance evaluation, financial forecasting, growth management, corporate financing, financial markets, business valuation, and capital budgeting.

**MBA 890. Independent Study. (1-3 Credits)**

A. Opportunity for independent study of a problem/issue chosen by the student and instructor. Approved independent study proposal form required. May be retaken up to 6 hours provided topic of study is different.

**MBA 892. Special Topics in MBA: \_\_\_\_\_. (1-3 Credits)**

A. Prerequisites: Departmental approval. For special topics related to the Business beyond the scope of regularly offered courses. May be taken to a maximum of 6 hours provided subtitle/topics vary.

**MBA 895. Integrated Decision Making. (3 Credits)**

Prerequisites: MBA870, MBA871, MBA875, MBA881, MBA882, and MBA883. This course focuses on strategic management skills and competencies. It explores why good strategic management leads to good business performance and concepts, examines tools of strategic analysis, and includes applications of methods of integrated decision-making.

## Functions of Business, University Certificate

The Functions of Business Certificate is designed to provide individuals who have a bachelor's degree with a foundation in the functional areas of business: Accounting, Finance, Management, and Marketing.

## Master of Business Administration with a Concentration in Accounting (MBA)

### MBA

The EKU MBA prepares students for career advancement in their current and future positions. Through an applied integrated curriculum, students expand their knowledge of all functional areas of business. The MBA Program provides foundational business courses, combined with concentrations that allow students to pursue a more individualized curriculum that is related to their career goals, backgrounds, and interests. The program provides an innovative approach to prepare students for jobs. Students expand their knowledge of functional areas of business. The MBA program seeks to produce organizational leaders who are prepared to contribute successfully to any industry, organization, department, or situation – at any level.

The MBA Experience consists of six core courses, a capstone course, and a 9 to 12 hour concentration. The program is designed to take one year to complete. It provides an interdisciplinary curriculum leading to the development of knowledge, skills, and abilities demanded of MBA graduates. MBA courses are designed to be eight weeks intensive with weekly opportunities for learning and interaction; each course is three credit hours.

### Expectations

In addition to course related knowledge and skills, we expect that our students will demonstrate the following workplace values:

- Strong Work Ethic
- Reliability
- Positive Attitude
- Commitment to Quality Work
- Adaptability
- Personal Integrity
- Respect and Empathy for Others
- Self-Motivation
- Resourcefulness
- Commitment to Grow and Learn
- Poise and Self-Confidence
- Professionalism

**Graduate Course Credit** – Required courses for the MBA program concentration can be approved 800-level courses or approved 700-level courses. All 700 level courses have undergraduate counterparts bearing the same last two digits. The 700 level courses are offered only for graduate level credit and require additional appropriate experiences for all students enrolled. Students who have previously taken the undergraduate counterpart of these courses at the 500 level will not be permitted to

enroll for graduate level credit in the 700 level counterpart. Credit will not be awarded for both the 700 and 500 level of the same course.

**Cross Listed Courses** – Some courses are offered under different prefixes with the same course content. Students will not be awarded credit for any course for which they have previously received credit under a cross listed prefix.

**Transfer Credit** – Upon written petition, subject to approval by the Dean of the Graduate School and the Director of the MBA Program, students may transfer a maximum of six semester hours of acceptable graduate level business coursework from other AACSB-International accredited institutions.

The maximum course load for MBA students normally is nine semester hours. Students who have full-time employment are discouraged from taking more than six semester hours.

### Program Requirements

**Probation and Progress in the Program** – All MBA students must achieve grades of “B” or better in all MBA coursework. Students who fail to meet this requirement are subject to dismissal. Students who wish to appeal their dismissal must do so within one year of the date of notification of dismissal. Reinstatement in the graduate program will be permitted only with the recommendation of the advisor, the MBA program coordinator, and approval by the Graduate Dean.

### Exit Requirements

The Exit Requirements for the program are fulfilled through successful completion of the capstone course. MBA 895 (<https://catalogs.eku.edu/search/?P=MBA%20895>) Integrated Decision Making.

### Admission Requirements

Minimum requirements for clear (unrestricted) admission to the Master of Business Administration program are as follows: Applicants must hold a accredited bachelor’s degree with a minimum overall undergraduate grade point average (UGPA) of 2.75

**Expected Competencies** – Applicants are expected to have sufficient background to function effectively in graduate courses that require computer-related knowledge or skills. Proficiency in word processing, spreadsheets, database management, and computer applications as well as knowledge of grounding in ethical behavior are assumed.

In addition, the assumption is made that all applicants can demonstrate proficiency in spoken and written communication. On the basis of GMAT verbal scores, interviews, samples of written work, or other appropriate indicators of speaking and writing proficiency, MBA applicants may be required as a precondition for admission to satisfactorily complete courses or tutorial experiences designed to enhance their communication skills.

**International Students** – Applications from international students are encouraged. In addition to the requirements listed above, applicants must meet the English Language Proficiency requirement by submitting acceptable test scores on the TOEFL or IELTS examinations. Refer to the University admission guidelines for admitting international students.

### Application Procedures

The application process for the EKU MBA Experience begins with the Graduate School. Information for domestic students is available at <https://gradschool.eku.edu/domestic-students> (<https://>

gradschool.eku.edu/domestic-students/). International students can find admission guidelines at [https://gradschool.eku.edu/Intl\\_students](https://gradschool.eku.edu/Intl_students) ([https://gradschool.eku.edu/Intl\\_students/](https://gradschool.eku.edu/Intl_students/)).

As part of the application process, you will be directed to provide the following: an updated résumé, all unofficial undergraduate transcript(s), a personal statement, and two recommendation forms. These materials are submitted through the Graduate School portal, along with any other materials required by the Graduate School. Official GRE scores, if required by the Graduate School, must be received from the testing agency. Request that your scores be sent to EKU.

TOEFL or IELTS scores are required for all international students without a recent undergraduate degree from countries where English is the official language.

# MBA Program with a Concentration in Construction Management

## MBA

The EKU MBA prepares students for career advancement in their current and future positions. Through an applied integrated curriculum, students expand their knowledge of all functional areas of business. The MBA Program provides foundational business courses, combined with concentrations that allow students to pursue a more individualized curriculum that is related to their career goals, backgrounds, and interests. The program provides an innovative approach to prepare students for jobs. Students expand their knowledge of functional areas of business. The MBA program seeks to produce organizational leaders who are prepared to contribute successfully to any industry, organization, department, or situation – at any level.

The MBA Experience consists of six core courses, a capstone course, and a 9 to 12 hour concentration. The program is designed to take one year to complete. It provides an interdisciplinary curriculum leading to the development of knowledge, skills, and abilities demanded of MBA graduates. MBA courses are designed to be eight weeks intensive with weekly opportunities for learning and interaction; each course is three credit hours.

## Admission Requirements

Minimum requirements for clear (unrestricted) admission to the Master of Business Administration program are as follows: Applicants must hold a accredited bachelor's degree with a minimum overall undergraduate grade point average (UGPA) of 2.75

**Expected Competencies** – Applicants are expected to have sufficient background to function effectively in graduate courses that require computer-related knowledge or skills. Proficiency in word processing, spreadsheets, database management, and computer applications as well as knowledge of grounding in ethical behavior are assumed.

In addition, the assumption is made that all applicants can demonstrate proficiency in spoken and written communication. On the basis of GMAT verbal scores, interviews, samples of written work, or other appropriate indicators of speaking and writing proficiency, MBA applicants may be required as a precondition for admission to satisfactorily complete

courses or tutorial experiences designed to enhance their communication skills.

**International Students** – Applications from international students are encouraged. In addition to the requirements listed above, applicants must meet the English Language Proficiency requirement by submitting acceptable test scores on the TOEFL or IELTS examinations. Refer to the University admission guidelines for admitting international students.

## Application Procedures

The application process for the EKU MBA Experience begins with the Graduate School. Information for domestic students is available at <https://gradschool.eku.edu/domestic-students> (<https://gradschool.eku.edu/domestic-students/>). International students can find admission guidelines at [https://gradschool.eku.edu/Intl\\_students](https://gradschool.eku.edu/Intl_students) ([https://gradschool.eku.edu/Intl\\_students/](https://gradschool.eku.edu/Intl_students/)).

As part of the application process, you will be directed to provide the following: an updated résumé, all unofficial undergraduate transcript(s), a personal statement, and two recommendation forms. These materials are submitted through the Graduate School portal, along with any other materials required by the Graduate School. Official GRE scores, if required by the Graduate School, must be received from the testing agency. Request that your scores be sent to EKU.

TOEFL or IELTS scores are required for all international students without a recent undergraduate degree from countries where English is the official language.

In addition, the assumption is made that all applicants can demonstrate proficiency in spoken and written communication. On the basis of GMAT verbal scores, interviews, samples of written work, or other appropriate indicators of speaking and writing proficiency, MBA applicants may be required as a precondition for admission to satisfactorily complete courses or tutorial experiences designed to enhance their communication skills.

**International Students** – Applications from international students are encouraged. In addition to the requirements listed above, applicants must meet the English Language Proficiency requirement by submitting

acceptable test scores on the TOEFL or IELTS examinations. Refer to the University admission guidelines for admitting international students.

## Application Procedures

The application process for the ECU MBA Experience begins with the Graduate School. Information for domestic students is available at <https://gradschool.ecu.edu/domestic-students> (<https://gradschool.ecu.edu/domestic-students/>). International students can find admission guidelines at [https://gradschool.ecu.edu/Intl\\_students](https://gradschool.ecu.edu/Intl_students) ([https://gradschool.ecu.edu/Intl\\_students/](https://gradschool.ecu.edu/Intl_students/)).

As part of the application process, you will be directed to provide the following: an updated résumé, all unofficial undergraduate transcript(s), a personal statement, and two recommendation forms. These materials are submitted through the Graduate School portal, along with any other materials required by the Graduate School. Official GRE scores, if required by the Graduate School, must be received from the testing agency. Request that your scores be sent to ECU.

TOEFL or IELTS scores are required for all international students without a recent undergraduate degree from countries where English is the official language.

## College of Education and Applied Human Sciences Strategic Plan 2022-2030

### Vision

Eastern Kentucky University's College of Education and Applied Human Sciences will pursue excellence in teaching, learning, scholarship, and service to the university and our stakeholders, and will foster the pursuit of excellence among our students.

### Mission

As Eastern Kentucky University is the School of Opportunity where everyone belongs, the faculty and staff of the College of Education and Applied Human Sciences also meet students where they are to help them achieve their goals and dreams. Student success is ensured through innovative knowledge-building and personalized support to help students develop proficiency and confidence as practitioners and leaders in their fields. The College's graduates are lifelong learners, invested in their own development and the wellbeing of all with whom they work and live.

### Strategic Priorities

#### Goal 1: Knowledge

The development and dissemination of knowledge, including the process of acquiring, reflecting on, and transferring knowledge into new contexts, is the defining characteristic of the College of Education and Applied Human Sciences. Inside classrooms, across campus, and through community-based placements, the college's faculty and staff lead students, alumni, and stakeholders as they create, apply, and share knowledge.

#### Goal 2: Innovation

The College's faculty and staff embrace the university's call for innovative thinking and bold action. Innovative approaches to teaching and supporting students today impact graduates in the field tomorrow and empower the university's next generation of students. A willingness to

ask and define "what's next" positions the college to strengthen families and shape communities now and in the future.

#### Goal 3: Transformation

Because education changes lives, transformation is central to all that the College of Education and Applied Human Sciences does. Students select majors in our college because they want to make a difference in others' lives. To honor their ambition, the college maintains an academic environment that supports students' intellectual growth and creativity; their desire for purpose, inclusion, and collaboration; and their ability to advocate for themselves and others. To accomplish great things, the college's faculty, staff, students, and alumni prioritize equitable access to knowledge and opportunity, dignity, and respect for others.

## CEAHS Advanced Degree Programs Master of Arts in Education (MAEd)

- Elementary, Middle, Secondary Education (P-12)
- Literacy (P-12)
- School Counseling
- School Librarian
- School Leadership
- Special Education

### Master of Arts (MA)

- Clinical Mental Health Counseling
- Communication Disorders

### Master of Arts in Teaching (MAT)

## Department of Clinical Therapeutic Programs

Dr. Kellie C. Ellis, Chair  
 Wallace 202  
 (859) 622-1125

Dr. James McGinn, Counselor Education Program Coordinator

Dr. Jade Robinson, Communication Sciences and Disorders Program Coordinator

The Department of Clinical Therapeutic Programs offers graduate degrees in Clinical Mental Health Counseling, School Counseling, and Communication Disorders. The Master's of Arts (M.A.) in Clinical Mental Health Counseling and Master's of Arts in Education (M.A.Ed) in School Counseling are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The Master's of Arts (M.A.) education program in speech-language pathology is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language Hearing Association.

## Counselor Education

### General Information

The Counselor Education Program offers degree and non-degree graduate programs in School and Clinical Mental Health Counseling.

This unit also provides graduate instruction in the common core areas required of many Master's degree programs in education and related fields, such as human development and learning, tests and measurement, and research. More complete information concerning the counseling programs can be reviewed by accessing the Counselor Education website at [coecounseling.eku.edu/](http://coecounseling.eku.edu/) (<http://coecounseling.eku.edu/>)

### Counselor Education

The Counselor Education program area offers graduate programs in school counseling and mental health counseling. The Clinical Mental Health Counseling and School Counseling Programs are nationally accredited by CACREP. The School Counseling Program meets curriculum standards of the Kentucky Department of Education, and the Clinical Mental Health Counseling program prepares students to apply for licensure.

### Counselor Education Program Descriptions

The Clinical Mental Health Counseling program prepares professional counselors to work in a variety of mental health settings, such as comprehensive care centers, regional mental health centers, hospitals, and other settings in which mental health services are provided.

The School Counseling program prepares individuals to become school counselors. The Provisional School Counseling Certificate will be awarded by the EPSB upon completion of the 48-hour degree. The School Counseling Certification earned will be at the P-12 level. Rank II may be earned at the completion of the first 33 hours in the program for teacher certified school counselors working on the MAED in School Counseling. Standard certificate in School Counseling can be earned with six (6) additional semester hours beyond the forty-eight (48) hour Masters of Arts in Education in School Counseling degree with either 1 year of successful school counseling experience (if candidate is a certified teacher) or two years of successful experience without a teaching degree and experience. A total of 60 graduate hours in a planned program in school counseling that includes the hours for the Masters and Rank I programs in school counseling may also be used toward the Rank I sixty (60) hour certification.

### Exit Requirements

The following are the exit requirements for all concentrations either of the Master of Arts in Education or the Master of Arts. There are no exit requirements for the Kentucky Rank I and Rank II classifications or for the additional certifications or endorsements such as the Standard Certificate in School Counseling or the Individual Intellectual Assessment Endorsement.

**Comprehensive Examinations** – The candidate will have an opportunity to demonstrate professional growth through a written and/or oral examination covering education and major program components. For the Masters of Arts in Mental Health Counseling and School Counseling, candidates must successfully pass a comprehensive examination selected by the department that may include the Counselor Preparation Comprehensive Examination (CPCE), a national examination.

## Master's

- Clinical Mental Health Counseling, Master of Arts (M.A.) (p. 627)
- Communication Disorders, Master of Arts (M.A.) (p. 628)
- School Counseling, Master of Arts in Education (M.A.Ed.) (p. 629)

## Non-Degree

- Certification Preparation Program (p. 626)
- Elementary Education Counselor Seeking Secondary School Counseling Endorsement Preparation Program (p. 629)
- Secondary School Counselor Seeking Elementary School Counseling Endorsement Preparation Program (p. 630)

## Courses

### Communication Sciences & Disorders

#### CSD 720. Augment & Alternat Comm System. (3 Credits)

I. An overview of various approaches to aided non-oral systems of communication. Various devices and symbol systems will be discussed.

#### CSD 725. Literate Language. (3 Credits)

I. Formerly CDS 725. Prerequisites: admission to CDS program or by departmental approval. Study of language disorders in children and principles for remediation in written language.

#### CSD 741. School Services in Comm Dis. (3 Credits)

I, II. Formerly CDS 741. Prerequisites: Overall 3.0 GPA and Admission to the CDS program, or departmental approval. Organization and management of speech-language therapy services in the schools. (Lec/Lab). Minimum of 27 field/clinical experience required.

#### CSD 771. Neural Bases of Communication. (3 Credits)

I. Prerequisite: admission to the CDS program or instructor approval. A study of neuroanatomic and neurophysiologic bases of communication including developmental issues and neurologic deficits resulting in communication disorders.

#### CSD 772. Speech and Hearing Science. (3 Credits)

II. Formerly CDS 772. Prerequisite: admission to the CDS program or instructor approval. Study of the physics of sound, acoustic characteristics and processes, perceptual correlates, production of speech, and psychophysical processes of communication. Software applications and instrumentation are also covered.

#### CSD 830. Counseling in Speech-Lang Path. (3 Credits)

A. Prerequisite: Admission to CD program or departmental approval. Overview of the therapeutic relationship between individuals with disabilities, their families, and professionals. Emphasis on applying empathetic listening, interviewing skills, and change process.

#### CSD 861. Comm Dis in Atypical Pop.. (3 Credits)

A. Prerequisite: admission to communication disorders and sciences program or by departmental permission. An overview of associated speech, language, or hearing problems commonly identified in atypical or special populations that may be encountered by the speech-language pathologist.

#### CSD 863. Motor Speech Disorders. (3 Credits)

II. Prerequisites: admission to communication disorders and sciences program or by departmental permission. Study of the neurophysiology, assessment, and treatment of various motor speech disorders, including dysarthria and apraxia.

**CSD 867. Advanced Language Disorders. (3 Credits)**

A. Formerly CDS 867. Prerequisites: admission to communication disorders and sciences program or by departmental permission. Advanced study of formal and informal assessment and treatment approaches in child language without consideration of etiology. Emphasis on collaboration within the classroom, language and narrative sampling analysis techniques and use of language within the natural context. Minimum of eight hours field/clinical experience required.

**CSD 870. Prof Issues in Comm Disorders. (3 Credits)**

A. Formerly CDS 870. Prerequisite: admission to communication disorders and sciences program or by departmental permission. Scope of practice, professional Code of Ethics, trends in service delivery, pertinent legislation, legal concerns, and other issues which impact the field of communication disorders will be examined.

**CSD 873. Adv. Artic. & Phono. Disorders. (3 Credits)**

I. Prerequisites: admission to communication disorders and sciences program or by departmental permission. Study of the research and principles associated with symptomatology, etiology, diagnosis, and treatment of articulation and phonological disorders. Issues related to accent enhancement and modification, including assessment and intervention are explored. Minimum of three hours field/clinical experience required.

**CSD 874. Grad Pract: Speech-Lang Path. (3 Credits)**

A. Formerly CDS 874. Prerequisite: admission to communication disorders and sciences program or by departmental permission. Supervised clinical practice in speech-language pathology. Must be retaken for a total of nine hours for the MA degree. Minimum of 145 field/clinical experience hours required across three semesters.

**CSD 875. Adult Neuro. Lang. Disorders. (3 Credits)**

II. Formerly CDS 875. The study of the neurophysiological bases of aphasia classification systems, evaluation procedures, and treatment strategies.

**CSD 876. Advanced Voice Disorders. (3 Credits)**

I. Prerequisites: admission to communication disorders and sciences program or by departmental permission. Study of the research and bases of laryngeal phonation deviation, including etiology, diagnosis, and treatment of functional and organic voice disorders; assessment and use of clinical techniques with a variety of voice disorders. Minimum of three field/clinical experience hours required.

**CSD 877. Advanced Fluency Disorders. (3 Credits)**

II. Formerly CDS 877. Prerequisites: admission to communication disorders and sciences program or by departmental permission. Critical study of research literature on etiology, theory, assessment and intervention strategies for preschool, school age, and adult fluency disorders. Minimum of two field/clinical experiences required.

**CSD 878. Diagnosis of Comm Disorders. (3 Credits)**

I. Prerequisite: admission to communication disorders and sciences program or by departmental permission. Diagnosis of language and speech disorders with emphasis on the use of dynamic assessment and comprehensive test batteries to describe the communication skills of children and adults. Profile analysis will be utilized to determine relative strength and weakness. Minimum of 10 hours field/clinical experiences required.

**CSD 879. Dysphagia. (3 Credits)**

II. Formerly CDS 879. Prerequisite: admission to communication disorders and sciences program or by departmental permission. An introduction to dysphagia, including the anatomy, physiology, and development of normal swallowing, and evaluation, etiologies, and treatment of dysphagia. Minimum of five field/clinical experience hours required.

**CSD 880. Research Methodology Comm Dis. (3 Credits)**

I. Formerly CDS 880. Prerequisites: admission to MAEd communication disorders program; or by departmental permission. Corequisite: CDS 878. Critical examination of research methodology in communication disorders and sciences. Students acquire the fundamental motivation, knowledge, and skills for conducting clinical and basic science research and for reading and critically evaluating research literature.

**CSD 885. Cognitive Rehabilitation. (3 Credits)**

A. Formerly CDS 885. Prerequisites: admission to communication disorders and sciences program and CSD 571 or 771 or by departmental permission. Study of the neurophysiological, cognitive, neuropsychological, and social/emotional issues associated with traumatic brain injury in children and adults, including principles of linguistic/cognitive assessment and intervention.

**CSD 895. Special Topics in CD. (3 Credits)**

Formerly CDS 895. Prerequisite: Department approval. Advanced study of various concepts, methods and materials in communication disorders. Topics may vary. Material will be taught using a combination of lecture, discussion and experiential learning.

**CSD 897. School Experiences in CD. (6 Credits)**

I,II. Formerly CDS 897. Prerequisites: CDS874 (9 credit hours), completion of CD core courses and admission to student teaching. Supervised 12-week, full-time clinical practice with a variety of communication disorders in selected school settings for a minimum of 70 school days. For CDS graduate seeking certificate in speech-language pathology.

**CSD 898. Externship in Comm Disorders. (6 Credits)**

I. Formerly CDS 898. Prerequisites: CDS 874 (nine credit hours) and completion of graduate core course work in communication disorders and sciences. Supervised 12-week, full-time clinical practice with a variety of communication disorders in selected externship sites.

**CSD 899. Research Project/Thesis Option. (3 Credits)**

II. Formerly CDS 899. Prerequisite: CDS 880 or instructor approval. Completion of a research project related to a special population that may lead to a thesis and/or to a professional presentation and publishable paper. May be retaken to a maximum of 9 credit hours. Credit not awarded for both SED 899 and CDS 899.

**Counseling****COU 803. Prin & Prac of Mental Hlth Cou. (3 Credits)**

I. Prerequisites: COU 840. Includes programs of mental health counseling and consultation, the development and management of mental health services programs, needs assessments, intervention and evaluation.

**COU 804. Counseling Diverse Populations. (3 Credits)**

I, II. Prerequisites: COU 813, 840, 846. An examination of the application of counseling methods and concepts to non-majority groups. The lifestyle, values, customs and attitudes of non-majority population will be explored.

**COU 807. Counseling: \_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: advisor/departmental chair approval. Workshops, special topics, or seminars. May be retaken under different subtitles.

**COU 813. Prof Orient & Ethics in Course. (3 Credits)**

I, II. Prerequisite: admission to the program. An introduction and orientation to the counseling profession. This course will explore the professional roles, organization, training, and credentialing standards of the profession. It will also survey the ethical, legal and professional issues facing counselors.

**COU 814. Admin & Cnslttn in Cnslng Srvc. (3 Credits)**

I. Prerequisites: COU 813, 840, 846. Consideration of theory, organization, consultation and personnel practices involved in organizing and administering guidance and counseling programs in the schools.

**COU 820. Group Counseling. (3 Credits)**

I, II. Prerequisites: COU 813, 840, 846. Theory and experiences to develop skill in and understanding of group dynamics and effective group behavior.

**COU 822. Lifestyle & Career Counseling. (3 Credits)**

I, II. Prerequisites: COU 813, 840, 846. Occupational information in educational and vocational planning; theories of vocational choice; sociology of occupations, and interpretation and utilization of current data pertaining to career fields.

**COU 825. Dvlpmntl COU w/ Schl Age Child. (3 Credits)**

A, II. Prerequisites: COU 813, 840, 846. Student will learn how to design and implement a systematic K-12 developmental guidance program based on collaboration, consultation, and prevention as well as develop creative and play therapy approaches to working with children and adolescents.

**COU 826. Assessment in Counseling. (3 Credits)**

I. Prerequisites: EPY 816, 839, COU 855, and departmental approval. Consideration of the major theories of assessment. Training in the administration, scoring, and interpretation of selected tests of intelligence and other counseling assessment tools.

**COU 827. Indiv Assess. of Intelligence. (3 Credits)**

I. Prerequisite: COU 826. Supervised practice in the administration, scoring, and interpretation of the Wechsler Intelligence Scale for Children, Wechsler Adult Intelligence Scale, and the Wechsler Preschool and Primary Scale of Intelligence.

**COU 840. Counseling Theory and Practice. (3 Credits)**

I, II. Prerequisite/Corequisite: COU 813. Major theories of counseling. Attention is given to personality structure and individual behavior from which these are derived.

**COU 846. Process and Basic Tech Counsel. (3 Credits)**

I, II. Prerequisites/Corequisites: COU 813, 840. Includes a consideration of different schools of thought in current counseling practice; how the counselor works; and effective procedures for counseling.

**COU 847. Crisis and Abuse Counseling. (3 Credits)**

A. Prerequisites: COU 813, 840, 846. This is an advanced counseling techniques class focusing on the process and skills in crisis and abuse counseling, as well as legal, ethical, and advocacy issues.

**COU 848. Child & Adolescent Counseling. (3 Credits)**

A. Prerequisites: COU 813, 840, 846. This is an advanced counseling techniques class focusing on specific skills and processes for children and adolescents.

**COU 849. Addiction Disorders Counseling. (3 Credits)**

I. Prerequisites: COU813, 840, and COU846. Addictive disorders and behaviors ranging from chemical dependency, compulsive gambling, sex addiction to workaholism with a focus on biopsychosocial model, 12-Step and peer therapy, assessments, and interventions for adolescent and adult populations.

**COU 850. Family Counseling. (3 Credits)**

A. Prerequisites: COU 813, 840, 846. The history, terms, ethics, principles, and major models of family counseling concepts, techniques and procedures will also be examined, with primary focus on the systems approach.

**COU 853. Cou Process/Clinical Sexuality. (3 Credits)**

A. This is an advanced skills course that will teach theoretical and skill-based clinical sexuality intervention and treatment models to work with clients. Students will explore professional issues in the field, including diversity issues related to clinical sexuality.

**COU 855. Diagnosis & Treatment Counsel. (3 Credits)**

A. Prerequisites: COU 813, 840, 846. This course addresses diagnoses and treatment planning in counseling as well as prevention of mental and emotional disorders and dysfunctional behavior. Credit will not be awarded to students who have credit for PSY 841.

**COU 856. Pract in Intellect Assessment. (3 Credits)**

A, II. Prerequisites: COU 826, 827. Advanced laboratory practice in giving tests and interpreting results. Attention given to intelligence tests, measurements of special aptitudes, inventories for self-appraisal, and measure of personality.

**COU 863. Crisis and Grief Counseling. (3 Credits)**

A. Prerequisite: COU 813, 840, 846. An advanced counseling techniques class focusing on the process and skills need in crisis and grief counseling.

**COU 865. Mindfulness Pract Couns & Clie. (3 Credits)**

A. Instruction in mindfulness-based practices in counseling for use with clients and for counselor self-care. Review of current theory and research as well as experiential components including movement, meditation, breathing exercises, and guided imagery.

**COU 870. Intro to Play Therapy. (3 Credits)**

(3). A. Prerequisites: EPY 839, COU 813, COU 840, COU 846. This course discusses understanding the person of the therapist, playroom and materials, theories, history, process, techniques, relationship building, themes, parent involvement, ethics and experiential practice of play therapy with children and adults.

**COU 871. Advanced Play Therapy. (3 Credits)**

(3) A. Prerequisite: COU 870. Includes research, advanced theory, play therapy practice and skill development with various populations across the life span.

**COU 872. Practicum in Play Therapy. (3 Credits)**

(3) A. Prerequisite: COU871. Includes personal and professional development of the Play Therapist through practical application of Play Therapy theories, techniques and skills.

**COU 875. Adventure Based Counseling. (3 Credits)**

A. Prerequisite: Admission to the Doctoral program. Recommended prerequisite: completion of COU 820 – Group Counseling. Course includes study, experience, and practice of adventure-based counseling to prepare participants to facilitate adventure-based activities.

**COU 880. Counseling Practicum:\_\_\_\_\_. (0.5-3 Credits)**

(.5-3)A. Prerequisite: Clinical coordinator approval. This course provides students the opportunity to practice skills developed in their program. Students will be supervised by an experienced counselor in a setting appropriate for their program. May be taken under different setting titles up to 12 hours.

**COU 881. Internship in Counseling:\_\_\_\_\_ (0.5-6 Credits)**

(.5-6) A. Prerequisite: COU 880. Practice in a counseling setting which allows for the transition from student to professional. May be taken for up to 15 credit hours in order to generate the required clock hours.

**COU 885. Clinical Supervision of COU. (3 Credits)**

(3) A. Prerequisite: COU 880. Provides counseling students with knowledge of fundamental issues in clinical supervision including the role and function of supervision; models and theories; diversity issues; legal and ethical considerations.

**COU 886. Advanced Clinical Supervision. (3 Credits)**

(3) A. Prerequisite: Admission to the CEP doctoral program. Advanced, integrative study of theories, models, and current issues in clinical supervision.

**COU 887. Supervision of Counseling Prac. (3 Credits)**

A. Prerequisite: Admission to the doctoral program. Supervised practice of supervision of master's level practicum students.

**COU 891. Advanced Counseling Theories. (3 Credits)**

A. Prerequisite: Admission to the Ed.D doctoral program, MA in Clinical Mental Health Counseling or MAEd in School Counseling. An examination of the theoretical foundations of counseling theory construction. Credit will not be awarded to students who have credit for COU 901.

**COU 892. Leadership & Social Justice Adv. (3 Credits)**

A. Prerequisite: Admission to the Ed.D doctoral program, MA in Clinical Mental Health Counseling or MAEd in School Counseling. Orientation to leadership styles and issues relevant to counselor education and advanced application of social justice advocacy in counselor education. Credit will not be awarded to students who have credit for COU 909.

**COU 893. Scholarship and Pub in COU Ed. (3 Credits)**

A. Prerequisite: Admission to the Ed.D doctoral program, MA in Clinical Mental Health Counseling or MAEd in School Counseling. The planning and execution of scholarly writing and professional conference presentations in counselor education. Credit will not be awarded to students who have credit for COU 910.

**COU 894. Teaching in Counselor Ed. (3 Credits)**

A. Prerequisite: Admission to the Ed.D doctoral program, MA in Clinical Mental Health Counseling or MAEd in School Counseling. Pedagogical foundations of course development and classroom instruction in counselor education. Credit will not be awarded to students who have credit for COU 910.

**COU 895. Advanced Clinical Supervision. (3 Credits)**

A. Prerequisite: Admission to the Ed.D doctoral program, MA in Clinical Mental Health Counseling or MAEd in School Counseling. Advanced, integrative study of theories, models, and current issues in clinical supervision. Credit will not be awarded to students who have credit for COU 986.

**COU 900. Advanced Counseling Theories. (3 Credits)**

A. This course provides advanced instruction in the major and/or contemporary counseling theories. Students will apply the original works of major theorists and will assess and construct a personal counseling orientation as backed by research.

**COU 902. Advanced Group Counseling. (3 Credits)**

A. Prerequisite: Admission to the doctoral program. (3 hours) Theoretical foundations of advanced group counseling (includes supervised experiential component via facilitation of master's level groups for in COU 820 course).

**COU 903. Adv Issues in Clin Mental Heal. (3 Credits)**

A. Prerequisite: Admission to the doctoral program. Current topical issues, related to advanced counseling practice and counselor education.

**COU 904. Advanced Issues in School Coun. (3 Credits)**

A. Prerequisite: Admission to the doctoral program. Current topical issues related to advanced school counseling, school leadership, and counselor education.

**COU 905. Sem in Rural/Appalachian Issue. (3 Credits)**

A. This course is an advanced application course of the field of marriage and family counseling/therapy. Students will apply family counseling techniques to case studies and real families.

**COU 906. Counseling: Adv Supervision. (3 Credits)**

A. Students will have the opportunity to refine their skills and enhance their understanding of clinical and administrative supervision in terms of various theoretical orientations and approaches to the art of supervision in counseling.

**COU 907. Counseling: Adv Practicum. (3 Credits)**

This course observation and counseling supervision in school, higher education, community, and controlled laboratory settings. One hundred hours of supervised fieldwork is required. Lectures, seminars, and research projects may also be included.

**COU 908. Counseling: Adv Internship. (3 Credits)**

A. Doctoral students are required to complete doctoral-level counseling internships that total a minimum of 600 clock hours. The 600 hours include supervised experiences in counselor education and supervision (e.g., clinical practice, research, and teaching).

**COU 912. Research Issues Counselor Ed. (3 Credits)**

This course deals with advanced quantitative and qualitative research methodology in the social sciences, specifically methodology to be used in advanced research in counselor education.

**COU 980. Doctoral Practicum. (1-3 Credits)**

(3) A. Prerequisite: Admission to the doctoral program. A supervised doctoral-level practicum experience in individual, group, and/or career counseling.

**COU 981. Doctoral Internship. (1-6 Credits)**

(3) A. Prerequisite: Admission to the doctoral program. A 600 hour internship to include professional work specified by CACREP standards such as Counseling; Teaching; Supervision, Research and Scholarship; and Leadership and Advocacy. (May be taken for variable credit from 1-6 hours.)

**COU 987. Supervision of Practicum. (3 Credits)**

A. Prerequisite: Admission to the doctoral program. Supervised practice of supervision of doctoral level practicum students.

**Educational Administration****EAD 801. Intro to Ed Adm & Ld Rsch. (3 Credits)**

A. This course explores modern administrative theories, practices, and techniques in school leadership and administrative responsibilities. Emphasis on research based practices which create an organizational climate supportive of excellence in teaching, learning, and school improvement. Minimum of 5 hours field related experiences.

**EAD 803. Leadership in Higher Education. (3 Credits)**

Candidates will examine various rural leadership activities and theories, then use them to evaluate the leadership of their own organization. They will learn about the process of change and use this theory to develop a plan for a needed change in their organization. They will identify their own strengths and weaknesses and use those data to develop a leadership rubric.

**EAD 807. Ed Admin & Supervision:\_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: advisor/ departmental approval. Workshops, special topics, or seminars. May be retaken under different subtitles.

**EAD 808. Admin of Pupil Pers Services. (3 Credits)**

A. Prerequisite: departmental approval. Administrative problems relating to child accounting. Major areas emphasized will be attendance reports and records, school census, and social and economic factors influencing school attendance.

**EAD 816. Data Analytics in Higher Ed. (3 Credits)**

Designed to enable candidates to apply various data-analytic strategies and software tools to address important issues and topics within a higher-education framework, EAD 816 is intended specifically for candidates enrolled in the M.A. in Student Personnel Services in Higher Education program within the College of Education. The course will focus on using data analytics to inform decision-making within the context of one's administrative role in a college or university. Credit will not be awarded to students who have credit for EPY 816.

**EAD 819. Sch Lead & Inst. Super. (3 Credits)**

A. Leadership related to the evaluation of instructional programs, teacher effectiveness, and improvement of student learning. Includes building collaborative cultures, informed decision-making, communication skills, and conflict resolution related to curriculum, instruction, & assessment. Minimum of 10 hours field experience required.

**EAD 821. Pract in Admin & Supervision. (3 Credits)**

A. Prerequisite: professional certificate in administration and supervision. Field experiences with emphasis on organization and administration of schools. Seminars/workshops will be attended to analyze problems and experiences of the field activities.

**EAD 827. Finance and Support Services. (3 Credits)**

I, II. The study of assessment, improvement, and application of computer technology and effective leadership practices in education. The focus of the course will be upon the use of technology and knowledge of best practices for educational improvements.

**EAD 828. School Law and Ethics. (3 Credits)**

I, II. Legal principles and interpretations of constitutional and statutory laws. Judicial decisions and school policies based on those are emphasized. Special attention is given to the site-based decision making process at the school level.

**EAD 829. Comm Relations & Ed Advocacy. (3 Credits)**

A. Emphasizes communication skills, understanding communities, as well as theories and techniques of school-community relations for educational leaders through critical reflection. Provisions are made for the development of guidelines, techniques and practices which facilitate collaborative relationships. Minimum of 10 hours field experience required.

**EAD 839. The School Superintendency. (3 Credits)**

A. The role of the school district superintendent is explored and analyzed with reference to job responsibilities and organizational structure. Knowledge, skills, and dispositions necessary to serve successfully in the position are also examined.

**EAD 840. Leadership for Safe Schools. (3 Credits)**

A. School safety course designed to develop skills and information to analyze school safety data. Students will evaluate and develop school procedures based on data and research.

**EAD 844. Stdnt Persnl Serv in Higher Ed. (3 Credits)**

I. Formerly COU 844. Study of student personnel services; emphasis upon relationship of these services to the total college program, research, and organization. Credit will not be awarded for both EAD 844 and COU 844.

**EAD 845. Intern Student Person Service. (3 Credits)**

(3) II. Supervised experience for student personal trainees. Opportunity provided to share responsibilities for all phases of student personnel services. Must be taken twice, once in the first 9 hours and once in the last 9 hours of the program.

**EAD 849. School Systems Administration. (3 Credits)**

A. Examination of school system operations including financial management, the administration of auxiliary services, human resources management, the management of federal and state programs, facilities planning and management, and the management of curriculum and instructional support.

**EAD 851. Assessment for Learning. (3 Credits)**

A. Candidates will develop skills to analyze data, including common assessments, to improve school learning environment and students achievement. Finally, candidates will develop an action research plan.

**EAD 852. Human Resource Leadership. (3 Credits)**

A. Candidates will evaluate school processes for selecting staff including staff, supervising staff, and providing staff professional development. Candidates will recommend ways to develop school human resources.

**EAD 853. Conditions of Learning. (3 Credits)**

A. Candidates will use data from surveys and interviews to evaluate a school's learning environment. Candidates will develop recommendations for improvement.

**EAD 854. Fair Learning Changes. (3 Credits)**

A. Candidates will complete an action research plan, working with school and community leaders to improve student learning or working conditions. Candidates will lead a team in developing, implementing, and evaluating the plan.

**EAD 856. Learning for At-Risk Students. (3 Credits)**

A. The course will provide knowledge and strategies for aspiring school leaders to support staff, programs, and initiatives to reduce the impact of risk factors on student learning.

**EAD 857. Principal Internship I. (3-6 Credits)**

(3-6) A. Prerequisite: EAD 801 and 851. Students engage in school administration work in school placement. In-field work is augmented by online modules to support candidates. The course is structured to provide opportunities to apply course content knowledge to real issues of administrative practice and to the development and refinement of leadership skills and competencies.

**EAD 858. Principal Internship II. (3 Credits)**

A. Prerequisite: departmental approval and EAD857. Candidates are principles, or have an approved plan, under the supervision of a mentor(s) to learn the principal role. In either case, candidates participate in seminars based on principal duties and responsibilities.

**EAD 859. Instruc Plnng for Stu Lrng. (3 Credits)**

(3) A. An examination of planning processes used by leaders to direct and focus educational change and improvement in student learning.

**EAD 860. Stdnt Dvlpmnt Theory in Hgh Ed. (3 Credits)**

I, II. This is a theoretical/development course in the introduction to student affairs profession. Credit will not be awarded for both EAD 860 and COU 860.

**EAD 861. Overview of Legal Issues in HE. (3 Credits)**

(3) I, II. Overview of the legal and ethical issues in the student affairs profession. Credit will not be awarded for both EAD 861 and COU 861.

**EAD 862. Policy & Finance in Higher Ed. (3 Credits)**

I, II. Analysis of governance, policymaking, and financial issues in the student affairs profession. Credit will not be awarded for both EAD 862 and COU 862.

**EAD 863. Working with College Students. (3 Credits)**

(3) A. Provides candidates with appropriate communication skills and methods to effectively facilitate the growth and development of college students in the context of college or university student personnel services.

**EAD 879. Systems for Change. (3 Credits)**

Prerequisite: departmental approval. Co-requisite: GRD 878r. Analysis of the school district administrator's role with emphasis on understanding district-wide complex systems change and how change impacts student learning. Minimum of 25 clinical hours required.

**EAD 897. Independent Study. (1-3 Credits)**

A. Designed for advanced graduate students who desire to investigate special problems relating to educational administration and/or supervision. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**Educational Leadership & Counseling Education****EDD 901. Orientation to Doc Studies. (3 Credits)**

A. A required orientation course that introduces students to programs, faculty, resources, and expectations for individual and group scholarship.

**EDD 902. Intro to Quant Res Methods. (3 Credits)**

A. This course is an introduction to the use of quantitative research methods in education. Topics include measures of central tendency, measures of variability, correlation, regression, testing statistical hypotheses, and research design.

**EDD 903. Qualitative Research. (3 Credits)**

A. Orientation to philosophical foundations, major theoretical approaches, methodology, and analysis in qualitative research.

**EDD 904. App Res: Eval, Sur, & Gr Writ. (3 Credits)**

A. Applications of research methods to include elements of program evaluation, survey design, and grant writing approaches. The course emphasizes the development of specific program planning and evaluation concepts, research design, survey development and grant writing as related to the program planning process.

**EDD 905. Analysis of Research Lit. (3 Credits)**

A. A core doctoral course designed to instruct students on writing wellstructured, critical literature reviews. The course covers topic selection, searching and managing literature data, notetaking techniques, assessing and synthesizing extant literature, and writing, editing, and proofreading strategies.

**EDD 906. Dissertation Practicum. (3 Credits)**

A. Prerequisite: Admission to the doctoral program in educational leadership or counselor education, EDD 901,902,903, and 904; or department approval. Intended for advanced educational leadership and counselor education students, this course focuses on applying research methods and critiquing relevant literature for designing the doctoral dissertation proposal.

**EDD 907. Intermed Quant Research Meth. (3 Credits)**

A. Formerly EDL 812. Prerequisite: EDD 902 or departmental approval. Examination of intermediate quantitative research methods including multiple regression, analysis of variance and covariance, discriminant analysis, and factor analysis. This course emphasizes practice and application of statistical analysis for evidence-based decisions and research. Credit will not be awarded to students who have credit for EDL 812 or 952.

**EDD 908. Adv Qualitative Research Meth. (3 Credits)**

(3) A. Prerequisite: EDD 903 or departmental approval. Examination of intermediate qualitative research methods. Emphasis is on advancing techniques for data collection, data analyses, and write up with emphasis on practice and application. Includes practice with Qualitative Data Analysis (QDA) software. Credit will not be awarded for both EDL 953 and EDD 908. Part III.

**EDD 999. Dissertation. (1-3 Credits)**

A. Formerly EDL 999. Prerequisite: Departmental approval. Completion and defense of a research dissertation appropriate to concentration. Course is repeatable for a maximum of 24 hours. A minimum of 12 hours is required for degree completion.

**Educational Leadership & Policy Studies****EDL 811. Intro Qualitative Methods. (3 Credits)**

A. Introduction to qualitative data collection and analysis in educational research. Review of origins, theory, and design of method; issues of validity, reliability, and human subject ethics.

**EDL 820. Cultural Leadership. (3 Credits)**

A. Investigation of cultural and social influences on the development of leadership in educational settings. Emphasis is on place and the application of sociocultural concepts to leadership issues and problems in educational settings.

**EDL 822. Social Political Leadership. (3 Credits)**

A. Examination of social and political dimensions of the process and content of leadership from theoretical and practical perspectives. Emphasis is on the application of relevant theoretical constructs to leadership issues and problems in educational settings.

**EDL 823. Assessment for Ed Leaders. (3 Credits)**

A. Study and application of appropriate and effective uses of different types of assessment data in a variety of educational settings to guide leadership practice.

**EDL 826. Leadership for Change. (3 Credits)**

A. Prerequisite: EDL 810 or permission of instructor. The emphasis is on research design, the limitations of research design, and the analysis of data. Techniques include ANOVA, regression, and ANCOVA.

**EDL 830. College Teaching. (3 Credits)**

A. An introduction to teaching on the college level focusing on best practices in pedagogy and research.

**EDL 899. Thesis for Specialists in Educ. (3 Credits)**

A. Prerequisite: departmental approval. Completion and defense of a research thesis in educational leadership, policy studies, or a related field. May be retaken to a maximum of six hours.

**EDL 900. Ed.D. Field Experience. (3 Credits)**

A. Prerequisite: departmental approval. Minimum of eighty hours of field experiences relevant to the student's planned program of study, supported by skill development through symposia, tutorials, lectures, and assessments. May be retaken to maximum of six hours.

**EDL 925. Organizational Bhvr & Justice. (3 Credits)**

(3) A. Examines the dynamacs of educational organizations including the complex patterns of human dynamics and provides a rationale for principles of situational leadership. Facilitates understanding of organizations, their management, and implications for perceptions of fairness.

**EDL 930. Seminar on Rural Schools & Com. (3 Credits)**

A. Consideration of the relationship between schools and rural communities, including issues related to democratic localism, state and nationaleducation agendas, and economic development in rural areas.

**EDL 940. Social Political Leadership. (3 Credits)**

Examination of social and political dimensions of the process and content of leadership from theoretical and practical perspectives, emphasizing and examining the shape of education in the United States, and the effect of these forces. Formerly EDL 822. Credit will not be awarded to students who have credit for EDL 822.

**EDL 941. Exam Div, Race, & Cult Equity. (3 Credits)**

(3) A. Examines education as a social and cultural phenomenon. Students gain skills to critically analyze educational practice, promote inclusion in schools, lead for cultural equity within organizations, and work with varied communities to serve marginalized students.

**EDL 942. Leadership Theory and Practice. (3 Credits)**

A. Analysis of skills required for successful leadership in education organizations. Students evaluate established theories, compare management from leadership, and examine ethical decision-making in complex educational dilemmas. Aligning leadership to individual strengths, values will be considered., Formerly EDL 821. Credit will not be awarded to students who have credit for EDL 821.

**EDL 943. Capacity Bldg, Org Improv & In. (3 Credits)**

Focuses on the leader's role in changing educational organizations emphasizing the nature, characteristics, responsibilities, and contextual determinants of change. Course considers leadership practices used to build organizational capacity. Formerly EDL 826. Credit will not be awarded to students who have credit for EDL 826.

**EDL 944. Public Policy & Politics. (3 Credits)**

The course focuses on education policy formation, application, and impact on both P-12 and postsecondary education. The interaction between policy and politics is emphasized. Students will research and prepare policy briefs. Formerly EDL 924. Credit will not be awarded to students who have credit for EDL 924.

**EDL 945. Ed.D Field Experience. (3 Credits)**

(3) A. Formerly EDL 900. A diverse field experience relevant to the student's planned program of study and research focus, supported by a mentor through site visits, interviews, field investigations and peer information sharing.

**EDL 950. Educating and Supporting Diverse Student Populations. (3 Credits)**

(3) A. This course examines best practice approaches for educating and serving students marginalized due to environmental, developmental or behavioral conditions and circumstances. Students in this course will develop improvement plans and analyze strength-based leadership.

**EDL 951. Higher Ed Admin and Leadership. (3 Credits)**

A. Designed to examine major themes of higher education administration, organizational leadership and governance with special emphasis on contemporary leadership challenges in postsecondary educational settings. Formerly EDL 912. Credit will not be awarded to students who have credit for EDL 912.

**EDL 953. Adv Qualitative Res Methods. (3 Credits)**

(3) A. Prerequisite: EDD 903 or departmental approval. Examination of intermediate qualitative research methods. Emphasis is on advancing techniques for data collection, data analyses, and write up with emphasis on practice and application. Includes practice with Qualitative Data Analysis (QDA) software.

**EDL 954. Found & Cur Issues in Ed Leade. (3 Credits)**

(3) A. Students analyze leading theorists, historical development, legal and policy precedence, and contemporary issues in American P-20 education with emphasis on the examination of leader roles. Students will integrate theoretical, legal, and historical context to interpret current issues.

**EDL 955. Field Experience Elective. (3 Credits)**

(3) A. Formerly EDL 900. A field experience relevant to the student's planned program of study and research focus, supported by a mentor through site visits, interviews, field investigations and peer information sharing.

**EDL 956. Analysis of Research Lit. (3 Credits)**

(3) A. This is a doctoral course designed to instruct students on writing well-structured, critical literature reviews. The course covers topic selection, searching and managing literature data, note-taking techniques, assessing and synthesizing extant literature, and writing, editing, and proofreading strategies. Credit will not be awarded for both EDD 905 and EDL 956.

**EDL 999. Dissertation. (3 Credits)**

A. Prerequisite: departmental approval. Completion and defense of a research dissertation in educational leadership, policy studies, or related field. May be retaken to a maximum of twelve hours.

## Certification Preparation Program

These are programs of study that do not lead to a degree or to an ECU awarded recognition but instead prepare the student, upon recommendation from ECU, for more advanced professional certification and/or Ranking by the Commonwealth of Kentucky Education Professional Standards Board (EPSB).

## Standard Guidance Certification Program

This program allows those holding the state's Provisional Certificate in School Counseling to convert their initial/provisional certification into Standard Guidance Certification. All individuals are required to earn six (6) graduate hours above their masters degree regardless of the institution from whom they obtained it and the number of credits/hours completed within their degree. This can also serve as a pathway for individuals needing to reinstate a lapsed certification with EPSB approval.

## Rank I in School Counseling Program

This program allows those with a master's degree in school counseling of less than 60 credits to obtain the necessary credits beyond their degree to earn Rank I in the state's educator rank system. Individuals must complete enough credits in this program to reach a total minimum of 60 [school] counseling, graduate credits. Individuals holding a master's degree in education or a related field must first apply to the MAEd School Counseling degree program before applying to this program, and may therefore not need this program as they may then have enough graduate credits to reach Rank I. This may also serve as a pathway for individuals needing to reinstate a lapsed certification with EPSB approval.

## Program Requirements

Code	Title	Hours
<b>Standard Guidance Certification Requirements Electives</b>		
	Choose from six hours of electives to be selected with advisor approval	6
<b>Rank I Certification Requirements Electives</b>		
	Rank I in School Counseling must at least 60 graduate hours in a planned program to be selected with advisor approval	12

## Clinical Mental Health Counseling, Master of Arts (M.A.)

### Admission Requirements

#### Admissions to the Master of Arts in Education in School Counseling and the Master of Arts in Clinical Mental Health Counseling

The minimum program admissions requirements - based on those of the Graduate School - are a baccalaureate degree from a regionally accredited institution and a minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale. If an applicant does not have an overall undergraduate GPA of 3.0 or higher, then one of the following must be met:

1. The individual's undergraduate GPA in the final 60 credits of their degree must be a 3.25 or higher, or
2. The individual must submit Graduate Record Exam (GRE) or Miller Analogy Test (MAT) scores.

If an applicant needs to submit GRE or MAT scores, then the program maintains the following minimum requirements of these scores and at least one of them must be met:

1. A score of 146 or higher on the verbal section of the GRE.
2. A score of 146 or higher on the quantitative section of the GRE.
3. A score of 365 or higher on the MAT.

The applicant must also submit additional application materials as described on the counseling program area website at <https://coecounseling.eku.edu/clinical-mental-health-master-arts-program-description> (<https://coecounseling.eku.edu/clinical-mental-health-master-arts-ma-program-description/>). Applicants who meet all of the above requirements must attend a virtual group admissions interview.

Additionally, the Counselor Education Program requires a state criminal history background check approved\* by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal background check may be required as a condition of admission. An additional state criminal background check approved\* by the College of Education and Applied Human Sciences is required prior to beginning off campus internship courses (COU 880, COU 881) or may be required at additional points in the program. Under certain circumstances, a national criminal background check may be required. Students must purchase professional liability insurance prior to enrollment in any clinical practice class including COU 846, COU 820, COU 880, and COU 881. Further, that insurance coverage must be maintained

throughout enrollment in the graduate program in any class that includes clinical applications.

\*"Approved" is a formal review process of the criminal records report. Any misrepresentation of facts, by omission or addition, may result in the denial of admission to the Counselor Education Program or enrollment in off campus externship courses.

Course Sequence: COU 813 Prof Orient & Ethics in Course, COU 840 Counseling Theory and Practice, and COU 846 Process and Basic Tech Counsel must be taken in semester sequence or as a corequisite.

2

3-9 hours if internship is taken over 2-3 semesters

3

Any COU 881 Internship in Counseling:\_\_\_\_\_ hours taken in excess of the three required Core credit hours will be applied as electives. A maximum of six credit hours of COU 881 Internship in Counseling:\_\_\_\_\_ may be used as electives.

A grade of B or higher is required in every course for degree completion for the M.A. in Clinical Mental Health Counseling program.

## Communication Disorders, Master of Arts (M.A.)

### General Information

The Master of Arts Program in Communication Disorders is a two-year, full time program leading to eligibility for certification/licensure in Speech-Language Pathology by the American Speech-Language-Hearing Association and Kentucky Board of Speech-Language Pathology. More complete information concerning the graduate program can be reviewed by accessing the Program website at <https://cd.eku.edu>.

### Admission Requirements

#### Admission to the Program

To be eligible for consideration for admission into the M.A. Program in Communication Disorders, applicants must meet the requirements for admission to the Eastern Kentucky University Graduate School and have a bachelor's degree in Communication Disorders or a related field with a minimum undergraduate GPA of 3.0 overall which includes the fall semester prior to the application deadline of Feb. 15. Candidates admitted with a degree other than Communication Disorders must complete program pre-requisites before starting the graduate curriculum.

The following documentation must be submitted with the online application:

1. Undergraduate transcripts showing all college level courses completed.
2. A personal essay of approximately 500 words describing the applicant's professional objectives.

A review of applications will result in an initial selection of candidates to interview. CSD faculty will conduct the interviews and make final admissions decisions based upon GPA, the personal essay, and candidate interview.

Once a candidate's application has been approved, the following documentation is necessary before official admission:

**Background Check** - The CD Program requires a state criminal history background check approved<sup>1</sup> by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal background check may be required

as a condition of admission. An additional state criminal background check approved<sup>1</sup> by the College of Education and Applied Human Sciences is required prior to beginning off campus externship courses (CSD 897 School Experiences in CD, CSD 898 Externship in Comm Disorders) or may be required at additional points in the program. Under certain circumstances, a national criminal background check may be required. Students must purchase professional liability insurance prior to enrollment in clinical practicum courses. Further, that insurance coverage must be maintained throughout enrollment in the graduate program.

1

"Approved" is a formal review process of the criminal records report. Any misrepresentation of facts, by omission or addition, may result in the denial of admission to the Communication Disorders Program or enrollment in off campus externship courses.

Admission to Eastern Kentucky University's undergraduate program in Communication Disorders does not guarantee acceptance into Eastern Kentucky University's graduate program. There are limited spaces available in the graduate program. The most qualified applicants are admitted. Admission is based upon the criteria described above. Application forms are available online at the Graduate Education and Research website, <http://gradschool.eku.edu/apply> (<http://gradschool.eku.edu/apply/>). Submit the completed application for admission with all required documents (application form, official transcripts, essay) by February 15 to the Office of Graduate Education and Research.

### Professional Code of Ethics

The ASHA Code of Ethics outlines professional guidelines for ethical professional conduct and decision-making in the field of speech-language pathology. Students are expected to abide by the ASHA Code of Ethics available at <http://www.asha.org/Code-of-Ethics/>

### Program Requirements

CIP Code: 51.0203

**Probation and Progress in the Program** – If, in any semester of study, a candidate's graduate grade point average falls below 3.0 for all courses taken after admission to the program, the candidate will automatically be on academic probation. The candidate will be dismissed from the program following any second semester with a cumulative GPA below 3.0. A candidate in the program, who earns more than two "Cs", or one "D", or one "F" in courses taken after admission, will be dismissed from the program.

**Exit Requirements**

GRD 877N	MAED Com Disorder Written Comp	0
or GRD 878W	MAED Commun Disorder Oral Comp	

**Total Hours** 63

If candidates have not completed a course in Neural Bases of Communication; Speech and Hearing Science; School Services in Communication Disorders; Statistics; and Chemistry or Physics with a grade of "C" or higher, then these courses must be completed to meet the requirements for graduation, certification/licensure in Speech-Language Pathology by the American Speech-Language-Hearing Association and Kentucky Board of Speech-Language Pathology.

**Exit Requirements**

The following are the exit requirements for the M.A. in Communication Disorders:

- Program GPA: Candidates must earn an overall GPA of 3.0 or higher, with no grade lower than a C.
- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components.
- A thesis and oral defense - GRD 877N MAED Com Disorder Written Comp (Research Option) or a written comprehensive examination covering education and major program components – GRD 878W MAED Commun Disorder Oral Comp (Non-Research Option).

**Clinical Clock Hours Requirement**

Candidates must complete 375 clinical clock hours before exiting from the graduate program. This requirement will meet the number of hours specified for national certification by the American Speech-Language-Hearing Association and will meet or exceed the hours required for Kentucky Licensure in Speech-Language Pathology. Clinical experiences for accruing clock hours are offered through CSD 874 Grad Pract: Speech-Lang Path, CSD 897 School Experiences in CD, and CSD 898 Externship in Comm Disorders. A maximum of 50 clinical clock hours accrued at the undergraduate level may be counted with appropriate documentation. A minimum of 25 clock hours of (documented) clinical observation must be completed prior to earning these clinical clock hours.

**Licensure**

Candidates seeking national certification by the American Speech-Language-Hearing Association and state licensure by the Kentucky

Board of Speech-Language Pathology and Audiology must complete the appropriate PRAXIS exams.

**Elementary Education Counselor Seeking Secondary School Counseling Endorsement Preparation Program**

**Endorsement Preparation Programs**

These are programs of study that do not lead to a degree or to an ECU awarded recognition but instead prepare the student, upon recommendation from ECU, for more advanced professional endorsement by the Commonwealth of Kentucky Education Professional Standards Board (EPSB).

**School Counseling, Master of Arts in Education (M.A.Ed.)**

**Admission Requirements**

**Admissions to the Master of Arts in Education in School Counseling and the Master of Arts in Clinical Mental Health Counseling**

The minimum program admissions requirements - based on those of the Graduate School - are a baccalaureate degree from a regionally accredited institution and a minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale. If an applicant does not have an overall undergraduate GPA of 3.0 or higher, then one of the following must be met:

1. The individual's undergraduate GPA in the final 60 credits of their degree must be a 3.25 or higher, or
2. The individual must submit Graduate Record Exam (GRE) or Miller Analogy Test (MAT) scores.

If an applicant needs to submit GRE or MAT scores, then the program maintains the following minimum requirements of these scores and at least one of them must be met:

1. A score of 146 or higher on the verbal section of the GRE.
2. A score of 146 or higher on the quantitative section of the GRE.
3. A score of 365 or higher on the MAT.

The applicant must also submit additional application materials as described on the counseling program area website at <https://coecounseling.eku.edu/school-counseling-program-description-master-arts-education-maed> (<https://coecounseling.eku.edu/school-counseling->

program-description-master-arts-education-maed/). Applicants who meet all of the above requirements must attend a virtual group admissions interview.

Additionally, the Counselor Education Program requires a state criminal history background check approved\* by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal background check may be required as a condition of admission. An additional state criminal background check approved\* by the College of Education and Applied Human Sciences is required prior to beginning off campus internship courses (COU 880, COU 881) or may be required at additional points in the program. Under certain circumstances, a national criminal background check may be required. Students must purchase professional liability insurance prior to enrollment in any clinical practice class including COU 846, COU 820, COU 880, and COU 881. Further, that insurance coverage must be maintained throughout enrollment in the graduate program in any class that includes clinical applications.

\*"Approved" is a formal review process of the criminal records report. Any misrepresentation of facts, by omission or addition, may result in the denial of admission to the Counselor Education Program or enrollment in off campus externship courses.

<sup>1</sup>

Course Sequence: COU 813 Prof Orient & Ethics in Course, COU 840 Counseling Theory and Practice, and COU 846 Process and Basic Tech Counsel must be taken in semester sequence or as corequisites.

<sup>2</sup>

6-9 hours of internship is taken over 2 or 3 semesters

A grade of B or higher is required in every course for degree completion for M.A.Ed. in School Counseling.

Provisional counseling certification is available with master's degree in School Counseling.

The Provisional Certificate for school counselors is issued for a period of five years or will be replaced with standard certification with the completion of six (6) credits beyond required degree courses.

## Secondary School Counselor Seeking Elementary School Counseling Endorsement Preparation Program

### Endorsement Preparation Programs

These are programs of study that do not lead to a degree or to an EKU awarded recognition but instead prepare the student, upon

recommendation from EKU, for more advanced professional endorsement by the Commonwealth of Kentucky Education Professional Standards Board (EPSB).

## Department of Teaching, Learning, & Educational Leadership

### General Information

The Department of Teaching, Learning, & Educational Leadership is responsible for graduate advisement and development in elementary education, middle grade education, secondary education, gifted education, literacy education, special education, library science, and leadership programs. Programs of study may lead to the Master of Arts in Education degree, Rank II, Rank I, and Master of Arts in Teaching degree (Initial Certification).

Additionally, the Department of Teaching, Learning, & Educational Leadership offers a variety of choices to candidates who wish to extend or add to their certificates due to personal choice or changes in school configurations within their districts. Candidates who seek to add an additional area of certification are asked to contact the department for specific program information and review of their current credentials. The secondary education program, in cooperation with appropriate departments throughout the University, offers specific programs in agriculture, art, biology, business education, English, family and consumer science, mathematics: mathematics education, music, physical education, physical science: chemistry, earth science, or physics, school health, social studies: history, and technology.

- **Middle School** (Grades 5 through 9) - Preparation includes either one or two teaching fields selected from English and communications, mathematics, science, or social studies.
- **Secondary School** (Grades 8 through 12) - Preparation includes one or more of the following specializations: English, mathematics, social studies, chemistry, physics, biology, or earth science.
- **Middle/Secondary School** (Grades 5 through 12) - Preparation includes one or more of the following specializations: agriculture, business and marketing education, family and consumer science, industrial education, or engineering and technology.
- **Elementary/Middle/Secondary School** (Primary through Grade 12) - Preparation includes one or more of the following specializations: art, foreign language, gifted education, health, literacy (reading/writing), physical education, music, or school librarian.

Endorsements are additional opportunities for specializing in areas of expertise and expand instructional repertoires for classroom teachers. We offer the following endorsement programs for teachers to add to their base teaching certificate:

- **English as a Second Language (ESL), P-12**
- **Gifted and Talented (GT), P-12**

- **Literacy Specialist, P-12**
- **Teacher Leader, P-12**

The Department also offers degree and non-degree graduate programs including the doctoral degree (Ed.D) with the option of two concentrations (Leadership and Policy Studies or Curriculum Leadership for Social Justice) and a Master's Degree in School Counseling, Student Personnel Services in higher Education, and Educational Specialist Degree in Educational Administration and Supervision. Certification programs include the Principalship, Supervisor, Superintendent, and Pupil Personnel Services. Through completion of the degree or certification programs, students may earn a chance in their rank status.

## Master of Arts in Education (M.A.Ed.)

### Admission Requirements

Candidates must meet the admissions requirements of the Graduate School and have completed an initial elementary, middle grades, or secondary/P-12/5-12 Kentucky teaching certification program. In addition, candidates must have earned an overall 3.0 undergraduate GPA or a 3.0 in the last 30 hours completed.

### Graduate Advisors

**Dr. Nicola Mason, Department Chair and eCampus Coordinator**

**Dr. Sonja Yow, Associate Chair**

**Dr. Emily Zuccaro, Graduate Programs Coordinator**

*MAEd Literacy, English as a Second Language (ESL), Gifted and Talented (GT), Literacy Specialist, and Teacher Leader Endorsements (P-12)*

**Dr. April Blakely**

*MAED Elementary, Middle and Secondary Education, and Additional Certifications*

**Dr. Ralph Turner**

*Library Science Coordinator and Rank I*

**Dr. Michelle Grempe**

*Deaf and Hard of Hearing (DHH)*

**Dr. Julie Rutland**

*Master of Arts in Teaching (MAT) and Interdisciplinary Early Childhood Education*

**Dr. MaryJo Krile**

*Learning Behaviors Disorders (LBD) and Moderate to Severe Disabilities (MSD)*

**Dr. Ann Burns**

*Leadership Programs*

**Dr. Todd McCardle**

Based upon individual credentials, may include additional graduate or undergraduate coursework beyond the degree or rank requirement.

## Doctoral

- Doctor of Education with a Concentration in Curriculum Leadership for Social Justice (Ed.D.) (p. 640)
- Doctor of Education with a Concentration in Leadership, Policy Studies, and Social Justice (Ed.D.) (p. 641)

## Specialist

- Educational Administration and Supervision, Specialist in Education (Ed.S.) (p. 643)

## Master of Arts in Education (MAEd)

- Elementary Education, Master of Arts (M.A.Ed.) (p. 644)
- Literacy P-12, Master of Arts in Education (M.A.Ed.) (p. 646)
- Middle Grades Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Certification Area Specialization (M.A.Ed.) (p. 647)
- Middle Grades Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Dual Credit Content Preparation (M.A.Ed.) (p. 648)
- Middle Grades Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in English as a Second Language Endorsement (Grades P#12) (M.A.Ed.) (p. 649)
- Middle Grades Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Gifted Education Endorsement (Grades P#12) (M.A.Ed.) (p. 650)
- Middle Grades Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Literacy Specialist Endorsement (Grades P#12) (M.A.Ed.) (p. 650)
- School Leadership, Master of Arts in Education (M.A.Ed.) (p. 653)
- School Librarian, Master of Arts in Education with a Concentration in Additional Certification (M.A.Ed.) (p. 654)
- School Librarian, Master of Arts in Education with a Concentration in Endorsement (M.A.Ed.) (p. 655)
- Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Certification Area Specialization (M.A.Ed.) (p. 656)
- Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in English as a Second Language (Grades P#12) Endorsement (M.A.Ed.) (p. 656)
- Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Gifted Education (Grades P#12) Endorsement (M.A.Ed.) (p. 657)
- Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Literacy Specialist (Grades P#12) Endorsement (M.A.Ed.) (p. 658)
- Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Preparation to Teach Dual Credit Music (M.A.Ed.) (p. 659)
- Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in Preparation to

Teach Dual Credit # Other Subject Area Concentrations (M.A.Ed.) (p. 659)

- Special Education, Master of Arts in Education (M.A.Ed.) (p. 660)

## Master of Arts in Teaching (MAT)

- Teacher Education, Master of Arts in Teaching with a Concentration in Agriculture (Grades 5-12) (M.A.T.) (p. 663)
- Teacher Education, Master of Arts in Teaching with a Concentration in Art (P-12) (M.A.T.) (p. 664)
- Teacher Education, Master of Arts in Teaching with a Concentration in Biological Science (8-12) (M.A.T.) (p. 666)
- Teacher Education, Master of Arts in Teaching with a Concentration in Business and Marketing (5-12) (M.A.T.) (p. 667)
- Teacher Education, Master of Arts in Teaching with a Concentration in Chemistry (8-12) (M.A.T.) (p. 669)
- Teacher Education, Master of Arts in Teaching with a Concentration in Deaf and Hard of Hearing Education (M.A.T.) (p. 670)
- Teacher Education, Master of Arts in Teaching with a Concentration in Earth Science (8-12) (M.A.T.) (p. 672)
- Teacher Education, Master of Arts in Teaching with a Concentration in Elementary Education P-5 Teaching (M.A.T.) (p. 674)
- Teacher Education, Master of Arts in Teaching with a Concentration in Engineering & Technology Education (5-12) (M.A.T.) (p. 675)
- Teacher Education, Master of Arts in Teaching with a Concentration in English (8-12) (M.A.T.) (p. 677)
- Teacher Education, Master of Arts in Teaching with a Concentration in Family and Consumer Sciences (5-12) (M.A.T.) (p. 679)
- Teacher Education, Master of Arts in Teaching with a Concentration in French (P-12) (M.A.T.) (p. 680)
- Teacher Education, Master of Arts in Teaching with a Concentration in Health Education (P-12) (M.A.T.) (p. 682)
- Teacher Education, Master of Arts in Teaching with a Concentration in Interdisciplinary Early Childhood Education (M.A.T.) (p. 684)
- Teacher Education, Master of Arts in Teaching with a Concentration in Mathematics (8-12) (M.A.T.) (p. 685)
- Teacher Education, Master of Arts in Teaching with a Concentration in Middle Grades 5-9 Teaching (M.A.T.) (p. 687)
- Teacher Education, Master of Arts in Teaching with a Concentration in Music (P-12) (M.A.T.) (p. 688)
- Teacher Education, Master of Arts in Teaching with a Concentration in Physical Education & Health Dual Certification (P-12) (M.A.T.) (p. 690)
- Teacher Education, Master of Arts in Teaching with a Concentration in Physical Education (P-12) (M.A.T.) (p. 692)
- Teacher Education, Master of Arts in Teaching with a Concentration in Physics (8-12) (M.A.T.) (p. 693)
- Teacher Education, Master of Arts in Teaching with a Concentration in Social Science (8-12) (M.A.T.) (p. 695)
- Teacher Education, Master of Arts in Teaching with a Concentration in Spanish (P-12) (M.A.T.) (p. 697)
- Teacher Education, Master of Arts in Teaching with a Concentration in Theatre (P-12) (M.A.T.) (p. 698)

## Certificate

- Deaf and Hard of Hearing Certification (p. 639)
- Interdisciplinary Early Childhood Education Certification (IECE) (p. 645)
- Learning and Behavior Disorders Certification (p. 646)
- Moderate and Severe Disabilities Certification (p. 651)

## Endorsement Options

- English as a Second Language (Grades P-12), Endorsement Preparation Program (p. 645)
- Gifted Education (Grades P-12), Endorsement Preparation Program (p. 645)
- Literacy Specialist (Grades P-12), Endorsement Preparation Program (p. 647)
- Rank I (Sixth Year) Program (p. 652)
- Teacher Leader, Endorsement Preparation Program (p. 700)

## Courses

### Educational Core

#### EDC 810. P12 ED/Tech: Critical Issues. (3 Credits)

Online. Introduction to research about integration of technology into P-12 school systems. Students will also investigate current and future technology advancements in hardware, software, networking, support, and training. Basic issues relating to legal and ethical issues relative to technology will also be introduced.

#### EDC 811. P12 Ed/Tech: multimedia Design. (3 Credits)

Online. Corequisite: EDC 810. Introduction to multimedia-authoring approaches and research in electronic formats. Students will create web-based instructional courseware. All students will produce and publish a classroom, school, or other education related website.

#### EDC 812. P12 ED/Tech: Online Learning. (3 Credits)

Online. Corequisite: EDC 810. Understand and apply principles and best practices in online learning as a medium for adding online activities in the P-12 classrooms. Students will evaluate open source software and develop an online course or unit of study using a selected open source system.

#### EDC 813. P12 ED/Tech: Capstone. (3 Credits)

Online. Prerequisites: EDC 810, 811, and 812. Students will synthesize and integrate theories and practices learned from the three previous courses in the program and apply them toward the development of a culminating educational technology project appropriate to the P-12 environment.

### Educational Foundations

#### EDF 804. Teaching and Leading with Tech. (2 Credits)

(2) I, II. Co-requisite: ETL 806. The applications of technology for teaching and learning in educational settings, including uses for promoting interactive engagement, reflection and inquiry, diversity and equity, and leadership.

#### EDF 807. Educational Studies:\_\_\_\_\_. (1-3 Credits)

A. Prerequisite: advisor/departmental chair approval. Independent work, workshop, special topics, or seminars. May be retaken under different subtitles.

#### EDF 837. Comparative Education. (3 Credits)

A. Study of the development of educational thought and practice in selected nations of Europe, Asia, Africa, and South America. Emphasis will be placed on intellectual, historical, and sociological factors.

#### EDF 839. Human Development & Learning. (3 Credits)

The study of various theories of human behavior, development, and learning. Emphasis is placed on current research and theories with special emphasis on different ethnic, cultural and social backgrounds and physical and mental exceptionality of children and youth.

#### EDF 855. Found of Multicultural Educati. (3 Credits)

A. Examination of the education implications of cultural pluralism in America and selected societies of the world.

### Early Elementary Education

#### ELE 707. Problems in Ele Education. (1-3 Credits)

A. Prerequisite: advisor/departmental chair approval. Independent work, special workshops, special topics, or seminar.

#### ELE 719. Teaching in the Kindergarten. (3 Credits)

A. Focuses upon leaders and literature of kindergarten education including historical movements, organizations, curricula, equipment, and procedures used with normal, developmentally different, and multicultural children.

#### ELE 807. Elementary Education:\_\_\_\_\_. (1-3 Credits)

A. Prerequisite: advisor/departmental chair approval. Independent work, workshops, special topics, or seminars. May be retaken under different subtitles.

#### ELE 808. Reading Recovery in Elem Ed. (3 Credits)

Independent work, workshops, or seminars related to the use of Reading Recovery® in Elementary Education. Course is restricted to the Reading Recovery® cohort.

#### ELE 810. Elementary School Curriculum. (3 Credits)

I, II. Study in depth of principles, materials, and procedures in current curriculum development and revision in the elementary school.

#### ELE 820. Literacy Foundation P-5. (3 Credits)

Intensive study of methods and materials appropriate for developing emergent, primary, and transitional literacy in grades P-5.

#### ELE 821. Literacy Instr. & Assess P-5. (3 Credits)

I, II. Pre-requisite: ELE 820. Co-requisite: CED 840. An examination of current trends and problems related to literacy instruction and assessment in grades P-5. Major emphasis on teaching and assessing reading, listening, writing, speaking, grammar, spelling, and handwriting.

#### ELE 822. Mathematical Foundations P-5. (3 Credits)

An overview of the mathematics state standards for teaching mathematics in grades K-5, and theories and research related to teaching and learning mathematics.

#### ELE 823. Math Content, Ped, & Assessmen. (3 Credits)

I, II. Prerequisite: ELE 822. Co-requisite: CED 840. An examination of mathematics for grades P-5 and relevant content, standards, instructional practices, and assessments for learners in this grade span.

#### ELE 824. Science Cont, Ped & Asses P-5. (3 Credits)

I, II. Co-requisite: CED 840. Inquiry-based course focusing on content, pedagogy, and materials for teaching science concepts in primary through grade five.

**ELE 825. Soc Stud Cont, Ped, & Assessme. (3 Credits)**

I, II. Co-requisite: CED 840. This course teaches the content and pedagogical content knowledge in geography, US and world history, government, and civics, cultures, and economics included in elementary state curricula and the Common Core State Standards.

**ELE 826. Integrating Arts, Hum, & Pract. (2 Credits)**

I, II. Study of integrated elementary arts, humanities and practical living skills. Create, reflect upon, and implement essential age-appropriate instruction integrated with elementary content area studies.

**ELE 827. Integrated Thematic Teaching. (2 Credits)**

I, II. Exploration of integrated thematic teaching curriculum focused on making connections through the unification of multiple subjects and experiences.

**ELE 871. Literacy Programs P-5. (3 Credits)**

A. Prerequisite: Admission to Master of Arts in Education, Master of Arts in Teaching, Rank 1, an Endorsement Preparation Program (Elementary Mathematics Specialist, English as a Second Language, Gifted Education, Literacy Specialist, or Reading), or a Certification Preparation Program (Elementary, Middle Grades, Secondary, School Media Librarian, Deaf and Hard of Hearing, Interdisciplinary Early Childhood Education, Learning and Behavior Disorders, or Moderate and Severe Disabilities). Intensive study of methods and materials appropriate for developing emergent, primary, and transitional literacy in grades P-5. (Minimum of 10 clinical hours required.)

**ELE 897. Independent Study. (1-3 Credits)**

I, II. Primarily for advanced graduate students who desire to investigate special problems relating to elementary education. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**Early Elementary/Middle School****EME 710. Art in the Curriculum. (3 Credits)**

A. Elements of the discipline, creativity, aesthetics, theory, philosophy and instructional facilities will be explored. Individual explorations of research and media.

**EME 751. Linguistics in the Curriculum. (3 Credits)**

A. Investigations of elements in the science of linguistics and their application to communication skills of students.

**EME 786. Teaching of Health in P-8. (3 Credits)**

A. Prerequisites: admission to teacher education and major in school health. Developmentally appropriate curriculum, materials, and methods for the health P-8 program. Minimum of twenty field/clinical hours.

**EME 796. P E for Children and Youth. (3 Credits)**

A. Comprehensive review of techniques used in teaching physical education in the early elementary and middle grades. Emphasis placed on health, evaluation, fitness testing, rhythmical activities, game activities, tumbling and self-testing.

**EME 843. Mathematics Intervention Strat. (3 Credits)**

A. Cross-listed as MAE 843. In-depth analysis of teaching resources, teaching strategies, and appropriate mathematics curriculum content for intervention. Credit will not be awarded for both EME 843 and MAE 843.

**EME 852. Teaching Grammar and Punct.. (3 Credits)**

(II.) Explore linguistic diversity and its impact on language development. Develop and evaluate contextualized, research-based language instructional approaches. Develop instructional plans to improve elementary and middle grades students' use of standard written and oral English. Credit will not be awarded to students who have credit for EME 752.

**EME 861. Art in Elem & Middle Grade P-8. (3 Credits)**

Pre-requisites: Admission to MAT program, concentration in art. Developmentally appropriate curriculum, materials, and methods for the P-8 Art program. Minimum of 10 clinical hours are required.

**EME 863. Social Sci in the Curriculum. (3 Credits)**

A. Emphasis on social science disciplines in the curriculum. New developments in social studies curricula are explored.

**EME 865. Investigations in Reading. (3 Credits)**

A. Prerequisite: ETL 802 or 805; Chair approval. Refine and implement a literacy focused action inquiry project. (Up to 40 hours of field experience may be required within candidates' own classroom or educational setting). Credit will not be awarded for EME 865 and ETL 804 or ETL 806.

**EME 866. Investigations in Mathematics. (1-3 Credits)**

A. Critical study of investigative and theoretical literature dealing with the teaching of mathematics.

**EME 870. Trends in Science Education. (3 Credits)**

A. Exploration of modern trends, practices, and foundation programs drawn from appropriate disciplines which relate to the teaching of science.

**EME 872. Mathematics in the Curriculum. (3 Credits)**

A. Cross-listed as MAE 872. Exploration of trends, concepts, and issues involved in modern mathematics programs. Research findings are examined and multi-sensory materials are presented. Credit will not be awarded to students who have credit for MAE 872.

**EME 873. Research Based Rdg. Inst.. (1-3 Credits)**

A. Advanced study of methods, materials, and organizational procedures appropriate for teaching developmental reading.

**EME 874. Lang Arts in the Curriculum. (3 Credits)**

A. Examination of current trends and curriculum problems related to teaching of language arts. Emphasis on listening, oral and written expression, spelling and handwriting. (Minimum of 10 clinical hours required.)

**EME 876. Investgtns in Sci.Ed/Ind.Study. (3 Credits)**

A. Prerequisite: instructor approval. Individual research and study of investigative and theoretical literature dealing with the teaching of science. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**EME 877. Practicum for Read Specialists. (3 Credits)**

A. Prerequisites: EMS 868 and 875. Supervised experience for reading specialists in diagnosing and instructing students with reading difficulties.

**EME 878. Teaching Music in Grades P-8. (3 Credits)**

Prerequisites: Admission to MAT program, major in music concentration. Developmentally appropriate materials and methods for teaching P-8 music. Minimum of 20 clinical hours are required.

**Middle Grade Education****EMG 707. Problems in Middle Grade Educ.. (1-3 Credits)**

A. Prerequisite: approval of advisor. Independent work, workshops, special topics, or seminar. May be taken for a maximum of six hours under different subtitles.

**EMG 806. Read Instruction Middle School. (3 Credits)**

A. Prerequisite: a course in foundations or reading/language arts instruction. Comprehensive study of materials and strategies for teaching reading in the middle grades with special emphasis on reading in the content areas. (Minimum of 10 clinical hours required)

**EMG 807. Middle Grade Education: \_\_\_\_\_. (1-3 Credits)**

A. Independent study, special workshops, topics, or seminars. May be retaken for a maximum of six hours under different subtitles.

**EMG 810. Curriculum in Middle School. (3 Credits)**

A. A study of the physical, social, emotional, and intellectual needs unique to the middle grade student and their implications for courses of study, the learning environment, and teacher characteristics.

**EMG 897. Independent Study. (1-3 Credits)**

A. Offered for advanced graduate students who desire to investigate special problems related to middle grade education.

**Early Elementary/Middle/Secondary Education****EMS 702. Music Tech Teaching Methods. (2 Credits)**

I. Cross listed with MUE 702. Prerequisite: Instructor approval. Development of strategies and techniques for teaching music through digital pedagogy. Ideas for developing musicianship through hands-on student involvement, as well as the use of technology to aid in instruction and delivery in the music classroom. Credit will not be awarded for both EMS 702 and MUE 702.

**EMS 761. Environmental Education Essen. (3 Credits)**

(3) I. This course delves into the philosophy, historical development, resource identification and curriculum development of environmental education. Credit will not be awarded for both EMS 761 and EMS 561.

**EMS 763. Teaching Environmental Educati. (3 Credits)**

(3) Summer Only. Appropriate methods and materials for effective environmental education in a variety of settings. Credit will not be awarded for both EMS 563 and EMS 763.

**EMS 764S. Service Learning as Pedagogy. (3 Credits)**

(3) A. Classroom service learning strategies and techniques will be modeled. Discussion about practical applications and reflection on class activities will follow. An environmental service learning project will be planned and carried out during the course.

**EMS 765S. Teaching in the Outdoors. (3 Credits)**

(3) Summer Only. Basic Principles of outdoor teaching will be combined with outdoor skills and an environmental service learning investigation. Due to its content, this will be taught in workshop format during the summer semester. Credit will not be awarded for both EMS 565S, EMS 864s, and EMS 765S.

**EMS 775. Methods for Multilingual Learners. (3 Credits)**

A. The study of effective methods of Teaching English as a Second Language (TESL). Thirty hours of field experiences are required. This course aims to enable you to critically examine, analyze, and apply theories and methodologies used in multilingual teaching. The ultimate purpose/objective of this course is to help you acquire the pedagogical competency repertoire needed to enhance and maximize learning for your multilingual learners.

**EMS 776. Assessment Methods for Multilingual Learners. (3 Credits)**

(II) This course is designed to examine the major principles and methods of assessment for multilingual learners, including standardized testing, classroom-based performance, and alternative assessment. Sociocultural issues related to assessment will also be explored. (10 hours of clinical experience required). Credit will not be awarded to students who have credit for EMS 576.

**EMS 777. Culturally and Linguistically Responsive Teaching. (3 Credits)**

(II). The purpose of this course is to help educators develop awareness of the implications of cultural and linguistic diversity for school success as well as effective techniques for collaborating with immigrant students and families. 10 hours of clinical experience required. Credit will not be awarded to students who have completed EMS 577.

**EMS 810. Emerging Instructional Technol. (3 Credits)**

I, II. Technological applications to education, training, and instruction within educational settings. Students examine, develop, and/or evaluate emerging instructional technologies.

**EMS 818. Effective Inst Models & Pract. (3 Credits)**

A. A course designed to help students examine, evaluate, and apply recent research findings related to effective instruction and schools.

**EMS 830. Multicultural Pop/School Curr. (3 Credits)**

A. Exploration of ethnic and family backgrounds, class structure, patterns of living, language characteristics, and teacher-pupil attitudes as they relate to the school experience.

**EMS 842. Discipline & Classroom Mgt. (3 Credits)**

A. Knowledge and skills necessary for establishing and maintaining positive relationships in the classroom; disciplinary concerns of teachers. Theoretical and tested knowledge in personal behavior and communication skills systems examined for practical and effective application.

**EMS 846. Social Studies Investigation. (3 Credits)**

(3) A. Critical study and application of investigative and theoretical literature dealing with the teaching of social sciences.

**EMS 850. Curr. for Leaders in Education. (3 Credits)**

A. A course focusing on definition, planning, implementation, and assessment of P-12 curricula. Designed for students pursuing programs in Instructional Leadership.

**EMS 853. Creativity in the Classroom. (3 Credits)**

A. Designed to offer students experience with creativity as a necessary component in learning for the gifted as well as all children. Creativity will be modeled in class format and teaching strategies.

**EMS 854. Soc & Emotional Dev of Gifted. (3 Credits)**

A. Focuses on the need for affective education of gifted students in a classroom context. Candidates will examine social and emotion issues, review models, and practice differentiated classroom strategies.

**EMS 855. Gifted and Talented Youth. (3 Credits)**

A. Survey of the unique characteristics of gifted and talented youth, methods of identification, and educational needs.

**EMS 856. Curr in Gifted/Talented Educat. (3 Credits)**

A. Models for gifted and talented curriculum development, gifted and talented curriculum projects and teaching strategies, state and national curricular guidelines for gifted and talented instruction, program delivery options, and technological support are major topics.

**EMS 857. Model Prog-Gifted/Talented Edu. (3 Credits)**

A. Examination of school and district wide programs for gifted and talented students including program delivery options, staff development, and development of critical and creative thinking skills.

**EMS 858. Practicum-Gifted & Talented Ed. (3 Credits)**

A. Prerequisites: EMS 855, 856, 857. Supervised teaching experience with gifted/ talented students. Provides students opportunities to apply knowledge and skills in classroom settings. Students will participate in program planning, implementation, and evaluation.

**EMS 861. Environmental Educ Essentials. (3 Credits)**

A. Exploration of the philosophy, historical development, resource identification and curriculum development of environmental education.

**EMS 863. Teaching Environmental Educ. (3 Credits)**

A. Appropriate methods and materials for effective environmental education in a variety of settings.

**EMS 864S. Teaching in the Outdoors. (3 Credits)**

A. Basic principles of outdoor teaching combined with outdoor skills and an environmental issue service-learning investigation. Due to its content, this will be taught in workshop format during the summer. Service learning activities required.

**EMS 868. Inst Tech & Mat for St Rdg Dif. (3 Credits)**

A. Prerequisite: ELE 871, EME 873, EMG 806, or ESE 884. Methods, materials and techniques appropriate for correction of reading problems.

**EMS 870. Literacy Consulting. (3 Credits)**

A. An introduction to the roles, skills, responsibilities and dispositions needed for successful literacy consulting in grades 4-12.

**EMS 871. Literacy Consulting Practicum. (3 Credits)**

A. Prerequisite: EMS 870. Supervised experiences for literacy consultants working in schools to provide instructional support and professional development in the language arts to teachers across the curriculum.

**EMS 873. Trends & Issues in ELA. (3 Credits)**

(3) I. A study of current trends and issues in the six language arts: reading, writing, speaking, listening, viewing, and visually representing. Current theories, relevant research and practical applications are considered in relation to language arts in the K-12 classroom. (Minimum of 10 clinical hours required.)

**EMS 874. Disciplinary Literacy. (3 Credits)**

I II . Prerequisites: EGC 820 and EGC 830. Corequisite: CED 830. Emphasis on developmental and content area reading skills, appraisal of content reading abilities, appropriate materials, instructional strategies and assessment.

**EMS 875. Literacy Assess and Instruct. (3 Credits)**

A. Prerequisite: ELE 871, or, EMG 806, or by departmental approval. Theory and implementation of assessment and instruction teaching students with a range of abilities in reading. Emphasis on assessing types and degree of reading strengths and needs, identifying contributing factors., and planning/implementing instruction to meet students' diverse needs and skills. Field/Clinical Experiences: 10 hours.

**EMS 876. Lit., Lead. & Advocate. (3 Credits)**

(3) II. Prerequisites: EMS 875. A culminating course for the program, this is the study of models of literacy leadership (e.g., coaching, mentoring) and how to create need-based literacy plans to assist practicing teachers in P-12 literacy. Field/Clinical Experiences: 20 hours.

**EMS 878. Mathematics Assessment P-12. (3 Credits)**

(3) A. Theory of application of a constructivist approach to mathematics assessment. Emphasis on accessing types and degree of math disabilities, identifying how children construct mathematical knowledge, and planning/implementing instruction to address students' needs.

**EMS 880. Early Ele/Middle Grd/Second Ed. (3 Credits)**

A. Prerequisite: teaching experience. For school and college personnel concerned with improving student teaching experiences.

**EMS 889. Specialist in Ed Capstone. (3 Credits)**

A. Prerequisites: ETL 802 or EDL 810 and EDL 811. Completion of minimum of 24 hours in Ed.S. program. Multimedia presentation of a research project related to. Reflections on individual professional development related to Advanced Kentucky Teacher Standards.

**Education - Teacher Leader****ETL 800. Leadership Skills for Teachers. (3 Credits)**

A. In-depth study of the key concepts, theories, practices, and procedures of teacher leaders in educational environments. This course must be retaken within the first six hours of a candidate's program. (Minimum of 14 clinical hours required.)

**ETL 801. Leading Achievement Change. (3 Credits)**

A. Pre-req/co-req: ETL 800. The study of change theory and its application in educational settings by educational leaders, teacher leaders, professional staff, support staff, students and communities to improve student achievement. 14 field hours required.

**ETL 803. Curriculum for Teacher Leaders. (3 Credits)**

A. Prerequisites/Corequisites: ETL 800. Candidates will conduct curriculum alignment and development that encompasses analysis and justification for applied curriculum at the appropriate level. Candidates will develop formative and summative assessments. They evaluate reasearch-based instructional strategies for all learners. (Field work 13 hours).

**ETL 805. Research Metho for Educ Profes. (3 Credits)**

A. Formerly ETL 802. Prerequisites: Chair Approval. This course introduces research methods in education. Candidates create a research proposal. With a focus on student learning, student achievement, or school improvement. Repeatable to 9 hours.

**ETL 806. Teacher Leader Capstone. (1-3 Credits)**

A. Formely ETL 804. Prerequisite: ETL 805 (for MAED majors) or EGC 847 (for MAT majors). Candidates will refine a research project begun in ETL 805 or EGC 847. Candidates will collect, analyze, and interpret data related to the impact on student learning and make a final presentation. (Minimum of 40 clinical hours required for advanced licensure candidates. Repeatable for a max of 6 hr.)

**Secondary Education****ESE 707. Problems in Secondary Edu. (1-3 Credits)**

A. Prerequisite: advisor/ departmental chair approval. Independent work, special workshops, special topics, or seminars.

**ESE 740. Teaching Art in the Schools. (3 Credits)**

I. Cross-listed as AED 740. Prerequisite: admission to the MAT program. Corequisite: CED 840. Developmentally appropriate materials and methods for teaching art in the schools. Maximum number of repeatable hours: 6. Credit will not be awarded for both ESE 740 and AED 740.

**ESE 743. Teach/Lang Arts in the Sec Sch. (3 Credits)**

I. Prerequisites: admission to the MAT program. Co-requisite: CED 840. Developmentally appropriate materials and methods for teaching language arts in the secondary school.

**ESE 749. Teach/Soc Stud in the Sec Sch. (3 Credits)**

I. Prerequisites: admission to the MAT program, a "B" or higher in EGC 820 and EGC 830, and a major in the social sciences. Co-requisite: CED 840. Developmentally appropriate materials and methods for teaching social sciences in the secondary school.

**ESE 750. Teach of Mat in the Sec Sch. (3 Credits)**

I. Cross-listed as MAE 750. Corequisite: CED 840. Developmentally appropriate materials and methods for teaching mathematics and computer science in secondary schools. Credit will not be awarded to students who have credit for MAE 750 and ESE 750.

**ESE 752. Teach/Car/Tech Edu/midd/Sec Sc. (3 Credits)**

I. Prerequisite: admission to the MAT program. Co-requisite: CED 840. Developmentally appropriate materials and methods for teaching career and technical education in the middle and secondary schools.

**ESE 753. Family & Consumer Sci Edu Cur. (4 Credits)**

I. Prerequisite: admission to the MAT program. Corequisite: CED 840. Developmentally appropriate materials and methods for teaching family and consumer sciences education curriculum in the secondary schools.

**ESE 761. Teach Sci in Secondary School. (3 Credits)**

I. Prerequisite: Admission into the secondary MAT program. Co-requisite: CED 840. Designed to introduce prospective teachers to the modern materials and methods of teaching biological and physical science at the secondary level.

**ESE 766. Teach Hlth/Phy Educ in Schools. (3 Credits)**

I. Prerequisites: admission to the MAT program with a major in health and physical education. Co-requisite: CED 840. Developmentally appropriate materials and methods for teaching physical education in the secondary schools.

**ESE 773. Teach Bus & Mar in Midd & Sec. (3 Credits)**

I. Prerequisite: admission to the MAT program. Co-requisite: CED 840. Developmentally appropriate materials and methods for teaching business and marketing education.

**ESE 779. Music Educ: Principles & Pract. (3 Credits)**

I. Cross-listed with MUE 779. Prerequisites: admission to the MAT program or a music certification program and MUS 750. Co-requisite: CED 840. Developmentally appropriate materials and methods for teaching music education in secondary schools. Credit will not be awarded to students who have credit for MUE 779.

**ESE 787. Teach of Health Educ in Sec Sc. (3 Credits)**

I. Prerequisites: admission to the MAT program with a major in health education. Developmentally appropriate materials and methods for teaching health education in secondary schools. Minimum of 96 field/clinical hours.

**ESE 807. Secondary Education:\_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: advisor/departmental chair approval. Independent work, workshops, special topics, or seminars. May be retaken under different subtitles.

**ESE 849. Trends and Mat in Soc Stu. (3 Credits)**

A. Designed to broaden the horizons of secondary social studies teachers. Attention focused on new curriculum materials, simulation, videotaped microteaching. Participants will be actively involved, and consultants will assist in areas of particular interest.

**ESE 850. Trends in Secondary Math. (3 Credits)**

I Crosslisted as MAE 850. An examination of curricular trends, modern programs, appropriate strategies, and innovative materials in secondary mathematics. Credit will not be awarded to students who have credit for MAE 850.

**ESE 863. Secondary School Curriculum. (3 Credits)**

II. Aims of the public secondary schools; plans for evaluating curriculum procedures; qualities of good teaching; procedures of evaluating and improving classroom teaching; methods of making the school a more effective agency.

**ESE 864. Special Problems in FCS Ed.. (1-3 Credits)**

Formerly: ESE 766. Student must have independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**ESE 884. Content Literacy. (3 Credits)**

A. Prerequisites: Admission to Master of Arts in Education or Master of Arts in Teaching or any teacher certification (Rank I or endorsement) programs. Emphasis on developmental and content area reading skills, appraisal of reading abilities, appropriate materials, assessment, and organization of secondary reading program. Minimum of 10 clinical hours.

**Special Education****SED 704. Assistive/Adaptive Technology. (3 Credits)**

I, A. Classroom use and modification of and assistive/adaptive devices. Integration of assistive technology into assessments, IEPs, lesson plans, educational activities, and daily routines. Lab.

**SED 738. Languag of Deaf & Hrd of Hring. (3 Credits)**

(3) A. Prerequisite: SED 825 or departmental approval. Receptive and expressive conversational language development and written language acquisition from a developmental perspective. Concepts in bilingual applied to the deaf. Methods to assess and facilitate language development.

**SED 774. Field Exp with Excep Learners. (3 Credits)**

A. Prerequisite: departmental approval. A practical experience with exceptional individuals. Emphasis is directed at behavior management, educational assessment, and IEP/IFSP.

**SED 777. Dual Sensory and Communication. (3 Credits)**

II, A. Prerequisites: SED 260 (or 522/722), 304, and 353/352 (teacher certification for SED 777), or instructor approval. Assessment, planning, and instruction for students with dual sensory impairments and severe cognitive disabilities. Augmentative and alternative communication methods, materials, and devices. Milieu language strategies, symbolic and nonsymbolic communication in natural environments and daily activities.

**SED 780. Audiology for Teachers of DHH. (3 Credits)**

Physics of sound; anatomy, physiology, pathology and medical treatment of the auditory system; introduction to the audiometer and basic pure-tone and speech (auditory) testing; hearing aids and devices; strategies for auditory development.

**SED 781. Speech F/T Deaf & HH. (3 Credits)**

A. Prerequisite: SED 780 or instructor approval. Acoustic articulation, rhythm, phrasing, accent, fluency, effects of impairment on speech, speech reading, auditory training.

**SED 800. Exceptl Learners Gen Ed Class. (3 Credits)**

A. Characteristics of students with disabilities, identification procedures, and instructional strategies.

**SED 801. Adv Early Childhood Assessment. (3 Credits)**

A. Identification and diagnostic procedures of development delay and at-risk conditions in infants, toddlers, and preschoolers. Continuous assessment of children's developmental, instructional, behavioral, and environmental needs; evaluation of effectiveness of services and family involvement.

**SED 802. Adv Early Childhd Intervn Prog. (3 Credits)**

A. Advanced curriculum and program development for infants, toddlers, and preschoolers in school centers or home settings, including collaboration with families and professionals, continuous assessment, and program evaluation.

**SED 804. Educl Mgt of LBD Students. (3 Credits)**

A. Prerequisite: certification in special education or department chair approval. Advanced management and programming for pupils with learning and behavior disorders. Selection, adaptation, development and evaluation of instructional approaches, methods and materials based on current research and best practice. Appropriate field experience required.

**SED 805. Roles of Special Educators. (3 Credits)**

A. Prerequisite: certification in special education or department chair approval. Focuses on roles of special educators in alternative settings, utilizing related services, and working with parents. Emphasis on interpersonal relationships and professional development.

**SED 807. Special Education. (1-3 Credits)**

A. Independent work, workshops, special topics, or seminars. May be retaken under different subtitles. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**SED 808. Spec Ed Early Childhood Survey. (3 Credits)**

I. Overview of history, philosophy, legislation and services for young children (0-5) at-risk for or with disabilities, including impact and intervention across developmental domains. Focus on research-based practices for early childhood programs.

**SED 809. Diag Teaching Deaf & HH. (3 Credits)**

A. Prerequisites: certification in Special Education or department chair approval and SED 354, SED 804 or instructor approval. Differential diagnosis and educational programming in academic, sociological, and vocational areas with emphasis on case presentation and individual educational plans.

**SED 810. Sp Ed Statutes Regs & Case Law. (3 Credits)**

A. A study of the administrative responsibilities of special education leadership with emphasis on the understanding of the field of special education, related federal and state laws, administrative regulations, instructional arrangements, grant writing and budget.

**SED 811. IECE Assessment. (3 Credits)**

A. Assessing infants, toddlers, and preschoolers with developmental delays and risk factors. Emphasis on screening, eligibility determination, authentic and functional assessments, data collection and interpretation, and collaboration with families and professionals.

**SED 812. Intro Spec Edu Assesment. (3 Credits)**

Formerly SED 776. Principles of tests and measurements. Test administration, scoring, and interpretation applied to exceptional children. Credit will not be awarded for both SED 812 and 776.

**SED 813. Adv Spec Edu Assessment. (3 Credits)**

Formerly SED 803. Evaluation of educational, perceptual, conceptual, social, and psychological characteristics of exceptional individuals. Interpretation for educational and community interventions for exceptional students. Credit will not be awarded for both SED 813 and 803.

**SED 814. Spec Ed Consult & Supv Tech. (3 Credits)**

A. Consulting and supervisory services; recruitment, selection, and utilization of support services, evaluation of personnel in special education and programs; staff development; and mediation techniques.

**SED 815. Response to Intervention. (3 Credits)**

Provides framework for implementing RtI. Focus on components and role of school personnel in RtI Models in the context of legal mandates and ethical guidelines for data collection, interventions, assessments, progress monitoring, and eligibility.

**SED 816. Prac in Spec Educ Administrati. (6 Credits)**

A. Prerequisites: SED 810, 814, and EAD 801 or department chair approval. Supervised experiences in providing consultation services and performing all of the other functions of director of special education including procedures and policies, record keeping, utilization of support services, staff development, and due process.

**SED 817. Behavior Disorders. (3 Credits)**

Formerly SED 778. This course examines behavior disorders and emotional disturbances as educational, psychological, and sociological phenomenon. Definitions, characteristics, theoretical foundations, and programmatic approaches are discussed. Credit will not be awarded for both SED 817 and 778.

**SED 819. Mod/Sev Disabilities Intro. (3 Credits)**

No prerequisite. Introduction to teaching students with Moderate and Severe Disabilities (MSD). Educational needs, issues, legal mandates, family concerns, and best practices for student-focused inclusive school and community programs. Credit will not be awarded for both SED 819 and 700.

**SED 820. Multi-Tier Math/Reading Instr. (3 Credits)**

I. Introduction to foundations, universal core instruction, and progressively intensive math/reading instruction for P-12 students, including students with disabilities. Selection/use of Tier 1 and 2 interventions, features of assessment of math/reading difficulties, data collection and analysis.

**SED 821. MSD Tech/Research-Based Strat. (3 Credits)**

Implementing technology, assistive/adaptive devices, and research-based strategies to support learning of students with moderate and severe disabilities. Includes use of language strategies, symbolic and non-symbolic communication in natural environments and daily routines. Credit will not be awarded for both SED 821 and 730.

**SED 822. DataMgmtRspnsIntervention. (3 Credits)**

Prerequisites: SED 815 and 820. Focuses on research-based practices in tracking student progress. Addresses data collection and analysis in RtI and roles of school personnel to collect, analyze, and make decisions based on student data.

**SED 823. Mod/Sev Disab Methods. (3 Credits)**

Functional assessment and systematic instruction for student with MSD. Use of assessment data to develop IEPs and research-based instructional programs, including activity-based and community-based instruction. Methods and materials for implementing best practices across settings. Credit will not be awarded for both SED 823 and 735.

**SED 824. Early Special Education Topics. (3 Credits)**

Prerequisite: advisor/departmental approval. School related work, special workshops, special seminars. May be retaken up to 6 credit hours provided topics differ. Credit will not be awarded for both SED 824 and 707.

**SED 825. Lang Disorder Students Disabil. (3 Credits)**

Formerly SED 722. Prerequisite: SED 826 or dept. approval. Acquisition of normal language and speech in our multicultural society. Identification and educational management of language and speech disorders in children with disabilities. Credit will not be awarded for both SED 825 and 722.

**SED 826. Best Practices in Spec Edu. (3 Credits)**

Overview of special education including characteristics, definitions, legal mandates, programming requirements, and research based practices to support students with disabilities. Open to non-majors. Credit will not be awarded for both SED 826 and 775.

**SED 827. Early Ch Spec Ed Partnerships. (3 Credits)**

Review of needs and methods for effective collaboration with families of children with disabilities, focusing on family-school-service provider interactions, and impact of family variability on collaboration.

**SED 830. Survey of Ed of Deaf and HoH. (3 Credits)**

A. Discussion of historical, philosophical, educational, psychological, and social aspects of deaf education. An orientation to problems, issues, and research in the field.

**SED 832. Written Lang of Deaf & HH. (3 Credits)**

A. Prerequisite: certification in special education or department chair approval. Methods of developing written language from preschool through secondary levels; including traditional and current methods of teaching written English. Evaluation of written language competence of deaf and hard of hearing students.

**SED 837. Applied Behavior Analysis for Students with Disabilities. (3 Credits)**

I. A study of classroom and behavior management, including applied behavior analysis as applied to classroom and instructional management. Development of skills in data collection, intervention procedures, graphing data, and evaluation of behavior change are the focus..

**SED 845. Spec Ed Transition/Collab. (3 Credits)**

Research-based practices in scheduling and management of Specially Designed Instruction; transdisciplinary services, and transition activities; collaboration with parents, paraprofessionals, and professionals; professional development skills, and records management to support the learning of students with disabilities. Credit will not be awarded for both SED 845 and 745.

**SED 850. Assess/Prog/Methods, D/HH. (3 Credits)**

II. Open to DHH and Communication Disorders graduate students only. Standardized and informal assessments used to measure reading and content knowledge of students who are deaf and hard of hearing. Exploration of professional literature and specialized curricula, programmatic decisions, and high leverage practices for students who are DHH.

**SED 851. Teaching Secondary LBD. (3 Credits)**

A. Focus on education of students with LBD in secondary settings, including academic instruction and learning strategies, social competence, schoolwide management, career education and transition, adolescent sexuality, drug and alcohol use, and juvenile delinquency.

**SED 856. Graduate Methods and Materials. (3 Credits)**

A. Curriculum for exceptional individuals; instructional principles and methodology; development, implementation, and evaluation of educational materials. Course will address teaching strategies using the Program of Studies to make appropriate adaptations and accommodations for diverse learners.

**SED 886. Seminar in Special Education. (3 Credits)**

A. Prerequisite: SED 805 or instructor approval. Critical study of research literature on education of exceptional individuals. Directed study based on student's area of emphasis.

**SED 890. Adv Behav Strateg & Interv. (3 Credits)**

A. Prerequisites: SED 341, SED 590/790, or instructor approval. Study of techniques of applied behavior analysis, functional behavioral assessment, alternative procedures, interventions for severe problem behaviors, and maintaining a safe learning environment for all students.

**SED 897. Practicum in Special Education. (3-6 Credits)**

A. Practicum for graduate students who seek certification in an area in special education.

**SED 898. Capstone Research Project. (1-3 Credits)**

(1-3). A. Prerequisites: EDL 810, EDL 811 and minimum of 24 hours in Ed. S. program. Completion of research project using action or traditional research design with topic related to area of specialization in Special Education.

## Deaf and Hard of Hearing Certification

### Certification Preparation Programs

These are programs of study which do not lead to a degree or to an ECU awarded recognition but instead prepare the student, upon recommendation from ECU, for professional certification by the Commonwealth of Kentucky Education Professional Standards Board.

### General Information

Candidates pursuing special education certification in Deaf and Hard of Hearing, Interdisciplinary Early Childhood Education, Learning and Behavior Disorders, and Moderate/Severe Disabilities must hold teaching certification. Additional hours may apply toward a sixth year program (Rank I). It is very important that candidates seek early advisement from the department.

The prerequisites are an undergraduate degree and a Kentucky Teaching Certificate in IECE, P-5, P-12, 5-9, 5-12, or Secondary for classroom teachers.

### Admission Requirements

To be eligible for admission into any special education nondegree graduate program (Rank II, I), a candidate must have a minimum undergraduate GPA of 2.75 overall or 3.0 in the last 30 hours of course work.

### Program Requirements

Also, candidates must have completed the following or equivalent prerequisite course work.

Code	Title	Hours
<b>Prerequisite Courses</b>		
ELE 445	Foundations of Reading/ Language Arts	3
or EMG 445	Foundation of Reading/Language Arts	
Choose from one of the following:		3
EMG 447	Disciplinary Literacy in the Middle Grades	
EMG 806	Read Instruction Middle School	
ELE 820	Literacy Foundation P-5	3
MAE 201	Mathematical Concepts for P-9 I	3
MAE 202	Mathematical Concepts for P-9 II	3
MAE 302	Mathematical Concepts for P-9 III	3
or ELE 822	Mathematical Foundations P-5	
<b>Required Courses</b>		
ASL 101	American Sign Language I	3
SED 738	Languag of Deaf & Hrd of Hring	3
SED 780	Audiology for Teachers of DHH	3
SED 845	Spec Ed Transition/Collab	3
SED 850	Assess/Prog/Methods, D/HH	3
SED 781	Speech F/T Deaf & HH	3

SED 808	Spec Ed Early Childhood Survey	3
SED 825	Lang Disorder Students Disabil	3
SED 830	Survey of Ed of Deaf and HoH	3
SED 897	Practicum in Special Education	3
<b>Total Hours</b>		<b>48</b>

Note: Completion of the above program will not suffice for completion of a Rank program. For DHH Certification, the PRAXIS test in the area of specialty must be passed.

## Doctor of Education with a Concentration in Curriculum Leadership for Social Justice (Ed.D.)

### General Information

The Doctor of Education (Ed.D.) includes a common core of coursework and three areas of concentration including

1. Leadership, Policy Studies, and Social Justice
2. Counselor Education and Supervision, and
3. Curriculum Leadership for Social Justice.

Students in each concentration complete common core coursework that provides foundational training in three areas including research, leadership, and social justice advocacy. Basic general information about each concentration appears below.

### Curriculum Leadership for Social Justice Concentration

Curriculum Leadership for Social Justice is geared for devoted practitioners committed to addressing problems facing leaders in the field of education. This degree concentration aims to develop scholars who wish to assume leadership roles in educational institutions, such as school or district curriculum leadership. Students will research and implement a diverse range of curricular trends focused on equity and social justice. Doctoral faculty will serve as mentors in helping students create doctoral dissertations that meet their professional goals.

### Admission Requirements

The decision to admit a student to doctoral work constitutes a major commitment from the faculty in the form of advising, teaching, chairing and serving on the committee, preparing and evaluating examinations, and guiding the dissertation to successful completion. The applications are due by March 1 for admission in the following fall semester. Applications received after March 1 may be considered for Spring admission pending availability of openings in the programs.

Admission to the Doctor of Education program is based upon the following entrance requirements:

1. Earned a master's degree in education or a related field with a minimum graduate GPA of 3.5. Students applying for the concentration in Counselor Education and Supervision must have a 60 hour master's degree from a CACREP accredited program or its equivalent.
2. Must have professional experience (preference will be given to those with leadership, school counseling, or clinical mental health counseling experience)

*The applicant should note that the decision to admit students to the doctoral program is a collective judgment of the faculty and represents their determination of the likelihood of the applicant's success in all major phases of the degree program. These judgments take into account the applicant's professional experiences, communication and thinking skills, and other relevant capabilities. Thus, an applicant is not automatically admitted on the basis of meeting the minimal criteria.*

A completed application packet will include:

1. Completed graduate school and concentration applications
2. Transcripts of all undergraduate and graduate work
3. Resumé of professional experience
4. Score reports from the Graduate Record Examination (GRE) or Miller Analogies Test if the graduate GPA is less than 3.5
5. At least three letters of recommendation—including at least one each from a peer, a supervisor, and a college/university faculty member.
6. Writing sample from previous graduate program that exemplifies applicant's writing and research skills

After a holistic review of the application packets, the Doctoral Program Committee will select those applicants to be interviewed. A dispositions evaluation (an assessment of attitudes and behaviors practiced in the areas of personal responsibility, ethics, emotional management, communication, and work ethic) of the candidate to be conducted by one or more members of the Doctoral Program Committee using an established format/protocol.

Students will be required to complete a criminal background check during their first semester, but may complete coursework on a provisional status pending completion of the criminal background check.

### Program Requirements

CIP Code: 13.0401

Candidates in both concentrations complete the following core coursework. Thereafter, each candidate's program of study will be individually planned within the following curriculum framework as defined by the concentration area:

Code	Title	Hours
<b>Ed.D. Core Requirements</b>		
EDD 901	Orientation to Doc Studies	3
EDD 902	Intro to Quant Res Methods	3
EDD 903	Qualitative Research	3
EDD 904	App Res: Eval, Sur, & Gr Writ	3
EDD 906	Dissertation Practicum	3
EDD 907	Intermed Quant Research Meth	3
or EDD 908	Adv Qualitative Research Meth	
EDD 999	Dissertation (Additional dissertation hours may be required.)	12
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
Leadership, Policy Studies, and Social Justice		
Counselor Education and Supervision		
Curriculum Leadership for Social Justice		
		30
<b>Exit Requirements</b>		
GRD 877P	Ed. D. Written&Oral Qual Exam	0

GRD 878Z	Ed. D. Oral Defense Exam (Dissertation Defense)	0
<b>Total Hours</b>		<b>60</b>

CPL 862	Race, Identity & Policing	
PSY 837	Social Psy & Cultural Diversity	

<b>Total Hours</b>		<b>30</b>
--------------------	--	-----------

## Exit Requirements

### Qualifying/Preliminary Examination

The Student's Doctoral Committee prepares and scores the Qualifying/Preliminary examination. This examination consists of two (2) options, which include

1. written responses by the student to the prepared questions written by the Student Doctoral Committee and/or
2. a written methodology paper and oral defense by the student that is evaluated by the student doctoral committee.

The Student Doctoral Committee will require students to rewrite any failed portion of the Qualifying examination by the last day of classes during the following semester.

### Dissertation

The purpose of the dissertation is for students to demonstrate the ability to conceptualize and complete an inquiry project. The dissertation process, during which students register for a minimum of twelve (12) credit hours, includes three (3) stages. First, there is the development of a proposal that the Student Doctoral Committee reviews and approves. Second, students prepare the dissertation document. Finally, students submit and defend the dissertation to the Student Doctoral Committee.

For additional information, consult the Doctoral Program Director for Educational Leadership and Policy Studies or for Counselor Education and Supervision.

## Doctor of Education with a Concentration in Leadership, Policy Studies, and Social Justice (Ed.D.)

### General Information

The Doctor of Education (Ed.D.) includes a common core of coursework and three areas of concentration including

1. Leadership, Policy Studies, and Social Justice
2. Counselor Education and Supervision, and
3. Curriculum Leadership for Social Justice.

Students in each concentration complete common core coursework that provides foundational training in three areas including research, leadership, and social justice advocacy. Basic general information about each concentration appears below.

### Leadership, Policy Studies, and Social Justice Concentration

P-12 and Postsecondary Leaders are charged to direct broad educational programs that increase excellence and equity as measured by outcomes. Educational entities and organizations need professionals who use current knowledge and possess strong leadership skills to design and administer programs that can improve teaching and learning. Moreover, they need leaders who know about and respond to the specific challenges and strengths of the communities they serve. The Doctor of Education (Ed.D.) program in this concentration at Eastern Kentucky University will play a significant role in developing such leaders. Participation in this doctoral program will lead to enhanced practical capacity with regard to human learning, educational institutions, and the interaction of the larger society with educational, financial, and governmental processes. Likewise, participation will allow for the acquisition of skills to conduct and successfully apply research. Course work will be built on a knowledge base that reflects current research, theory, and practice. Doctoral faculty will serve as mentors.

### Admission Requirements

The decision to admit a student to doctoral work constitutes a major commitment from the faculty in the form of advising, teaching, chairing and serving on the committee, preparing and evaluating examinations, and guiding the dissertation to successful completion. The applications are due by March 1 for admission in the following fall semester. Applications received after March 1 may be considered for Spring admission pending availability of openings in the programs.

Admission to the Doctor of Education program is based upon the following entrance requirements:

1. Earned a master's degree in education or a related field with a minimum graduate GPA of 3.5. Students applying for the concentration in Counselor Education and Supervision must have a 60 hour master's degree from a CACREP accredited program or its equivalent.
2. Must have professional experience (preference will be given to those with leadership, school counseling, or clinical mental health counseling experience)

*The applicant should note that the decision to admit students to the doctoral program is a collective judgment of the faculty and represents*

*their determination of the likelihood of the applicant's success in all major phases of the degree program. These judgments take into account the applicant's professional experiences, communication and thinking skills, and other relevant capabilities. Thus, an applicant is not automatically admitted on the basis of meeting the minimal criteria.*

A completed application packet will include:

1. Completed graduate school and concentration applications
2. Transcripts of all undergraduate and graduate work
3. Resumé of professional experience
4. Score reports from the Graduate Record Examination (GRE) or Miller Analogies Test if the graduate GPA is less than 3.5
5. At least three letters of recommendation—including at least one each from a peer, a supervisor, and a college/university faculty member.
6. Writing sample from previous graduate program that exemplifies applicant's writing and research skills

After a holistic review of the application packets, the Doctoral Program Committee will select those applicants to be interviewed. A dispositions evaluation (an assessment of attitudes and behaviors practiced in the areas of personal responsibility, ethics, emotional management, communication, and work ethic) of the candidate to be conducted by one or more members of the Doctoral Program Committee using an established format/protocol.

Students will be required to complete a criminal background check during their first semester, but may complete coursework on a provisional status pending completion of the criminal background check.

## Program Requirements

CIP Code: 13.0401

Candidates in both concentrations complete the following core coursework. Thereafter, each candidate's program of study will be individually planned within the following curriculum framework as defined by the concentration area:

Code	Title	Hours
<b>Ed.D. Core Requirements</b>		
EDD 901	Orientation to Doc Studies	3
EDD 902	Intro to Quant Res Methods	3
EDD 903	Qualitative Research	3
EDD 904	App Res: Eval, Sur, & Gr Writ	3
EDD 906	Dissertation Practicum	3
EDD 907	Intermed Quant Research Meth	3
or EDD 908	Adv Qualitative Research Meth	
EDD 999	Dissertation (Additional dissertation hours may be required.)	12
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
	Leadership, Policy Studies, and Social Justice	30
	Counselor Education and Supervision	
	Curriculum Leadership for Social Justice	
<b>Exit Requirements</b>		
GRD 877P	Ed. D. Written&Oral Qual Exam	0
GRD 878Z	Ed. D. Oral Defense Exam (Dissertion Defense)	0
<b>Total Hours</b>		<b>60</b>

## Concentration

or EDD 908	Adv Qualitative Research Meth	
EAD 807	Ed Admin & Supervision:_____	
or EAD 897	Independent Study	
<b>Total Hours</b>		<b>18</b>

## Exit Requirements

### Qualifying/Preliminary Examination

The Student's Doctoral Committee prepares and scores the Qualifying/Preliminary examination. This examination consists of two (2) options, which include

1. written responses by the student to the prepared questions written by the Student Doctoral Committee and/or
2. a written methodology paper and oral defense by the student that is evaluated by the student doctoral committee.

The Student Doctoral Committee will require students to rewrite any failed portion of the Qualifying examination by the last day of classes during the following semester.

### Dissertation

The purpose of the dissertation is for students to demonstrate the ability to conceptualize and complete an inquiry project. The dissertation process, during which students register for a minimum of twelve (12) credit hours, includes three (3) stages. First, there is the development of a proposal that the Student Doctoral Committee reviews and approves. Second, students prepare the dissertation document. Finally, students submit and defend the dissertation to the Student Doctoral Committee.

For additional information, consult the Doctoral Program Director for Educational Leadership and Policy Studies or for Counselor Education and Supervision.

## Educational Administration and Supervision, Specialist in Education (Ed.S.)

### General Information

The Specialist in Education degree is a professional degree designed for those preparing for positions that call for a level of study and specialization beyond the master's degree. The specific goal is to provide the preparation needed for certification for School Principal Levels I and II, Supervisor of Instruction Levels I and II, Director of Pupil Personnel Levels I and II, or Superintendent of Schools. The 30-hour minimum requirement is a structured program oriented toward the candidate's professional objectives. Candidates for the superintendent certificate must have two years of administrative experience.

### Admission Requirements

Admission to the specialist in education degree program includes the following requirements, beyond a master's degree.

1. Documentation of three (3) years teaching experience.
2. District administration candidates must hold principal certification. Additionally, superintendent candidates must provide documentation of two years of administrative experience.
3. Provision of two (2) letters of recommendation from school/district supervisors and one (1) letter from a district official pledging support for the clinical experiences.
4. Provision of a written statement indicating ability to improve student achievement, to lead, and to possess advanced knowledge of curriculum, instruction, and assessment.

## Program Requirements

<b>Exit Requirements</b>		
GRD 878R	Spe Ed Admin Thesis Defense	0
Candidates must successfully complete and defend a professional portfolio.		
<b>Total Hours</b>		<b>30</b>

### Certification Requirements

To be recommended for education administrative certification and/or rank change, all candidates must meet the requirements for admission to professional education, complete the approved leadership curriculum, and pass the required PRAXIS exam. Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Certification at (502) 564-5846.

The Supervisor of Instruction program prepares instructional supervisors for district-wide leadership. Initial certification for supervisor of instruction requires completion of an approved master's degree, the courses required for Level I principal certification, and three years of teaching experience.

The Director of Pupil Personnel program prepares directors and assistant directors of pupil personnel services for school district-wide leadership. Initial certification for director of pupil personnel services requires completion of an approved master's degree, the courses required for Level I principal certification, and three years of teaching experience.

The Superintendent of Schools program prepares highly qualified candidates for district-wide leadership. Initial certification for school superintendent requires completion of an approved master's degree, the courses required for Level II principal certification, three years of teaching experience, and two years of administrative experience.

### SCHOOL PRINCIPAL

Prerequisites for school principal concentration: ETL 800 Leadership Skills for Teachers, EAD 801 Intro to Ed Adm & Ld Rsch, or other leadership course.

Code	Title	Hours

## Elementary Education, Master of Arts (M.A.Ed.)

### General Information

The MAEd in Elementary Education is available to candidates who wish to

1. improve their professional skills, extend their knowledge of the subjects they teach, and increase their understanding of the intellectual, philosophical, sociological, psychological, and cultural foundations of effective education in order to serve as instructional leaders, teacher mentors, instructional facilitators, department chairs and/or team leaders; or
2. deepen their understanding of teaching and learning development, practices, and trends.

Candidates who complete Option A will be eligible to apply for the Teacher Leader Endorsement upon completion of this program.

### Admission Requirements

All candidates must meet the admissions requirements of the Graduate School. In addition, candidates must have earned an overall 3.0 undergraduate GPA or a 3.0 in the last 30 hours completed.

In addition, the following are required for admission to the program:

- MAED Option A: Advanced study requires a valid teaching license in initial elementary education. With this option, candidates will be eligible to apply for the Teacher Leader Endorsement upon completion of this program.
- MAED Option B: Candidates entering this non-teaching option must hold a bachelor's degree in education or related human services discipline from an accredited institution. Prerequisite coursework (completed or equivalent): EDF 203 Educational

Foundations, EDF 219 Human Development and Learning, and EDF 413 Assessment in Education.

## Program Requirements

CIP Code: 13.1202

Code	Title	Hours
<b>Required Core for Both Options</b>		
EDF 804	Teaching and Leading with Tech	2
ELE 871	Literacy Programs P-5	3
EMS 855	Gifted and Talented Youth	3
Choose from one of the following:		
EME 843	Mathematics Intervention Strat (Option A)	
EME 866	Investigations in Mathematics (Option B)	
EME 870	Trends in Science Education	3
or EMS 846	Social Studies Investigation	

#### Options

Choose from one of the following Options: 16-17

##### Option A: Advanced Study

ETL 800	Leadership Skills for Teachers	
ETL 801	Leading Achievement Change	
ETL 803	Curriculum for Teacher Leaders	
ETL 805	Research Metho for Educ Profes	
ETL 806	Teacher Leader Capstone	

Elementary Education Support Course: Choose from one three hour advisor approved elective <sup>1</sup>

##### Option B: Non-Teaching Option

EDF 855	Found of Multicultural Educati	
ELE 826	Integrating Arts, Hum, & Pract	
EMS 775	Methods for Multilingual Learners	
EMS 842	Discipline & Classroom Mgt	
SED 800	Exceptl Learners Gen Ed Class	

##### Support Course:

**Total Hours** **30-31**

<sup>1</sup>

Course selected to strengthen candidate's knowledge of subjects taught. Candidates are encouraged to discuss endorsement options with their advisor as well.

## Exit Requirements

The following are the exit requirements for Elementary Education:

- **Program GPA:** Candidates must earn overall GPA of 3.0 or higher, with no grade lower than a C.
- **Option A:** An action research project which culminates in a technology enhanced presentation is required in the Capstone Seminar, ETL 806 Teacher Leader Capstone. ETL 806 Teacher Leader Capstone is repeatable for candidates not completing their Capstone Research Project in one semester. Candidates may register for ETL 806 Teacher Leader Capstone only in the last semester of study and after successful completion of the prerequisite course, ETL 805

Research Metho for Educ Profes. Candidates must also register for EDF 804 Teaching and Leading with Tech.

- **Option B:** A comprehensive examination is required for this option.
- GRD 878A MAEd Elem Ed Oral Comp Exam

## English as a Second Language (Grades P-12), Endorsement Preparation Program

### Endorsement Preparation Programs

These are programs of study which prepare the candidate, upon recommendation from ECU, for professional endorsement by the Commonwealth of Kentucky Education Professional Standards Board (EPSB.) Endorsements are opportunities to increase an educator's instructional repertoire in specialized areas, such as English as a Second Language (ESL), Gifted and Talented (GT), literacy specialist, and teacher leader. Endorsements can be earned toward a rank change. In some cases, the endorsement may be earned as part of a degree program (MAEd Middle Grade, MAEd Secondary, MAEd School Librarian).

For information on the following endorsement programs, go to the Teaching, Learning, & Educational Leadership website at <https://curriculum.eku.edu/endorsement-programs> (<https://curriculum.eku.edu/endorsement-programs/>)

### Program Requirements

Code	Title	Hours
EME 751	Linguistics in the Curriculum	3
EMS 775	Methods for Multilingual Learners	3
EMS 776	Assessment Methods for Multilingual Learners	3
EMS 777	Culturally and Linguistically Responsive Teaching	3
<b>Total Hours</b>		<b>12</b>

Upon completion of the ESL endorsement, the candidate must pass the Kentucky TESOL Praxis in order to have the endorsement added to their teaching certificate.

## Gifted Education (Grades P-12), Endorsement Preparation Program

### Endorsement Preparation Programs

These are programs of study which prepare the candidate, upon recommendation from ECU, for professional endorsement by the Commonwealth of Kentucky Education Professional Standards Board (EPSB.) Endorsements are opportunities to increase an educator's instructional repertoire in specialized areas, such as English as a Second Language (ESL), Gifted and Talented (GT), literacy specialist, and teacher leader. Endorsements can be earned toward a rank change. In some cases, the endorsement may be earned as part of a degree program (MAEd Middle Grade, MAEd Secondary, MAEd School Librarian).

For information on the following endorsement programs, go to the Teaching, Learning, & Educational Leadership website at <https://curriculum.eku.edu/endorsement-programs> (<https://curriculum.eku.edu/endorsement-programs/>)

## Program Requirements

Code	Title	Hours
EMS 855	Gifted and Talented Youth	3
EMS 856	Curr in Gifted/Talented Educat	3
EMS 857	Model Prog-Gifted/Talented Edu	3
EMS 858	Practicum-Gifted & Talented Ed	3
<b>Total Hours</b>		<b>12</b>

Upon completion of the GT endorsement, the candidate must pass the Kentucky GT Praxis in order to have the endorsement added to their teaching certificate.

## Interdisciplinary Early Childhood Education Certification (IECE) Certification Preparation Programs

These are programs of study which do not lead to a degree or to an ECU awarded recognition but instead prepare the student, upon recommendation from ECU, for professional certification by the Commonwealth of Kentucky Education Professional Standards Board.

### General Information

Candidates pursuing special education certification in Learning and Behavior Disorders, Interdisciplinary Early Childhood Education, and Deaf and Hard of Hearing must hold teaching certification. The certification options are listed below. Additional hours may apply toward a sixth year program (Rank I). It is very important that candidates seek early advisement from the department.

The prerequisites are an undergraduate degree in early childhood or related field and a Kentucky Teaching Certificate or meet all requirements for admission to professional education.

Candidates entering the Graduate Certification Program in IECE without a prior Kentucky teaching certification must contact the College of Education and Applied Human Sciences Office of Licensure and Certification at 859-622-1829 for additional requirements.

## Admission Requirements

To be eligible for admission into any special education nondegree graduate program (Rank II, I), a candidate must have a minimum undergraduate GPA of 2.75 overall or 3.0 in the last 30 hours of course work.

## Program Requirements

Code	Title	Hours
<b>Core Courses</b>		
CDF 741	Infant Toddler Dev&Group Care	3
SED 800	Exceptl Learners Gen Ed Class	3
SED 802	Adv Early Childhd Intervn Prog	3
SED 808	Spec Ed Early Childhood Survey	3
SED 811	IECE Assessment	3
SED 825	Lang Disorder Students Disabil	3
SED 837	Applied Behavior Analysis for Students with Disabilities	3
SED 897	Practicum in Special Education	3

Supporting Course Requirements		
OTS 715	Early Child Sensorimotor Devel	3
SED 827	Early Ch Spec Ed Partnerships	3
Course Requirements for Admission to Professional Education		
TBD hours: Based upon individual transcript analysis.		
<b>Total Hours</b>		<b>30</b>

Note: Completion of the above program will not suffice for completion of a Rank program. For IECE Certification, the PRAXIS test in the area of specialty must be passed.

## Learning and Behavior Disorders Certification

### Certification Preparation Programs

These are programs of study which do not lead to a degree or to an EKU awarded recognition but instead prepare the student, upon recommendation from EKU, for professional certification by the Commonwealth of Kentucky Education Professional Standards Board.

#### General Information

Candidates pursuing special education certification in Deaf and Hard of Hearing, Interdisciplinary Early Childhood Education, Learning and Behavior Disorders, and Moderate/Severe Disabilities must hold teaching certification. Additional hours may apply toward a sixth year program (Rank I). It is very important that candidates seek early advisement from the department.

The prerequisites are an undergraduate degree and Kentucky Teaching Certificate in IECE, P-5, P-12, 5-9, 5-12, or Secondary classroom teachers.

### Admission Requirements

To be eligible for admission into any special education nondegree graduate program (Rank II, I), a candidate must have a minimum undergraduate GPA of 2.75 overall or 3.0 in the last 30 hours of course work.

### Program Requirements

Candidates must also have completed the following or equivalent prerequisite course work:

Code	Title	Hours
<b>Prerequisite Courses</b>		
Choose from one of the following:		3
ELE 445	Foundations of Reading/ Language Arts	
EMG 445	Foundation of Reading/Language Arts	
Choose from one of the following:		3
EMG 447	Disciplinary Literacy in the Middle Grades	
EMG 806	Read Instruction Middle School	
EMS 874	Disciplinary Literacy	
MAE 201	Mathematical Concepts for P-9 I	3
MAE 202	Mathematical Concepts for P-9 II	3
MAE 302	Mathematical Concepts for P-9 III	3
or ELE 822	Mathematical Foundations P-5	
<b>Required Courses</b>		
SED 774	Field Exp with Excep Learners <sup>1</sup>	3

SED 812	Intro Spec Edu Assesment	3
SED 817	Behavior Disorders	3
SED 825	Lang Disorder Students Disabil	3
SED 837	Applied Behavior Analysis for Students with Disabilities	3
SED 845	Spec Ed Transition/Collab	3
SED 856	Graduate Methods and Materials	3
SED 897	Practicum in Special Education	3-6
<b>Total Hours</b>		<b>39-42</b>

1

SED 774 Field Exp with Excep Learners can be waived with one year of successful teaching of students with LBD.

Note: Completion of the above program will not suffice for completion of a Rank program. For LBD Certification, the PRAXIS test in the area of a specialty must be passed.

## Literacy P-12, Master of Arts in Education (M.A.Ed.)

### General Information

This program offers individuals currently certified to teach at the elementary, middle grade, and secondary levels, or variations thereof, an additional certification option in Literacy Endorsement (P-12). This certification supports educators in improving their professional skills, extending their knowledge of the subjects they teach, and increasing their understanding of the intellectual, philosophical, sociological, psychological, and cultural foundations of effective education in order to serve as literacy specialists, instructional leaders, teacher mentors, literacy coaches, and/or instructional facilitators. Candidates must pass the Reading Specialist PRAXIS II exam to earn the Literacy Endorsement.

Candidates will be eligible to apply for the Literacy (P-12) endorsement upon completion of this program.

### Admission Requirements

Candidates must meet the admissions requirements of the Graduate School and have completed an initial teaching certification program in elementary, middle, or secondary/P-12/5-12 education. In addition, candidates must have earned an overall 3.0 undergraduate GPA or a 3.0 in the last 30 hours completed.

### Program Requirements

1

ETL 806 Teacher Leader Capstone is repeatable for candidates not completing their Capstone Research Project in one semester. Candidates may register for ETL 806 Teacher Leader Capstone only in the last semester of study and after successful completion of the prerequisite course, ETL 805 Research Metho for Educ Profes.

Candidates may apply for the Literacy Specialist (P-12) certification (endorsement) after completing EMS 873 Trends & Issues in ELA; EMS 875 Literacy Assess and Instruct; EMS 876 Lit., Lead. & Advocate; EME 877 Practicum for Read Specialists; and either ELE 871 Literacy Programs P-5 or EMG 806 Read Instruction Middle School.

Candidates must pass the appropriate PRAXIS II Exam for this area of certification.

## Exit Requirements

The following are the exit requirements for the Literacy P-12 degree:

- Program GPA: Candidates must earn overall GPA of 3.0 or higher, with no grade lower than a C.
- Research Requirement: An action research project which culminates in a technology enhanced presentation is required in ETL 806 Teacher Leader Capstone; candidates must also register for EDF 804 Teaching and Leading with Tech. Successful completion of GRD 878G MAED R/W Oral Comp Exam is also required.

## Literacy Specialist (Grades P-12), Endorsement Preparation Program

### Endorsement Preparation Programs

These are programs of study which prepare the candidate, upon recommendation from ECU, for professional endorsement by the Commonwealth of Kentucky Education Professional Standards Board (EPSB.) Endorsements are opportunities to increase an educator's instructional repertoire in specialized areas, such as English as a Second Language (ESL), Gifted and Talented (GT), literacy specialist, and teacher leader. ## Moderate and Severe Disabilities Certification

### Certification Preparation Programs

These are programs of study which do not lead to a degree or to an EKU awarded recognition but instead prepare the student, upon recommendation from EKU, for professional certification by the Commonwealth of Kentucky Education Professional Standards Board.

### General Information

Candidates pursuing special education certification in Deaf and Hard of Hearing, Interdisciplinary Early Childhood Education, Learning and Behavior Disorders, and Moderate/Severe Disabilities must hold teaching certification. Additional hours may apply toward a sixth year program (Rank I). It is very important that candidates seek early advisement from the department.

The prerequisites are an undergraduate degree and Kentucky Teaching Certificate in IECE, P-5, P-12, 5-9, 5-12, or Secondary for classroom teachers.

## Admission Requirements

To be eligible for admission into any special education nondegree graduate program (Rank II, I), a candidate must have a minimum undergraduate GPA of 2.75 overall or 3.0 in the last 30 hours of course work.

## Program Requirements

Candidates must also have completed the following or equivalent prerequisite course work:

Code	Title	Hours
<b>Prerequisite Courses</b>		
ELE 445	Foundations of Reading/ Language Arts	3
or EMG 445	Foundation of Reading/Language Arts	
Choose from one of the following:		3
EMG 447	Disciplinary Literacy in the Middle Grades	

EMG 806	Read Instruction Middle School	
ELE 820	Literacy Foundation P-5	3
MAE 201	Mathematical Concepts for P-9 I	3
MAE 202	Mathematical Concepts for P-9 II	3
MAE 302	Mathematical Concepts for P-9 III	3
or ELE 822	Mathematical Foundations P-5	
<b>Required Courses</b>		
SED 774	Field Exp with Excep Learners <sup>1</sup>	3
SED 819	Mod/Sev Disabilities Intro	3
SED 821	MSD Tech/Research-Based Strat	3
SED 823	Mod/Sev Disab Methods	3
SED 825	Lang Disorder Students Disabil	3
SED 826	Best Practices in Spec Edu	3
SED 837	Applied Behavior Analysis for Students with Disabilities	3
SED 845	Spec Ed Transition/Collab	3
SED 897	Practicum in Special Education	3-6
OTS 715	Early Child Sensorimotor Devel	3
or SED 808	Spec Ed Early Childhood Survey	
<b>Total Hours</b>		<b>48-51</b>

1

SED 774 Field Exp with Excep Learners can be waived with one year of successful teaching of students with MSD.

Note: Completion of the above program will not suffice for completion of a Rank program. For MSD Certification, the PRAXIS test in the area of a specialty must be passed.

## Rank I (Sixth Year) Program

The College of Education and Applied Human Sciences, in cooperation with the offering departments within the College of Education and Applied Human Sciences, other colleges of the University, and the Office of Graduate Education and Research, offers Rank I programs for teachers, school counselors, school administrators, supervisors, directors of pupil personnel, and directors of special education.

Program guidelines are highly flexible. General institutional guidelines include:

1. A minimum 30-semester hour program in addition to:
  - a. requirements for Rank II classification, or
  - b. 60 semester hours including the master's degree.
2. Each program shall be planned in consultation with the candidate's advisor prior to completion of nine hours of course work applicable to the program. The planned program shall be filed with the Office of Licensure and Certification. Upon application by the candidate and completion of the program, the College of Education and Applied Human Sciences certification officer shall recommend Rank I classification to the Kentucky Department of Education.
3. Candidates shall be fully admitted to the Graduate School prior to approval of the Rank I planned curriculum by the advisor and the filing of the curriculum with the Office of Licensure and Certification.
4. At least 15 semester hours shall be taken at Eastern Kentucky University. The remaining 15-semester hours credit may be taken at EKU or, upon approval by the advisor, at other accredited graduate schools and transferred.

5. All courses in the 30 semester hour requirement for Rank I shall be graduate level and a "B" average shall be required for certification. No credit shall be allowed for any course carrying a grade lower than "C." At least 12 hours shall be courses open only to graduate candidates. Only graduate credits not used in the Rank II (fifth-year non-degree program) shall be considered in the Rank I program. All CAA 85 credits earned in the master's degree program can be included in the 60 hours required for completion of the Rank I program.
6. The Rank I program shall include six additional semester hours of professional education, 24 hours of courses in a certified teaching field (combined in the Rank II and Rank I programs) and free electives to total 30 semester hours. Preparation certification programs for school administrators, school counselors, pupil personnel directors, and directors of special education can be part of a Rank I program.
7. Course credit specified for Rank I cannot be more than 10 years old at the completion of the program.
8. For any specific requirement applicable to special fields or individual departments, contact the appropriate department or school.

The Office of Licensure and Certification receives and processes applications for teaching certificates (Rank III, II and I) and additional certificates for school personnel (principals, supervisors, superintendents, directors of special education, school counselors, school psychologists, and pupil personnel directors). Questions may be directed to a College of Education and Applied Human Sciences certification officer at [coecert@eku.edu](mailto:coecert@eku.edu) or (859) 622-1829.

Planned programs for degree and non-degree teacher certification programs are received and maintained in the Licensure and Certification Office.

Candidates seeking initial teaching certification must meet all the requirements for admission to the teacher education program as stated in the Undergraduate Catalog. Candidates pursuing an alternative route to certification will follow the admission requirements as described in the program display.

The Rank I requires a minimum of 60 hours if a master's program is included or a minimum of 30 additional hours after completion of a planned Rank II program.

## Admission Requirements

- Admission to the Graduate School
- A bachelor's or master's degree with a cumulative grade point average of 3.0 on a 4.0 scale or a grade point in the last 60 hours of credit completed, including undergraduate and graduate coursework
- A Verbal score of 150, a Quantitative score of 143 and an Analytical Writing score of 4.0 on the GRE. Applicants with a cumulative GPA of 3.0 or higher or a 3.25 in the last 60 semester hours are exempt from the Entrance Examinations.
- Statement of Eligibility or Professional Certificate with EPSB
- Candidates must have a Master's degree or Rank II certification through a regionally accredited institution.
- Reference inventory on Candidate Dispositions (which candidates receives from a colleague or administrator who has worked directly with the candidate): In the areas of Communication, Collaboration, Critical Thinking, and Creativity, the candidate must receive a rating of 3 or higher to be eligible for admission to advanced programs.
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions

- Candidates must review the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
- Candidates must review the character and fitness questionnaire contained in Section III of the CA-1 incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
- Candidates must demonstrate understanding of professional dispositions expected of Professional educators.

1. documentation of three (3) years teaching experience,
2. provision of two letters of recommendation from school/ district supervisors and one (1) letter from a district official pledging support for the clinical experiences,
3. provision of a written statement indicating ability to improve student achievement, to lead, and possession of advanced knowledge of curriculum, instruction, and assessment.

## Exit Requirements

- Complete all required coursework within the time allotted.
- Earn a GPA of 3.0 on a 4.0 scale with no grade lower than a C.
- Successfully complete a Professional Growth Plan, Program Portfolio and Exit Interview.
- Pass PRAXIS exam, if required.

## School Leadership, Master of Arts in Education (M.A.Ed.)

### General Information

The School Leadership program is designed to prepare teachers to be educational leaders. The specific goal is to provide additional preparation needed for principal certification. The 30 hour minimum requirement is a structured program. Candidates will be eligible to apply for Level I and Level II principal certification and/or rank change upon completion of this program and passing state required licensure exams.

### Admission Requirements

Candidates must meet the admissions requirements of the Graduate School and have completed an initial teaching certification program. Admission to the Masters of Arts in School Leadership degree program includes:

EAD 853	Conditions of Learning	3
EAD 859	Instruc Plnng for Stu Lrng	3
EAD 879	Systems for Change	3
EDL 944	Public Policy & Politics	3
<b>Total Hours</b>		<b>15</b>

(Level I principal courses required.)

### DIRECTOR OF PUPIL PERSONNEL

The **Director of Pupil Personnel** program prepares directors and assistant directors of pupil personnel services for school district-wide leadership. Initial certification for director of pupil personnel services requires completion of an approved master's degree, the courses required for Level I principal certification, and three years of teaching experience.

Code	Title	Hours
<b>Certificate Requirements</b>

<b>Total Hours</b>		<b>12</b>

### Exit Requirements

The following are the exit requirements for School Librarian:

- Program GPA: Candidates must earn an overall GPA of 3.0 or higher, with no grade lower than a C.

- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components. Successful completion of all key assessments and evaluation in the College's digital portfolio database is required.
- Research Requirement: EPY 869 or ETL 805 /ETL 906 are the research methods courses for this program. MAEd. School Librarian candidates with a Teacher-Leader secondary concentration take ETL 805 and ETL 806, culminating in an action research project which culminates in a technology enhanced presentation. All other MAEd. School Librarian candidates fulfill research requirements through EPY 869.
- The professional portfolio is a requirement for the program. Students complete the portfolio review as part of GRD 878Y.
- LIB 870 is considered the professional practice experience for this program.

### Certification Examination

While the passing of the certification examination is not a requirement to earn the Master of Education in School Librarian, Kentucky does require a passing score on the PRAXIS II Subject Assessments-Library Media Specialist for certification as a school media librarian. Candidates will be required to take the PRAXIS II Subject Assessments-Library Media Specialist in order to complete the program. Students outside of Kentucky are responsible for determining the requirements for certification in their states.

## School Librarian, Master of Arts in Education with a Concentration in Endorsement (M.A.Ed.)

(Programs Available Online)

### General Information

The Master of Arts in Education School Librarian program prepares professionals for work in P-12 schools as School Librarians.

### Admission Requirements

- Candidates must meet the admissions requirements of the Graduate School (undergraduate GPA of 2.5 –candidates who do not have a cumulative GPA of 2.5 may be considered for probationary admission to the graduate school upon completion of the GRE. ### Exit Requirements

The following are the exit requirements for all Master of Arts in Education - Secondary Education programs.

- Program GPA: Candidates must earn overall GPA of 3.0 or higher, with no grade lower than a C.
- Research Requirement: an action research project which culminates in a technology enhanced presentation is required in ETL 806 Teacher Leader Capstone. Candidates must also register for EDF 804 Teaching and Leading with Tech
- GRD 878I MAED Secnd Ed Oral Comp Exam is also required.

## Secondary Education, Master of Arts with Teacher Leader Endorsement Preparation with a Concentration in English as a Second Language (Grades P#12) Endorsement (M.A.Ed.)

### General Information

The curriculum is designed to help teachers certified to teach in secondary programs (P-12, 5-12, or 8-12) improve their professional skills, extend their knowledge of the subjects they teach, and increase their understanding of the intellectual, philosophical, sociological, psychological, and cultural foundations of effective education in order to serve as instructional leaders, teacher mentors, literacy or math coaches, instructional facilitators, department chairs and / or team leaders. Candidates will be eligible to apply for the Teacher Leader Endorsement upon completion of this program.

### Admission Requirements

Candidates must meet the admissions requirements of the Graduate School and have completed an initial teaching certification program in

secondary programs (P-12, 5-12, or 8-12). In addition, candidates must have earned an overall 3.0 undergraduate GPA or a 3.0 in the last 30 hours completed.

## Special Education, Master of Arts in Education (M.A.Ed.)

Dr. Michelle Grep, Graduate Coordinator

The Department of Teaching, Learning, & Educational Leadership also offers graduate programs leading to the Master of Arts in Education in Special Education, and Rank I. Options for the Master of Arts in Education in Special Education include Advanced Study with Teacher Leader endorsement in Interdisciplinary Early Childhood Education or Adding Certification in Learning and Behavior Disorders, Education of the Deaf and Hard of Hearing, Interdisciplinary Early Childhood Education, or Moderate to Severe Disabilities. In addition, the Department offers certification only programs in Learning and Behavior Disorders, Education of the Deaf and Hard of Hearing, Interdisciplinary Early Childhood Education, and Moderate and Severe Disabilities. The Master of Arts in Education, non-teaching option, is offered in Interdisciplinary Early Childhood Education. Candidates should consult with a graduate advisor for the desired certification program as early as possible.

### General Information

Options include the Master of Arts in Education in Special Education with Teacher Leader Endorsement for Advanced Study, or Additional Certification in Learning and Behavior Disorders, Moderate and Severe Disabilities, Deaf and Hard of Hearing, or Interdisciplinary Early Childhood Education.

### Admission Requirements

For clear admission to all MAEd program options the student must meet admission requirements for the Graduate School plus the following program requirements:

- an undergraduate GPA of 3.0 overall or a 3.0 in the last 30 hours completed, or
- a verbal score of 150, a qualitative score of 143, and writing score of 4.0 on the GRE. Those seeking probationary admission are required to submit target GRE scores.

### Program Admissions

#### MAEd Option A: Advanced Study

#### Interdisciplinary Early Childhood Education Teaching with Teacher Leader Endorsement

- Valid teaching certificate in IECE.

#### Interdisciplinary Early Childhood Education Non-teaching

- Prerequisites for entering the IECE non teaching option are a bachelor's degree in an education related discipline from an accredited institution;
- Prerequisite course work (completed or equivalent):

Code	Title	Hours
SED 104	Special Education Introduction	3
or SED 800	Exceptl Learners Gen Ed Class	
CDF 235	Child Development: Conception-Eight Years	3
or CDF 741	Infant Toddler Dev&Group Care	

**MAEd Option B: Adding Certification Learning and Behavior Disorders (LBD)**

- Prerequisites: KY Teaching Certificate in P-5, P-12, 5-9, 5-12, or Secondary for Classroom Teachers;
- Successful completion of equivalent coursework for:

**Additional Information Regarding Exit Requirements**

The following are exit requirements for Master of Arts in Education in Special Education candidates:

- Program GPA: Candidate must earn an overall GPA of 3.0 or higher, with no grade below a C.
- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components. Successful completion of all key assessments and evaluation in the College's digital portfolio database is required.
- Oral presentation of Capstone Research project and approval by graduate faculty advisor in ETL 806 Teacher Leader Capstone.
- GRD 877M MAED Spec Ed Written Comp – Comprehensive Written Exam or GRD 878V MAED Spec Ed Oral Comp – Comprehensive Oral Exam
- For Option B, adding certification and/or rank change candidates must pass the appropriate PRAXIS II Exam for new area of certification.
- Candidates seeking licensure in another state should follow the guidelines established by the state's licensing agency.

PRAXIS Disclaimer: Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Professional Learning and

Assessment at (502) 564-5846. EKU is not responsible for providing test codes to candidates.

# Teacher Education, Master of Arts in Teaching with a Concentration in Agriculture (Grades 5-12) (M.A.T.)

## General Information

The Master of Arts in Teaching program is designed to allow degree candidates who have already completed an appropriate undergraduate major (determined by transcript review) to complete certification requirements while completing a master’s degree.

## Admission Requirements

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

### Admission to the Program

- A bachelor’s or master’s degree with a cumulative grade point average of 2.75 on a 4.0 scale **or** a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the PRAXIS II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101 American Sign Language I, ASL 102 American Sign Language II.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring 2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
  - EKU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
  - EKU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
  - Candidates must demonstrate understanding of professional dispositions expected of professional educators.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at certification.alternative\_routes@EKU.EDU or visit the Alternative Certification Specialist in Bert Combs, Room 423

<b>Concentration Courses</b>		
ESE 752	Teach/Car/Tech Edu/midd/Sec Sc	3
Choose from six hours of content with advisor approval		6
<b>Total Hours</b>		<b>9</b>

### Exit Requirements

The following are the exit requirements for Master of Arts in Teaching:

- Program GPA: Candidates must earn an overall GPA of 3.0 or higher, with no grade lower than a C, and no grade lower than a B in CED courses.
- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components.
- Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education and Applied Human Sciences requirements.
- Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.
- Approval of the Capstone Research project by the candidate's advisor (GRD 878N MAT Secnd Portfolio Review)
- Oral presentation of Action Research in ETL 806 Teacher Leader Capstone.

- Initial Certification Concentration: Successful completion of the student teaching semester for the initial certification concentration.

Option 6 Route: Submission of completed, verified Mentoring Plan.

### Licensure

Candidates seeking licensure and/or rank change in Kentucky must complete the appropriate PRAXIS content exam(s) and Praxis II Principles of Learning and Teaching exam.

PRAXIS Disclaimer: Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Professional Learning and Assessment at (502) 564-5778.

## Teacher Education, Master of Arts in Teaching with a Concentration in Art (P-12) (M.A.T.)

### General Information

The Master of Arts in Teaching program is designed to allow degree candidates who have already completed an appropriate undergraduate major (determined by transcript review) to complete certification requirements while completing a master's degree.

### Admission Requirements

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

#### Admission to the Program

- A bachelor's or master's degree with a cumulative grade point average of 2.75 on a 4.0 scale **or** a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the PRAXIS II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101 American Sign Language I, ASL 102 American Sign Language II.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring

2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.

- EKU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
- EKU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
- Candidates must demonstrate understanding of professional dispositions expected of professional educators.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. ## Exit Requirements

The following are the exit requirements for Master of Arts in Teaching:

- Program GPA: Candidates must earn an overall GPA of 3.0 or higher, with no grade lower than a C, and no grade lower than a B in CED courses.
- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components.
- Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education and Applied Human Sciences requirements.
- Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.
- Approval of the Capstone Research project by the candidate's advisor (GRD 878N MAT Secnd Portfolio Review)
- Oral presentation of Action Research in ETL 806 Teacher Leader Capstone.
- Initial Certification Concentration: Successful completion of the student teaching semester for the initial certification concentration.

Option 6 Route: Submission of completed, verified Mentoring Plan.

## Licensure

Candidates seeking licensure and/or rank change in Kentucky must complete the appropriate PRAXIS content exam(s) and Praxis II Principles of Learning and Teaching exam.

PRAXIS Disclaimer: Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Professional Learning and Assessment at (502) 564-5778.

# Teacher Education, Master of Arts in Teaching with a Concentration in Deaf and Hard of Hearing Education (M.A.T.)

## General Information

The Master of Arts in Teaching program is designed to allow degree candidates who have already completed an appropriate undergraduate

major (determined by transcript review) to complete certification requirements while completing a master's degree.

## Admission Requirements

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

### Admission to the Program

- A bachelor's or master's degree with a cumulative grade point average of 2.75 on a 4.0 scale **or** a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the Praxis II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Candidates seeking DHH with Sign Proficiency certification must successfully complete the American Sign Language Proficiency Interview exam prior to admission. For middle grades concentration, candidates must successfully complete one of two required Praxis II content exams.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring 2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
  - EKU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
  - EKU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
  - Candidates must demonstrate understanding of professional dispositions expected of professional educators.
  - Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101, 102.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will

initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.

- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at [certification.alternative\\_routes@EKU.EDU](mailto:certification.alternative_routes@EKU.EDU) or visit the Alternative Certification Specialist in Bert Combs, Room 423

Option 6 Route: Submission of completed, verified Mentoring Plan.

## Licensure

Candidates seeking licensure and/or rank change in Kentucky must complete the appropriate PRAXIS content exam(s) and Praxis II Principles of Learning and Teaching exam.

PRAXIS Disclaimer: Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Professional Learning and Assessment at (502) 564-5778.

# Teacher Education, Master of Arts in Teaching with a Concentration in English (8-12) (M.A.T.)

## General Information

The Master of Arts in Teaching program is designed to allow degree candidates who have already completed an appropriate undergraduate major (determined by transcript review) to complete certification requirements while completing a master's degree.

## Admission Requirements

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

## Admission to the Program

- A bachelor's or master's degree with a cumulative grade point average of 2.75 on a 4.0 scale **or** a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the PRAXIS II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101 American Sign Language I, ASL 102 American Sign Language II.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring 2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
- EKV College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
- EKV College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
- Candidates must demonstrate understanding of professional dispositions expected of professional educators.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at certification.alternative\_routes@EKU.EDU or visit the Alternative Certification Specialist in Bert Combs, Room 423

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

### Admission to the Program

- A bachelor’s or master’s degree with a cumulative grade point average of 2.75 on a 4.0 scale or a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the PRAXIS II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101 American Sign Language I, ASL 102 American Sign Language II.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring 2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
- EKU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
- EKU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
- Candidates must demonstrate understanding of professional dispositions expected of professional educators.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at certification.alternative\_routes@EKU.EDU or visit the Alternative Certification Specialist in Bert Combs, Room 423

- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring 2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
- ECU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
- ECU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470

- Candidates must demonstrate understanding of professional dispositions expected of professional educators.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at certification.alternative\_routes@EKU.EDU or visit the Alternative Certification Specialist in Bert Combs, Room 423

## Program Requirements

CIP Code: 13.1206

Code	Title	Hours
<b>Professional Education Core</b>		
CED 810	Clinical VII or VIII: The Education Profession and Curriculum Design	1
CED 830	Clinical IX: Diagnosis & Presc	1
CED 840	Clinical X: Practicing Teachin	1
CED 897	Clinical XI: Grad Practicum	3
EGC 820	Prof Stud I: Tchrs, Sch, & Soc	3
EGC 830 & ETL 805	Professional Studies II: Learner, Teachers, and Action Research and Research Metho for Educ Profes	6
EMS 810	Emerging Instructional Technol	3
EMS 874	Disciplinary Literacy	3
SED 800	Exceptl Learners Gen Ed Class	3

### Concentrations

Students must select one of the following Concentrations:

Interdisciplinary Early Childhood Education
Deaf and Hard of Hearing Education
Elementary Education P-5 Teaching
Middle Grades 5-9 Teaching
Agriculture (Grades 5-12)
Art (P-12)
Biological Science (8-12)
Business and Marketing (5-12)

Chemistry (8-12)	
Earth Science (8-12)	
Engineering & Technology Education (5-12)	
English (8-12)	
Family and Consumer Sciences (5-12)	
French (P-12)	
Health Education (P-12)	
Mathematics (8-12)	
Music (P-12)	
Physical Education (P-12)	
Physical Education & Health Dual Certification (P-12)	12
Physics (8-12)	
Social Science (8-12)	
Spanish (P-12)	
Theatre (P-12)	

### Exit Requirements

ETL 806	Teacher Leader Capstone (repeatable for up to three hours)	1
GRD 878K	MAT Elementary Portfolio Review	0
GRD 878L	MAT Middle Grade Portfolio Review	0
GRD 878N	MAT Secnd Portfolio Review	0
GRD 878O	Deaf and Hard of Hearing Portfolio Review	0
GRD 878P	MAT IECE Portfolio Review	0

**Total Hours** 37

The selected concentration subject is that in which the candidate will then request certification by the Education Professional Standards Board.

- Candidates may obtain Rank 1 upon completion of the MAT DHH certification with the addition of the following coursework: ELE 821 Literacy Instr. & Assess P-5, SED 808 Spec Ed Early Childhood Survey, and SED 837 Applied Behavior Analysis

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
ESE 766	Teach Hlth/Phy Educ in Schools	3
EME 786	Teaching of Health in P-8	3
Choose from six hours of content with advisor approval		6
<b>Total Hours</b>		<b>12</b>

## Exit Requirements

The following are the exit requirements for Master of Arts in Teaching:

- Program GPA: Candidates must earn an overall GPA of 3.0 or higher, with no grade lower than a C, and no grade lower than a B in CED courses.
- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components.
- Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education and Applied Human Sciences requirements.
- Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.

- Approval of the Capstone Research project by the candidate's advisor (GRD 878N MAT Secnd Portfolio Review)
- Oral presentation of Action Research in ETL 806 Teacher Leader Capstone.
- Initial Certification Concentration: Successful completion of the student teaching semester for the initial certification concentration.

Option 6 Route: Submission of completed, verified Mentoring Plan.

## Licensure

Candidates seeking licensure and/or rank change in Kentucky must complete the appropriate PRAXIS content exam(s) and Praxis II Principles of Learning and Teaching exam.

PRAXIS Disclaimer: Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Professional Learning and Assessment at (502) 564-5778.

# Teacher Education, Master of Arts in Teaching with a Concentration in Physical Education (P-12) (M.A.T.)

## General Information

The Master of Arts in Teaching program is designed to allow degree candidates who have already completed an appropriate undergraduate major (determined by transcript review) to complete certification requirements while completing a master's degree.

## Admission Requirements

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

### Admission to the Program

- A bachelor's or master's degree with a cumulative grade point average of 2.75 on a 4.0 scale **or** a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the PRAXIS II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101 American Sign Language I, ASL 102 American Sign Language II.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR

1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.

- Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring 2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.
- EKU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
- EKU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
- Candidates must demonstrate understanding of professional dispositions expected of professional educators.

The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at [certification.alternative\\_routes@EKU.EDU](mailto:certification.alternative_routes@EKU.EDU) or visit the Alternative Certification Specialist in Bert Combs, Room 423

<b>Total Hours</b>		<b>34</b>

The selected concentration subject is that in which the candidate will then request certification by the Education Professional Standards Board.

- Candidates may obtain Rank 1 upon completion of the MAT DHH certification with the addition of the following coursework: ELE 821 Literacy Instr. & Assess P-5, SED 808 Spec Ed Early Childhood Survey, and SED 837 Applied Behavior Analysis

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
ESE 743	Teach/Lang Arts in the Sec Sch	3
Choose from six hours of content with advisor approval		6
<b>Total Hours</b>		<b>9</b>

## Exit Requirements

The following are the exit requirements for Master of Arts in Teaching:

- Program GPA: Candidates must earn an overall GPA of 3.0 or higher, with no grade lower than a C, and no grade lower than a B in CED courses.
- Key Assessments: Candidates will have opportunities to demonstrate professional growth through key assessments covering major program components.
- Students must register for and take the PRAXIS exam which correlates to their degree program, per College of Education and Applied Human Sciences requirements.
- Refer to Degree Works for exam details. The PRAXIS exam must be taken prior to student teaching.
- Approval of the Capstone Research project by the candidate's advisor (GRD 878N MAT Secnd Portfolio Review)
- Oral presentation of Action Research in ETL 806 Teacher Leader Capstone.

- Initial Certification Concentration: Successful completion of the student teaching semester for the initial certification concentration.

Option 6 Route: Submission of completed, verified Mentoring Plan.

## Licensure

Candidates seeking licensure and/or rank change in Kentucky must complete the appropriate PRAXIS content exam(s) and Praxis II Principles of Learning and Teaching exam.

PRAXIS Disclaimer: Kentucky educator certification requirements are subject to change. Before registering for the test(s), please check the Education Professional Standards Board website at [www.epsb.ky.gov](http://www.epsb.ky.gov) (<http://www.epsb.ky.gov>) for current test requirements and current cut scores. You may also contact the Division of Professional Learning and Assessment at (502) 564-5778.

## Teacher Education, Master of Arts in Teaching with a Concentration in Theatre (P-12) (M.A.T.)

### General Information

The Master of Arts in Teaching program is designed to allow degree candidates who have already completed an appropriate undergraduate major (determined by transcript review) to complete certification requirements while completing a master's degree.

### Admission Requirements

Candidates seeking admission to the program must **meet all admission requirements for the Graduate School and admission to the program.**

#### Admission to the Program

- A bachelor's or master's degree with a cumulative grade point average of 2.75 on a 4.0 scale **or** a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed, including undergraduate and graduate coursework. (EPSB regulation 16 KAR 5:020)
- Must successfully complete the PRAXIS II content exam in the desired certification area with the exception of DHH, IECE, elementary, and music concentrations. Prerequisite courses for candidates seeking MAT with DHH certification: ASL 101 American Sign Language I, ASL 102 American Sign Language II.
- A professional resume
- An autobiography documenting relevant life/work/educational experience
- Three letters of reference
- Demonstrate communication, creativity, critical thinking, and collaboration in two writing assignments given by the School.
- An interview with the MAT Admission Committee
- Professional Code of Ethics, Character Fitness Declaration, and Professional Dispositions
  - Candidates must review and sign the Professional Code of Ethics for Kentucky School Certified Personnel established in 16 KAR 1:020 and sign a COE Professional Code of Ethics for Kentucky Declaration form.
  - Candidates must review and sign the character and fitness questionnaire contained in Section III of the TC-1 (CA-1 Spring

2015) incorporated by reference in 16 KAR 2:010 and sign a COE Professional Character and Fitness Declaration form.

- EKU College of Education and Applied Human Sciences requires a state criminal history background check approved by the College of Education and Applied Human Sciences as a condition of admission. Under certain circumstances, a national criminal history background check may be required as a condition of admission.
- EKU College of Education and Applied Human Sciences requires a Central Registry check per 922 KAR 1:470
- Candidates must demonstrate understanding of professional dispositions expected of professional educators.

**Note:** Based upon applicant disclosure, an interview by the Professional Education Admission Committee may be required.

### Candidates Seeking Option 6 Alternative Route

- Candidates with clear admission to a traditional route MAT program may pursue an Option 6 route (Temporary Provisional Certification) with an offer of employment from a school district. Candidates seeking employment will be provided an Option 6 eligibility letter to support their application for employment. The school district will initiate a CA-TP application as their intent to hire the candidate. A mentoring plan will be deployed that outlines responsibilities for direct observations from a university mentor with participation from a district assigned mentor.
- To seek and maintain a temporary provisional certification, candidates must be in good academic standing at the university and have concurrent enrollment each semester in the MAT program for the duration of the Option 6 placement. All program requirements and assessments must be completed during the initial and first renewal of the licensure prior to enrollment in practicum and the capstone course which will be completed during the KTIP year, the second renewal. Degree completion is recommended upon successful completion of KTIP and all program requirements.
- To begin the Option 6 route professional education admission process or to request an option 6 eligibility letter, please email the Profession Education Service at [certification.alternative\\_routes@EKU.EDU](mailto:certification.alternative_routes@EKU.EDU) or visit the Alternative Certification Specialist in Bert Combs, Room 423

## Teacher Leader, Endorsement Preparation Program

### Endorsement Preparation Programs

These are programs of study which prepare the candidate, upon recommendation from EKU, for professional endorsement by the Commonwealth of Kentucky Education Professional Standards Board (EPSB.) Endorsements are opportunities to increase an educator's instructional repertoire in specialized areas, such as English as a Second Language (ESL), Gifted and Talented (GT), literacy specialist, and teacher leader. Endorsements can be earned toward a rank change. In some cases, the endorsement may be earned as part of a degree program (MAEd Middle Grade, MAEd Secondary, MAEd School Librarian).

For information on the following endorsement programs, go to the Teaching, Learning, & Educational Leadership website at <https://curriculum.eku.edu/endorsement-programs> (<https://curriculum.eku.edu/endorsement-programs/>)

## Mission

Our Commonwealth is our common health. With a guided focus on student **transformation**, our purpose is our people. We demonstrate this through our recruiting and selecting of a diverse and inclusive faculty, staff, and student body, **innovative** strides in teaching and research to enhance **knowledge**, continuous performance improvement in operational efficiencies, and being intentional with community engagement endeavors. We listen to our people, affirm our purpose, and take action to this end.

## Vision

To make a sustainable impact through the development of future health science practitioners. We strive to optimize the success, health, and well-being of the students and communities that we serve.

### Core Values

We stand united and committed to student success. This is demonstrated through equitable and inclusive behavior. The **values** that guide our behavior include:

- **TRUST** - A team climate of respect in which people are comfortable being themselves.
- **OPTIMISM** - Seeing and expecting the future in a positive manner.
- **BELONGINGNESS** - The degree to which members of Team CHS feel accepted.
- **SERVANT LEADERSHIP** – A servant focus on the well-being of the people to which we belong.

### Strategic Pillars and Goals

#### Pillar 1: Student Success

Team CHS supports students in achieving their individual goals and provides a wide range of opportunities for engagement in academic, personal, and professional activities to enhance **knowledge** and community contribution. Team CHS will promote environments, opportunities, and resources designed to **transform** students to reach their full potential. Through engagement with the college and institution, and exposure to **innovative** student-centered approaches, students can thrive, complete their degree, and reach their goals.

### 1. Recruitment & Retention

**Goal 1.1:** Recruit, support, and engage students to be successful and to enter their respective undergraduate and graduate programs of study.

**Goal 1.2:** Increase the retention and engagement of students for a timely progression to degree completion.

### 2. Student Development and Transformation

**Goal 1.3:** Develop students' long-term success and ability to become leaders in their communities.

**Goal 1.4:** Enhance curricular and co-curricular environments to ensure holistic student development.

**Goal 1.5:** Support students with programs and services that help them discover and better understand career paths.

### **PILLAR 2: Teaching and Research Excellence**

Team CHS (CHS) promotes the advancement of **knowledge and innovation** through a culture of student-centered, **transformational** integrated teaching, research, and creative scholarly activities. Teaching and research are the keystones to advance **knowledge**, foster creativity, inspire **innovation**, and **transform** quality of life. Team CHS will invest in research programs, faculty development, and current technology that enhance the faculty as teacher-scholars and their ability to model best practices for students. As a result, faculty can improve student learning, prepare students to compete in the global marketplace, and **transform** student success by providing access to a complete experiential learning environment that develops students into holistic critical thinkers in the professional community.

### **GOALS TO ACHIEVE PILLAR 2**

#### 1. Teaching

**Goal 2.1.** Enhance student success through innovative academic programming that promote excellence.

#### 2. Faculty Instructional Support

**Goal 2.2.** Promote and invest in faculty support services to maximize instructional effectiveness.

#### 3. Foster Belongingness and Collaboration Across CHS Faculty

**Goal 2.3** Create opportunities for the mutual exchange of teaching, scholarship, and professional development.

#### 4. Expand Research Opportunities & Infrastructure

**Goal 2.4** Develop infrastructure that fosters research and creative scholarly activities of faculty and students.

### **PILLAR 3: Community Engagement**

Build and nurture sustained, mutually beneficial, collaborative partnerships to **transform** quality of life in the community, to share **knowledge** and **innovative** resources and to foster civic and social responsibilities among students, citizens, faculty, and staff.

By deepening strategic relationships, expanding opportunities, and encouraging community members to engage with CHS on multiple levels,

the College will distinguish itself as a valued regional partner and critical community resource.

### **GOALS TO ACHIEVE PILLAR 3**

#### 1. Partnerships and Collaborations

**Goal 3.1** Develop long-term relationships and build multiple pathways of clear communication and reciprocal engagement with stakeholders.

#### 2. Assessment of Engagement

**Goal 3.2:** Strategically coordinate, implement, assess, and enhance mutually beneficial engagement efforts related to community stakeholders.

#### 3. Education and Enrichment

**Goal 3.3** Increase educational opportunities for citizens across the region.

#### **Admission Requirements for College**

The College of Health Sciences accepts applications from all persons who are qualified for admission to the University. All applicants must provide evidence of their ability to meet the academic standards established by the various programs. Due to enrollment limitations of some programs, applications should be made early. Applications received after the deadline of a program will be processed and admissions recommended on a space available basis. Specific entrance requirements for each program are shown in the departmental sections of this *Catalog*.

#### **Admission Policies**

1. Students must meet requirements and be admitted by the University before being considered for enrollment in programs within the College of Health Sciences. Specific admission criteria are provided under each of the Health Sciences programs. The student is responsible for obtaining information for the application process including department deadlines.
2. Transfer work must be from an accredited institution and with a minimum grade of "C" in major and supporting courses. The applicant must be eligible to return to the last institution attended.
3. Work taken more than eight years previously must be approved by the Dean of the College.
4. In the event that a student is not accepted for a program, the student who wishes to reapply must submit a new application and related materials that will be considered when a new class is accepted.

Students desiring to complete collegiate work required for admission to professional programs may complete this work at any accredited college or university. Students are urged to carefully plan their course of study to be consistent with the individual program's curriculum progression plan of study. Students who plan to complete coursework before declaring a major in a College of Health Sciences program should consult with the individual program directors or with the College of Health Sciences Advisors.

Students who have not reached a decision on a specific health science major may obtain counseling/guidance from individual program directors in the College of Health Sciences or from College of Health Sciences Advisors.

The programs in the College of Health Sciences are designed to prepare graduates for practice in health and human services professions. Most

require licensure and/or certification after graduation and prior to practice. A criminal record (excluding minor traffic violations) may make a person ineligible for licensure or certification in these professions. Students with such a history should contact the licensing or certifying body prior to enrollment to determine whether this might be the case.

### Clinical Agency Placement Requirements

Placement in clinical sites for certain programs in the College of Health Sciences requires students to meet specific clinical agency placement requirements. Clinical agency placement requirements for certain programs (particularly those involving direct patient contact and/or practice with children) require a criminal background check and/or a urine drug screen. Students whose results from these screenings do not meet clinical agency placement requirements will be unable to participate in clinical experiences which are required for satisfactory progression and completion of the program. Most clinical agencies and programs where students may be potentially exposed to blood borne pathogens mandate that students comply with the Hepatitis B vaccination requirement. [see Blood Borne Pathogens and Hepatitis B Statement]. Other requirements may include documentation of tuberculosis screenings indicating student is free of disease, specific immunizations, certifications, licensures, student professional liability insurance purchased through the University [see Student Liability (Malpractice) Insurance], and individual health insurance. Students who have not met clinical agency placement requirements will not be permitted to participate in clinical and laboratory learning experiences mandated for satisfactory progression and completion of the program. Specific requirements for individual programs may be obtained by contacting the departmental office for the program.

## Student Agreement Statement

Programs in the College of Health Sciences may require a student to sign an agreement statement that encompasses professional expectations related to the program. This statement is to be signed when the student enters courses in the major.

## Student Liability (Malpractice) Insurance

All students whose programs require participation in clinical learning experiences must purchase and maintain liability insurance through the University during the entire clinical experience. Proof of such insurance coverage must be furnished to the department before the clinical experience is scheduled to begin. The University has arranged for appropriate insurance coverage at a modest cost to the student. Further information may be obtained at the student's major departmental office.

## Clinical Facilities

The University maintains formal contracts with many health care Human Services and Educational agencies located throughout Kentucky and the United States. Almost every specialty within the entire health care spectrum is available for use in providing high quality experiences for students enrolled in the programs. A list of cooperating agencies is available through the Office of the Dean.

The University is not liable for, nor is there a fund from which payment can be made for those who are inconvenienced or incur expenses based upon canceled classes, assignments, or clinical placements, etc.

## Bloodborne Pathogens and Hepatitis B Statement

The College of Health Sciences attempts to minimize the risk of exposure to blood borne pathogens for students who will be involved in clinical and laboratory learning experiences where the risk of exposure could occur. To this end, students majoring in clinical programs within the College of Health Sciences where a potential risk of exposure could occur are required to receive education in universal precautions and the Occupational Safety and Health Administration's (OSHA) Bloodborne Pathogens Standard Regulations. Students will be responsible for complying with the Hepatitis B vaccination when indicated before participation in the clinical training phase of their respective programs [see Clinical Agency Placement Requirements]. The Blood Borne Pathogens Exposure Control Plan is posted on the College of Health Sciences website and should be carefully reviewed. More information regarding specific program requirements may be obtained through the departmental offices, program student handbooks, and other program informational sources.

## Graduate Course Credit

All 700 level courses have undergraduate counterparts bearing the same last two digits. The 700 level courses are offered only for graduate level credit and require additional appropriate experiences for all students enrolled. Students who have previously taken the undergraduate counterpart of these courses at the 500 levels will not be permitted to enroll for graduate level credit in the 700 level counterparts. Credit will not be awarded for both the 700 and 500 level of the same course.

## Cross Listed Courses

Some courses are offered under different prefixes with the same course content. Students will not be awarded credit for any course which they have previously received credit under a cross-listed prefix.

## Center for Retention, Progression, and Graduation

### Director

Dr. Jamie Woolery  
(859) 622-2090  
Rowlett 311

The College of Health Sciences Center for Retention, Progression and Graduation (RPG) is a center for all students in the College of Health Sciences providing academic enrichment and support resources for student success. The Center for RPG is a one stop shop for students, faculty, and staff as a resource consortium. The full-time staff and student workers, work congruently to provide assistance for students to navigate college and the University system. The staff also provide referrals to other ECU resources which students and faculty may not be aware.

- The Center for RPG includes: manipulative assessments, textbooks for house use, a quiet and group study/homework center with white boards and large tables for use. A full computer lab with printing and color printing is available. As well as student success tutorials and workshops.
- Testing for any required admission exams (HESI A-2) as well as mid-curricular and exit exams are provided for the School of Nursing on a

set schedule for the year. The Center may be used for make-up testing when set-up at a faculty's request.

- Tutoring is available through our Learning Assistant program. Upperclassmen provide individualized and group sessions on course content, study tips, encouragement, and guidance to their peers through meeting and discussing concerns and challenges their fellow students have encountered.
- Research assistance is available in the Center for RPG with collaboration from the University Library.

## Department of Occupational Science and Occupational Therapy

Dr. Dana Howell, Chair

Dr. Renee Causey-Upton, Associate Chair and Graduate Coordinator

Dr. Shirley O'Brien, Post-professional OTD Coordinator

[www.ot.eku.edu](http://www.ot.eku.edu) (<http://www.ot.eku.edu>)

(859) 622-3300

### Mission

The mission of the Department of Occupational Science and Occupational Therapy is to prepare professionals who are leaders in occupational science and occupational therapy reaching the community, the Commonwealth and the world, through education, research, and service, fostering services that provide dignity and respect for all people.

### Doctoral

- Occupational Therapy Doctorate with a Concentration in Post-Professional (O.T.D.) (p. 707)
- Occupational Therapy Doctorate with a Concentration in Professional (O.T.D.) (p. 708)
- Rehabilitation Sciences Doctoral Program (p. 709)

### Master's

- Occupational Therapy, Master of Science (M.S.) (p. 706)

### Courses

#### OTS 715. Early Child Sensorimotor Devel. (3 Credits)

A. Prerequisite: education major or degree or instructor's approval. Provides an overview of normal sensorimotor development in infants and young children. Includes contrasting normal/ abnormal development and application of appropriate developmental tasks. Laboratory experiences will be provided.

#### OTS 720. Provid Hlth Serv in Appalachia. (3 Credits)

A. Prerequisite: departmental approval. An analysis of development and delivery of health care services in Appalachia. Examination of relevant current and historical factors, which have an impact on the health of the Appalachian people.

#### OTS 800. OBP: Early Childhood. (3 Credits)

(3) A. Evaluation and intervention related to occupational performance for individuals accessing health and education systems ages 0-5. Theory driven and client centered practices for supporting occupational performance.

#### OTS 804. Practice Experience Prep I. (3 Credits)

A. Preparation for Level II fieldwork, Applied Leadership Experience and Capstone.

#### OTS 805. Practice Experience Prep II. (3 Credits)

A. Pre-req: OTS 804. Preparation for Applied Leadership Experience and Capstone.

#### OTS 810. OBP: Children and Youth. (3 Credits)

(3) A. Evaluating and intervention related to occupational performance in children ages 5-21 accessing health and education systems. Theory driven and client centered practices for supporting occupational performance.

#### OTS 815. OBP: Neurological. (3 Credits)

A. Evaluation and intervention related to preventing and remediating neurologic diagnoses. Theory driven and client centered practices for supporting occupational performance.

#### OTS 820. OBP: Fundamentals. (4 Credits)

(4) A. Corequisite: OTS 821. Foundational knowledge in occupation-based practice including philosophy, theory, context, process, and reasoning. Emphasis on active learning and reasoning skills.

#### OTS 821. Level I OT Experience. (3 Credits)

A. Integration and application of foundational knowledge of occupation-based practice through participation in varied practice experiences across a continuum of care. May be retaken to a maximum of 9 hours.

#### OTS 822. OBP: Health Care Practice 1. (4 Credits)

A. Corequisite: OTS 821. Lecture and lab to include theories, principles and methods of evaluation, intervention and outcome processes for individuals accessing health systems. Course will focus on engagement in occupation to support participation in life roles across the lifespan.

#### OTS 824. OBP: Health Care Practice 2. (4 Credits)

A. Prerequisites: OTS 821 and OTS 822. Continued study of theories, principles and methods of evaluation, intervention and outcome processes for individuals accessing health systems. Course will focus on engagement in occupation to support participation in life roles across the lifespan.

#### OTS 825. technology and Rehabilitation. (3 Credits)

A. Prerequisite: computer literacy or departmental approval. Advanced exploration of occupational therapy knowledge and skill about assistive technology. Emphasis on application and use of assistive technology to enhance occupational performance of individuals with disabilities.

#### OTS 830. OBP: Education Communities. (4 Credits)

A. Prerequisites: OTS 824 and OTS 832. Corequisite: OTS 871. Occupation-based assessment and intervention for children and young adults in educational contexts. Course addresses models of practice, service delivery, federal/state legislation and philosophy of administration. Active learning experiences in the community.

#### OTS 831. Practice Seminar II. (2 Credits)

A. Prerequisite: OTS 821 or Corequisites: OTS 824 and OTS 832. Integration of occupation-based practice through reflection on curriculum themes, participation in community-based settings, preparation for Level II Fieldwork and ongoing development of a professional portfolio.

#### OTS 832. OBP: Community-Based Practice. (4 Credits)

A. Corequisite: OTS 831. Theories, principles and methods of evaluation, intervention and outcome processes for individuals and groups assessing social systems through the lifespan. Course will focus on engagement in occupation for community participation.

#### OTS 834. OBP: Advanced Dimensions. (3 Credits)

A. Prerequisite: permission of department. Advanced conceptualization and synthesis of Occupational Science and existing models of Occupational Therapy for practice. Includes analysis and application of occupation-based practice and evidence within specialty areas.

**OTS 835. OT Intervention in Workplace. (3 Credits)**

I, II, A. Prerequisite: OTS 820 or departmental approval. Exploration of the direct and indirect service roles and functions of the occupational therapist in the workplace. Emphasis will be on the work-related behaviors and environmental assessments for health promotion, prevention and work adjustment.

**OTS 836. OBP: Optimizing Occupation. (3 Credits)**

A. Prerequisite: graduate standing in the occupational therapy program; OTS 822, and 832. Specialized evaluation and intervention in occupational therapy practice with emphasis on emerging practice areas. Students will synthesize and apply skills of best practice for optimizing occupations.

**OTS 837. UE Evaluation & Intervention. (3 Credits)**

A. Prerequisite: OTS 822 or departmental approval. This course focuses on advanced study of the upper extremity including evaluation and treatment techniques in evidence-based occupational therapy practice.

**OTS 840. OBP: Mental Health. (3 Credits)**

A Evaluation and intervention related to mental health conditions: Neurocognitive, psychosocial, and behavioral. Theory driven and client centered practices for supporting occupational performance.

**OTS 845. Health Care Practice Fieldwork. (6 Credits)**

A. Prerequisite: Successful completion of all didactic coursework or department approval. Twelve weeks of fieldwork in health care practice to promote systematic evaluation; diagnose occupational performance deficits; develop and implement intervention plans based on occupational profiles and evidence; measure client outcomes; and document findings.

**OTS 846. Community Practice Fieldwork. (3-5 Credits)**

I. Prerequisite: Successful completion of all didactic coursework. Six to ten-week fieldwork in community/education to promote systematic evaluation; diagnose occupational performance deficits; develop and implement intervention plans based on occupational profiles and evidence; measure client outcomes; and document findings.

**OTS 846S. Early Childhood Practice. (3 Credits)**

Prerequisite: OTS820 or departmental approval. Advanced study of theories, models of practice, and therapeutic approaches in early intervention and preschool environments within the context of state and federal laws. Emphasizes therapeutic interventions in early childhood through service learning.

**OTS 847. Emerging Practice Fieldwork. (1-3 Credits)**

Prerequisite: Successful completion of all didactic coursework. Two to six week fieldwork in an emerging or traditional practice settings to develop/refine skills. Includes online reflective seminar.

**OTS 850. Management Principles for OT. (3 Credits)**

A. Principles of supervision, collaboration, strategic planning, and developing, funding, and managing an occupational therapy practice.

**OTS 851. Strategic Communication in OT. (3 Credits)**

A. Prerequisite: undergraduate/graduate course in administration or consent of instructor. Study of change theory and factors affecting communication in practice settings.

**OTS 852. OT Serv in Mental Hlth Setting. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Examination of external forces influencing mental health services and models of occupational therapy service delivery, emphasizing community-based and rural health programs.

**OTS 853. Leadership in Human Services. (3 Credits)**

A. Advance ethical leadership skills through development and application of current leadership theory to become a change agent to positively impact the profession.

**OTS 855. Role of OT & the Aging Adult. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Advanced study of occupational therapy's role in delivering services to the aging adult in emerging/innovative programming. Identification and analysis of factors which promote/hinder quality of life.

**OTS 855S. Role of OT & the Aging Adult. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Advanced study of occupational therapy's role in delivering services to the aging adult in emerging/innovative programming. Identification and analysis of factors which promote/hinder quality of life. Credit will not be awarded for both OTS 855 and 855S.

**OTS 860. OBP: Emerging Practice. (3 Credits)**

A. Evaluation and intervention related to emerging areas of occupational therapy practice, including assistive technology. Theory driven and client centered practices for supporting occupational performance.

**OTS 862. Thera. Modalities in OT Pract. (3 Credits)**

Addresses occupational therapy theoretical principles, neurophysiological and electrophysical changes that occur as a result of the application of selected physical and electrical modalities. Students will develop skill in the application of these modalities.

**OTS 863. Occupation & Sensory Process. (3 Credits)**

A. Understanding the impact of sensory processing disorders on occupational natures will enable students to provide appropriate intervention. Occupational adaptation and sensory integrative theories will be applied as conceptual frameworks for occupational therapy intervention.

**OTS 864. Early Childhood Practice. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Advanced study of theories, models of practice, and therapeutic approaches in early intervention and preschool environments within the context of state and federal laws. Emphasizes the interdisciplinary nature of therapy service delivery in the early childhood.

**OTS 864S. Early Childhood Practice. (3 Credits)**

(A) Prerequisite: OTS 820 or departmental approval. Advanced study of theories, models of practice, and therapeutic approaches in early intervention and preschool environments within the context of state and federal laws. Emphasizes therapeutic interventions in early childhood through service learning.

**OTS 865. School-based Practice. (3 Credits)**

A. Prerequisite: Departmental approval. In-depth study of school-based therapy. Theories, principles, models of practice, and methods of therapy service delivery for students with learning and behavioral difficulties, within the context of state and federal laws.

**OTS 866. OT & Behavior Disorder in Sch. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Examination and application of occupational therapy theoretical models used in evaluation and intervention for this population and the external systems affecting service delivery.

**OTS 870. Profess Trends & Issues in OT. (3 Credits)**

I, II. Trends and issues impacting the occupational therapy profession. Advancement of professional roles of consultant, entrepreneur, educator, leader and researcher.

**OTS 871. Practice Seminar III. (2 Credits)**

A. Corequisite: OTS 830. Integration of occupation-based practice through reflection on curriculum themes, participation in community-based learning in education, preparation for Level II Fieldwork and completion of a professional portfolio.

**OTS 871S. Professional Seminar II. (3 Credits)**

A. Students assume leadership in learning communities, complete professional portfolios and participate in professional learning experiences. Credit will not be awarded for both OTS 871 and OTS 871S.

**OTS 875. Special Topics: \_\_\_\_\_ (1-3 Credits)**

Advanced study of selected topics in occupational therapy practice.

**OTS 880. Res in Occupational Therapy. (3 Credits)**

I, II, A. Exploration, critical analysis and application of research and evidence-based practice in occupational therapy. Emphasis on preparation and implementation of a research study.

**OTS 882. Advanced Occupational Science. (3 Credits)**

II. Exploration of occupational science as a disciplinary knowledge base, current research on occupation-based practice, and methods of developing occupation-based practice. Emphasis on change, clinical leadership and research.

**OTS 883. Change and Complexity in OBP. (3 Credits)**

A. Comprehensive critique of disciplinary literature describing professional applications of occupation. Deriving insights into occupation-based practice (OBP) through perspectives from history, systems, chaos, change, and complexity. Action and change research methods for the development of occupation-based practice.

**OTS 884. Qualitative Inquiry Approaches. (3 Credits)**

A. Prerequisite: Undergraduate course in research design. This course synthesizes the rationale, theoretical foundations, design, methods, analysis, and ethical issues related to qualitative research. Students analyze five approaches of qualitative inquiry, and develop a research prospectus.

**OTS 885. Occupational Perform. Measures. (3 Credits)**

A. Prerequisite: OTS 880 and occupational therapy graduate status or departmental approval. Analysis of clinical evaluation instrumentation. Review of measurement issues and use of instruments in evidence-based practice in occupational therapy. Integration into occupation-based practice.

**OTS 886. Culture and Diversity in OT. (3 Credits)**

A. Importance of culture and diversity in the understanding of health disparities in health care policy and OT practice. Global and national policy and program models for inclusion of culture, diversity and disability are highlighted.

**OTS 890. Independent Study in OT. (1-3 Credits)**

I, II, A. Prerequisite: advisor/departmental approval. Student initiated directed study. Regular consultation with faculty supervisor and final paper required. May be retaken under different subtopics to a cumulative maximum of six hours. Approval of independent study proposal by faculty supervisor and department chair must occur prior to enrollment.

**OTS 895. OT Research Project I. (3 Credits)**

(3) A Development and initiation of a research project as part of a research team. Application of critical thinking and clinical reasoning skills to investigate occupational science and occupational therapy research inquiries.

**OTS 896. Research Project II. (3 Credits)**

A. Prerequisite: OTS 895. Completion of a research project as part of a research team. Application of critical thinking and clinical reasoning skills to investigate occupational science and occupational therapy research inquiries and disseminate results.

**OTS 898. Thesis I. (3 Credits)**

I, II, A. Proposal development leading to thesis as directed by chair of thesis committee.

**OTS 899. Thesis II. (3 Credits)**

Research leading to thesis as directed by chair of thesis committee.

**OTS 899C. Thesis/Project Continuation. (1-3 Credits)**

I, II, A. Prerequisite: advisor/departmental approval. Continuation of research leading to thesis/ special project as directed by the chair of student's committee. May be retaken as necessary to complete research. May not be used to satisfy degree program requirements.

**OTS 901. OTD Leadership Seminar I. (3 Credits)**

A. Prerequisite: Enrollment in OTD Program. Foundational work for development of OTD capstone and Applied Leadership Experience. Conceptualize identity as a leader for change. Develop methods to assess population needs to improve occupation-based programming.

**OTS 902. OTD Leadership Seminar II. (3 Credits)**

A. Prerequisite or Corequisite: OTS 901. Explore options for professional development and leadership experiences. Assess population needs to support occupation-based programming.

**OTS 903. Capstone I: Project Developmnt. (3 Credits)**

(3) Prerequisite: OTS 902. Design capstone project based on needs assessment, literature synthesis, and professional goals to serve as a change agent for occupation-based programming. Capstone emphases are ethical leadership within change and OBP for diverse populations.

**OTS 904. Capstone II: Implmt and Eval. (3 Credits)**

(3) A. Prerequisite: OTS 903. Implement capstone project. Evaluate capstone project outcomes to assess change in occupation-based programming.

**OTS 905. Applied Leadership Experience. (3-6 Credits)**

(3-6) I, A. Prerequisites: OTS 805 or 902. Custom-designed field-based experiences in the Occupational Therapy Doctorate. Emphases are on ethical leadership within change and excellence in occupation-based services for diverse populations.

**OTS 906. OTD Capstone. (1-3 Credits)**

A. Prerequisite: OTS 805 or 904. Integration and application of program outcomes through reflection on Applied Leadership Experience and completion of the capstone project and portfolio. Students present capstone project.

**OTS 910. Policy and Advocacy for OT. (3 Credits)**

(3) A. Analysis of social and healthcare policy on the profession of occupational therapy. Program development to address health disparities, and advocacy needs in emerging practice.

**OTS 911. Applied Research for OT. (3 Credits)**

(3) I. Students will apply research methods, synthesize, paradigms, design, methods, and ethical issues related to research, and discuss funding options. The role of the researcher as an agent of change in practice will be emphasized.

**OTS 912. Evidence-based Practice for OT. (3 Credits)**

(3) II. Evaluate and perform critical research appraisals to justify intervention decisions. Content focuses on: Clinical Reasoning, outcomes measurement, finding evidence, changes in practice, ethics, and communicating evidence-based decisions to stakeholders.

**OTS 913. Educational Practices for OT. (3 Credits)**

(3) I. Prerequisite: Enrollment in the OTD Program. Fundamental principles of designing and implementing educational programs across the lifespan. Educational strategies and learning theories will be analyzed and applied to clinical, community, and didactic settings and populations.

# Occupational Therapy, Master of Science (M.S.)

## General Information

The Department of Occupational Science and Occupational Therapy offers the Master of Science degree in Occupational Therapy. There are two admission concentrations in the program (Professional Concentration, and Post-Professional Concentration). The Professional Concentration is intended for students who do not currently hold a baccalaureate degree or post-baccalaureate certificate in occupational therapy. Permission to enter via the Professional Concentration is highly dependent on the applicant's prior education and therefore the admission criteria should be reviewed carefully. The BS OS Entrance is for the individual with a baccalaureate degree in occupational science. The Post-Professional Concentration is for students who currently hold a baccalaureate degree or post-baccalaureate certificate in occupational therapy from an accredited occupational therapy program.

The MS program is being phased out and no new applicants will be accepted. The last class will graduate in 2024

The graduates of the Master of Science degree program in Occupational Therapy will demonstrate the ability to:

1. Design, provide and analyze evidence-based occupational therapy services that engage people in occupation to support their participation in context.
2. Collaborate with others to promote the health and well-being of diverse persons and communities.
3. Contribute to occupational therapy practice, education and research through the ethical application of reasoning abilities.
4. Reflect the profession's values, principles and beliefs in carrying out professional responsibilities.
5. Inform, negotiate, advocate, and consult with diverse persons, disciplines, and communities to facilitate and promote health.

## Admission Requirements

**This program is no longer admitting students; please refer to the Occupational Therapy Doctorate for current degree options. Professional Pathway**

To be considered for admission, applicants must meet the general admission requirements of the Graduate School. Additional requirements established by the program are as follows:

### BS OS Entrance

1. Bachelor's degree in Occupational Science
2. "C" or better in all prerequisite coursework.
3. 3.0 GPA on the most recent 60 hours of coursework (program prerequisites not included in the most recent 60 hours will be added in the calculation of GPA) or a 3.0 overall undergraduate GPA (all hours attempted in the semester in which the 60th hour occurs will be counted) determined by the February 1st program application deadline.

4. Health Science Reasoning Test (HSRT) Overall Target Score of 15.
5. Three letters of recommendation.

### Specific Criteria

Students with a baccalaureate degree in occupational science should apply to the Graduate School by February 1 of their senior year for admission into the Master of Science in Occupational Therapy. Students will be admitted on a competitive basis using a weighted matrix.

### Post-Professional Pathway

(For Licensed, Registered, Practicing Occupational Therapists)

Students interested in pursuing a Master's in route to an OTD, should refer to the OTD program in the catalog.

## Progression Requirements

In addition to the Graduate School progression policy, the MS OT students must achieve a grade of 'B' or higher in all OTS courses to progress in the program. If a student receives a "C" or lower or an Unsatisfactory grade in an OTS course twice or receives a "C" or lower or an Unsatisfactory grade in two separate courses, they will be dismissed from the program. Refer to the Occupational Therapy Graduate Student Handbook for further information on progression and retention.

## Program Requirements

**This program is no longer admitting students; please refer to the Occupational Therapy Doctorate for current degree options.**

OTS 831	Practice Seminar II	2
OTS 871	Practice Seminar III	2

*Capstone Courses*

OTS 845	Health Care Practice Fieldwork	6
OTS 846	Community Practice Fieldwork	5
OTS 847	Emerging Practice Fieldwork	1

**Total Hours** 56

**Exit Requirements**

**Thesis**

A thesis is optional in this program. If thesis option is selected, an oral defense of the thesis is required (GRD 888C MS Occ Therapy Thesis Denfense).

**Comprehensive Examination**

A comprehensive examination will be required of all post-professional Master of Science students who are non-thesis candidates (GRD 887D MS Occupational Therapy Written Comprehensive Exam).

**Capstone Courses**

All entry-level Master of Science students must successfully complete the following capstone classes with a "Satisfactory" grade, OTS 845 Health Care Practice Fieldwork, OTS 846 Community Practice Fieldwork and OTS 847 Emerging Practice Fieldwork.

The professional course work for the Master of Science in Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE):

Accreditation Council for Occupational Therapy Education (ACOTE)

6116 Executive Boulevard, Suite 200  
North Bethesda, MD 20852-4929  
(301) 652-2682

Following successful completion of the Master of Science in Occupational Therapy, the graduate is eligible to sit for the National Board for Certification in Occupational Therapy (NBCOT) certification examination. For additional information on the examination, contact

NBCOT  
One Bank Street, Suite 300  
Gaithersburg, MD 20878  
[www.nbcot.org](http://www.nbcot.org) (<http://www.nbcot.org>)

Professional level graduates must apply for licensure and/ or certification prior to practicing in any state. A criminal record (excluding minor traffic violations) may make a person ineligible for national certification examination and/or licensure or state certification for practice. Students with such a history should contact NBCOT and relevant licensing or certifying bodies prior to enrollment to determine their situation. For more information regarding the profession, contact the American Occupational Therapy Association (AOTA):

American Occupational Therapy Association (AOTA)  
6116 Executive Boulevard, Suite 200  
North Bethesda, MD 20852-4929  
[www.aota.org](http://www.aota.org) (<http://www.aota.org>)

Program changes may occur in response to accrediting agencies. Students should contact the department to verify program requirements.

**Occupational Therapy Doctorate with a Concentration in Post-Professional (O.T.D.)**

**General Information**

The Department of Occupational Science and Occupational Therapy offers the Occupational Therapy Doctorate (OTD) program. There are two admission concentrations to the OTD program: Professional Concentration and Post-Professional Concentration. The Professional Concentration is intended for students who do not currently hold a baccalaureate degree or post-baccalaureate certificate in occupational therapy, and who have completed the EKU Bachelor of Science in Occupational Science degree program. The Post- Professional Concentration is for students who currently hold an entry-level degree or certificate in occupational therapy from an accredited occupational therapy program. The Post-Professional concentration does not accept occupational therapy assistants.

Graduates of the Post-professional Concentration will:

1. Engage in occupation-based practice as a method of change to positively impact the future of the profession and the quality of occupational therapy services.
2. Ethically and responsibly meet the needs of diverse client populations, by addressing issues related to health disparity, policy and legislation.
3. Serve as leaders of change at local, state, and national levels using tools such as program development, research, client education, and evidence based practice.

- Use advanced critical reasoning skills to provide ethical occupational therapy services.

## Admission Requirements

To be considered for admission, applicants must meet the general admission requirements of the Graduate School. Additional requirements established by the program are as follows:

- A degree (post-baccalaureate certificate, baccalaureate or masters) from an entry level occupational therapist program that is accredited by the Accreditation Council of Occupational Therapy Education (ACOTE). International applicants must have met all requirements for practice in their own country and graduated from an accredited or World Federation of Occupational Therapy (WFOT) approved occupational therapy program.
- Initial certification by the National Board for Certification in Occupational Therapy (NBCOT). International applicants must provide documentation that they are eligible to practice as an occupational therapist in their home country.
- A graduate research methods course.
- Three letters of recommendation (waived for students who graduated from ECU)
- A one-to-two page statement of professional goals.
- A resume and/or professional portfolio.
- Transcripts of undergraduate and graduate coursework.
- An online graduate application.
- Those applicants meeting the above criteria may be required to complete an admission interview with the faculty of the doctoral program prior to final selection.

### Specific Criteria

Applicants should apply by August 5 for fall term; December 5 for Spring term; or May 5 for Summer term.

### Progression Requirements

Students need to obtain a grade of a B or higher in all courses in order to progress in the program.

## Program Requirements

CIP Code: 51.2306

All classes meet online. Students who require a graduate research methods course for admission to the program may take OTS 884 Qualitative Inquiry Approaches, OTS 895 OT Research Project I, or OTS 896 Research Project II, or other comparable graduate research course.

Code	Title	Hours
<b>Core Courses</b>		
OTS 853	Leadership in Human Services	3

## Exit Requirements

Students in the Post-Professional Concentration are required to:

- Satisfactorily complete and present a capstone project.
- Satisfactorily complete and present a professional portfolio.

## Occupational Therapy Doctorate with a Concentration in Professional (O.T.D.)

### General Information

The Department of Occupational Science and Occupational Therapy offers the Occupational Therapy Doctorate (OTD) program. There are two admission concentrations to the OTD program: Professional Concentration and Post-Professional Concentration. The Professional Concentration is intended for students who do not currently hold a baccalaureate degree or post-baccalaureate certificate in occupational therapy, and who have completed the ECU Bachelor of Science in Occupational Science degree program. The Post-Professional Concentration is for students who currently hold an entry-level degree or certificate in occupational therapy from an accredited occupational therapy program. The Post-Professional concentration does not accept occupational therapy assistants.

Graduates of the Professional Concentration will:

- Actualize occupation-based principles to promote the occupational therapy profession.
- Disseminate occupation-based principles through professional written, oral, and non-verbal communication in order to promote occupational therapy.
- Apply critical thinking to facilitate changes that will improve outcomes in occupational therapy.
- Demonstrate excellence and personal and professional accountability that will lead the discipline forward and meet the increasingly complex demands that will be required of occupational therapists.

5. Demonstrate in-depth knowledge in a practice area to positively impact the quality of occupational therapy services and the future of the profession.

## Admission Requirements

To be considered for admission, applicants to the Professional Concentration must meet the general admission requirements of the Graduate School. Additional requirements established by the OTD Program are as follows:

1. Successful completion of a Bachelor’s degree in Occupational Science (the first two years of the combined BSOS to OTD entry level program at EKU) with a minimum GPA of 3.0
2. Completion of a 2nd Health Science Reasoning Test (HSRT)

### Specific Criteria for Students in the Bachelor of Science in Occupational Science Program

Students in the Bachelor of Science in Occupational Science program should apply to the Graduate School by February 1 of their second professional year for admission into the OTD Professional Concentration.

### Progression Requirements

Students need to obtain a grade of a B or higher in all courses in order to progress in the program. Students in the Professional Concentration must successfully complete the Professional Year 3 competency to progress in the program.

## Program Requirements

<b>Total Hours</b>		<b>25-29</b>

## Exit Requirements

Students in the Professional Concentration are required to:

1. Successfully complete the following capstone classes with a “Satisfactory” grade: OTS 845, 846, and 847
2. Satisfactorily complete and present a capstone project.
3. Satisfactorily complete a professional portfolio.

## Rehabilitation Sciences Doctoral Program

### Rehabilitation Sciences Doctoral Program

(in collaboration with the University of Kentucky)

## General Information

The Department of Occupational Science and Occupational Therapy participates in a collaborative Rehabilitation Sciences Doctoral Program with the University of Kentucky. The Doctoral Program in Rehabilitation Sciences is designed to produce academic leaders, researchers, and clinical leaders. The curriculum will provide the students with general knowledge of the full spectrum of the rehabilitation process as well as in-depth knowledge of one specific area of a discipline, such as Occupational Therapy, Physical Therapy, Athletic Training, or Speech and Communication. The degree is awarded by the University of Kentucky.

## Admission Requirements

The student will apply to the University of Kentucky Graduate School. Students must meet the admission criteria of the Graduate School at the University of Kentucky, possess a Master’s Degree and be eligible for a current license to practice in Kentucky.

## Program Requirements

Program requirements can be obtained from <https://www.uky.edu/chs/academic-programs/rehabilitation-sciences-phd-program> (<https://www.uky.edu/chs/academic-programs/rehabilitation-sciences-phd-program/>).

## Exit Requirements

Successful completion of a planned program, comprehensive exam, and a dissertation are required for completion of the Rehabilitation Sciences Doctoral Program.

## Department of Parks, Recreation, Exercise, and Sport Science

### Chair

Dr. Jon McChesney  
(859) 622-1833  
Combs 208

**Associate Chair**

Dr. Matthew Sabin  
(859) 622-8149  
Combs 215A

**Faculty**

H. Adams-Blair, B. Clark, T. Cook, J. Cormier, D. Czech, E. Fuchs, M. Gerken, S. Jones, M. Lane, J. Larkin, J. McChesney, A. Monk, D. Muff, C. Perry, M. Sabin, R. Salmans

**Master's**

- Exercise and Sport Science, Master of Science with a Concentration in Exercise and Wellness (M.S.) (p. 712)
- Exercise and Sport Science, Master of Science with a Concentration in Sports Administration (M.S.) (p. 713)
- Recreation and Park Administration, Master of Science (M.S.) (p. 714)

**Courses**

**ESS 717. Bioenergetics of Performance and Sports Nutrition. (3 Credits)**  
(3) A. Formerly PHE 762. Study of bioenergetics processes and the relationship to energy storage, transformation and utilization in biological systems. Study of energy metabolism during different physiological conditions and the applications to clinical exercise science and sport.

**ESS 720. Advanced Strength and Condition. (3 Credits)**  
I, II This course is an advanced education in the field of strength and conditioning, principles, organization, and techniques. Higher level understanding of human physiology will be gained with specific emphasis on optimizing adaptation response.

**ESS 730. Sports Communications. (3 Credits)**  
I. Formerly PHE 730. Students will explore and apply communication theories to the sport and exercise industry. Emphasis will be on examination of public and media relations with a special focus on organizational communication to external and internal publics.

**ESS 762. Adapted Physical Activity and Special Populations Programming. (3 Credits)**  
I, II. Formerly PHE 762. Principles and practices of adapted physical activity and exercise programming for special populations and at risk, chronic disease populations. Content will emphasize the nature and needs of exceptional persons, etiology of disabilities, and exercise interventions. Credit will not be awarded for both ESS 762 and PHE 762.

**ESS 775. Tests & Measurements. (3 Credits)**  
I, II. Formerly PHE 775. Administration and scoring of tests, evaluation and use of results obtained.

**ESS 790. Special Topics in Ex/Sport Sci. (1-4 Credits)**  
A. Formerly PHE 790. Study of various topics in physical education and sport selected to meet special student needs and interests. May be retaken to a maximum of six hours with advisor's approval provided subtitle is different.

**ESS 799. Tactical Strength and Conditioning. (3 Credits)**  
Foundations of preparing, periodizing, and developing tactical-based athletes and professionals. Tactical athletes include military, LEO, firefighter, and other first responders.

**ESS 800. Research Methods. (3 Credits)**  
I, II. Formerly PHE 800. Application of research methods in exercise and sport science with emphasis on consumption of research, methods of research, and tools and instrumentation for research.

**ESS 810. Financial Aspects of Sport. (3 Credits)**  
A. Formerly PHE 810. Study of the principles, practices, and theories associated with finance planning and management of enterprises engaged in the provision of sport related services and/or products. Topics include budget planning and preparation, preparing and analyzing financial statements, revenue sources, money management, preparation of business plans and feasibility studies.

**ESS 812. Lifetime Fitness and Wellness. (3 Credits)**  
A. Formerly PHE 812. Philosophical and factual basis for lifetime fitness for professional fitness leaders. Problem-solving and decision-making approaches to establish creative and effective programs.

**ESS 814. Sport Mkt/Prom/Fund Raising. (3 Credits)**  
I, A. Formerly PHE 814. Marketing, promotion, and fund raising within the context of amateur and professional sport. An overview of sport business industry; theory; pricing, distribution, and promotional technique of sport; media relations; endorsement and sponsorships; and licensing.

**ESS 821. Physiological Bases of Phy Fit. (3 Credits)**  
II. Formerly PHE 821. Effects of chronic exercise on neuromuscular, cardiovascular, respiratory, and metabolic function.

**ESS 822. Sociology of Sport. (3 Credits)**  
A. Formerly PHE 822. Meaning of sport in contemporary societies; relationship of selected social factors on development of social groups and attitudes in varying levels of sport; structure and function of sport in simple and complex social institutions.

**ESS 823. Psychology of Sport & Exercise. (3 Credits)**  
II. Formerly PHE 823. This course examines the psychological basis of organization and team dynamics of performance in sport and exercise behavior through an exploration of psychological theories and their applications to real world experiences.

**ESS 825. Policy and Governance of Sport. (3 Credits)**  
II. Formerly PHE 825. An in-depth study of major sport governing agencies including organizational structure, constitutions, policies, procedures, and membership requirements of sport agencies at the state, national, and international levels.

**ESS 835. Legal Issues in Sports Science. (3 Credits)**  
I. Formerly PHE 835. Principles and concepts of exercise and sport in contemporary society with primary emphasis on legal issues that relate to the exercise industry and amateur sport.

**ESS 839. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**  
A. Formerly PHE 839. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 839A. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**  
A. Formerly PHE 839A. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 839B. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**

A. Formerly PHE 839B. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 839C. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**

A. Formerly PHE 839C. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 839D. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**

A. Formerly PHE 839A. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 839E. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**

A. Formerly PHE 839E. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 839F. Co-op or Appl Lrn: Physical Ed. (0.5-6 Credits)**

A. Formerly PHE 839F. Prerequisites: departmental approval; must have been admitted to the Master of Science/Sports Administration option. Work under faculty and field supervisors in a cooperative placement related to student's academic studies. One to six hours credit per semester or summer. Six hours may count toward master's degree. A minimum of eighty hours work is required for each academic credit.

**ESS 848. History/Philosophy Ex/Sport Sc. (3 Credits)**

A. Formerly PHE 848. A study of organized physical activity of people in significant cultural epochs in history and the underlying philosophy that influenced these activities and the influence on modern exercise and sport science methods and techniques.

**ESS 850. Event and Facility Management. (3 Credits)**

I. Formerly PHE 850. A. Focus on fundamentals of event and facility management: organizing and operating athletic events, planning and modifying facilities associated with athletic, physical education, fitness, and recreation programs.

**ESS 869. Org Behavior & Leadership in ESS. (3 Credits)**

II. Formerly PHE 869. Students will study the basic concepts, theories, organization and administration including financial management as applied to exercise and sport science.

**ESS 870. Internship Sports Administration. (1-6 Credits)**

A. Formerly PHE 870. Supervised experience in selected aspects of sports in a sports administration setting. May be retaken to a maximum of six hours.

**ESS 871. Internship: Exercise/Wellness. (1-6 Credits)**

A. Formerly PHE 871. Supervised experiences of selected aspects of wellness programming.

**ESS 875. Seminar in Exercise and Sport. (3 Credits)**

A. Formerly PHE 875. Research and discussion of critical questions in physical education; topics to be studied will vary according to the concerns of seminar students.

**ESS 885. Independent Study. (1-3 Credits)**

A. Formerly PHE 885. Designed for graduate students who have demonstrated the ability to conduct individual research relating to physical education. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of three hours.

**ESS 891. Issues in Exercise/ Sport Sci. (3 Credits)**

A. Identification of critical issues arising from current problems; exploration of points of view and possible solutions.

**ESS 896. Sports Administration Capstone. (3 Credits)**

A. Formerly PHE 896. Comprehensive integration and application of program learning outcomes. The student will analyze and synthesize academic knowledge and practical experience as they relate to issues and problems in sports administration.

**ESS 897. Thesis. (3-6 Credits)**

A. Formerly PHE 897. For students preparing a thesis in partial fulfillment of the requirements for the master's degree programs. May be retaken to a maximum of six hours.

**REC 711. Rec Therapy Prac & Services. (3 Credits)**

II. Interventions and utilization of terminology. Apply leadership skills, assistive technology, and programming applications. 2 Lec/2 Lab.

**REC 712. Mgmt of Therapeutic Rec Serv. (3 Credits)**

Management concepts applied to delivering therapeutic recreation services, and includes: documentation, activity analysis, assessment, liability, legislation and standards of practice.

**REC 712S. Mgmt of Rec Therapy Services. (3 Credits)**

I. Prerequisite: for majors only. Management concepts applied to delivering recreation therapy services, and includes: documentation, activity analysis, assessment, liability, legislation, and standards of practice. Includes 15 service learning hours.

**REC 716. Recrtn & Prk Interpretive Svcs. (3 Credits)**

The interpretation of natural, historical and cultural resources in recreation and park settings. Frequent agency visits and educational field seminars are components of this course.

**REC 720. Trends/Issues in Rec Therapy. (3 Credits)**

A. Professional issues and trends discussion on topics related to recreation therapy such as clinical practice, licensure, legislative and regulatory issues, curricular standardization, professional ethics and other relevant professional topics.

**REC 730. Park Management. (3 Credits)**

II. Park purposes and operations with an emphasis on natural resources and visitor management. Concentration on design, resource conservation and preservation, public relations, park policies.

**REC 790. Special Topics:\_\_\_\_\_ (1-3 Credits)**

A. Identification and study of specialized techniques in recreation leadership, activities skills, operational methods, and services. May be retaken under different subtitle.

**REC 800. Literature Analysis in Rec. (1 Credit)**

I. Individualized study of recreation and park administration designed for students entering the graduate program without a degree in recreation, parks, or tourism. It is recommended that this course be completed before taking classes in the graduate program. This course must be passed with at least a B grade.

**REC 801. Park, Rec & Tour Resrch Methds. (3 Credits)**

II. Emphasis will be on applied research methods in the field of parks, recreation, leisure and tourism. Prepares students to understand and identify appropriate data collection methods, sampling, questionnaire design, data analysis, and interpretation of research literature.

**REC 809. Advanced Study in Recreation. (3 Credits)**

A. Prerequisite: REC 801. Directed study of topics in recreation and leisure. An advanced study project and individual meetings with instructor are required. An advanced study proposal from must be approved prior to enrollment.

**REC 815. Internship. (1-3 Credits)**

A. Prerequisite: department chair approval. Supervised practical work experience in a clinical or administrative setting.

**REC 825. Phil of Recreation and Leisure. (3 Credits)**

I. Examination of recreation theory and practice from both research and empirical bases. Significance of leisure and recreation for the individual and society. Recreation's future in a changing cultural milieu.

**REC 830. Outdoor Rec. in America. (3 Credits)**

I. A study and analysis of outdoor recreation policy development and agency management. Includes the development of natural and historical interpretive services.

**REC 840. Admin Proc & Pract. (3 Credits)**

II. Principles and concepts of administration, in-depth investigation of budgeting, policy formulation, and legislative provisions.

**REC 850. Recreation & Tourism Marketing. (3 Credits)**

I, II. The purpose of this course is to provide the student with an in-depth understanding of marketing in the public and commercial recreation sectors, parks, and leisure services.

**REC 870. Rec Therapy Quality Assurance. (3 Credits)**

I, II. Examine the components of quality assurance and techniques for evaluation related to programs, management, and patient outcomes in therapeutic recreation settings.

**REC 871. Therapeutic Recreation Admin. (3 Credits)**

I, II. Understand the characteristics of management, administrative management, as related to human services in therapeutic recreation.

**REC 890. Independent Study in REC. (3 Credits)**

I, II, A. Student must have the independent study proposal form approved by the graduate program director and chair prior to enrollment. Student initiated directed study for the purpose of conducting research and examining issues in park, recreation, and leisure services. May be retaken up to six hours, provided the topics are different.

**REC 897. Thesis. (3-6 Credits)**

A. Designed for students preparing a thesis in partial fulfillment of the requirements for the master's degree program.

## Exercise and Sport Science, Master of Science with a Concentration in Exercise and Wellness (M.S.)

Dr. Heather Adams, Graduate Coordinator/Advisor  
www.ess.eku.edu (<http://www.ess.eku.edu>)  
(859) 622- 1898

## Admission Requirements

To be considered for admission, applicants must meet the general admission requirements of the Graduate School. Additional requirements established by the program are as follows:

1. Bachelor's degree in a related field
2. Minimum 2.5 undergraduate GPA
3. Two letters of reference uploaded directly to the ECU Graduate School application.

Applicants who do not meet the Graduate School's GPA requirement for admission must submit official GRE scores to be considered for Probationary Admission. Expected target scores on the GRE for Probationary Admission are 147 on the Verbal and Quantitative sections and an Analytical Writing score of 3.5.

Admission into the Master of Science degree program in Exercise and Sport Science requires demonstration of adequate undergraduate preparation in a field related to graduate study in Exercise and Sport Science. Adequate preparation may be demonstrated in one of two ways:

1. Completion of a baccalaureate degree program with a major or minor or equivalent in physical education/exercise sport science or similarly named major or related discipline. Transcripts serve as adequate documentation for admission.
2. Submission of a professional portfolio, which includes a combination of relevant academic and experiential preparation. Presentation of a professional portfolio of work experiences serves as documentation for admission consideration. Portfolio materials must document experiences and may include assessments by supervisors or other valid assessment reports.

**Note:** Students must submit relevant documents with their original application for admission to the Graduate School.

## Program Requirements

CIP Code: 31.0505

### Probation and Progress in the Program

If, in any semester of study, a student's graduate grade point average falls below 3.0 for all courses taken after admission to the program, the student will automatically be on academic probation. The student will be dismissed from the program following any second semester with a cumulative GPA below 3.0. A student in the program is allowed to earn no more than one "C" and no "D"s or "F"s in courses taken after admission to the program.

<b>Concentration Courses</b>		
<i>Required Courses</i>		
ESS 717	Bioenergetics of Performance and Sports Nutrition	3
ESS 812	Lifetime Fitness and Wellness	3
ESS 821	Physiological Bases of Phy Fit	3
<i>Supporting Course Requirements</i>		
Choose from 0-3 hours of the following: (non-thesis students must take three hours)		0-3
ESS 720	Advanced Strength and Conditio	
ESS 762	Adapted Physical Activity and Special Populations Programming	
ESS 775	Tests & Measurements	
ESS 790	Special Topics in Ex/Sport Sci	
ESS 822	Sociology of Sport	
700 and/or 800 Level course with prior departmental approval from non-ESS graduate departments		
<i>Exit Requirements</i>		
ESS 871	Internship: Exercise/Wellness	3-6
or ESS 897	Thesis	
Choose from one of the following:		0
GRD 888D	MS Exercise and Sport Science Project Oral Defense (non-thesis)	
GRD 887B	MS Exercise and Sport Science Written Comprehensive Exam (thesis students)	
<b>Total Hours</b>		<b>15-18</b>

A maximum of nine hours of 700 level course works is allowed.

## Comprehensive Examination

(GRD 887B MS Exercise and Sport Science Written Comprehensive Exam or GRD 888D MS Exercise and Sport Science Project Oral Defense)

Candidates in Exercise and Wellness will be required to successfully complete a project, with a summary and oral presentation for fulfillment of exit requirements.

**Note:** The comprehensive exam exit requirement for students who successfully complete ESS 897 Thesis the written comprehensive exam is waived. However, the student must enroll in GRD 887B MS Exercise and Sport Science Written Comprehensive Exam for exit requirement. The score of Satisfactory or Unsatisfactory will be assigned according to the thesis defense outcome.

## Sports Administration Capstone Course

Candidates in Sports Administration Concentration shall perform satisfactorily (B or higher grade) in ESS 896 Sports Administration Capstone.

# Recreation and Park Administration, Master of Science (M.S.)

## General Information

The Master of Science program provides a generalized study in recreation, parks, and tourism services management. The program prepares students for supervisory and management careers in therapeutic recreation, commercial recreation and tourism, natural resource management, and public and nonprofit recreation. Individuals with backgrounds in biology, business, physical education, sociology, and psychology frequently lead professional careers in recreation, parks, and leisure services.

## Admission Requirements

To be considered for admission, applicants must meet the general admission requirements of the Graduate School. Applicants who do not meet the Graduate School's GPA requirement for admission must submit official GRE scores to be considered for Probationary Admission. Expected target scores on the GRE for Probationary Admission are 143 on the Verbal and Quantitative sections.

An undergraduate major or minor in recreation, parks, or leisure is preferred. REC 350 Supervision of Recreation Personnel and REC 460 Advanced Leadership and Programming (or course equivalents) are undergraduate prerequisites for students not holding a BS degree in recreation, parks, or leisure services.

Courses open to graduate students require a minimum understanding of foundations in recreation and park administration, knowledge of facility operation, agency budgeting, and legal issues. Students with limited field experience may be required to complete a graduate practicum course.

## Program Requirements

Students wishing to sit for the National Therapeutic Recreation Certification Exam are required to take these 15 hrs. of Recreation courses. Therefore additional hrs. may be needed.

## Exit Requirements

- **Thesis** – A thesis is optional in this degree program.
- **Comprehensive Examination** – A comprehensive examination is required (GRD 887E MS Rec&Park Written Comp Exam).

## Department of Public Health and Clinical Sciences

Dr. Ismail El-Amouri, Chair

Dr. Heather Tudor, Associate Chair

Dr. Phyllis Bryden, MPH Director

www.mph.eku.edu (<http://www.mph.eku.edu/>)  
(859) 622-8316

The Department of Public Health and Clinical Sciences offers a Master of Public Health (MPH) Degree in one of two concentrations:

- Health Promotion\* - 100% online (<https://ekuonline.eku.edu/mph-health-promotion/>) (<https://ekuonline.eku.edu/mph-health-promotion/>) (Starting Fall 2023)
- Environmental/Occupational Health & Sustainability (EOHS) (Hybrid)

The MPH program is tailored to meet the needs of individuals working in or planning to work in a public health profession. Classes are offered on evenings, Saturdays, and online.\* A total of 42 semester hours are required to complete the program with 21 hours of MPH core requirements and 15 hours in the chosen concentration. Additional hours are completed in an Applied Practice Experience and Integrative Learning Experience. Full-time students can expect to complete the degree requirements in 2 to 3 years, depending on summer attendance.

\*Health Promotion concentration classes are 100% online

#### **VISION:**

We envision a healthy commonwealth and global community led by competent and committed public health practitioners.

#### **MISSION:**

The mission of the public health program is to prepare culturally competent, skilled public health practitioners that are engaged in community-focused service and public health scholarship, for the commonwealth and beyond.

#### **PROGRAM GOALS:**

- **Student Success:** Students will demonstrate professional competencies needed to effectively serve as public health practitioners.
- **Instruction Goal:** The program prepares competent public health professionals through high-impact pedagogy.
- **Community-focused Service Goal:** The program faculty and students will advance the health of the commonwealth through engagement in community and professional service.
- **Scholarship Goal:** The program faculty and students will engage in research and scholarship to grow the public health profession.

#### **VALUES:**

- *intellectual vitality*, which is characterized by knowledge, scholarly inquiry, creativity, critical thinking, and curiosity, all with a global perspective;
- *sense of community*, which is characterized by a supportive environment with strong relationships and a commitment to service, shared governance, collaboration, and unity of purpose;
- *cultural competency*, which is characterized by equitable opportunities and treatment, mutual respect, and the inclusion and celebration of diverse peoples and ideas;

- *stewardship of place*, by which the program enhances the intellectual capacity, economic vitality, environmental sustainability, and quality of life of the communities it serves;
- *accountability*, which is characterized by fiscal responsibility, operational transparency, and responsiveness to the needs of internal and external stakeholders; and
- *excellence*, which is achieved through integrity, continuous quality improvement, and a focused emphasis on the personal and professional growth of students, faculty, and staff.

## Master's

- Master of Public Health with a Concentration in Environmental/Occupational Health & Sustainability (M.P.H.) (p. 717)
- Master of Public Health with a Concentration in Health Promotion (M.P.H.) (p. 718)

## Certificates

- Industrial Hygiene, University Certificate (p. 717)

### **EHS 710. Radiological Health & Safety. (3 Credits)**

A. Provides the student with the principles of health effects from ionizing radiation, including radiation sources, detection, measurement, control, and safety devices. Student will be able to identify, evaluate and control radiation in the work environment; implement a radiation monitoring program; establish emergency plans for actions to be taken in event of radiological accident; develop risk assessment and communication program. Credit will not be awarded to students who have received credit for EHS 510.

### **EHS 730. Emerging and Re- Infect Diseases. (3 Credits)**

I, II. The student will acquire an understanding of the principles, biology, identification, evaluation, and control of vector borne diseases and other emerging/re-emerging diseases of public health concern.

### **EHS 839. Appl Learning in Env Hlth Sci. (0.5-6 Credits)**

A. Cross listed with EHS 863. Supervised and directed field experience at official agencies at any level of government (local, state or national) or with a private industry. The EHS field practice course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 863.

### **EHS 839A. Co-op in Environmental Health. (0.5-6 Credits)**

### **EHS 839B. Co-op in Environmental Health. (0.5-6 Credits)**

A. Cross listed with EHS 863. Supervised and directed field experience at official agencies at any level of government (local, state or national) or with a private industry. The EHS field practice course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 863.

### **EHS 839C. Co-op in Environmental Health. (0.5-6 Credits)**

A. Cross listed with EHS 863. Supervised and directed field experience at official agencies at any level of government (local, state or national) or with a private industry. The EHS field practice course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 863.

### **EHS 839D. Co-op in Environmental Health. (0.5-6 Credits)**

A. Cross listed with EHS 863. Supervised and directed field experience at official agencies at any level of government (local, state or national) or with a private industry. The EHS field practice course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 863.

**EHS 839E. Co-op in Environmental Health. (0.5-6 Credits)**

A. Cross listed with EHS 863. Supervised and directed field experience at official agencies at any level of government (local, state or national) or with a private industry. The EHS field practice course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 863.

**EHS 839F. Appl Learning in Env Hlth Sci. (0.5-6 Credits)**

A. Cross listed with EHS 863. Supervised and directed field experience at official agencies at any level of government (local, state or national) or with a private industry. The EHS field practice course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 863.

**EHS 840. Total Worker Health. (3 Credits)**

A. A study of the impact of the work place on worker's health and the control of causative factors of disease.

**EHS 841. Occ Health Exposure Assessment. (3 Credits)**

A. Identify primary sources of potential chemical, physical and biological agents, identify techniques for assessing the risk of worker exposures and understand health impacts of occupational exposures to workers. (KYU and WEB course).

**EHS 855. Global Envir Crisis Management. (3 Credits)**

A. This course will provide students with environmental health principles required to protect the global environmental health of a community in times of emergency/disaster.

**EHS 860. Air Quality Assessment. (3 Credits)**

A. A study of health impacts of air pollution from both outdoor and indoor sources. The course will also provide information about methods of reduction, control, and elimination of air pollution.

**EHS 863. Field Experience in Env. Hea. (1-6 Credits)**

A. Cross listed with EHS 839. Supervised and directed field experience at official agencies at any level of government (state, local or national) or with private industry. The course administrator must approve all field-training sites before selection or assignment. Credit will not be awarded to students who have credit for EHS 839.

**EHS 865. Environmental Toxicology. (3 Credits)**

A. Toxicology, the principles, concepts and thinking that are its foundation. The mechanisms by which the substances enter the cells of the body, the physiological processes, the target organs, classes of toxic substances, and potential exposures.

**EHS 875. Principles of Ventilation. (3 Credits)**

A. Provides the student with the principles of ventilation including: design of fans, cleaners duct sizing: calculations, inspections, balancing the system, and overall maintenance. This course deals with use of ventilation to reduce or eliminate occupational exposures in the workplace.

**EHS 880. Food/Waterborne Sanitation. (3 Credits)**

A. The management of safety and disease hazards inherent in administering community programs of food hygiene, water supply, and wastewater treatment.

**EHS 885. Crisis Mgmt, Risk Com/Asmt. (3 Credits)**

A. Provides the student with the principles of Crisis Management and Risk Communication/Assessment by becoming familiar with laws that mandate risk communication, types, and approaches to risk communication, effective risk communication, importance of crisis management/communication, process of hazard risk assessment, and benefits of development and implementation of an emergency response program.

**EHS 890. Grad Project in Envrnmntl Hlth. (1-3 Credits)**

A. Research into a special topic in Environmental Health. Student must have approval of course faculty.

**HEA 790. Health Education:\_\_\_\_\_ (1-3 Credits)**

A. Study of pertinent problems in health and health education. Includes topics such as: health care delivery, child abuse, teenage pregnancy, community health organizations, elementary school health curriculum, drug education, school and health services, health deviations among students, sexually transmitted diseases, etc. May be retaken once with advisor approval provided subtitle is different.

**HEA 791. Women's Health. (3 Credits)**

A. Analysis of the major health problems of contemporary women with special emphasis on health promotion, disease prevention, and consumer health concerns.

**HEA 792. Human Sexuality. (3 Credits)**

A. Study of the biological, social, and psychological aspects of human sexuality. Directed primarily toward those individuals in situations, which require them to assist others in understanding the broad impact of one's sexuality. Emphasis is placed upon student development of logical and reasoned justifications for their own value system.

**HEA 793. Death and Grief. (3 Credits)**

A. A study of attitudes, behaviors, and issues concerning death and grief. Topics include responses to death and grief throughout the life cycle; process of grief and bereavement; theology and death; legal aspects of dying; care of the dying; suicide; post-mortem care; death education.

**HEA 794. Substance Use Prevention Skill. (3 Credits)**

I,II, A. Prerequisite: Junior or senior standing. A substance use prevention approach using a strategic prevention framework to develop the knowledge and skills needed to plan, implement, and evaluate effective, data-driven programs and practices that reduce behavioral health disparities and improve wellness.

**HEA 800. Advanced Health Science. (3 Credits)**

A. Provides students an opportunity to broaden their knowledge of the latest scientific facts and sources of information related to selected health concerns including disease, nutrition, fitness, drug use, family living, and emotional health.

**HEA 804. Drug Abuse & Dependency. (3 Credits)**

I, II. Study of the nature and progression of chemical abuse and dependency and effects on the individual, family, and society. Includes study of strategies for prevention, intervention, and treatment.

**HEA 805. Public Health Communication. (3 Credits)**

(3) A. Prerequisite: MPH 810 with a minimum grade of "C". This course prepares students to develop and evaluate health messages for advocacy, program planning, and health campaigns through the lens of cultural competency including interpersonal, organizational, and mass communication approaches.

**HEA 807. Health:\_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: advisor/departmental approval. Independent work, special topics, or seminars. May be retaken under different subtitles. Topics include first aid and safety for teachers, lifestyle and mental health, and health education for elementary teachers.

**HEA 820. Global Health. (3 Credits)**

II. Overview of the relationship between epidemiological, economic, political, sociological and cultural factors that impact global health. Special emphasis is on methods of prevention/intervention utilized in coping with health problems on an international level.

**HEA 825. Planning & Eval of Hlth Prgms. (3 Credits)**

II. The focus of this course is on the process of assessing a community and on strategies for planning, implementing, and evaluating health promotion programs in a variety of settings.

**HEA 826. Public Health Program Evaluati. (3 Credits)**

(3) A. Prerequisite: MPH 825 or HEA 825 with a minimum grade of "C". The focus of this course is on methods and techniques to evaluate public health policies and programs.

**HEA 856. Applied Epidemiology. (3 Credits)**

A. Prerequisites: HEA 830 and HEA 855 or departmental approval. An applied epidemiology course with emphasis on field investigations, public health surveillance, surveys and sampling, use of computers in epidemiology descriptive epidemiology, designing studies, analysis, interpretation and communication of data, and intervention/control measures.

**HEA 880. Scholarship in Cmmnty Health. (1-3 Credits)**

A. Applied scholarship experience demonstrating synthesis and integration of advanced knowledge and skills in Community Health. Student must have approval of department prior to enrollment.

**HEA 890. Practicum in Community Health. (3-6 Credits)**

A. Student will be placed in a supervised work environment in community health.

**HEA 895. Public Health Capstone Seminar. (3 Credits)**

II. Integration and application of competencies acquired through the MPH program to problems likely to be encountered in public health practice. Current challenges, money, politics, and public health ethics, as they impact the profession, are addressed.

**HEA 897. Thesis. (3-6 Credits)**

A.

**HEA 899. Practicum in Community Health. (3-6 Credits)**

A. Student will be placed in a supervised work environment in community health.

## Industrial Hygiene, University Certificate

### General Information

The College of Health Sciences through the Master of Public Health in Environmental/Occupational Health & Sustainability offers a Master's level University Certificate in Industrial Hygiene. The Certificate program is designed for both degree-seeking and Certificate-seeking students. The number of credit hours required for completion is 18 hours of which 6 hours can be used as electives in the MPH Environmental/Occupational Health & Sustainability.

### Admission Requirements

Minimum requirements for admission include:

1. Admission to the Graduate School. A Bachelor of Science degree from a nationally-accredited program
2. A minimum of 12 hours of biology and/or chemistry

### Program Requirements

CIP 51.2206

Code	Title	Hours
<b>Certificate Requirements</b>		
EHS 710	Radiological Health & Safety	3
EHS 840	Total Worker Health	3
EHS 841	Occ Health Exposure Assessment	3
EHS 865	Environmental Toxicology	3
EHS 875	Principles of Ventilation	3
EHS 885	Crisis Mgmt, Risk Com/Asmt	3
<b>Total Hours</b>		<b>18</b>

## Master of Public Health with a Concentration in Environmental/Occupational Health & Sustainability (M.P.H.)

Dr. Phyllis Bryden, MPH Director  
www.mph.eku.edu (<http://www.mph.eku.edu>)  
859-622-1145

Dr. Gary Brown, Graduate Coordinator/Advisor  
859-622-8316

### General Information

The College of Health Sciences at Eastern Kentucky University offers a Master of Public Health (MPH) degree with concentrations in Health Promotion, and Environmental/Occupational Health & Sustainability. The program is tailored to meet the needs of individuals working in or planning to work in a public health profession.

### Mission

The mission of the public health programs is to prepare culturally competent, skilled public health practitioners that are engaged in community-focused service and public health scholarship, for the commonwealth and beyond.

### Program Goal

To achieve its mission, the MPH Program prepares professionals for broad-based practice in public health, grounded in foundational public health knowledge and foundational competencies with specialized knowledge, and expertise in a selected public health discipline.

### Education Objectives

Students who complete the MPH degree will be able to:

1. Contribute to the public health profession through sound professional public health attitudes, values, concepts and ethical practices.
2. Recognize and facilitate diversity of thought, culture, gender, and ethnicity through inclusiveness, communication and collaboration.
3. Participate in professional development, scholarship, service, and interdisciplinary educational activities that contribute to public health.
4. Integrate and apply knowledge and skills (competencies) within the traditional core public health areas of knowledge (behavioral sciences, biostatistics, epidemiology, environmental health science, and public health administration) as well as crosscutting and emerging public health areas.

5. Demonstrate advanced knowledge and skills necessary for specialized roles within public health specific to health promotion and environmental occupational health and sustainability.

## Admission Requirements

Clear admission to the MPH program requires a baccalaureate degree from an accredited institution. Applicants with a cumulative undergraduate grade point average (GPA) of 3.0 or higher – or – 3.25 in their last 60 hours of undergraduate work meet the minimum requirements for eligibility for full-admission consideration. Applicants with a cumulative undergraduate degree GPA of 2.5 or higher, but do not meet the requirements for full-admission consideration, are eligible for provisional admission consideration. Students with provisional admission based upon GPA must maintain a cumulative graduate GPA of 3.0 or higher for their first two academic terms. A TOEFL score of at least 550 for paper based, 79 for internet based, or 213 computerized, is required for international applicants. Satisfying the minimum entrance requirements does not guarantee admission.

## To Apply

Submit all application materials online to the Graduate School at [www.gradschool.eku.edu/apply](http://www.gradschool.eku.edu/apply) (<http://www.gradschool.eku.edu/apply/>):

- Graduate School application and fee;
- Official transcripts;
- TOEFL score;
- Statement of personal and professional objectives (1 1/2 to 2 pages); and
- List of 3 professional or academic references with current contact information

For application deadlines visit: <https://gradschool.eku.edu/graduate-application-deadlines> (<https://gradschool.eku.edu/graduate-application-deadlines/>)

## Academic Background Expectations for MPH Concentrations

So that timely progress toward the degree can be achieved, the following undergraduate pre-requisite courses are expected to be completed prior to active participation in the program.

Environmental/Occupational Health and Sustainability: At least 1 physical science, 2 chemistry with lab, 2 biology with lab, college algebra, and 1 microbiology course at the undergraduate level.

## Program Requirements

 (859) 622-1941  
 Rowlett 220

The programs in the School of Nursing include Associate of Applied Science in Nursing, Bachelor of Science in Nursing, Master of Science in Nursing and Doctor of Nursing Practice.

The mission of the School of Nursing is to educate nurses at the Associate, Baccalaureate, Masters and Doctorate levels who work in interprofessional environments to promote health and well-being for diverse populations across the Commonwealth, country and world.

## Doctoral

- Doctor of Nursing Practice (D.N.P) (p. 722)

## Master's

- Master of Science in Nursing with a Concentration in Rural Health Family Nurse Practitioner (M.S.N.) (p. 723)
- Master of Science in Nursing with a Concentration in Rural Psychiatric Mental Health Nurse Practitioner (M.S.N.) (p. 724)

## Post-Graduate Certificate

- Family Nurse Practitioner, Post-Graduate University Certificate (p. 723)
- Psychiatric Mental Health Nurse Practitioner, Post-Graduate University Certificate (p. 725)

## Courses

### NSC 700. Early Childhood Health Care. (3 Credits)

A. Prerequisite: education major or permission of instructor. Focuses on the development of competencies necessary for health management of young children (ages birth to five years) with special health care needs. Appropriate for non-health care professionals in the community or classroom.

### NSC 800. Advanced Practice Role. (1-9 Credits)

A. Advanced practice role clinical experience. Students will retake for the minimum number of hours required for their specialty concentration.

### NSC 802. Population-Focused Practice. (1-6 Credits)

A. Clinical experience for graduate nursing administration students to demonstrate population focused nursing leadership competencies. Students will retake for the minimum number of credit hours required for the specialty option.

### NSC 830. Advanced Pharmacology. (3 Credits)

A. Prerequisite: admission to MSN program or department approval. Application of pharmacotherapeutic principles to the treatment and management of conditions across the life span.

### NSC 832. Advanced Health Assessment. (3 Credits)

A. Prerequisite: admission to MSN program or department approval. Emphasis is on the advanced skills necessary for Advanced Practice nursing in assessing the health status of clients from across the life span. Diagnostic reasoning and systems approach will be emphasized.

### NSC 834. Advanced Pathophysiology. (3 Credits)

A. Prerequisite: admission to the MSN program or department approval. Application of advanced pathophysiology to the diagnosis and treatment of conditions across the life span.

### NSC 836. Rural Public Health Nursing I. (2 Credits)

A. Prerequisite: admission to the MSN program. Corequisite: NSC 802. An analysis of the core concepts of advanced public health nursing with an emphasis on rural public health needs, health care systems, and the role of the nurse.

### NSC 837. Three P's- Public Hlth Nursing. (3 Credits)

(3) A. Prerequisite: Admission to the MSN program, HEA 855, NSC 850. Explore the relevance and benefit of epidemiology in the field of organizational healthcare management, including a focus on population outcomes and the 3 P's: Prevalence of disease, Prevention of adverse events, and Preparedness for emergencies.

### NSC 838. Topics for Advanced Practice. (1-6 Credits)

A. Selected topics will be offered as appropriate for enhancement of advanced practice nursing role. May be retaken under different topics for a maximum of six credit hours. A. Selected topics will be offered as appropriate for enhancement of advanced practice nursing role. May be retaken under different topics for a maximum of six credit hours.

### NSC 840. Theoretical Foundation for EBC. (3 Credits)

A. Prerequisite: admission to the MSN program or department approval. Provides a basic understanding of the process of theory construction and an appreciation of the role that theory plays in providing a scientific basis for nursing.

### NSC 842. Advanced Nsg. Practice Issues. (3 Credits)

A. Prerequisite: admission to the MSN program or department approval. Analysis of professional issues and strategies, which can facilitate the development of the nursing profession. Consideration of selected variables influencing the development and resolution of issues.

### NSC 850. Assessment and Collaboration. (3 Credits)

(3) A. Prerequisite or Corequisite: HEA 855 with a minimum grade of B. Analyze Advanced Nursing concepts of assessment and dimensions of practice related to population-focused health care within communities and systems.

### NSC 852. Program and Policy Development. (3 Credits)

(3) A. Prerequisite: NSC 850 with a minimum grade of "B"; Corequisite: Analysis of the core concepts and competencies of advanced nursing Administration with an emphasis on program and policy development and quality improvement initiatives for population-focused health.

### NSC 854. Management of Health Care. (3 Credits)

A. Prerequisite: admission to MSN program. Theoretical basis for the advanced nurse's role in management of health care in rural settings. Strategies for the improvement of health care in rural settings will be analyzed.

### NSC 856. Nursing Resource Management. (3 Credits)

(3) A. Prerequisite: Admission to MSN program. Overview of nursing resource management for the nurse leader to promote a fiscally responsible health care environment.

### NSC 858. Nursing System Quality Mgmt. (3 Credits)

(3) A. Prerequisite: Admission to MSN program. Explore and analyze the role of the nurse leader as it relates to quality management and safety for system effectiveness and healthcare outcomes.

### NSC 860. Nursing AdminPracticum. (3 Credits)

(3) A. Prerequisite: NSC 854, 856 and 858 with a minimum grade of B. A synthesis of leadership, management, and public health nursing theory applied to the role of the nurse leader in the administration of health systems. Includes problem resolution and analysis of alternative approaches.

**NSC 862. Nursing Admin Internship. (3 Credits)**

A. Prerequisite: NSC 850 and 852, each with a minimum grade of "B" and two hours of NSC 802. Internship allows the student to apply advanced knowledge and skills in implementing the role of a nurse leader in administration of population-focused health to improve health outcomes.

**NSC 870. Rural Health FNP I. (3 Credits)**

A. Prerequisite: NSC 830, NSC 832, NSC 834, and NSC 840, each with a grade of B or better. Course provides theoretical and diagnostic knowledge necessary to confront problems relevant to the health care of individuals across the life span. Emphasis on health promotion, disease prevention and management of common health problems.

**NSC 872. Rural Health FNP II. (3 Credits)**

A. Prerequisites: NSC 870 with a minimum grade of B. Corequisite: Theoretical and diagnostic knowledge necessary to confront problems relevant to the health care of individuals across the life span. Emphasis on health promotion, disease prevention, and management of common health problems. Builds on NSC 870.

**NSC 874. Rural Health FNP III. (3 Credits)**

A. Prerequisite: NSC 872 with a minimum grade of B. Corequisite: NSC 800. Theoretical and diagnostic knowledge necessary to confront problems relevant to the health care of individuals across the life span. Emphasis on health promotion, disease prevention and management of common health problems. Builds on NSC 872.

**NSC 876. Rural Health FNP Internship. (6 Credits)**

A. Prerequisite: NSC 870, NSC 872, NSC 874, each with a minimum grade of "B", and eight hours of NSC 800. Prerequisite /Co requisite: NSC 842, with a minimum grade of "B". Course allows synthesis of theoretical and diagnostic knowledge in a concentrated rural primary care practicum. Emphasis on health promotion, disease prevention and management of common health problems in individuals and families across the lifespan.

**NSC 880. Rural PMHNP I. (3 Credits)**

A. Prerequisite: NSC 830, NSC 832, NSC 834, and NSC 840, each with a minimum grade of B. Corequisite: NSC 881. Theoretical and diagnostic knowledge necessary to diagnose and treat psychiatric disorders across the life span. Competencies in working with individuals are developed.

**NSC 881. Applied Psychopharmacology. (3 Credits)**

A. Prerequisite: NSC 830, NSC 832, and NSC 834, each with a minimum grade of B. Corequisite: NSC 880. Applies theoretical and diagnostic knowledge related to prescribing psychopharmacological treatment of psychiatric disorders across the life span.

**NSC 882. Rural PMHNP II. (3 Credits)**

A. Prerequisite: NSC 880 and 881, each with a minimum grade of B. Corequisite: NSC 800. Theoretical and diagnostic knowledge necessary to diagnose and treat psychiatric disorders across the life span. Competencies in working with families are developed.

**NSC 883. Rural PMHNP Child Adolescent. (3 Credits)**

A. Prerequisite: NSC 830, NSC 832, NSC 834 & NSC 881. Current Certification as an Adult PMHNP/CS. Applies theoretical and diagnostic knowledge related to treatment of psychiatric disorders in children and adolescents.

**NSC 884. Rural PMHNP III. (3 Credits)**

A. Prerequisite: NSC 882 with a minimum grade of "B". Theoretical and diagnostic knowledge necessary to diagnose and treat psychiatric orders across the life span. Group skills, community resources, and the context of professional practice are examined.

**NSC 886. Rural PMHNP Internship. (5 Credits)**

A. Prerequisite: NSC 884 with a minimum grade of "B" and seven hours of NSC 800. Prerequisite/Co requisite: NSC 842, with a minimum grade of B. Synthesis of theoretical and diagnostic knowledge to promote mental health and maintain mental health across the life span. Systematically examines opportunities for improving PMHNP practice.

**NSC 890. Synthesizing Evidence for ANP. (3 Credits)**

A. Prerequisite: NSC 840, with a minimum grade of "B". Critical appraisal and synthesis of nursing and inter-professional research as a foundation for evidence-based advanced nursing practice in diverse populations.

**NSC 892. Evidence-based Proj in ANP. (3 Credits)**

A. Prerequisite: NSC 890, with a minimum grade of B. Implementation of an evidence-based project to improve health or healthcare delivery for diverse populations.

**NSC 895. Independent Study in Nursing. (1-6 Credits)**

A. May be retaken under different subtopics to a cumulative maximum of six hours. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**NSC 900. Organizational Leadership: DNP Experience I. (1-3 Credits)**

A. Prerequisite: Admission to DNP program. Explore issues pertinent to role transition and role assimilation for the DNP graduate.

**NSC 901. Organizational Leadership: DNP Experience II. (1-3 Credits)**

A. Prerequisite: NSC 990. Provides an opportunity for synthesis of evidence-based theoretical concepts to incorporate into practice.

**NSC 905. Analytical Methods for EBP. (3 Credits)**

A. Prerequisite: Admission to DNP Program. Description and analysis of quantitative data using statistical and graphical methods for purposes of evidence-based practice.

**NSC 938. Special Topics for DNP. (1-6 Credits)**

A. Prerequisite: Admissions to DNP Program. Selected topics will be offered as appropriate for enhancement of advanced nursing role. May be retaken under different topics for a maximum of six credit hours.

**NSC 940. Theoretical Appl for DNP. (3 Credits)**

A. Prerequisite: Admissions to DNP Program. Theoretical perspectives, integration of nursing science, and the interrelationships among theory, research, and evidence-based nursing practice will be explored, emphasizing strategies for knowledge and theory development, evaluation, and application.

**NSC 942. Healthcare Deliv. Informatics. (3 Credits)**

A. Prerequisite: Admission to DNP Program. Focuses on theoretical basis of information systems in healthcare, impact of informatics on clinical practice and administrative decision-making, and strategies to evaluate and improve use of information technology in health care.

**NSC 950. Health Policy. (3 Credits)**

A. Prerequisite: Admission to DNP Program. Analysis of the policy process in order to develop advanced nursing leadership skills for designing, implementing, and evaluating health policy.

**NSC 954. Organizational Leadership. (3 Credits)**

A. Prerequisite: Admission to DNP Program. Explores theoretical foundations of leadership with an organization systems perspective. Examine principles of organizational systems, quality improvement, dimensions of healthcare/ organizations, and human resource management.

**NSC 960. Mngmnt of Health Care Resource. (3 Credits)**

(4) A. Prerequisite: Admission to the DNP program. Examines healthcare resources and their relationship to clinical practice, to solve problems/issues pertaining to healthcare delivery. Students are expected to have a basic understanding of economic and financial concepts utilized to examine these issues.

**NSC 990. Synthesizing Evidence for DNP. (3 Credits)**

A. Prerequisite: NSC 905 and NSC 942, each with a minimum grade of "B". Translate scientific nursing knowledge into complex interventions to improve practice and health outcomes.

**NSC 992. Implementation Methods for DNP. (3 Credits)**

A. Prerequisite: NSC 990 with a minimum grade of "B". Translate scientific multi-disciplinary knowledge into complex interventions to improve practice and health outcomes in the development of a proposal to enhance evidence-based practice.

**NSC 994. DNP Project. (3-9 Credits)**

A. Prerequisite: NSC 992, with a minimum grade of "B". Translate a body of evidence-based research in the implementation of a project to improve practice and health outcomes.

**NSC 995. Independent Study in Nursing. (1-6 Credits)**

A. Prerequisite: Admission to DNP Program. May be retaken under different subtopics to a cumulative maximum of six hours. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

## Doctor of Nursing Practice (D.N.P)

### General Information

The School of Nursing offers the Doctor of Nursing Practice (DNP) program. The DNP program is designed to allow nurses who possess a graduate degree in nursing to prepare for the highest level of nursing practice.

### Program Outcomes

1. Develop, evaluate, translate, and integrate theory-based nursing and interdisciplinary knowledge in new practice approaches to enhance health and health care delivery.
2. Create and evaluate principles of organizational and systems theory to provide leadership in improving health outcomes and promoting excellence in practice.
3. Utilize analytic methods, information technology, and research methods to critically appraise evidence-based practice data to evaluate outcomes of practice, practice patterns, and health systems against national benchmarks, to improve health care outcomes.
4. Assimilate and process aggregate data, using information systems, informatics and technology, as well as evaluation and assessment tools, current research and outcome data, to translate this knowledge to improve or transform patient and health care systems.
5. Actively influence health policy that addresses health disparity, access, quality, and financing at institutional, local, state, federal, and international levels.
6. Employ effective communication and interprofessional collaboration to design, implement, and evaluate individual and system level interventions, to improve health and create change in health care delivery systems.
7. Implement clinical prevention and population health activities to improve the health of individuals and populations.

## Admission Requirements

Minimum requirements for admission to the Doctor of Nursing Practice (DNP) program include

1. a master's degree in nursing (MSN) from a nationally accredited program,
2. unencumbered Registered Nurse (RN) license from an approved state,
3. a graduate GPA of at least 3.0 (4.0 scale).

Admission is competitive and limited to available space. In addition to the Graduate School application, applicants must also submit to the School of Nursing a separate completed DNP application form, a resume or curriculum vitae, a professional statement (750 words), and 3 professional references. As a limited number of applicants are accepted for admission, selection will be based on careful consideration of all information included in the admission application packet and the degree to which each candidate meets the requirements. Complete applications, which include all requested information, are given priority in the selection process. In order to be competitive, all material and documentation must be submitted by the deadline.

Please refer to the School of Nursing website at [nursing.eku.edu/doctor-nursing-practice](http://nursing.eku.edu/doctor-nursing-practice) (<http://nursing.eku.edu/doctor-nursing-practice/>) for specific information on the application process for admission and progression plans for study, or contact the department at (859) 622-7927 for information on the application process for admission.

### Progression Policy

To progress, students must complete all required course work with a grade of "B" or higher and must complete any pre-requisite courses before advancing to the next course. Students who fail to meet the requirements for progression must apply for readmission. Readmission to a nursing course is not guaranteed to any student. Please refer to the Student Handbook for specific information on readmission procedures. The program reserves the right to alter the suggested plan as necessary to enhance a quality educational program.

## Program Requirements

CIP Code: 51.3818

Code	Title	Hours
<b>DNP Core Courses</b>		
NSC 905	Analytical Methods for EBP	3
NSC 940	Theoretical Appl for DNP	3
NSC 942	Healthcare Deliv. Informatics	3
NSC 950	Health Policy	3
NSC 954	Organizational Leadership	3
NSC 960	Mngmnt of Health Care Resource	3
NSC 990	Synthesizing Evidence for DNP	3
NSC 992	Implementation Methods for DNP	3
<b>Organizational Leadership</b>		
NSC 900	Organizational Leadership: DNP Experience I	1-3
NSC 901	Organizational Leadership: DNP Experience II	1-2
NSC 994	DNP Project	6-9
<b>Total Hours</b>		<b>32-38</b>

Required hours will be individually evaluated on a planned program of study for each student, depending on academic background and career goals.

## Exit Requirements

DNP Project (NSC 994 DNP Project) – Candidates are required to satisfactorily complete and present a DNP project before they are eligible to graduate from the program. Students must have documentation of a minimum of 1,000 total clinical hours completed beyond the BSN. Hours required to be completed at EKU will be assessed upon admission to the DNP Program and a plan of study developed accordingly.

## Family Nurse Practitioner, Post-Graduate University Certificate

### General Information

The School of Nursing offers Post-Graduate Certificates in Rural Family Nurse Practitioner and Rural Psychiatric Mental Health Nurse Practitioner, for nurses who have completed a Master of Science in Nursing (MSN) degree or higher and who wish to obtain a second nursing specialty. The number of credit hours required for completion varies by specialty. All MSN policies apply to the Post-Graduate Certificate students.

### Program Outcomes

1. Demonstrate the synthesis of expert knowledge for advanced nursing practice in diverse populations.
2. Evaluate nursing and interprofessional theory and evidence-based practice for their contributions to advanced nursing practice and professional role development.
3. Provide leadership in the appraisal and improvement of healthcare and healthcare delivery.
4. Use systematic methods to design, implement, and evaluate evidence-based advanced nursing practice.
5. Participate in organizational and political systems to influence healthcare and healthcare delivery.
6. Communicate, collaborate, and consult with clients, nurses, and other professionals to meet healthcare needs of individuals and populations.
7. Actively demonstrate the advanced nursing practice role.
8. Integrate ethical and legal principles in advanced nursing practice.

### Admission Requirements

Minimum requirements for admission to the program include:

1. Admission to the Graduate School.
2. A Master of Science in Nursing (MSN) or Doctor of Nursing Practice (DNP) degree from a nationally-accredited program.
3. Unencumbered Registered Nurse (RN) license from an approved state.

Admission is competitive and limited to available space. In addition to the above criteria, consideration is also given to the student's Professional Statement submitted with the Graduate School application and the three required professional references.

Please refer to the School of Nursing website at <https://nursing.eku.edu/masters-degree-programs>

programs/) for specific information on the application process for admission and progression plans for study, or contact the School of Nursing at (859) 622-1827 for information on the application process for admission.

### Progression Policy

To progress, students must complete all required course work with a grade of "B" or higher and must complete any pre-requisite courses before advancing to the next course. Students who fail to meet the requirements for progression must apply for readmission. Readmission to a nursing course is not guaranteed to any student. Please refer to the Student Handbook for specific information on readmission procedures. The program reserves the right to alter the suggested plan as necessary to enhance a quality educational program.

## Master of Science in Nursing with a Concentration in Rural Health Family Nurse Practitioner (M.S.N.)

### General Information

The School of Nursing offers the Master of Science in Nursing (MSN) degree. The program is designed to allow nurses with a baccalaureate degree to prepare for rural health advanced practice roles. MSN degree concentrations available include Rural Health Family Nurse Practitioner and Rural Psychiatric Mental Health Nurse Practitioner. Graduates of the MSN program will have specific competencies related to rural health nursing practice either as a Rural Health Family Nurse Practitioner or as a Rural Psychiatric Mental Health Nurse Practitioner.

### Program Outcomes

1. Demonstrate the synthesis of expert knowledge for advanced nursing practice in diverse populations.
2. Evaluate nursing and interprofessional theory and evidence-based practice for their contributions to advanced nursing practice and professional role development.

3. Provide leadership in the appraisal and improvement of healthcare and healthcare delivery.
4. Use systematic methods to design, implement, and evaluate evidence-based advanced nursing practice.
5. Participate in organizational and political systems to influence healthcare and healthcare delivery.
6. Communicate, collaborate, and consult with clients, nurses, and other professionals to meet healthcare needs of individuals and populations.
7. Actively demonstrate the advanced nursing practice role.
8. Integrate ethical and legal principles in advanced nursing practice.

## Admission Requirements

In addition to meeting the requirements of the Graduate School, the minimum requirements for admission to the program include

1. a baccalaureate degree in nursing from a nationally accredited program,
2. RN license from an approved state,
3. an undergraduate GPA of at least 3.0 (4.0 scale) cumulative,
4. a three hour graduate or undergraduate course in statistics with a grade of "C" or higher.

Admission is competitive and limited to available space. In addition to the above criteria, consideration is also given to the applicant's professional work experience, the applicant's professional statement, and the three required professional references submitted with the Graduate School application.

Please refer to the School of Nursing website at <https://nursing.eku.edu/masters-degree-programs> for specific information on the application process for admission and progression plans for study. For the Rural Health Family Nurse Practitioner Concentration contact 859-622-6458. For the Rural Psychiatric Mental Health Nurse Practitioner Concentration contact 859-622-7927.

## Progression Policy

To progress, students must complete all required course work with a grade of "B" or higher and must complete any prerequisite courses before advancing to the next course. Students who fail to meet the requirements for progression must apply for readmission. Readmission to a nursing course is not guaranteed to any student. ## Courses

### Criminal Justice Policy and Leadership

#### CPL 802. Violence Against Women. (3 Credits)

A. This course provides students with a human right framework and cross-cultural understanding of violence against women, and efforts across societies to translate international knowledge into local justice for gender-based violence and female victims. Credit will not be awarded to students who have credit for CRJ 802.

#### CPL 808. Anlys of Cor and Juv Just data. (3 Credits)

A. Formerly COR 808. Prerequisites: undergraduate research methods and undergraduate statistics or departmental approval. This course examines techniques for analyzing data in corrections and juvenile justice. Emphasis is placed on analysis and interpretation of data using univariate, bivariate, and multivariate techniques.

#### CPL 809. Pro/Policy Eval and Analysis. (3 Credits)

A. Formerly JPL 809. Qualitative/quantitative concepts and procedures to manage, understand, and effectively consume program evaluation and statistically based-research. Reading, understanding, accurately interpreting evaluation-based research journals and governmentally produced research emphasized.

#### CPL 810. Criminological Theory for Policy & Leadership. (3 Credits)

A. Formerly JPL 810. Presents and critiques explanations of crime, delinquency, and criminalization processes with emphasis on application of explanations to criminal/juvenile justice policy/leadership issues. Credit will not be awarded for students who have credit for JPL 810.

**CPL 812. Lead w Pol, Eth, and Emo Intel. (3 Credits)**

A. Formerly JPL 812. This course examines leadership within the justice field, focusing on three competencies essential for effective, just leadership: political, ethical, and emotional intelligence. Understanding mindset/tactics associated with administrators that do/don't lead with these competencies. Credit will not be awarded to students who have credit for JPL 812.

**CPL 814. Policing and Society. (3 Credits)**

A. Theoretical, historical and comparative perspectives on policing. Critical analysis of the function of police in modern society. Credit will not be awarded to students who have credit for CRJ 814.

**CPL 818. Rsrch Mthds Jstc Ply and Ldrs. (3 Credits)**

A. Formerly JPL 818. This course examines strategies/issues relevant to the collection and analysis of quantitative and qualitative data for criminal justice research. Special attention will be paid to the methodology most relevant to agency administration. Credit will not be awarded to students who have credit for JPL 818.

**CPL 820. Issues in Juv Instit/Com Cor. (3 Credits)**

A. Formerly JPL 820. Examines trends/issues central to understanding contemporary juvenile corrections/crime; correctional trends; historical development; use/effectiveness of various interventions (prevention, pre/post adjudicatory responses to juvenile offenders).

**CPL 823. Topics: Just Policy and Lead. (3 Credits)**

A. Formerly JPL 823. This is a variable topic seminar meant to provide in-depth, critical analyses of contemporary issues in adult corrections or juvenile justice, or police policy. The course may be retaken to a maximum of six hours on different topics.

**CPL 825. Illicit Offender Networks. (3 Credits)**

A. Formerly JPL 825. Examines structure/functions of inmate exchange networks. Discussion on markets for illicit goods, services; interpersonal, collective, sexual violence; staff complicity in illegal activities. Explore social/institutional factors impacting inmate exchange networks.

**CPL 826. Intr Response to Juv Adult Off. (3 Credits)**

A. Formerly JPL 826. Examination of adult and juvenile systems of punishment, traditional and non-traditional, of various nations. Explore critical issues/trends from several perspectives to develop deeper understanding of prison and alternatives in the US and world.

**CPL 827. Corrections & Crime Mythology. (3 Credits)**

A. Formerly JPL 827. Interrelatedness of social construction of issues in corrections, prisons, crime in popular/media culture with empirical realities of these issues. Examination of social and symbolic construction through analysis of film, literature, popular culture, academic literature.

**CPL 828. MH/Sub Abuse Issues in Cor Stg. (3 Credits)**

A. Formerly JPL 828. Explores prevalence, diagnosis, best practices for treatment of mental illness/substance abuse disorders; pressing issues facing the criminal justice system in the correctional population.

**CPL 830. Understanding Corr/Juv Just In. (3 Credits)**

A. Formerly JPL 830. Situates issues facing correctional organizations in historical, political, economic, cultural contexts. Emphasizes applying theory and critical thinking to address problems/issues/trends facing leaders in corrections and juvenile justice.

**CPL 835. Adv Jus Admin and Leadership. (3 Credits)**

A. Formerly JPL 835. An examination of theoretical bases and contemporary approaches to justice organizations, administration and leadership. Emphasis placed in the social, cultural, and political setting of justice administration and management. Credit will not be awarded to students who have credit for JPL 835.

**CPL 839. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly JPL 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for JPL 839.

**CPL 839A. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly COR 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for COR 839.

**CPL 839B. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly COR 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for COR 839.

**CPL 839C. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly COR 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for COR 839.

**CPL 839D. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly COR 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for COR 839.

**CPL 839E. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly COR 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for COR 839.

**CPL 839F. Co-op: Justice Policy and Lead. (3 Credits)**

A. Formerly COR 839. Prerequisite: departmental approval and graduate GPA of at least 3.0. Students work in an agency in corrections, juvenile justice, policing, or related area. Accompanying classroom and coursework components are designed to promote integration of work and academic experiences. A minimum of 80 hours work is required for each hour of academic credit. Credit will not be awarded to students who have credit for COR 839.

**CPL 840. Adult Corrections. (3 Credits)**

A. Formerly JPL 840. This course analyzes current and emerging trends/issues in adult community and institutional corrections. The future of corrections is examined based on current and projected trends.

**CPL 850. Corr & Juv Just Interventions. (3 Credits)**

A. Formerly JPL 850. This course provides critical analyses of research and theories guiding effective rehabilitation programs in corrections and juvenile justice. It examines how various factors contribute to criminal behavior and how assessment procedures can improve programs.

**CPL 856. Law/Ethics in Dealing with Off. (3 Credits)**

A. Formerly JPL 856. Analyzes ethical and legal issues confronting leaders in adult and juvenile correctional agencies. Evaluates statutory law, case decisions, administrative promulgations from constitutional and socio-legal standpoints.

**CPL 857. Comm Context of Adult/Juv Cor. (3 Credits)**

A. Formerly JPL 857. Analyzes interaction between local communities/institutional/community corrections. Explores how community shapes offenders entering the correctional system; how the correctional system impacts local communities. Emphasis on subcultural theories of crime and communities; implications of re-integrating offenders.

**CPL 860. Advanced Organizational Theory. (3 Credits)**

A. Formerly CRJ 860. Analysis of theories/metaphors of organizations and management, including modernist, neo-modernist and post-modernist with respect to political, technological, environmental, historical contexts, with implications for organization design, structure, culture, leadership, strategy.

**CPL 862. Race, Identity & Policing. (3 Credits)**

A. Formerly CRJ 862. Examines why racial injustices exist in criminal justice and policing, using historical and contemporary studies of connections between race, poverty, and the criminal justice system/policing.

**CPL 864. Comparative & Intl Policing. (3 Credits)**

A. Examination of comparative and international policing focusing on the structure and processes of systems in other nations, their relative successes, failures, and effects on the world environment. Credit will not be awarded to students who have credit for CRJ 802.

**CPL 875. Crime and Public Policy. (3 Credits)**

A. Provides an overview of factors shaping crime policy. The concept of crime, the use of law to promote social control policies, policy responses related to crime control and the efficacy of those policies will be examined. Addresses conceptualizations of the modern state and the use of state power. Credit will not be awarded to students who have credit for CRJ 802.

**CPL 878. Capstone Applied Resrch Project. (3 Credits)**

A. Prerequisite: Complete core courses; final semester registration. Formerly JPL 878. Culminating academic experience involving research of well-defined appropriate topical methods of inquiry, integrating knowledge gained throughout program. Credit will not be awarded to students who have credit for JPL 878.

**CPL 897. Independent Study. (3 Credits)**

A. Formerly JPL 897. Students engage in self-directed learning at the university or in a field setting under graduate faculty supervision. Students must have completed a minimum of 6 hours of JPL coursework and have clear admission status to be eligible to register for this course. Additionally, students must have the independent study proposal form approved by faculty supervisor and the graduate director before enrolling. Credit will not be awarded to students who have credit for JPL 897.

**Criminal Justice****CRJ 800. Advanced Crimi Justice Studies. (3 Credits)**

A. An orientation to our field of study as well as an examination of the criminal justice and crime control apparatus. Includes a review of the assumptions, theories, research, and normative orientations that underlie and drive criminal justice thinking and practice.

**CRJ 801. History of Criminal Justice. (3 Credits)**

A. An examination of the historical development of the criminal justice system.

**CRJ 802. Violence Against Women. (3 Credits)**

A. This course provides students with a human rights framework and cross-cultural understanding of violence against women, and efforts across societies to translate international knowledge into local justice for gender-based violence and female victims.

**CRJ 808. Analysis of Crimi Justice Data. (3 Credits)**

A. An examination of statistics and analysis in criminal justice research. Addresses epistemological presuppositions, statistical assumptions, results, and use of results for decision making.

**CRJ 810. Advanced Police Administration. (3 Credits)**

A. An examination of the functions of the police in the criminal justice system; concepts and principles of police organizational structure; concepts and principles of administration and management with an emphasis on the environment, change, conflict, strategy and evolution.

**CRJ 813. Analysis of Police Operations. (3 Credits)**

A. An analysis of the strategies and programs utilized in modern police work. Previous research studies and contemporary methods for assessing the effectiveness of police practices are examined.

**CRJ 814. Policing and Society. (3 Credits)**

A. Theoretical, historical and comparative perspectives on policing. Critical analysis of the function of police in modern society.

**CRJ 815. Policing Global Insecurity. (3 Credits)**

A. Examines global security threats (e.g. terrorism, transnational crime, ethnic cleansing) and the State and private sector's role in their construction and control. Late-modern social, political, and cultural movements are used to make theoretical sense of these phenomena.

**CRJ 821. Class, Race, Gender, & Justice. (3 Credits)**

A. Course will examine issues of justice related to race, gender, class and intersections inherent between multiple identities. Significant attention to marginalized populations/ disparate outcomes within particular institutions.

**CRJ 823. Social Justice and Music. (3 Credits)**

I, II. This course analyzes how American society and justice are reflected in popular music and its performance. The course examines connections between music, culture, history and society. A knowledge of music is not a pre-requisite.

**CRJ 829. Juvenile Justice. (3 Credits)**

A. This course presents a critical analysis of juvenile justice operations with particular emphasis placed on history and the role and effectiveness of police, court, and correctional responses to juvenile offenders.

**CRJ 833. Human Trafficking. (3 Credits)**

A. Critically examines the global problem of human trafficking and international legal frameworks, including obligations for prevention, protection, prosecution and partnership as it relates to addressing human trafficking.

**CRJ 840. Punishment and Society. (3 Credits)**

I. Beginning with the enlightenment and classical philosophers, students will examine historical and current trends in punishment and social control theory and practice. Addresses social control and punishment in late-modernity.

**CRJ 842. Human Rights & Justice. (3 Credits)**

A. Studies human rights movements, international law, and issues such as war on terrorism. Applies a paradigm of global human-rights justice to identify problem exemplars, exemplary problems solutions, and failing as well as failed paradigms.

**CRJ 843. Adv Issues in Criminal Law. (3 Credits)**

A. Advanced study of criminal law and procedure with emphasis upon judicial supervision of law enforcement and review of convictions.

**CRJ 844. Innocence Project Externship. (3 Credits)**

A. Corequisite and or Prerequisite: CRJ 843 and departmental approval. The externship is designed to teach students the fundamental components of effective criminal investigation. Students will have the opportunity to apply investigation skills and knowledge offered in the classroom to cases which may contain previously overlooked exculpatory evidence.

**CRJ 846. Legal Issues in Crim Just Admi. (3 Credits)**

A. Legal research methodology; examination of employment problems including labor-management relations and discrimination; administrative agencies; civil liability, including vicarious liability and related issues.

**CRJ 856. Legal & Ethical Issues in Corre. (3 Credits)**

An analysis of the impact of federal and state laws, court decisions, and moral and ethical issues in relation to treatment procedures for adult and juvenile offenders. Emphasis on offender's retention of constitutional guarantees.

**CRJ 864. Comparative & Intl Policing. (3 Credits)**

A. Examination of comparative and international policing focusing on the structure and processes of systems in other nations, their relative successes, failures, and effects on the world environment.

**CRJ 866. Law & the Juvenile Just System. (3 Credits)**

A study of laws relevant to the juvenile justice system with a major focus on further development of laws in terms of current needs and social situations of juvenile offenders.

**CRJ 870. Theories of Crime & Crim Just. (3 Credits)**

A. Examines the major theoretical perspectives in modern criminology and criminal justice, including classical statements and contemporary developments. Provides an exploration of theoretical arguments, underlying assumptions, philosophy of science commitments, and the sociohistorical context in which the theories were developed.

**CRJ 871. Crime, Victims and Criminals. (3 Credits)**

A. Examines the relationship between social inequality, crime, criminals and victims. Addresses the use of power in the construction of crime and the creation of law, as well as differential treatment by gender, race, ethnicity and class.

**CRJ 872. The Community Context of Crime. (3 Credits)**

A. Examines crime and synthesizes the body of theory and research examining community level effects on crime/crime control.

**CRJ 873. Social Construction of Crime. (3 Credits)**

A. Examines the social construction of crime including consideration of the process by which crime problems are generated.

**CRJ 874. Crime, Criminal Jus & Pop Cult. (3 Credits)**

A. Examines the interrelatedness of consumption, production, crime and popular culture. Examination of the social and symbolic construction of crime will be included through analysis of film, literature, music, and academic literature.

**CRJ 875. Crime and Public Policy. (3 Credits)**

A. Provides an overview of factors shaping crime policy. The concept of crime, the use of law to promote social control policies, policy responses related to crime control and the efficacy of those policies will be examined. Addresses conceptualizations of the modern state and the use of state power.

**CRJ 876. Organizational Crime. (3 Credits)**

A. This course explores empirical research, theories, and concepts related to crime committed within organizational contexts. Particular attention is paid to forms of syndicated crime, corporate crime, governmental corruption, and state crime.

**CRJ 877. Postmodernism and Justice. (3 Credits)**

A. An introduction to the ideas of postmodernism as applied to criminal justice. In contrast to the scientific model of inquiry most often used in criminal justice, the use of postmodernism brings to the field of criminal justice new models characterized by relationships, the importance of symbols, and assumptions that underlie our understanding of the concept of justice.

**CRJ 878. Ideology and Criminal Justice. (3 Credits)**

A. An assessment of the interrelatedness of crime and ideology. Includes an examination of the ideological construction of crime and crime control.

**CRJ 879. Vice and Criminal Justice. (3 Credits)**

A. A historical, analytic overview of America's response to vice. Particular topics will be chosen from the major vices in American society: prostitution, gambling, drugs and alcohol, as they relate to this country's relationship between morality and the criminal law.

**CRJ 888. Research Methods in Crim Just. (3 Credits)**

A. Prerequisites: undergraduate research methods and undergraduate statistics. Study of the philosophical foundations, design, and processes of criminal justice and criminological research: critical critique of current research issues in criminal justice.

**CRJ 889. Qualitative Research Methods. (3 Credits)**

A. A survey of qualitative research strategies and their epistemological presuppositions.

**CRJ 890. Topical Seminar in Crim Just. (3 Credits)**

A. May be retaken to a maximum of twelve hours on different topics.

**CRJ 897. Independent Study in Crim Just. (1-9 Credits)**

A. Individual investigations in criminal justice. Under the supervision of a faculty advisor. Student must have the independent study proposal form approved by faculty supervisor and the criminal justice graduate program coordinator in the College of Justice and Safety prior to enrollment. May be retaken up to a maximum of nine hours.

**CRJ 898. Thesis I. (3 Credits)**

A. This course orients students toward the production of a proposal suitable for a thesis.

**CRJ 899. Thesis II. (3 Credits)**

A. Entails an oral presentation and defense of thesis.

# Criminal Justice Policy and Leadership, Master of Science (M.S.)

Dr. Peter Kraska  
Graduate Program Coordinator

## General Information

Graduates of the program are expected to demonstrate advanced-level critical and analytical thinking; to apply principles from multiple academic disciplines to problems in criminal justice, adult corrections, juvenile justice, and policing in an effort to formulate creative solutions and to respect, evaluate, and synthesize information from diverse sources, while maintaining a critical focus on issues such as mass incarceration, social injustice, race and gender dynamics, as well as examining alternative approaches to leadership and administration, policy research/analysis, and qualitative/quantitative research methods. A central goal is to develop the student's leadership/communication/critical thinking skills in order to improve their administrative effectiveness. Further, graduates are required to show competency in the following areas:

1. the historical, theoretical, and legal foundations of the field;
2. the methods of gathering and analyzing information for research purposes;
3. knowledge of the major bases of literature; and
4. the ability to function responsively in leadership positions within criminal justice, adult corrections, juvenile justice, and policing agencies.

## Admission Requirements

Applicants must:

1. meet the requirements of the Graduate School;
2. hold a baccalaureate degree from an accredited institution;
3. have achieved an undergraduate grade point average (GPA) of 3.0 overall or 3.25 in the last 60 hours of the baccalaureate program.

The Master of Science in Criminal Justice Policy and Leadership must be completed online. Contact the Graduate Program Coordinator for additional details.

## Program Requirements

CIP Code: 43.0104

A minimum of 30 semester hours of graduate credit is required. A maximum of nine hours of approved, outside credit may be transferred to this degree program. All outside credit must be approved by the Department Graduate Committee.

## Cross Listed Courses

Some courses are offered under different prefixes with the same course content. Students will not be awarded credit for any course for which they have previously received credit under a cross listed prefix.

Code	Title	Hours
<b>Core Courses</b>		
CPL 809	Pro/Policy Eval and Analysis	3
CPL 810	Criminological Theory for Policy & Leadership	3
CPL 818	Rsrch Mthds Jstc Plcy and Ldrs	3
CPL 835	Adv Jus Admin and Leadership	3

<b>Electives</b>		
Choose from 15 hours of the following:		15
CPL 802	Violence Against Women	
CPL 812	Lead w Pol, Eth, and Emo Intel	
CPL 814	Policing and Society	
CPL 820	Issues in Juv Instit/Com Cor	
CPL 823	Topics: Just Policy and Lead	
CPL 828	MH/Sub Abuse Issues in Cor Stg	
CPL 830	Understanding Corr/Juv Just In	
CPL 839	Co-op: Justice Policy and Lead <sup>1</sup>	
CPL 840	Adult Corrections	
CPL 850	Corr & Juv Just Interventions	
CPL 856	Law/Ethics in Dealing with Off	
CPL 860	Advanced Organizational Theory	
CPL 862	Race, Identity & Policing	
CPL 864	Comparative & Intl Policing	
CPL 875	Crime and Public Policy	
CPL 897	Independent Study <sup>1</sup>	
Approved electives		
<b>Exit Requirements</b>		
CPL 878	Capstne Applied Resrch Project	3
<b>Total Hours</b>		<b>30</b>

<sup>1</sup>

No more than six hours total may be applied to a degree from CPL 839 Co-op: Justice Policy and Lead and CPL 897 Independent Study (singularly or combined).

## Exit Requirements

### Capstone Applied Research Project - Prerequisites

Complete all core courses and be in the last semester of coursework prior to graduation. Candidates are required to satisfactorily complete applied research project (CPL 878 Capstne Applied Resrch Project) before they are eligible to graduate from the program.

## Criminology and Criminal Justice, Master of Science (M.S.)

Dr. Judah Schept, Graduate Program Coordinator

## General Information

Objectives of the graduate program are based upon the assumption that social policy, decision-making, and reform in modern society require a broad academic experience and innovative thinking, including theoretical foundations of the discipline, appropriate research methods, and principles applicable to the administration of justice.

A major focus is to demonstrate that problems of both a public and private nature associated with crime and delinquency must be viewed as social problems rather than isolated problems. It is therefore expected that graduates will be:

1. conversant with the theoretical and legal principles implicit in criminology and criminal justice;
2. knowledgeable of the essential research contributions in the discipline;

3. capable of research and data analysis appropriate to the discipline; and
4. competent to assume policy-making, research and instructional responsibilities in criminology and criminal justice.

## Admission Requirements

Students seeking clear admission should (a) meet the requirements of the Graduate School, and; (b) hold a baccalaureate degree from an accredited institution of higher learning with a 3.0 grade point average (GPA).

## Program Requirements

CIP Code: 43.0103

A minimum of 36 semester hours of graduate credit is required. The following courses are required of all students:

Code	Title	Hours
CRJ 800	Advanced Crimi Justice Studies	3
CRJ 808 or CRJ 875	Analysis of Crimi Justice Data Crime and Public Policy	3
CRJ 888	Research Methods in Crim Just	3

## Graduate Course Credit

All 700 level courses have undergraduate counterparts bearing the same last two digits. The 700 level courses are offered only for graduate level credit and require additional appropriate experiences for all students enrolled. Students who have previously taken the undergraduate counterpart of these courses at the 500 level will not be permitted to enroll for graduate level credit in the 700 level counterpart. Credit will not be awarded for both the 700 and 500 level of the same course.

## Cross Listed Courses

Some courses are offered under different prefixes with the same course content. Students will not be awarded credit for any course for which they have previously received credit under a cross listed prefix.

## Curriculum for the General Program

Code	Title	Hours
<b>Core Courses</b>		
CRJ 800	Advanced Crimi Justice Studies	3
CRJ 870	Theories of Crime & Crim Just	3
CRJ 888	Research Methods in Crim Just	3
CRJ 808 or CRJ 875	Analysis of Crimi Justice Data Crime and Public Policy	3
<b>Electives</b>		
Choose from eight of the following electives or six electives plus Thesis:		24
CRJ 801	History of Criminal Justice	
CRJ 802	Violence Against Women	
CRJ 810	Advanced Police Administration	
CRJ 813	Analysis of Police Operations	
CRJ 814	Policing and Society	
CRJ 815	Policing Global Insecurity	
CRJ 840	Punishment and Society	
CRJ 842	Human Rights & Justice	
CRJ 843	Adv Issues in Criminal Law	

CRJ 844	Innocence Project Externship
CRJ 846	Legal Issues in Crim Just Admi
CRJ 871	Crime, Victims and Criminals
CRJ 872	The Community Context of Crime
CRJ 873	Social Construction of Crime
CRJ 874	Crime, Criminal Jus & Pop Cult
CRJ 876	Organizational Crime
CRJ 877	Postmodernism and Justice
CRJ 878	Ideology and Criminal Justice
CRJ 879	Vice and Criminal Justice
CRJ 889	Qualitative Research Methods
CRJ 890	Topical Seminar in Crim Just
CRJ 897	Independent Study in Crim Just <sup>1</sup>

### Exit Requirements

Choose from one of the following:		0
GRD 897B	MS Crim Justice Written Comp (Non-Thesis)	
GRD 898C	MS Crim Justice Thesis Defense (Thesis)	

**Total Hours** **36**

1

Course work for CRJ 897 Independent Study in Crim Just should be arranged and no more than nine hours will be applied toward the degree.

## Exit Requirements

- **Thesis** – A thesis is optional in this program. GRD 898C MS Crim Justice Thesis Defense required if thesis is chosen.
- **Comprehensive Examination** – Students in the non-thesis option are required to pass a written comprehensive examination (GRD 897B MS Crim Justice Written Comp). Students in the thesis option are required to pass an oral comprehensive examination in defense of the thesis (GRD 898C MS Crim Justice Thesis Defense).

## School of Safety, Security, and Emergency Management

Dr. Tom Schneid, Chair and Interim Graduate Program Coordinator  
Stratton Building, Room 253  
(859) 622-2382

## General Information

The School of Safety, Security and Emergency Management offers the Master of Science degree in Safety, Security and Emergency Management. The M.S. degree program is designed to provide students with a broad background in safety, security, and emergency management, in addition to the option for more in-depth knowledge of at least one area of Occupational Safety, Cyber and Security Management, Emergency Management, and Disaster Resilience, Healthcare Safety, Construction Safety, Safety Leadership and Management, and Supply Chain Safety and Security. The program is directed at preparing students for responsible careers in safety, security, and emergency management. Students are prepared to draw logically sound conclusions, think creatively, communicate effectively, and appreciate the role and responsibilities of the safety, security, and emergency management administration/ professionals.

The objectives of the graduate Safety, Security, and Emergency Management program are:

1. To provide a broad-based program that affords the depth of education, the specialized skills, and the sense of creativity that will allow the graduate to practice in and contribute to the field of safety, security, and emergency management.
2. To provide an avenue for a highly mobile and marketable career to individuals wishing to pursue graduate education in the Safety, Security, and Emergency Management discipline.
3. To add to the body of knowledge through scholarly activity, research, and advanced professional training.
4. To provide safety, security, and emergency management practitioners with leadership skills needed for the planning and delivery of loss prevention and safety services at the state and national levels.

## Admission Requirements

Students seeking clear admission should hold a baccalaureate degree from an accredited institution of higher learning with a 2.5-grade point average overall. Students with an undergraduate grade point below 2.5 may be considered for Probationary Admission but are required to sit for the Graduate Record Examination (GRE) and acquire a target score in three categories: Verbal; 149, Quantitative 141, and Analytical Writing 3.0. Students who have previously earned advanced degrees including but not limited to M.S., M.A., M.B.A., J.D., or other recognized graduate degrees from an accredited university will be exempt from the GRE requirement. Applicants without an academic and/or experiential background in a related discipline or field of study including, but not limited to occupational safety, security, fire, homeland security, emergency management, emergency medical, insurance, and risk management may be accepted into the program with departmental approval. When deficiencies are deemed to exist, applicants may be required to satisfy all designated deficiencies prior to admission to candidacy. Students must also meet the general requirements of the ECU Graduate School.

### Online Learning Option

The Master of Science degree in Safety, Security, and Emergency Management is offered online. The M.S. degree program also offers classes each semester online including options in Cyber and Security Management, Emergency Management and Disaster Resilience, Occupational Safety, Construction Safety, Healthcare Safety, Supply Chain Safety and Security, and Safety Leadership and Management.

## Program Requirements

CIP Code: 43.9999

### Code Title Hours

Code	Title	Hours
Core Courses		18
SSE 815	SSE Administration	
SSE 826	Emergency Prep/Response	
SSE 827	Issues in Security Management	
SSE 833	Legislation & Regulatory Comp	
SSE 865	SSE Auditing	
SSE 880	SSE Research/Planning	
ELECTIVES		

Students choose from the approved University Certificate Programs or Advisor Approved Electives 12

### Exit Requirements

Choose from one of the following: 6

1. Comprehensive Examination - Prerequisites: Candidate must have completed all core classes before scheduling to sit for the comprehensive examination. Candidate shall perform satisfactorily on the written comprehensive examination on their program of study and primarily focused on the core program requirements.
2. Capstone Applied Research Project - Prerequisites: Completion of 30 hours in MSSEM and SSE 880 SSE Research/Planning or department approval. Students must earn a grade of "A" or "B" in order to satisfactorily pass the Capstone. A lower grade will result in the student being given only one additional opportunity to pass the Capstone within one year following an unsatisfactory grade.

## Courses

### Homeland Security

#### HLS 800. HLS and Emergency Management. (3 Credits)

A. Organization, missions and critical issues in US homeland security and emergency management. Focuses on developing professional skills in critical thinking, policy analysis and ethics.

#### HLS 810. Infrastructure Protec and Risk. (3 Credits)

A. Foundations for providing security and resilience to the nation's critical infrastructure with an emphasis on risk management.

#### HLS 820. Security Intelligence. (3 Credits)

A. Principles of security intelligence and applications to private sector security, risk, and resilience efforts as well as operational models in an effort to safeguard physical, cyber, and human assets and to enable informed decision-making.

#### HLS 830. Long-Term Disaster Resilience. (3 Credits)

A. Explores disaster trends and problems, as well as community wide mitigation and preparedness strategies aimed at reducing the impacts of natural hazards and achieving long-term disaster resilience.

#### HLS 831. Unconventional Threats and Res. (3 Credits)

A. Formerly SSE 831. The course addresses concepts, theories, laws and authorities, principles, programs, and requirements associated with unconventional threats to our nation that most likely would result in mass casualties and pose large-scale responses and cascading threats.

#### HLS 835. Intergov Rltns in Disaster Mgt. (3 Credits)

A. Analysis of intergovernmental relations and disaster policies across all phases of emergency management with a focus on disaster response and recovery. Systems are investigated through critical thinking, case studies, and comparative analysis methodologies.

**HLS 850. Foundations of Cybersecurity M. (3 Credits)**

A. Identification and application of private sector cybersecurity management principles as well as the analysis and application of national cybersecurity policies and frameworks. Concentration on cyber intrusion prevention, response and recovery from a management perspective.

**Safety, Security, and Emergency Management****SSE 801. MS SSEM Academic Orientation. (0 Credits)**

Academic orientation for the SSEM Graduate Program. This course will address the college experience at the graduate level and assist the student in building skills and competencies for academic success in the program.

**SSE 815. SSE Administration. (3 Credits)**

A. Prerequisite: departmental approval. Examination of administrative concepts and principles regarding organizing and managing the functional areas of fire, safety, and security. Development of organizational and administrative structure to include policy formulation, goals and objectives, managerial tasks, and impact evaluations within an encompassing safety, security, and emergency framework.

**SSE 822. Workers Compensation/Labor Law. (3 Credits)**

A. Prerequisite: departmental approval. Comprehensive study of workers compensation and regulations; National Labor Relations Act; Title VII; A.D.E.A.; and other relevant laws applicable to the functional areas of safety, security, and emergency services.

**SSE 826. Emergency Prep/Response. (3 Credits)**

A. Prerequisite: departmental approval. In-depth study of the planning process, program development, training methods, etc., for response to man-made and natural emergencies/disasters for both private and public entities.

**SSE 827. Issues in Security Management. (3 Credits)**

A. Examination of principles and security measures addressing the management and implementation of programs, personnel, policies, procedures, risk/threat assessments, and other key activities associated with the protection of persons and key assets within the workplace.

**SSE 828. Industrial Safety Management. (3 Credits)**

A. Prerequisite: departmental approval. Investigation and analysis of hazard control principles relating to the management of personnel, facilities, and equipment, including control procedures, work-task analysis, risk identification and countermeasures, safety training, and pertinent safety management techniques.

**SSE 830. Organizational Continuity. (3 Credits)**

Organizational continuity will be discussed using the phases of emergency response, crisis management, and recovery. This course addresses value added activity of planning for catastrophic events and critical factors in restoring operational activity.

**SSE 831. Evltn of Emrgncy Management. (3 Credits)**

Current practice of emergency management evolved through governmental reactions to disasters that helped shape current emergency management practices, policy, administrative changes and historical context for the changes.

**SSE 832. Construction Safety. (3 Credits)**

A. Prerequisite: departmental approval. Introduction/ analysis of general construction safety utilizing the key components of 29 CFR 196. Included in this study will be general safety & health provisions of OSH Act and a review of the various subparts of 29 CFR 1926.

**SSE 833. Legislation & Regulatory Comp. (3 Credits)**

A. Prerequisite: departmental approval. Comprehensive study and analysis of federal/state regulations and legislation such as OSHA, EPA, etc., which mandate compliance with certain safety, health, and environmental conditions and practices relating to work performed in occupational, industrial, and comparable settings.

**SSE 834. Corporate Compliance. (3 Credits)**

A. Prerequisite: departmental approval. The assessment, analysis and development of safety, emergency management, security and environmental compliance programs. This course will address the regulatory requirements and best business practices for each of the compliance areas.

**SSE 835. Advanced Construction Safety. (3 Credits)**

A. A more detailed examination of 29 CFR 1926 including: PPE; Electrical; Scaffolding; Fall Protection; Cranes; Excavation; Steel Erection; Confined Spaces; and Residential Construction.

**SSE 839. Appl Lrn: Safe.Sec.Emer.Mngmt. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839A. Cooperative Study. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839B. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839C. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839D. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839E. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839F. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839G. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839H. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839I. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839J. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839K. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 839L. Cooperative Study. (0.5-6 Credits)**

A. Formerly LPS 839 A-F. Prerequisite: departmental approval. Work under faculty and field supervisor in a cooperative placement related to student's academic studies. May be retaken to a maximum of six hours, but only three hours may count toward master's degree. A minimum of 80 hours required for each hour of academic credit.

**SSE 840. Tech Construction Safety Mgmt. (3 Credits)**

A. Students will be presented with case studies and will be expected to prepare investigation reports, countermeasure plans, and strategic plans in order to counter and prevent future occurrences.

**SSE 841. Appl Study: Safe.Sec.Emer.Mgmt. (3 Credits)**

A. Prerequisite: departmental approval. Supervised study in loss prevention setting to provide the student an opportunity to synthesize theory and on-the-job situations. Individual conferences.

**SSE 842. Safety Ethics. (3 Credits)**

A. Addressed are fundamental concepts of ethics and ethical practice for safety professionals. Issues/topics include the central role of ethics, reaching agreement, cheating/free riding, and dilemmas faced by the safety professional.

**SSE 843. HR & Change Mgmt for Sfty Pros. (3 Credits)**

A. An analysis of human resource laws and employment issues impacting the safety function including ADA, Title VII and Pregnancy Discrimination Act. Assessment of new/pending legislation and regulations impacting the safety and employment functions.

**SSE 845. Personal/Environmental Hazards. (3 Credits)**

A. Prerequisite: departmental approval. Analysis and investigation of hazard and threat control principles relating to personal and environmental risks within the workplace. Investigation techniques, inspection methodologies, management techniques, and prevention programs essential to the manager within the safety, fire, and security functions are emphasized.

**SSE 850. Ergonomics & Human Factors. (3 Credits)**

A. The assessment and analysis of ergonomic risk factors, identification of known musculoskeletal disorders, and development of effective ergonomic management techniques and compliance programs.

**SSE 856. Global Supply Chain Operations. (3 Credits)**

A. Supply chains are increasing in size, scope, and complexity. This course considers the fundamentals of Global Supply Chain Management through the lenses of safety and security.

**SSE 857. Global Supply Chain Risk & Res. (3 Credits)**

A. Understanding and evaluating risk and resiliency are essential to ensuring a secure, dependable global supply chain. This course explores risk assessment strategies, modeling, and mitigation approaches used in reducing global supply chain vulnerability.

**SSE 860. Injury Management. (3 Credits)**

(3) Injury Management will review practical activities employers should engage to effectively manage injury/illness claims. Transitional return to work and OSHA recordkeeping associated with managing work related injuries.

**SSE 865. SSE Auditing. (3 Credits)**

A. Prerequisite: departmental approval. Theory and application of auditing in safety, fire, and security. Comprehensive study of risk/threat exposure and assessment.

**SSE 866. Spcl Topics Healthcare Safety. (3 Credits)**

A. This course, utilizing case studies and readings, will focus on current events, risks and threats to the healthcare delivery system, special safety issues, and emergency management related to the safety of healthcare facilities.

**SSE 867. Safety/Security Across Health. (3 Credits)**

A. This course introduces the healthcare continuum, focusing on the hospital/medical center environment. Ancillary and specialty services, including the 17 healthcare service types addressed in the CMS Final Rule for Emergency Preparedness, will be addressed.

**SSE 870. Principles of School Safety. (3 Credits)**

A. Examines a range of school and community crime prevention and safety strategies and assesses their effectiveness. In addition, students will be required to develop a school and community prevention and safety plan.

**SSE 880. SSE Research/Planning. (3 Credits)**

A. Models and applications of research design and planning in safety, security, emergency services and assets protection. Identification and evaluation of problems, information and data interpretation, and research/planning methodologies for contemporary approaches to proactive safety, security, and emergency services.

**SSE 885. Quantitative Analysis in SSEM. (3 Credits)**

(3) A. Addresses issues related to SSEM management by developing a systematic approach for evaluating evidence. Reviews study design, measure of associations, confounding, interaction, sources of bias and error, and quantitative analysis and its role in SSEM.

**SSE 890. Topical Seminar. (3 Credits)**

A. Prerequisite: advisor/departmental approval. Designed to explore specific, contemporary aspects of safety, security, and emergency services. May be retaken to a maximum of six hours provided topic is different each time.

**SSE 896. SSEM Capstone. (3 Credits)**

I, II and A. Prerequisite: Completion of 30 hours in MSSSEM or department approval. Final research project and presentation; Students will collect, analyze, interpret and assemble data and conclusions related to issues in SSEM.

**SSE 897. Independent Study. (3 Credits)**

A. Prerequisite: departmental approval. Designed for graduate students who have demonstrated the ability to conduct individual research relating to loss prevention and safety. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of six hours.

## Safety, Security, and Emergency Management, Master of Science (M.S.)

### GENERAL INFORMATION

The School of Safety, Security, and Emergency Management offers the Master of Science degree in Safety, Security, and Emergency

Management. The M.S. degree program is designed to provide students with a broad background in safety, security, and emergency management, in addition to the option for more in-depth knowledge of at least one area of Occupational Safety, Cyber and Security Management, Emergency Management, and Disaster Resilience, Healthcare Safety, Construction Safety, Safety Leadership and Management, and Supply Chain Safety and Security. The program is directed to preparing students for responsible careers in safety, security, and emergency management. Students are prepared to draw logically sound conclusions, to think creatively, to communicate effectively, and to appreciate the role and responsibilities of the safety, security, and emergency management administration/professionals.

The objectives of the graduate Safety, Security, and Emergency Management program are:

1. To provide a broad-based program that affords the depth of education, the specialized skills, and the sense of creativity that will allow the graduate to practice in and contribute to the field of safety, security, and emergency management.
2. To provide an avenue for a highly mobile and marketable career to individuals wishing to pursue graduate education in the Safety, Security and Emergency Management discipline.
3. To add to the body of knowledge through scholarly activity, research, and advanced professional training.
4. To provide safety, security, and emergency management practitioners with leadership skills needed for the planning and delivery of loss prevention and safety services at the state, regional, and national levels.

**Online Learning Option** - The Master of Science degree in Safety, Security and Emergency Management is offered online.

## Admission Requirements

Students seeking clear admission should hold a baccalaureate degree from an accredited institution of higher learning with a 2.5 grade point average overall. Students with an undergraduate grade point below 2.5 may be considered for Probationary Admission but are required to sit for the Graduate Record Examination (GRE) and acquire a target score in three categories: Verbal 149, Quantitative 141 and Analytical Writing 3.0. Students who have previously earned advanced degrees including, but not limited to M.S., M.A., M.B.A., J.D. or other recognized graduate degrees from an accredited university will be exempt from the GRE requirement.

Applicants without an academic and/or experiential background in a related discipline or field of study including, but not limited to: occupational safety, security, fire, homeland security, emergency management, emergency medical, insurance, and risk management may be accepted into the program with departmental approval. When deficiencies are deemed to exist, applicants may be required to satisfy all designated deficiencies prior to admission to candidacy. Students must also meet general requirements of the ECU Graduate School.

[www.english.eku.edu](http://www.english.eku.edu) (<http://www.english.eku.edu>)

(859) 622-5861

## General Information

The Department of English offers a 30-hour program of study leading to the Master of Arts in English & Writing Professions Degree. The Department of English also offers a 48-hour program of study leading to the Master of Fine Arts in Creative Writing (MFA-CW) degree.

The Master of Arts in Education degree with a concentration in English is offered in the College of Education with the cooperation of the Department of English. The Master of Arts in Teaching degree with a concentration in English is also offered in the College of Education. The regulations for these degrees may be found in the College of Education section of this *Catalog*.

Each of the above degree programs caters to students who are interested in English Studies but who have different immediate career goals:

- The MA in English & Writing Professions prepares students for careers in higher education—especially working with first-year writing and student support programs—as well as professional and technical writing.
- The MFA in Creative Writing helps students interested in publishing creative work of all genres to develop their craft and to learn how to navigate the modern publishing industry.
- The MAEd program provides professional development for already-certified K-12 teachers. The MAT is a fully-online program that provides an alternate pathway for teacher certification. Both of these programs may require supporting in English at the graduate level, depending on the course of study.

## B.A./M.A. in English & Writing Professions: 3+2 Accelerated Dual Degree Program

Students accepted to the 3+2 Accelerated Dual Degree Program are able to complete their B.A. degree and M.A. degree within 5 calendar years because up to 9 semester hours of graduate-level coursework will apply to both the undergraduate B.A. degree and the graduate M.A. degree. Only undergraduate students of proven academic ability will be considered for the program. Students should be aware that, in order to maintain their progress in the accelerated 3+2 program, careful coordination with their advisor is required.

Students admitted into the 3+2 program will remain coded as undergraduates until fulfilling their B.A. requirements. Students admitted into the 3+2 program must complete the English B.A. degree with a minimum 3.0 GPA to be allowed to proceed on with graduate program coursework. Students must fulfill all graduation requirements listed below.

### Entrance Requirements

Entrance requirements for the 3+2 adhere to the requirements for the M.A. in English & Writing Professions Program described in the Graduate Catalog. Completion of ENG 301 Advanced Composition (or ENG 303 Advanced Composition for Teachers) and ENG 302 Principles of Literary Study; an overall grade point average (GPA) of at least 3.0 at the time of admission to the 3+2 option.

Students may apply to the Graduate School for admission to the 3+2 program in their junior or senior year.

Approval of both the department and Graduate School is required (see the form at [https://success.eku.edu/register/3+2enrollment#\\_ga=2.90128923.1808918020.1690379325-357469383.1658330770](https://success.eku.edu/register/3+2enrollment#_ga=2.90128923.1808918020.1690379325-357469383.1658330770)).

## Master's

- Creative Writing, Master of Fine Arts (M.F.A.) Bluegrass Writers Studio (p. 739)
- English & Writing Professions, Master of Arts (M.A.) (p. 740)

## Courses

### ENG 700. Topics in Professional Writing. (3 Credits)

A. Familiarizes students with visual communication as applied in popular culture, business, science, and technology. Students learn visual design principles, and apply them by creating a variety of visual projects, from icons to infographics.

### ENG 702. Topics in Creative Writing. (3 Credits)

A. Special topics and workshop course for advanced or specialty genres and for students who desire to have their manuscripts critiqued. Guest lectures by and discussion with writers in residence. May be taken with different topics for a maximum of six hours.

### ENG 703. Creative Writing Residency. (3 Credits)

SUMMER ONLY. A. Prerequisite: departmental approval. Held in conjunction with Bluegrass Writers Studio's eight-day summer residency on EKU-Richmond campus, followed by asynchronous online work. Includes craft lectures, panels, and readings by visiting writers. Students must submit an original creative writing manuscript before the residency. Students having received credit for this course at the 500 level may take this course for a maximum of six hours, including the undergraduate credit.

### ENG 710. Intro to Linguistic Theory. (3 Credits)

A. An introduction to current linguistic theory and practice.

### ENG 715. English as a Second Language. (3 Credits)

A. Prerequisite: Study of theories advanced to explain the learning of English as a second language.

### ENG 720. History of English Language. (3 Credits)

A. Study of the history of the English language in terms of social, historical, and linguistic forces from which it developed into modern English, with an emphasis on English in contemporary contexts.

### ENG 730. Topics in a Genre:\_\_\_\_\_. (3 Credits)

A. Study of a particular genre or comparison of related genres. These can include traditional literary genres contemporary popular genres; or digital multimodal genres. May be retaken with different topics to a maximum of six hours.

### ENG 750. Topics in Textual Studies:\_\_\_\_. (3 Credits)

A. An intensive study of a particular aspect of textual production, transmission, or reception such as a movement, an author, historical contexts, or contemporary directions/experiments. May be retaken with a different topic to a maximum of six hours.

### ENG 800. Seminar on Writing Pedagogy. (3 Credits)

I. An introduction to best practices in writing studies with practical application, problem solving, and research especially relevant to college-level teaching and consulting.

### ENG 801. Introduction to Graduate Study. (3 Credits)

I. Introduction to professional expectations, issues, techniques, and tools of graduate-level study and research in disciplines related to literacy, written communication, and textual criticism. Must be taken before 12 hours earned in the program.

**ENG 803. Approaches to Creative Writing. (3 Credits)**

A. Study in depth of the various approaches to pedagogy of creative writing (e.g., Atelier, Great Works, Workshop) culminating in a major project demonstrating both mastery and synthesis of the approaches covered.

**ENG 804. Seminar in Creative Writing. (3 Credits)**

A. Writing and study in depth of a particular genre (e.g., fiction, poetry, drama) resulting in a coordinated project. May be retaken with different topics to a maximum of six hours, only upon advisor recommendation.

**ENG 805. Writing Prjct Summer Institute. (1-6 Credits)**

A. Prerequisite: Departmental approval. Collaborative, intensive experience in writing and teaching writing, focusing on writing process and development of best practice pedagogy for writing and literacy instruction in all content areas and grade levels, K-16.

**ENG 806. Topics in Modern Rhetoric:\_\_\_\_. (3 Credits)**

A. Study in depth of selected major concepts, theories, research and/or pedagogical approaches in twentieth-century rhetoric and writing studies, with attention to application. May be retaken with a different topic to a maximum of six hours.

**ENG 807. Adv Stdy Lang: Knowledge & Use. (3 Credits)**

A. Prerequisite: ENG 510/710 or equivalent. An advanced course in language knowledge (competence) and use (performance) from the perspective of language theory, focusing on aspects of language acquisition and literacy development.

**ENG 808. Studies in Modern Composition. (3 Credits)**

A. An advanced course in modern writing theories, suitable for students of writing and for students interested in writing professions; includes theory, practice, and administrative application.

**ENG 809. Seminar in Scholarship & Writ.. (3 Credits)**

A. Study of the range of scholarly tools and methods for research and writing, including print and electronic sources. Special emphasis on practical application to a specific research project.

**ENG 810. Advanced Grammar. (3 Credits)**

(3) A. In-depth analysis of linguistic and grammatical theories informing contemporary style rules in academic and professional contexts.

**ENG 812. Sem in Comp Resrch Methods. (3 Credits)**

A. Study of research methodology for rhetoric and composition, focused on gathering primary and secondary source material, ethics, collaboration, and reporting findings. Emphasis on practical application to a specific research project conduct as a class.

**ENG 814. Writing Across the Curriculum. (3 Credits)**

(3) A. A study of how literacy and writing programs function at the institutional level in higher education. Special focus on first-year writing, writing center, and general education administration practices.

**ENG 827. History of Rhetoric. (3 Credits)**

A. A study of theories of rhetoric over time, with a focus on rhetoric's application to writing studies.

**ENG 830. Textual Studies Seminar. (3 Credits)**

A. An intensive study of selected texts. May include examinations of textual production, applications, and appropriations in popular and political contexts, especially as those phenomena occur within transcultural, transhistorical, and transmedial flows. May be retaken with different topics to a maximum of six hours.

**ENG 833. Multimodal Criticism. (3 Credits)**

A. Study of selected major critical approaches (such as Multimodal Criticism, New Criticism, Marxist Criticism, Psychoanalytic Criticism, Deconstruction, New Historicism, Feminist Criticism, LGBTQ Criticism) and their application to multimodal texts.

**ENG 839. Professional English Project. (0.5-6 Credits)**

A. Prerequisite: Departmental approval. Work under faculty and field supervisors in cooperative placement related to literacy, writing, or media studies. One to six hours credit per semester or summer session. Minimum of eighty hours work required for each academic credit. Maximum of three hours credit may apply toward an M.A. degree in English. Credit will not be awarded for both ENG 839 and ENG 898.

**ENG 839B. Cooperative Study in English. (1-6 Credits)**

Work under faculty and field supervisors in cooperative placement related to English graduate studies. Maximum of three hours credit can apply toward MA in English degree.

**ENG 840. Foundations in ProTech Writing. (3 Credits)**

(3) A. Focuses on workplace writing in networked environments for technical, scientific, business, and other professional contexts. Emphasizes context and user analysis, data analysis and display, project planning, document management, usability, ethics, and research.

**ENG 850. Crit. Studies Contemp. Texts. (3 Credits)**

A. Study in depth of texts produced after 1840, paying attention to technological and socioeconomic contexts as well as poetic and rhetorical trends. May be retaken with different topics to a maximum of six hours, only upon advisor recommendation.

**ENG 860. Topics in Reading & Teaching. (3 Credits)**

A. Study of topics related to reading and teaching literature. May focus on informational, narrative, and/or poetic texts, and should address engaging with texts in digital, oral, and print modes. Designed for current and prospective 5-12 teachers, as well as students interested in post-secondary and professional instructional environments. (Counts towards MA, MAT, MAED, and Extension Certificate). May be retaken with different topics to a maximum of six hours, upon advisor approval.

**ENG 863. Writing & Teaching Writing. (3 Credits)**

A. Study of writing practices and writing instruction to develop K-16 students' writing skills and strategies. Designed for current and prospective K-12 teachers, as well as students interested in post-secondary and professional instructional environments. (Counts toward MA, MAT, MAED, Extension Certificate.) Students who already have credit for ENG 805 will not receive credit for ENG 863.

**ENG 870. Seminar in Medieval Literature. (3 Credits)**

A. Study of texts and textual production prior to the Industrial Revolution. May include syntheses with contemporary texts or with applications and appropriations in modern popular and political contexts. May be retaken with different topics to a maximum of six hours.

**ENG 880. Seminar in 20th Cen Brit Lit. (3 Credits)**

A. A study in depth of several major authors, or of a significant literary movement, in modern British literature. May be retaken with different topics to a maximum of six hours, only upon advisor recommendation.

**ENG 890. Special Studies. (1-3 Credits)**

A. Independent research and writing designed to fulfill individual needs and interests of advanced students. Student must have the graduate special studies proposal approved by faculty supervisor, graduate program coordinator, and department chair. ENG 898 Thesis I. (3) A. ENG 899 Thesis II. (3) A.

**ENG 898. Thesis. (3 Credits)**

A. An intensive research project related to critical textual studies, literacy, or written communication. Students are required to contact faculty and propose course of study in semester prior to taking this course. Credit will not be awarded for both ENG 839 and ENG 898.

# Creative Writing, Master of Fine Arts (M.F.A.) Bluegrass Writers Studio

## General Information

A studio-academic, terminal degree program, the Master of Fine Arts in Creative Writing equips students with the training necessary to become regularly publishing writers. Workshops, contemporary literature courses, and residencies focus on advanced craft, contemporary literature, publishing, the literary marketplace, and professional development.

MFA graduates are qualified for careers in college and university-level teaching, contract and freelance writing, digital content creation, editing, and publishing.

Graduates of the program regularly publish poetry and prose in national literary journals, publish their book-length works with regional and national presses, and have been named finalists or winners of several notable literary and scholarly awards such as The Annie Dillard Award for Creative Nonfiction, The Fulbright Scholars Program, The PEN/Bellwether Award for Socially Engaged Fiction, and others.

The program is regularly ranked among the top low-residency MFA programs in the country, and it has twice been named Best Low-Res MFA Program by Intelligent.com (2022, 2023).

## Admission Requirements

Applicants to the MFA in Creative Writing program (Bluegrass Writers Studio) are required to submit a portfolio of work in their desired concentration (poetry, fiction, or creative nonfiction) to the MFA Program Director. The writing sample should consist of up to 15 pages of poetry or 20 pages of prose. The portfolio should also include a Statement of Purpose that addresses the applicant’s reasons for applying. Though applicants are not required to have completed an undergraduate bachelor’s degree in English or Creative Writing, it is recommended applicants with such preparation have either a minor in English and/or significant outside preparation or experience in literature and writing. In lieu of that, applicants should be prepared to complete additional hours to remove any deficiency in their preparations for graduate study.

Applicants must also meet the general requirements of the Graduate School. Applicants with a cumulative undergraduate GPA of less than 2.50 are required to complete the GRE and achieve satisfactory scores of 150 or higher on the Verbal and 4.0 or higher on the Analytical Writing sections of the exam. The MFA Program Director reserves the right to waive certain departmental requirements in the event that a writing sample is exceptional.

## Program Requirements

CIP Code: 23.1302

Students must complete 48 hours in the program, including 12 hours of summer residency, as well as an approved creative thesis. Students must also deliver a craft presentation and thesis reading at their final summer residency.

Each fall and spring, full-time students register for one, asynchronous contemporary literature course (ENW 810, 3 cr. hrs.) and one synchronous workshop (ENW 820, 6 cr. hrs.) that meets live, online, one day per week. Each summer, full-time students attend two sessions of in-person, domestic or international residency (ENW 801, 3 cr. hrs. for each session)

The Bluegrass Writers Studio Domestic Summer Residency is held in Richmond/Berea/Lexington, Kentucky and begins, annually, the first Friday after the July 4<sup>th</sup> holiday. Session one runs for 8 days. Session two runs for 7 days. A keynote address and reception is held at the mid-point of the residency.

The Bluegrass Writers Studio International Summer Residency is held in Lisbon, Portugal in partnership with Disquiet International. The first session begins, annually, in late June and runs for two weeks with several off-days built into the schedule. The second session begins the Monday after the end of the first session and runs eight days.

At both residencies, students can expect workshop choices in several genres and to learn from award-winning and best-selling visiting authors, resident faculty, and visiting writing industry professionals. Students can also expect to attend professional development panels, readings, receptions, and other events.

Code	Title	Hours
<b>Required Courses</b>		
Students must complete four sections of the following: <sup>1</sup>		12
ENW 801	Summer MFA Residency	
Students must complete four sections of the following: <sup>1</sup>		12
ENW 810	Topics in Creative Writing: (three-hour course)	
Students must complete three sections of the following: <sup>1</sup>		18
ENW 820	MFA Writing Workshop (six-hour course)	
Students must complete three sections of the following:		6
ENW 820	MFA Writing Workshop ((Thesis))	
<b>Exit Requirements</b>		
GRD 858F	MFA Creative Wrtg Comp Present ((presentation and thesis reading))	0
<b>Total Hours</b>		<b>48</b>

<sup>1</sup> Topic must vary in each section. Course content is not to be repeated.

## Exit Requirement Thesis

After completing 24 credit hours, students will submit a Thesis Prospectus in which they describe the book-length project they will complete for their creative thesis. They will also form their thesis committee which will consist of a Thesis Director and Second Reader they choose. The third and final member of the student’s thesis committee, the Moderator, is assigned by the program director. In conjunction with the Thesis Director, the student will set deadlines for drafts of the thesis and a final date by which the thesis will be submitted to the committee for scoring.

## Additional Exit Requirements

At their final summer residency, either domestic or international, the student will deliver a public presentation on craft and a public reading from their thesis, both of which will be followed by an oral defense proctored by a member of the resident faculty. Students may complete

these requirements once they have filed their Thesis Prospectus with the MFA Program Director, completed a minimum of 39 credit hours, and been approved to do so by the MFA Program Director.

## English & Writing Professions, Master of Arts (M.A.)

### Admission Requirements

Applicants must meet the general requirements of the Graduate School. Applicants with a cumulative undergraduate GPA of less than 2.5 are required to complete the GRE and achieve satisfactory scores of 150 or higher on the Verbal and 4.0 or higher on the Analytical Writing sections of the exam.

### Program Requirements

CIP Code: 23.0101

Students must complete the 12 hours of the core curriculum as outlined below.

They must also complete 3 hours of Foundations and Theories courses, 6 hours of Historical Contexts courses, and 6 hours of Methods and Practices courses. Students can opt to take 3 hours in either Co-Op or Thesis: see "Exit Requirements," below.

Code	Title	Hours
<b>Core Courses</b>		
ENG 801	Introduction to Graduate Study	3
ENG 800	Seminar on Writing Pedagogy	3
ENG 808	Studies in Modern Composition	3
ENG 814	Writing Across the Curriculum	3

### Exit Requirements

Choose from one of the following:		3
ENG 839	Professional English Project	
ENG 898	Thesis	
<b>Total Hours</b>		<b>30</b>

### EXIT REQUIREMENTS

All students are required to complete *either* a Professional English Project or a Thesis.

**ENG 839 Professional English Project** – Professional English Projects (PEPs) will involve guided, cooperative work with a division of EKU outside of the department or with a higher education or community institution outside the University. Before their final semester, students will submit a PEP Proposal in coordination with a project committee and a liaison from the hosting division or institution. After approval of their proposal, students will be allowed to register for ENG 839. Candidates will complete a report on the project and will present it at a formal Showcase before the end of their final semester.

**ENG 898 Thesis** - Theses will require students to undertake original research that can involve human subjects, institutional data collection, and/or archival research. Before their final semester, students completing a thesis will submit a Thesis Proposal to be approved by their thesis committee. After approval of the proposal, students will be allowed to register for ENG 898. Candidates will submit the completed thesis to the Graduate School and present on the thesis in a formal Showcase before the end of their final semester.

## Department of Government

Prof. Lynnette Noblitt, Chair  
 Dr. Jeongwoo Kim, MPA Graduate Coordinator  
[www.government.eku.edu](http://www.government.eku.edu) (<http://www.government.eku.edu>)  
 Commonwealth 1510  
 (859) 622-5931

The Department of Government offers work leading toward a Master of Public Administration and provides graduate level courses as support for graduate programs in related disciplines.

### Certificates

Persons with a baccalaureate degree from an accredited institution may earn a 12-hour non-degree University certificate in the following areas. Students must meet all requirements for admission to the Graduate School. The certificate courses overlap with courses in the MPA Concentrations and may be applied to the MPA degree.

### Master's

- Master of Public Administration with a Concentration in Applied Policy (M.P.A.) (p. 742)
- Master of Public Administration with a Concentration in Community Development (M.P.A.) (p. 744)
- Master of Public Administration with a Concentration in Emergency Management and Disaster Resilience (M.P.A.) (p. 745)
- Master of Public Administration with a Concentration in Nonprofit Management (M.P.A.) (p. 746)

## Certificate

- Applied Policy, University Certificate (p. 742)
- Community Development, University Certificate (p. 742)
- Nonprofit Management, University Certificate (p. 747)

## Courses

### **POL 733. Seminar: State & Local Politics. (3 Credits)**

A. A topical analysis of the institutions, policies, and administration of American state and local government. May be retaken to a total of six credit hours, provided subject matter differs each time.

### **POL 741. Politics and Education. (3 Credits)**

A. An examination of the way political decisions and policies are made in the field of education. Special attention is given to educational decision makers and political power at the local level.

### **POL 751. Classic & Mediev Pol Theory. (3 Credits)**

A. Cross-listed as PHI 751. Examination of Western political thought from Plato to Aquinas. Credit will not be awarded to students who have credit for PHI 551, PHI 551W, POL 551, POL 551W or PHI 751.

### **POL 752. Modern Political Theory. (3 Credits)**

A. Cross-listed as PHI 752. Examination of Western political thought from the Renaissance to the mid-twentieth century. Credit will not be awarded to students who have credit for PHI 552, PHI 552W, POL 552, POL 552W or PHI 752.

### **POL 753. Contemporary Political Theory. (3 Credits)**

A. Cross-listed as PHI 753. Examination of Western political thought from the mid-twentieth century to the present. Credit will not be awarded to students who have credit for PHI 553, PHI 553W, POL 553, POL 553W, or PHI 753.

### **POL 765. Administrative Law. (3 Credits)**

Nature of the powers vested in administrative agencies; the problems of administration procedure; the methods and extent of judicial control over administrative action.

### **POL 800. Research Methods in Pol Sci. (3 Credits)**

A. An introduction and an overview of theories, methods, and analyses which are used in contemporary political science and public administration research.

### **POL 801. Admin, Ethics, Public Policy. (3 Credits)**

A. An analysis and overview of the interplay of ethical considerations, administration, and policy process in the public sector.

### **POL 835. Sem Intergovernmental Relation. (3 Credits)**

A. An examination of the institutions, concepts, and problems of intergovernmental relations and the American federal system.

### **POL 839. Co-op or Appl Lrn: Pub Adm/Pol. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisors in cooperative placement related to student's academic studies. Credit varies with hours of employment. A minimum of eighty hours of work required for each academic credit. May be repeated at the discretion of the department. Credit may be substituted for POL 871 in the M.P.A program provided the requirements of POL 871 are met completely by the cooperative education assignment. Credit may not otherwise be substituted for any M.A. or M.P.A requirements.

### **POL 839A. Co-op in Pub Admin & Pol Sci. (0.5-6 Credits)**

Work under faculty and field supervisors in a cooperative placement related to student's academic studies. Credit varies with hours of employment. May be repeated at the discretion of the department. Credit may be substituted for POL 871 in the MPA program provided the requirements of POL 871 are met completely by the cooperative education assignment. Credit may not otherwise be substituted for any M.A. or M.P.A. cooperative education assignment. Credit may not otherwise be substituted for any M.A. or M.P.A. requirements.

### **POL 839B. Co-op in Pub Admin & Pol Sci. (0.5-6 Credits)**

Work under faculty and field supervisors in a cooperative placement related to student's academic studies. Credit varies with hours of employment. May be repeated at the discretion of the department. Credit may be substituted for POL 871 in the MPA program provided the requirements education assignment. Credit may not otherwise be substituted for any M.A. or M.P.A. requirements.

### **POL 839C. Co-op in Pub Admin & Pol Sci. (0.5-6 Credits)**

Work under faculty and field supervisors in a cooperative placement related to student's academic studies. Credit varies with hours of employment. May be repeated at the discretion of the department. Credit may be substituted for POL 871 in the MPA program provided the requirements of POL 871 are met completely by the cooperative education assignment. Credit may not otherwise be substituted for any M.A. or M.P.A. requirements.

### **POL 839D. Co-op in Pub Admin & Pol Sci. (0.5-6 Credits)**

Work in placements related to academic studies. One to eight hours credit per semester or summer. Total hours: eight, associate; sixteen, baccalaureate. A minimum of 80 hours employment required for each semester hour credit. No more than six hours may count toward this major. No more than three hours may count toward this minor.

### **POL 845. Community Development. (3 Credits)**

A. Examines developmental efforts on community level in the United States; relates community development to community organization and examines current efforts, especially those based on the concept of self-help, to generate and implement community development programs.

### **POL 846. Non-Profit Organizations. (3 Credits)**

A. Study of non-profit organizations, including an examination of types, leadership styles, management tools, board organization, budgeting and fund-raising.

### **POL 847. Grant Writing. (3 Credits)**

A. The study of grant writing processes involving federal and foundation grants as they apply to the public and non-profit sector. Credit will not be awarded for both POL 847 and POL 847S.

### **POL 847S. Grant Writing. (3 Credits)**

A. The study of grant writing processes involving federal and foundation grants as they apply to the public and non-profit sector, enhanced with a service-learning component. Credit will not be awarded for both POL 847 and POL 847S.

### **POL 870. Public Admin Internship. (3 Credits)**

A. Prerequisite: departmental approval. An internship in a public or nonprofit organizational setting for M.P.A. students conducted under departmental supervision and resulting in a capstone paper.

### **POL 871. Thesis in Public Administration. (3 Credits)**

A. Prerequisite: Departmental approval. An advanced, directed research project for M.P.A. students under departmental supervision resulting in a thesis.

**POL 873. Applied Project in Public Administration. (3 Credits)**

A. Prerequisite: departmental approval. An applied research project for a public or nonprofit organization for MPA students under departmental supervision resulting in a capstone project.

**POL 874. Public Sector Leadership. (3 Credits)**

A. This course examines theories and practices of leadership in public and nonprofit sector organizations. Emphasis is given competing theories of leadership and to the examination of leadership through theoretical reference frames.

**POL 875. Organization Theory. (3 Credits)**

A. Survey of major theories as applied to government agencies and other not-for-profit organizations. Topics covered include classical texts and recent research on theories of organizational behavior,

**POL 876. Public Human Resources Mngt. (3 Credits)**

A. Study of strategies and techniques of public human resources management in the public sector and their relationship to pertinent laws, policies, and institutions, in the context of contemporary theories of organizational behavior.

**POL 877. Public Finance Administration. (3 Credits)**

A. An examination of the effects of economic, administrative, legislative and judicial factors on the fiscal operations of government. Study of the budgetary and financial decision-making process at the federal, state and local levels.

**POL 879. Policy Analysis and Evaluation. (3 Credits)**

A. Prerequisite: POL 800. An introduction to theories and methods of analysis relating to public policy and public program formulation, implementation, and evaluation. Topics include quantitative and non-quantitative analytical techniques.

**POL 880. Nonprofit Financial Management. (3 Credits)**

A. The course will examine financial considerations of nonprofit organizations, including funding sources, nonprofit financial statements, reserve development and management, financial accountability, and strategies required to ensure the effectiveness and sustainability of the organization.

**POL 891. Directed Research. (3-6 Credits)**

Research under the direct supervision of one or more departmental members. Students must have the independent study proposal form approved by faculty supervisor and departmental chair prior to enrollment.

**POL 892. Dir. Re in Public Hlth Admin.. (3-6 Credits)**

A. Research under the direct supervision of faculty advisors. Students must have the independent study form approved by the faculty supervisor and department chair. Designed for MPH students concentrating in Public Administration.

**POL 893. Special Topics:\_\_\_\_\_ (1-3 Credits)**

A. Seminar in a specialized topic of the discipline. Topics will vary. May be retaken to a total of six hours credit, provided subject matter differs each time.

**POL 895. Independent Study. (1-3 Credits)**

A. Student-initiated directed study. Can include research project or readings in an area of the discipline. May be retaken to a total of six hours credit, provided subject matter differs each time. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment.

**POL 899. Thesis. (3-6 Credits)**

A. May be retaken to a total of six hours credit.

## Master of Public Administration with a Concentration in Applied Policy (M.P.A.)

### General Information

First of its kind in Kentucky when created in 1968, the Master of Public Administration program prepares qualified individuals, both entry-level and mid-career, for advanced professional positions in the administration of public and non-profit programs. The program also may be appropriate for individuals in the private sector who have responsibility for public sector contracts, regulatory compliance, or other liaison and oversight activities.

Special emphasis is placed on regional and local government. In addition to a general concentration, specialized programs of study are offered in community development, emergency management and disaster resilience, and nonprofit management.

The MPA program is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA).

## Admission Requirements

Applicants for admission must meet both the general requirements of the Graduate School and the requirements of the MPA program. Applicants to the MPA program come from a variety of undergraduate degree programs, and admission decisions are based on an overall assessment of a student's application.

Applicants who meet the criteria listed below may qualify for "Clear Admission" to the MPA program:

1. A complete application;
2. Meets the general requirements of both the Graduate School and MPA program;
3. Achieves a cumulative grade point average (GPA) of 2.75 (on a 4.0 scale);
4. Resume or curriculum vitae (CV);
5. Two (2) letters of recommendation;
6. Statement of career goals and objectives;
7. Affirm their character and fitness for graduate education in public administration.

Applicants who do not meet the GPA requirement for admission must submit official GRE scores to be considered for Probationary Admission. Expected target scores on the GRE for Probationary Admission are 145 on both the verbal and quantitative sections of the exam. Students who cannot affirm their character and fitness must include a statement explaining their past actions to be reviewed by the program faculty.

## Program Requirements

CIP Code: 44.0401

The MPA Degree program requires satisfactory completion of a minimum of 36 credit hours. All students take a common program core of 21 credit hours. The program core consists of courses in:

- Administration, Ethics, and Public Policy
- Research Methods
- Public Sector Leadership
- Organizational Theory
- Public Human Resources Management
- Public Finance Administration
- Policy Analysis and Program Evaluation

In addition to these program core courses, all students will enroll in and execute three semester hours of applied study. This requirement may be met through an internship, generally at a public or nonprofit organization, and the submission of a capstone paper; through an applied project resulting in the submission of a capstone project; or through an advanced and directed research project resulting in a thesis.

While observing the above requirements, students may choose to complete the general degree program or may choose from three

concentrations within the program. Curriculum requirements for the general program and concentrations are as follows:

Code	Title	Hours
<b>Core Courses</b>		
POL 800	Research Methods in Pol Sci	3
POL 801	Admin, Ethics, Public Policy	3
POL 874	Public Sector Leadership	3
POL 875	Organization Theory	3
POL 876	Public Human Resources Mngt	3
POL 877	Public Finance Administration	3
POL 879	Policy Analysis and Evaluation	3
<b>Concentrations</b>		
Students must select one of the following Concentrations:		
Community Development		
Emergency Management & Disaster Resilience		
Applied Policy		12
Nonprofit Management		
<b>Exit Requirements</b>		
Choose from one of the following:		3
POL 870	Public Admin Internship	
POL 871	Thesis in Public Administration	
POL 873	Applied Project in Public Administration	
<b>Total Hours</b>		<b>36</b>

## Program Plan

During the first term, graduate students must meet with their advisor to develop a planned program. Students for whom program plans have not been appropriately filed will not be eligible for a second registration.

## Concentration

Code	Title	Hours
<b>Concentration Courses</b>		
Choose from 12 hours of the following approved by the e-Campus MPA Advisor:		12
POL 835	Sem Intergovernmental Relation	
POL 845	Community Development	
POL 846	Non-Profit Organizations	
POL 847	Grant Writing

**Department of History, Philosophy, and Religious Studies**

Dr. Timothy Smit, Interim Chair  
 Dr. Joshua Lynn, Graduate Coordinator  
 (859) 622-1365

The Department of History, Philosophy, and Religious Studies offers the Master of Arts in History through thesis, non-thesis, or applied history plans. Program plans provide courses in American and non-American history. The College of Education offers the Master of Arts in Education degree in secondary education with a concentration in history, and regulations for that degree may be found in the College of Education section of this *Catalog*.

**Master's**

- History, Master of Arts (M.A.) (p. 748)

**Courses**

**HIS 800. Historiography and Criticism. (3 Credits)**

A. A seminar in the history and theory of historical writing and fundamental techniques of the historian.

**HIS 802A. Historical Research and Writin. (3 Credits)**

(3). Prerequisite or Corerequisite: HIS 800. Historical research and methodologies using case studies of specific events in U.S. history that have influenced the development of cultures and civilizations.

**HIS 802B. Historical Research in Writing. (3 Credits)**

(3) Prerequisite or Corerequisite: HIS 800. Historical research and methodolgies using case studies of specific events in European history that have influenced and continue to influence the development of cultures and civilizations. Course may be retaken to a maximum of 9 hours provided the subject matter differs each time.

**HIS 802C. Historical Research and Writin. (3 Credits)**

(3.) A. Prerequisite or Corerequisite: HIS 800. Historical research and methodologies using case studies of specific events in non-Western history that have influenced and continue to influence the development of cultures and civilizations. Course may be retaken to a maximum of 9 hours provided the subject matter differs each time.

**HIS 838. Practicum in Applied History. (3 Credits)**

A. Prerequisite: departmental approval. Supervised practice in applied history settings. Selective participation varies with the student’s program and participation. May be retaken at the discretion of the department. Three credit hours will require approximately 150 hours of supervised practice plus completion of an independent research project over the course of a semester. Maximum of three credit hours may be applied to the M.A. program in history for students in Thesis or Non-Thesis Plan. Credit up to nine hours awarded toward degree if in Applied History Plan.

**HIS 839. Co-op Study in Applied History. (1-3 Credits)**

Prerequisite: Departmental approval; must have been admitted to Masters in history program. Work in placement related to applied history. One to three hours credit per semester or summer. A minimum of 80 hours employment required for each semester hour credit. May be retaken for a maximum of 3 hours. Credit up to 6 hours awarded toward degree if in Applied History Plan. Credit may not otherwise be substituted for any M.A. requirements.

**HIS 840. HIS Topics for 4th-8th Grd Tch. (3 Credits)**

(3) A. Seminar on selected topics in history specifically related to 4th through 8th- grade social-studies curriculum. Course may be retaken to a maximum of 9 hours provided the subject matter differs each time. Course is not open to History M.A. students or to secondary-education teachers. Course cannot be used to fulfill requirements for a History M.A.

**HIS 849. Reading and Research:\_\_\_\_\_ (3 Credits)**

A. Independent study in a specific field. Student must have the independent study proposal form approved by faculty supervisor and department chair prior to enrollment. May be retaken to a maximum of six hours, provided the subject matter differs each time.

**HIS 860. Readings in American History. (3 Credits)**

A. Seminar on selected developments in American history. May be retaken to a maximum of nine hours, provided the subject matter differs each time.

**HIS 861. Readings in European History. (3 Credits)**

A. Seminar on selected developments in European history. May be retaken to a maximum of nine hours, provided the subject matter differs each time.

**HIS 862. Reading in Asian/African His:\_. (3 Credits)**

A. Seminar on selected developments in Asian or African history. May be retaken to a maximum of nine hours, provided subject matter differs each time.

**HIS 863. Readings in Latin American His. (3 Credits)**

A. Seminar on selected developments in Latin American history. May be retaken to a maximum of nine hours, provided subject matter differs each time.

**HIS 864. Comparative History:\_\_\_\_\_. (3 Credits)**

A. Seminar on issues in comparative history. May be retaken to a maximum of nine hours, provided the subject matter differs each time.

**HIS 865. Conceptualizing History:\_\_\_\_\_. (3 Credits)**

A. Analysis of recent trends in the teaching and conceptualizing of world history, western civilization, and/or U.S. History. May be retaken to a maximum of nine hours, provided the subject matter differs each time.

**HIS 899. Thesis. (3-6 Credits)**

May be retaken to a maximum of six hours.

**HIS 899C. Thesis Continuation. (3-9 Credits)**

I, II. Prerequisite: departmental approval. Continuation of research leading to thesis as directed by the chair of the thesis committee. Student must already have registered for six hours of HIS 899. May not be used to satisfy degree program requirement.

## History, Master of Arts (M.A.)

### General Information

The department strongly recommends that students who plan to seek a doctoral degree choose the thesis plan. At least one-half of the course work leading to the degree must be in 800-level courses.

### Language

Though the department no longer maintains a language requirement, it strongly recommends that students who plan to seek a doctoral degree should acquire foreign language proficiency while completing the masters degree.

## Admission Requirements

Admission is determined by the Department of History, Philosophy, and Religious Studies in cooperation with the Office of Graduate Education and Research. To be considered for admission, applicants must meet the general admission requirements of the Graduate School. In addition, the following is required of each candidate:

Completion of at least a satisfactory undergraduate minor in history or the equivalent.

Applicants must arrange for submission of three letters of recommendation.

## Program Requirements

<b>Total Hours</b>		<b>30</b>	

1

The department requires that at least one of the courses used to satisfy the eighteen credit hours represented by these three requirements cover in a substantial way a period before the year 1800.

2

The department requires successful completion of at least one of the following research seminars: HIS 802A Historical Research and Writin, HIS 802B Historical Research in Writing, or HIS 802C Historical Research and Writin.

## Exit Requirements

### Thesis (Thesis Plan only)

Each candidate must submit a thesis which demonstrates an appropriate level of skill in historical research and writing. Should the thesis topic selected require additional research skills (i.e. foreign language, statistics, or other), the candidate may be required by the graduate committee to acquire, through additional course work, the necessary skills. The student must complete six hours of thesis credit (HIS 899 Thesis) and may, if extra time is needed to complete the project, register for six additional hours of thesis credit, although this extra six hours does not count as part of the thirty total credit hours needed for completion of the History M.A. program. The thesis shall be submitted to the student's major professor at least 30 days in advance of graduation. Acceptance of the thesis shall be decided by a special reading committee. This committee shall be composed of the major professor and two other faculty members recommended by the chair of the major department and appointed by the Dean of Graduate Education and Research. The committee shall complete its review of the thesis at least one week prior to the final oral examination.

### Comprehensive Examination (Thesis Plan)

The program will culminate in a written comprehensive examination (GRD 857G MA Hist Written Comp Exam) designed to test the student's general knowledge of history and an oral defense of the thesis (GRD 858H MA Hist Oral Comp Exit Exam).

### Comprehensive Examination (Non-Thesis Plan and Applied History Plan)

Upon completion of course work, the student's knowledge of history will be tested by a comprehensive written examination (GRD 857G MA Hist Written Comp Exam). The program will culminate in an oral examination designed to test the student's mastery of graduate course work (GRD 858H MA Hist Oral Comp Exit Exam).

# The Institute for Creative and Collaborative Arts: Art, Communication, Music, and Design

- School of Art and Design (p. 750)
- School of Communication (p. 753)
- School of Music (p. 753)

## School of Art and Design

Executive Director

The Master of Arts in Education degree and the Master of Arts Teaching degree with a concentration in art are offered in the College of Education with the cooperation of the Department of Art. The regulations for the degrees may be found in the College of Education section of this *Catalog*.

## Master's

- Instructional Design and Learning Technology, Master of Science with a Concentration in Online Learning Design (M.S.) (p. 751)
- Instructional Design and Learning Technology, Master of Science with a Concentration in User Experience Design (M.S.) (p. 752)

## Certificate

- Online Learning Design, University Certificate (p. 752)
- User Experience Design, University Certificate (p. 753)

## Courses

### Design

#### DES 721. Analytical Furniture Design. (3 Credits)

A. Analysis of furniture design in terms of integration of function and styles with structure; coordination of furniture style with interior architectural expression.

#### DES 850. Graphic Design for Learning. (3 Credits)

(3) I, II. Introduction to the elements and principles of design, methods, tools and software used in the field of graphic design.

#### DES 851. User Experience Design. (3 Credits)

(3) I, II. Introduction to the processes and methods of User Experience Design, including user research, contextual design, design thinking, ideation, and prototyping of a service or product.

### Instructional Design Learning

#### IDL 800. Intro to Instructional Design. (3 Credits)

(3) I, II. A comprehensive introduction to the process, theories and profession of Instructional Design.

#### IDL 801. Instructional Design Mastery. (3 Credits)

(3) I, II. Prerequisite: IDL 800. Application of design theory, implementation of instructional lessons, selection of suitable instructional technology, evaluation of learners and instructional products, and instruction implementation.

#### IDL 802. Data-Driven Decision Making. (3 Credits)

(3) I, II. Data collection and analysis techniques involved in making sound instructional/training and development decisions in organizations.

#### IDL 810. Multimedia for Learning. (3 Credits)

(3) A. Exploration, design, and creation of multimedia products that support sound instructional practices.

#### IDL 811. Online Learning Design. (3 Credits)

(3) A. Exploration of the modern principles and practices that drive effective online learning, analysis of structure and interaction of online courses to create meaningful online experiences.

#### IDL 812. Game Design for Learning. (3 Credits)

(3) I, II. Application of game design in creating instructional materials, development of various gaming concepts, and experiences in gamified learning.

**IDL 813. Instruction for Diverse Learners. (3 Credits)**

(3) A. Exploration of design learning experiences while considering diverse audiences and environments, learner characteristics, training theories, and deployment of tested instructional strategies to improve learning outcomes.

**IDL 814. Training the Modern Workforce. (3 Credits)**

(3) I, II. Prerequisite: IDL 802. Examining professional development components of workforce training, training programs, and responding to the changing organizational needs.

**IDL 820. Field Internship. (3 Credits)**

(3) A. Prerequisites: Completion of 2 out of 10 program courses (6 credits) and departmental approval. Guided internship designed to afford opportunities for the IDLT students to practice learned lessons in highly successful environments and collaborate with peers and mentors who have practical experience to share.

**IDL 821. Portfolio and Exit Review. (3 Credits)**

(3) A. Prerequisites: Completion of nine program-required courses (27 credits) and departmental approval. Culmination of studies and experiences in IDLT. Creation of a professional web portfolio that showcases student's most significant work and internship experiences.

**IDL 890. Independent Study. (3 Credits)**

(3) A. Prerequisite: Approved Independent Study Proposal Form and Departmental Approval. Faculty Guided Independent research, which allows students to design a research problem and make experimental observations and conclusions. Students will perform in-depth research pertinent to IDLT and craft a project based on their investigation.

## Instructional Design and Learning Technology, Master of Science with a Concentration in Online Learning Design (M.S.)

### General Information

The master's degree in Instructional Design and Learning Technology prepares students to efficiently enter the profession as those who employ systematic, evidence-based approaches to designing and developing instructional products and experiences across multiple diverse environments. Students will acquire not only specialized foundational and theoretical knowledge of the field, but also hone relevant, industry-accepted skills while making connections with current practitioners. Because nearly every course culminates in development of a professional instructional product, students can be assured they are gaining relevant experience as well as curating a demonstrable portfolio showcasing their talents and abilities, a critical factor in many hiring decisions.

### Admission Requirements

Applicants for admission to the Master of Instructional Design and Learning Technology program must:

1. Meet all admission requirements of the Graduate School;
2. Hold a bachelor's or masters' degree
3. Have a 2.5 overall undergraduate GPA. Applicants who do not meet the GPA requirement for admission must submit official GRE scores to be considered for Probationary Admission. Applicants with Masters' degree can submit undergraduate or graduate transcripts.

4. Submit 2 letters of recommendation;
5. Write a letter of intent on why they want to pursue this degree.

### International Students

International students, please see application/admission instructions at: [https://gradschool.eku.edu/Intl\\_students](https://gradschool.eku.edu/Intl_students) ([https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgradschool.eku.edu%2FIntl\\_students&data=05%7C01%7C1da.Kumoji%40eku.edu%7Cbb7a69db11604764e69808db816da2a8%7Ce23043271af04dee83fbc1b2fd6db%7C0%7C0%7C638246080126445162%7CUnknown%7CTWFpbGZsb3d8eyJWljojoiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTil6k1haWwILC%7C3000%7C%7C%7C&sdata=Kh30fhrzgLmd5ZbX4dHnMqNPzlvb8S88PbJCireccul%3D&reserved=0](https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgradschool.eku.edu%2FIntl_students&data=05%7C01%7C1da.Kumoji%40eku.edu%7Cbb7a69db11604764e69808db816da2a8%7Ce23043271af04dee83fbc1b2fd6db%7C0%7C0%7C638246080126445162%7CUnknown%7CTWFpbGZsb3d8eyJWljojoiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTil6k1haWwILC%7C3000%7C%7C%7C&sdata=Kh30fhrzgLmd5ZbX4dHnMqNPzlvb8S88PbJCireccul%3D&reserved=0)).

### Program Requirements

Code	Title	Hours
<b>Core Courses</b>		
IDL 800	Intro to Instructional Design	3
IDL 801	Instructional Design Mastery	3

Foster 101

[www.music.eku.edu](http://www.music.eku.edu) (<https://music.eku.edu>)

### General Information

The EKU School of Music offers the Master of Music degree with concentrations in Conducting, Music Education, and Conducting.

### Program Objectives

Upon successful completion of the Master of Music program, graduates will be prepared to analyze and evaluate all forms of music, teach, write or perform in a specific genre of music, and research in depth in several fields of music.

In addition, all music education majors will demonstrate the ability to write and research in their field as well as teach a variety of instruments/voice types, develop music curricula, and engage in effective teaching practices. All theory and composition students will demonstrate both composition and analytical/theoretical skills and present original compositions in public recitals as well as researching in the field. All conducting students will demonstrate rehearsal skills, research literature for an array of ensembles, and demonstrate an ability to work with other musicians through cooperative learning experiences. All performance majors will prepare a performance recital, research and analyze repertoire presented on the recital, in addition to demonstrating different pedagogical approaches in their area. All pedagogy and performance majors will demonstrate the ability to analyze student performances and engage in effective teaching practices for the improvement of student performance as well as prepare and present their own performance recital with repertoire that has been thoroughly researched and presented with correct performance practice.

Graduates of the Master of Music program are prepared to further their education at doctoral schools across the country, teach/conduct in college/public schools, teach/conduct in the church music field, compose or arrange, perform/conduct in theatrical/operatic settings, in U.S. service bands, in professional orchestras, or a combination of several areas.

### Master's

- Master of Music with a Concentration in Conducting (M.M.) (p. 755)
- Master of Music with a Concentration in Music Education (M.M.) (p. 756)
- Master of Music with a Concentration in Performance (M.M.) (p. 757)

### Courses

#### MUS 701. Music Leadership. (2 Credits)

(2) II. Development of music leadership skills for the 21st century. Leadership styles, digital marketing, grant writing, and policy development will be addressed.

#### MUS 710. Special Topics in Music:\_\_\_\_. (1-3 Credits)

A. Prerequisite: MUS 480 or equivalent, or departmental approval. Advanced topics in music. May be retaken to a maximum of six hours, provided the topics are different.

#### MUS 710S. Special Topics in Music:\_\_\_\_. (1-3 Credits)

A. Prerequisite: Departmental approval. Advanced topics in music that incorporates a service learning component. May be retaken to a maximum of six hours, provided the topics are different. Credit will not be awarded for both MUS 710 and 710S.

#### MUS 711. Jazz Theory. (2 Credits)

(2) I. Study of musical concepts relating to the jazz idiom. Credit will not be awarded for both MUS 511 and 711.

#### MUS 712. Piano V. (1-4 Credits)

I, II. May not be taken for credit by piano majors.

#### MUS 713. Techniques of Accompanying. (1 Credit)

I, II. Practical training in the tradition, interpretation, and execution of accompaniments. May be retaken to a maximum of two hours.

**MUS 716. Studio Management. (1 Credit)**

(1) II. Pre-requisite: departmental approval. This course explores business practices and administrative duties of managing an applied music studio. Credit will not be awarded to students who have credit for MUS 516 and 816.

**MUS 717. Arranging. (2 Credits)**

(2) I. A study of the practical skills and fundamental knowledge needed to arrange music for instruments and/or voices in various ensemble configurations. Credit will not be awarded for both MUS 517 and 717.

**MUS 719. Performance Temperament. (2 Credits)**

(2). A. Condition students for optimal public performance. Strategies for artful and effective practicing/preparation, maintaining motivation, as well as confronting performance anxieties and achieving peak performance. Credit will not be awarded for both MUS 519 and 719.

**MUS 720. Advanced Diction for Singers. (1 Credit)**

A. Prerequisite: departmental approval. For voice, education, and choral conducting students. Enunciation and projection; accurate pronunciation in German and French. Phonetics and the International Phonetic Alphabet.

**MUS 722. Voice V. (1-4 Credits)**

I, II. May not be taken for credit by voice majors.

**MUS 742. Organ V. (1-4 Credits)**

I, II. May not be taken for credit by organ majors.

**MUS 749. Career Development in Music. (2 Credits)**

(2) Development of the professional skills necessary for a sustainable career in music. Selfmarketing, business and finance, networking, and interviewing topics will be explored. Creation of professional documents needed for personal promotion in the industry. Credit will not be awarded for both MUS 749 and 549.

**MUS 750. Teaching Techniques. (1 Credit)**

A. Analysis of current teaching methods and materials with the intention of developing sound teaching procedures. May include observation and performance. Topics in woodwinds, brass, percussion, strings, voice, piano, and organ. Credit will not be awarded for both MUS 550 and 750.

**MUS 751. Performance Literature. (1 Credit)**

A. Literature for various performing media relative to performance practices and problems. Topics in woodwinds, brass, percussion, strings, voice, piano and organ. Credit will not be awarded for both MUS 551 and 751.

**MUS 755. Symphonic Music Literature. (3 Credits)**

II. Prerequisite: MUS 371 and 372. Evolution of the symphony from its beginning to the 20th century with emphasis on score reading and listening.

**MUS 756. Choral Music Literature. (2 Credits)**

II. Survey of choral music literature from the 15th century to the present.

**MUS 757. Symphonic and Wind Band Litera. (2 Credits)**

(2).I. Evolution of instrumental music from its beginning to modern day. Includes a detailed exploration of music and the many artistic, social, and cultural forces that helped to shape these genres.

**MUS 786. Workshop in Instrumental Music. (1-4 Credits)**

A. Topics in band or orchestra procedures. May be retaken to a maximum of four hours.

**MUS 788. Pedagogy of Theory. (2 Credits)**

A. Comparative study of theory systems with emphasis on presentation and illustrative exercises dealing with related theoretical problems.

**MUS 789. Workshop in Choral Music. (1-4 Credits)**

A. Techniques, literature, and materials pertinent to a particular area or areas of preparation and performance of choral music. Topics to be announced. May be retaken to a maximum of four hours.

**MUS 802. Assessment in Music. (2 Credits)**

(2). A. Principles and procedures in assessing musical skills, attitudes, aptitudes, and understandings. Topics include assessment development and analysis, addressing the scope of psychomotor, cognitive, and affective domains related to music education.

**MUS 803. Learning & Behavi Mod in Music. (2 Credits)**

(2). II. Methods and techniques of teaching and behavior modification specific to music ensemble and classroom settings. Topics include social and academic behavior, and the application of research-based techniques to lesson planning, and student assessment.

**MUS 805. Chamber Music. (0.5 Credits)**

A. May be retaken to a maximum of one hour.

**MUS 812. Piano. (1-5 Credits)**

I, II. Prerequisite: MUS 412. Four years or equivalent, as demonstrated by the student's proficiency in piano. May be retaken.

**MUS 822. Voice. (1-5 Credits)**

I, II. Prerequisite: MUS 422. Four years or equivalent, as demonstrated by the student's proficiency in voice. May be retaken.

**MUS 824. Chamber Singers. (1 Credit)**

Highly select small ensemble dedicated to the highest standards of preparation and choral literature from all style periods. Membership is by audition only. May be retaken to a maximum of four credits.

**MUS 825. Concert Choir. (1 Credit)**

Large mixed chorus open to all singers. This choir places and emphasis on developing sight reading and performance skills while providing a challenging and satisfying musical experience. Course may be retaken.

**MUS 826. University Singers. (1 Credit)**

I, II. Advanced choral ensemble of mixed voices open by audition only. Rehearsal and performance of choral repertoire from various styles and eras. Presents several major concerts throughout the year on and off campus. Course may be retaken.

**MUS 827. Opera Workshop. (1 Credit)****MUS 828A. EnChor (SSAA Choir). (1 Credit)**

(0-1) I, II. Choral ensemble of soprano/mezzo/alto voices open to all students. Rehearsal and performance of choral repertoire from various styles and eras. Course may be retaken.

**MUS 828B. Koros (TTBB Choir). (1 Credit)**

(0-1) I, II. Choral ensemble of tenor/baritone/bass voices open to all students. Rehearsal and performance of choral repertoire from various styles and eras. Course may be retaken.

**MUS 832. String Instruments. (1-5 Credits)**

I, II. Four years or equivalent as demonstrated by the student's proficiency on string instruments. Graduate applied instruction in violin, viola, violoncello, string bass, viola da gamba or guitar. May be retaken.

**MUS 835. Orchestra. (1 Credit)**

I, II. May be retaken to a maximum of two hours.

**MUS 842. Organ. (1-5 Credits)**

I, II. Prerequisite: MUS 442. Four years or equivalent, as demonstrated by the student's proficiency on organ. May be retaken.

**MUS 844. Applied Conducting. (1 Credit)**

(1) A. Exploration and enhancement of all elements of the conductor's being, in conjunction with exploring conducting pedagogy and skills, leadership, score study, and one's own awareness of their self-projection in front of an ensemble.

**MUS 845. Brass Instruments. (1-5 Credits)**

I, II. Prerequisite: MUS 445. Four years or equivalent, as demonstrated by the student's proficiency on brass instruments. Graduate applied instruction in cornet and trumpet, French horn, baritone horn, trombone, or tuba. May be retaken.

**MUS 846. Woodwind Instruments. (1-5 Credits)**

I, II. Prerequisite: MUS 446. Four years or equivalent, as demonstrated by the student's proficiency on woodwind instruments. Graduate applied instruction in flute, oboe, clarinet, bassoon, or saxophone. May be retaken.

**MUS 847. Percussion. (1-5 Credits)**

I, II. Prerequisite: MUS 447 or equivalent, as demonstrated by the student's proficiency in percussion. May be retaken.

**MUS 850. Small ensembles. (0.5 Credits)**

I, II. May be retaken to a maximum of one hour.

**MUS 851. Advanced Woodwind Techniques. (3 Credits)**

A. Prerequisites: MUS 351 and 352 or instructor approval. Techniques, literature and pedagogical approaches to teaching woodwind instruments in public schools.

**MUS 854. Jazz Ensemble. (1 Credit)**

(0-1) I, II. Rehearsal and performance of standard Jazz Ensemble literature including jazz improvisation, jazz styles, and form. Course open by audition only. May be retaken to a maximum of four hours.

**MUS 855. Band. (1 Credit)**

I, II. May be retaken to a maximum of two hours.

**MUS 873. Music in Society. (3 Credits)**

(3) II. A survey of the roles that music and musicians have had in societies, from past to present. The social and cultural foundations of music will be explored, including the production, content, and consumption of music.

**MUS 878. Foundations of Music. (3 Credits)**

A. Historical and philosophical foundations of music and music pedagogy. Diverse trends are compared with emphasis on materials and personal development in music for the general music specialist.

**MUS 881. Seminar in Choral Conducting. (1 Credit)**

I. The study of non-gestural issues in the field of choral conducting, including auditions, choral tone, programming, recruiting, standing formations, touring, voicing, and warm-ups.

**MUS 882. Seminar in Instrumental Conducting. (1 Credit)**

II. The study of gestural and non-gestural issues in the field of instrumental conducting, including auditions, instrument and ensemble color, performance practice, rehearsal techniques, ensemble set-up, warm-ups, and other special topics.

**MUS 883. Sem:Choral/Instrum Conducting. (2 Credits)**

A. Techniques in the preparation, conducting, and performance of choral/instrumental music. Survey of high school and college choral or instrumental literature.

**MUS 885. Psychology of Music. (3 Credits)**

A. Reactions to musical stimuli; musical aptitude and achievement; application of psychological theories to musical learning.

**MUS 887. Analytical Techniques I. (3 Credits)**

A. Prerequisite: MUS 884 or equivalent. Significant forms, procedures, and compositional devices relevant to the major stylistic periods from the Renaissance to the Contemporary.

**MUS 889. Advanced Composition I. (2 Credits)**

A. Prerequisite: MUS 483 or equivalent, or departmental approval. Individual guidance in the exploration of advanced compositional techniques with emphasis on larger forms, May be retaken to a maximum of four hours.

**MUS 896. Spec Proj in Comp, Pedagogy. (1-3 Credits)**

I, II. Requirement for the Master of Music in composition, pedagogy, music education, pedagogy, choral conducting and instrumental conducting. May be elected by other Master of Music concentrations. May be fulfilled by composition, analytical paper, or conducting recital. May be retaken to a maximum of three credit hours.

**MUS 897. Graduate Recital. (2,3 Credits)****MUS 898. Research in Mus & Mus Educ. (3 Credits)**

A. Research techniques appropriate to music and music education; principles of research design; organization of the research report; analysis of representative research.

**MUS 899. Thesis. (1-3 Credits)**

I, II. May be retaken to a maximum of three credit hours.

## Master of Music with a Concentration in Conducting (M.M.)

### Admission Requirements

Applicants for admission to the Master of Music program must:

1. Meet all admission requirements of the Graduate School;
2. Hold a bachelor's degree in music or certification in music from an accredited institution;
3. Have a 2.5 overall undergraduate GPA;
4. Submit 2 letters of recommendation;
5. Demonstrate competent applied music skills through a performance audition for either applied study or for admission to music ensembles.

Applicants who do not meet the GPA requirement for admission must submit official GRE scores to be considered for Probationary Admission. Expected target scores on the GRE for Probationary Admission are 144 on the Verbal and 3.0 on the Analytical Writing sections of the exam.

### Admission Requirements for Individual Concentrations Conducting Concentration

Candidates who pass a pre-screening video audition will be invited to campus for a live audition with a university ensemble before a committee of music faculty, and must possess either an undergraduate degree in music from an accredited institution or equivalent course work.

### Program Requirements

### Thesis

The thesis is optional in this program.

## Master of Music with a Concentration in Performance (M.M.)

### Admission Requirements

Applicants for admission to the Master of Music program must:

1. Meet all admission requirements of the Graduate School;
2. Hold a bachelor's degree in music or certification in music from an accredited institution;
3. Have a 2.5 overall undergraduate GPA;
4. Submit 2 letters of recommendation;
5. Demonstrate competent applied music skills through a performance audition for either applied study or for admission to music ensembles.

Applicants who do not meet the GPA requirement for admission must submit official GRE scores to be considered for Probationary Admission. Expected target scores on the GRE for Probationary Admission are 144 on the Verbal and 3.0 on the Analytical Writing sections of the exam.

### Admission Requirements for Individual Concentrations

#### Performance Concentration

Candidates must audition before a committee of music faculty (recorded auditions may be allowed); and must possess an undergraduate degree in music from an accredited institution.

**Note:** Voice candidates in their audition must include works in French, Italian, and German and must have either a demonstrated competency or at least two semesters of undergraduate course work in any one language—French, Italian, or German. Candidates will also show two semesters of diction study and a vocal pedagogy course at the undergraduate level. Those who have not completed undergraduate foreign language, diction or pedagogy requirements will complete them as part of the Masters degree. The undergraduate language credits will not count as credit toward the MM degree, diction and pedagogy (MUS 720 Advanced Diction for Singers and MUS 750 Teaching Techniques) may count toward the MM degree electives.

## Department of Language & Cultural Studies, Anthropology, and Sociology

Dr. Abbey Poffenberger, Chair  
[www.foreignlanguages.eku.edu](http://www.foreignlanguages.eku.edu) (<http://www.foreignlanguages.eku.edu>)  
 (859) 622-2996

The Department of Languages & Cultural Studies, Anthropology, and Sociology cooperates with the College of Education in offering the Master of Arts in Teaching with the concentration in Spanish. The program is described in the College of Education section of this *Catalog*.

# Department of Psychology

Dr. Jaime Henning, Interim Chair

Dr. Michael McClellan, Director of Clinical Training

Dr. Robert Mitchell, Coordinator, General Psychology with Experimental Concentration

Dr. MyraBeth Bundy, Coordinator, General Psychology with Applied Behavior Analysis Concentration

Dr. Yoshie Nakai, Coordinator, I/O Psychology

www.psychology.eku.edu (<http://www.psychology.eku.edu>)  
(859) 622-1105

## General Information

The Department of Psychology offers the Master of Science degree in Clinical Psychology, Industrial and Organizational Psychology, and General Psychology (with a Concentration in either Experimental Psychology or Applied Behavior Analysis), and the Doctor of Psychology (Psy.D) degree in Clinical Psychology. Clinical psychology students may apply for the Autism Spectrum Disorder Certificate, offered in cooperation with the Department of Occupational Therapy and Special Education. Requirements for this certificate can be found below. Students holding a Master's Degree may apply for the Applied Behavior Analysis Certificate.

## Doctoral

- Clinical Psychology, Doctor in Psychology (Psy. D.) (p. 766)

## Master's

- Clinical Psychology Program, Master of Science (M.S.) (p. 765)
- General Psychology, Master of Science with a Concentration in ABA (M.S.) (p. 767)
- General Psychology, Master of Science with a Concentration in Experimental Psychology (M.S.) (p. 768)
- Industrial and Organizational Psychology, Master of Science (M.S.) (p. 768)

## Certificate

- Applied Behavioral Analyst Certification, University Certificate (p. 764)
- Autism Spectrum Disorder, University Certificate (p. 764)

## Courses

### Occupational Therapy

#### OTS 715. Early Child Sensorimotor Devel. (3 Credits)

A. Prerequisite: education major or degree or instructor's approval. Provides an overview of normal sensorimotor development in infants and young children. Includes contrasting normal/ abnormal development and application of appropriate developmental tasks. Laboratory experiences will be provided.

#### OTS 720. Provid Hlth Serv in Appalachia. (3 Credits)

A. Prerequisite: departmental approval. An analysis of development and delivery of health care services in Appalachia. Examination of relevant current and historical factors, which have an impact on the health of the Appalachian people.

#### OTS 800. OBP: Early Childhood. (3 Credits)

(3) A. Evaluation and intervention related to occupational performance for individuals accessing health and education systems ages 0-5. Theory driven and client centered practices for supporting occupational performance.

#### OTS 804. Practice Experience Prep I. (3 Credits)

A. Preparation for Level II fieldwork, Applied Leadership Experience and Capstone.

#### OTS 805. Practice Experience Prep II. (3 Credits)

A. Pre-req: OTS 804. Preparation for Applied Leadership Experience and Capstone.

#### OTS 810. OBP: Children and Youth. (3 Credits)

(3) A. Evaluating and intervention related to occupational performance in children ages 5-21 accessing health and education systems. Theory driven and client centered practices for supporting occupational performance.

#### OTS 815. OBP: Neurological. (3 Credits)

A. Evaluation and intervention related to preventing and remediating neurologic diagnoses. Theory driven and client centered practices for supporting occupational performance.

#### OTS 820. OBP: Fundamentals. (4 Credits)

(4) A. Corequisite: OTS 821. Foundational knowledge in occupation-based practice including philosophy, theory, context, process, and reasoning. Emphasis on active learning and reasoning skills.

#### OTS 821. Level I OT Experience. (3 Credits)

A. Integration and application of foundational knowledge of occupation-based practice through participation in varied practice experiences across a continuum of care. May be retaken to a maximum of 9 hours.

#### OTS 822. OBP: Health Care Practice 1. (4 Credits)

A. Corequisite: OTS 821. Lecture and lab to include theories, principles and methods of evaluation, intervention and outcome processes for individuals accessing health systems. Course will focus on engagement in occupation to support participation in life roles across the lifespan.

#### OTS 824. OBP: Health Care Practice 2. (4 Credits)

A. Prerequisites: OTS 821 and OTS 822. Continued study of theories, principles and methods of evaluation, intervention and outcome processes for individuals accessing health systems. Course will focus on engagement in occupation to support participation in life roles across the lifespan.

#### OTS 825. technology and Rehabilitation. (3 Credits)

A. Prerequisite: computer literacy or departmental approval. Advanced exploration of occupational therapy knowledge and skill about assistive technology. Emphasis on application and use of assistive technology to enhance occupational performance of individuals with disabilities.

#### OTS 830. OBP: Education Communities. (4 Credits)

A. Prerequisites: OTS 824 and OTS 832. Corequisite: OTS 871. Occupation-based assessment and intervention for children and young adults in educational contexts. Course addresses models of practice, service delivery, federal/state legislation and philosophy of administration. Active learning experiences in the community.

#### OTS 831. Practice Seminar II. (2 Credits)

A. Prerequisite: OTS 821 or Corequisites: OTS 824 and OTS 832. Integration of occupation-based practice through reflection on curriculum themes, participation in community-based settings, preparation for Level II Fieldwork and ongoing development of a professional portfolio.

**OTS 832. OBP: Community-Based Practice. (4 Credits)**

A. Corequisite: OTS 831. Theories, principles and methods of evaluation, intervention and outcome processes for individuals and groups assessing social systems through the lifespan. Course will focus on engagement in occupation for community participation.

**OTS 834. OBP: Advanced Dimensions. (3 Credits)**

A. Prerequisite: permission of department. Advanced conceptualization and synthesis of Occupational Science and existing models of Occupational Therapy for practice. Includes analysis and application of occupation-based practice and evidence within specialty areas.

**OTS 835. OT Intervention in Workplace. (3 Credits)**

I, II, A. Prerequisite: OTS 820 or departmental approval. Exploration of the direct and indirect service roles and functions of the occupational therapist in the workplace. Emphasis will be on the work-related behaviors and environmental assessments for health promotion, prevention and work adjustment.

**OTS 836. OBP: Optimizing Occupation. (3 Credits)**

A. Prerequisite: graduate standing in the occupational therapy program; OTS 822, and 832. Specialized evaluation and intervention in occupational therapy practice with emphasis on emerging practice areas. Students will synthesize and apply skills of best practice for optimizing occupations.

**OTS 837. UE Evaluation & Intervention. (3 Credits)**

A. Prerequisite: OTS 822 or departmental approval. This course focuses on advanced study of the upper extremity including evaluation and treatment techniques in evidence-based occupational therapy practice.

**OTS 840. OBP: Mental Health. (3 Credits)**

A Evaluation and intervention related to mental health conditions: Neurocognitive, psychosocial, and behavioral. Theory driven and client centered practices for supporting occupational performance.

**OTS 845. Health Care Practice Fieldwork. (6 Credits)**

A. Prerequisite: Successful completion of all didactic coursework or department approval. Twelve weeks of fieldwork in health care practice to promote systematic evaluation; diagnose occupational performance deficits; develop and implement intervention plans based on occupational profiles and evidence; measure client outcomes; and document findings.

**OTS 846. Community Practice Fieldwork. (3-5 Credits)**

I. Prerequisite: Successful completion of all didactic coursework. Six to ten-week fieldwork in community/education to promote systematic evaluation; diagnose occupational performance deficits; develop and implement intervention plans based on occupational profiles and evidence; measure client outcomes; and document findings.

**OTS 846S. Early Childhood Practice. (3 Credits)**

Prerequisite: OTS820 or departmental approval. Advanced study of theories, models of practice, and therapeutic approaches in early intervention and preschool environments within the context of state and federal laws. Emphasizes therapeutic interventions in early childhood through service learning.

**OTS 847. Emerging Practice Fieldwork. (1-3 Credits)**

Prerequisite: Successful completion of all didactic coursework. Two to six week fieldwork in an emerging or traditional practice settings to develop/refine skills. Includes online reflective seminar.

**OTS 850. Management Principles for OT. (3 Credits)**

A. Principles of supervision, collaboration, strategic planning, and developing, funding, and managing an occupational therapy practice.

**OTS 851. Strategic Communication in OT. (3 Credits)**

A. Prerequisite: undergraduate/graduate course in administration or consent of instructor. Study of change theory and factors affecting communication in practice settings.

**OTS 852. OT Serv in Mental Hlth Setting. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Examination of external forces influencing mental health services and models of occupational therapy service delivery, emphasizing community-based and rural health programs.

**OTS 853. Leadership in Human Services. (3 Credits)**

A. Advance ethical leadership skills through development and application of current leadership theory to become a change agent to positively impact the profession.

**OTS 855. Role of OT & the Aging Adult. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Advanced study of occupational therapy's role in delivering services to the aging adult in emerging/innovative programming. Identification and analysis of factors which promote/hinder quality of life.

**OTS 855S. Role of OT & the Aging Adult. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Advanced study of occupational therapy's role in delivering services to the aging adult in emerging/innovative programming. Identification and analysis of factors which promote/hinder quality of life. Credit will not be awarded for both OTS 855 and 855S.

**OTS 860. OBP: Emerging Practice. (3 Credits)**

A. Evaluation and intervention related to emerging areas of occupational therapy practice, including assistive technology. Theory driven and client centered practices for supporting occupational performance.

**OTS 862. Thera. Modalities in OT Pract. (3 Credits)**

Addresses occupational therapy theoretical principles, neurophysiological and electrophysical changes that occur as a result of the application of selected physical and electrical modalities. Students will develop skill in the application of these modalities.

**OTS 863. Occupation & Sensory Process. (3 Credits)**

A. Understanding the impact of sensory processing disorders on occupational natures will enable students to provide appropriate intervention. Occupational adaptation and sensory integrative theories will be applied as conceptual frameworks for occupational therapy intervention.

**OTS 864. Early Childhood Practice. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Advanced study of theories, models of practice, and therapeutic approaches in early intervention and preschool environments within the context of state and federal laws. Emphasizes the interdisciplinary nature of therapy service delivery in the early childhood.

**OTS 864S. Early Childhood Practice. (3 Credits)**

(A) Prerequisite: OTS 820 or departmental approval. Advanced study of theories, models of practice, and therapeutic approaches in early intervention and preschool environments within the context of state and federal laws. Emphasizes therapeutic interventions in early childhood through service learning.

**OTS 865. School-based Practice. (3 Credits)**

A. Prerequisite: Departmental approval. In-depth study of school-based therapy. Theories, principles, models of practice, and methods of therapy service delivery for students with learning and behavioral difficulties, within the context of state and federal laws.

**OTS 866. OT & Behavior Disorder in Sch. (3 Credits)**

A. Prerequisite: OTS 820 or departmental approval. Examination and application of occupational therapy theoretical models used in evaluation and intervention for this population and the external systems affecting service delivery.

**OTS 870. Profess Trends & Issues in OT. (3 Credits)**

I, II. Trends and issues impacting the occupational therapy profession. Advancement of professional roles of consultant, entrepreneur, educator, leader and researcher.

**OTS 871. Practice Seminar III. (2 Credits)**

A. Corequisite: OTS 830. Integration of occupation-based practice through reflection on curriculum themes, participation in community-based learning in education, preparation for Level II Fieldwork and completion of a professional portfolio.

**OTS 871S. Professional Seminar II. (3 Credits)**

A. Students assume leadership in learning communities, complete professional portfolios and participate in professional learning experiences. Credit will not be awarded for both OTS 871 and OTS 871S.

**OTS 875. Special Topics: \_\_\_\_\_ (1-3 Credits)**

Advanced study of selected topics in occupational therapy practice.

**OTS 880. Res in Occupational Therapy. (3 Credits)**

I, II, A. Exploration, critical analysis and application of research and evidence-based practice in occupational therapy. Emphasis on preparation and implementation of a research study.

**OTS 882. Advanced Occupational Science. (3 Credits)**

II. Exploration of occupational science as a disciplinary knowledge base, current research on occupation-based practice, and methods of developing occupation-based practice. Emphasis on change, clinical leadership and research.

**OTS 883. Change and Complexity in OBP. (3 Credits)**

A. Comprehensive critique of disciplinary literature describing professional applications of occupation. Deriving insights into occupation-based practice (OBP) through perspectives from history, systems, chaos, change, and complexity. Action and change research methods for the development of occupation-based practice.

**OTS 884. Qualitative Inquiry Approaches. (3 Credits)**

A. Prerequisite: Undergraduate course in research design. This course synthesizes the rationale, theoretical foundations, design, methods, analysis, and ethical issues related to qualitative research. Students analyze five approaches of qualitative inquiry, and develop a research prospectus.

**OTS 885. Occupational Perform. Measures. (3 Credits)**

A. Prerequisite: OTS 880 and occupational therapy graduate status or departmental approval. Analysis of clinical evaluation instrumentation. Review of measurement issues and use of instruments in evidence-based practice in occupational therapy. Integration into occupation-based practice.

**OTS 886. Culture and Diversity in OT. (3 Credits)**

A. Importance of culture and diversity in the understanding of health disparities in health care policy and OT practice. Global and national policy and program models for inclusion of culture, diversity and disability are highlighted.

**OTS 890. Independent Study in OT. (1-3 Credits)**

I, II, A. Prerequisite: advisor/departmental approval. Student initiated directed study. Regular consultation with faculty supervisor and final paper required. May be retaken under different subtopics to a cumulative maximum of six hours. Approval of independent study proposal by faculty supervisor and department chair must occur prior to enrollment.

**OTS 895. OT Research Project I. (3 Credits)**

(3) A Development and initiation of a research project as part of a research team. Application of critical thinking and clinical reasoning skills to investigate occupational science and occupational therapy research inquiries.

**OTS 896. Research Project II. (3 Credits)**

A. Prerequisite: OTS 895. Completion of a research project as part of a research team. Application of critical thinking and clinical reasoning skills to investigate occupational science and occupational therapy research inquiries and disseminate results.

**OTS 898. Thesis I. (3 Credits)**

I, II, A. Proposal development leading to thesis as directed by chair of thesis committee.

**OTS 899. Thesis II. (3 Credits)**

Research leading to thesis as directed by chair of thesis committee.

**OTS 899C. Thesis/Project Continuation. (1-3 Credits)**

I, II, A. Prerequisite: advisor/departmental approval. Continuation of research leading to thesis/ special project as directed by the chair of student's committee. May be retaken as necessary to complete research. May not be used to satisfy degree program requirements.

**OTS 901. OTD Leadership Seminar I. (3 Credits)**

A. Prerequisite: Enrollment in OTD Program. Foundational work for development of OTD capstone and Applied Leadership Experience. Conceptualize identity as a leader for change. Develop methods to assess population needs to improve occupation-based programming.

**OTS 902. OTD Leadership Seminar II. (3 Credits)**

A. Prerequisite or Corequisite: OTS 901. Explore options for professional development and leadership experiences. Assess population needs to support occupation-based programming.

**OTS 903. Capstone I: Project Development. (3 Credits)**

(3) Prerequisite: OTS 902. Design capstone project based on needs assessment, literature synthesis, and professional goals to serve as a change agent for occupation-based programming. Capstone emphases are ethical leadership within change and OBP for diverse populations.

**OTS 904. Capstone II: Implmt and Eval. (3 Credits)**

(3) A. Prerequisite: OTS 903. Implement capstone project. Evaluate capstone project outcomes to assess change in occupation-based programming.

**OTS 905. Applied Leadership Experience. (3-6 Credits)**

(3-6) I, A. Prerequisites: OTS 805 or 902. Custom-designed field-based experiences in the Occupational Therapy Doctorate. Emphases are on ethical leadership within change and excellence in occupation-based services for diverse populations.

**OTS 906. OTD Capstone. (1-3 Credits)**

A. Prerequisite: OTS 805 or 904. Integration and application of program outcomes through reflection on Applied Leadership Experience and completion of the capstone project and portfolio. Students present capstone project.

**OTS 910. Policy and Advocacy for OT. (3 Credits)**

(3) A. Analysis of social and healthcare policy on the profession of occupational therapy. Program development to address health disparities, and advocacy needs in emerging practice.

**OTS 911. Applied Research for OT. (3 Credits)**

(3) I. Students will apply research methods, synthesize, paradigms, design, methods, and ethical issues related to research, and discuss funding options. The role of the researcher as an agent of change in practice will be emphasized.

**OTS 912. Evidence-based Practice for OT. (3 Credits)**

(3) II. Evaluate and perform critical research appraisals to justify intervention decisions. Content focuses on: Clinical Reasoning, outcomes measurement, finding evidence, changes in practice, ethics, and communicating evidence-based decisions to stakeholders.

**OTS 913. Educational Practices for OT. (3 Credits)**

(3) I. Prerequisite: Enrollment in the OTD Program. Fundamental principles of designing and implementing educational programs across the lifespan. Educational strategies and learning theories will be analyzed and applied to clinical, community, and didactic settings and populations.

**Psychology****PSY 702. Behavioral Applications II. (3 Credits)**

Prerequisite: PSY 701. This course builds on principles of behavior analysis in creating behavior change across a range of populations, behaviors, and settings. The focus is on fundamental elements of behavior change.

**PSY 703. Practicum in Psychology. (1-3 Credits)**

A. Prerequisite: departmental approval. Practicum experience in which students will utilize their knowledge of psychological theory and methodology in an applied setting. Students will not receive credit for both PSY 503 and PSY 703. May be retaken to a maximum of 6 hours.

**PSY 710. Publishing Empirical Research. (3 Credits)**

(3) A. Prerequisite: Department approval. Students must submit proposals to instructor prior to enrollment. This course will focus on analyzing, writing and submitting results of a psychological study or experiment to a professional journal.

**PSY 713. Mind & Brain. (3 Credits)**

(3) A. Prerequisite: PSY 853(C) or departmental approval. A bridging discipline between cognitive science and biopsychology examining neural bases of consciousness, mental processes and complex behavior. Major topics include prefrontal cortex functioning, neural networks, decision making, working memory, emotional control, and frontal disconnections.

**PSY 766. Forensic Psychology. (3 Credits)**

A. Prerequisite: departmental approval. Review the roles of clinical psychologists in the legal system, focusing on principles of forensic mental health assessment, procedures of civil and criminal forensic psychological assessment, expert testimony, and forensic report writing.

**PSY 777. The Autism Spectrum. (3 Credits)**

A. Prerequisite: departmental approval. Assessment, diagnosis, and intervention in autism spectrum disorders across the lifespan. Conduct autism spectrum assessment and design interventions.

**PSY 779. History & Systems of Psychology. (3 Credits)**

A. A survey of the history of psychology and its various schools of thought and approaches to the study of behavior and mental processes.

**PSY 790. Tests & Measurements. (3 Credits)**

A. Prerequisite: PSY 200 or departmental approval. Study of measurement principles with application in psychology, business, industry, and government. Interpretation, use, and evaluation of measurement and job analysis methods. Reliability, validity, utility, ethical/legal concerns are examined.

**PSY 797. Advanced Topics in Psy. \_\_\_\_\_. (3 Credits)**

A. Prerequisite: PSY 200 or departmental approval. Selected topics for advanced study. Variable topics across semester in terms of student interest and available faculty. May be retaken provided the subject matter differs each time.

**PSY 802. Multicultural Psychology. (3 Credits)**

Prerequisite: Admission to the Psy. D. program. Designed to promote self-awareness of cultural values and biases, and increasing knowledge about how race, culture, gender, sexual orientation, and social class impact the professional relationship.

**PSY 803. Rural Mental Health. (3 Credits)**

Prerequisite: Admission to the Psy. D. program. This course is designed to provide an overview of rural mental health with an emphasis on addressing both geographic, economic, and cultural barriers to mental health care in rural communities.

**PSY 804. Introduction to I-O Psychology. (3 Credits)**

A. Prerequisite: departmental approval. Introduction to psychology theories and procedures applied to work. Topics include personnel psychology, organizational psychology, and ethical and legal concerns related to the practice of I-O Psychology.

**PSY 805. Quantitative Research Methods. (3 Credits)**

A. Prerequisite: departmental approval. Principles and techniques of scientific observation, control, and analysis in psychology. Evaluation of research designs and their implementation in professional settings.

**PSY 806. Applied Research Methods. (3 Credits)**

Prerequisite: Departmental Approval. Application of research methods, data analysis techniques, and reporting pertaining to the field of Industrial-Organizational psychology.

**PSY 807. Work Analysis. (3 Credits)**

A. Prerequisite: departmental approval. Psychological principles and techniques involved in job analysis, competency modeling, and job evaluation.

**PSY 808. Selection. (3 Credits)**

Prerequisite: Departmental Approval. Psychological theory, research, and practice pertaining to the personnel selection of human resources in the workplace.

**PSY 809. Performance Management. (3 Credits)**

A. Prerequisite: departmental approval. Psychological theory, research, and practice pertaining to the performance appraisal and performance management of human resources in the workplace.

**PSY 810. Consulting and Business Skills. (3 Credits)**

Prerequisite: Departmental Approval. Developing consulting skills including proposal development, project management, process improvement, contracting, conflict resolution, and networking.

**PSY 811. Professional Development. (3 Credits)**

Prerequisite: Departmental Approval. Developing personal effectiveness including skills in writing, communication, facilitating, leading, and career development.

**PSY 812. Practicum in I-O Psychology. (3 Credits)**

A. Practicum in I-O Psychology. Supervised practice in applied settings. Participation with an approved agency varies with the student's experience. Graded Satisfactory/Unsatisfactory.

**PSY 813. Ethics and Prof Conduct Appl B. (3 Credits)**

A. Prerequisite: Departmental Approval. Foundational ethics for behavior analysts practicing across applied and research areas.

**PSY 816. Philosophical Underpinning ABA. (3 Credits)**

A. Prerequisite: Departmental Approval. Philosophical foundations of behavioral science as applied in the field of Applied Behavior Analysis. This course covers BCBA level content requirements in the Foundational area of Philosophical Underpinnings of Behavior Analysis as required by the Behavior Analysis Certification Board.

**PSY 817. Intro Foundations in Beh Analy. (3 Credits)**

A. Prerequisite: Departmental Approval. Foundation, concepts, and principles of behavioral science applied to the field of behavior analysis.

**PSY 818. Psychology of Addictions. (3 Credits)**

A. Prerequisite: admission to the Psy.D. program. This course is designed to provide an overview of the assessment, diagnosis, theory, and treatment of substance-related and addictive disorders.

**PSY 820. Statistics & Research Design I. (3 Credits)**

A. Prerequisite: departmental approval. Principles and techniques of scientific observation, control, and analysis specifically oriented to research in psychology. Evaluation of research designs and their implementation in professional settings. Emphasis on univariate statistical analyses. Credit will not be awarded to students who have credit for PSY 820S.

**PSY 820S. Statistics & Research Design I. (3 Credits)**

A. Prerequisite: departmental approval. Principles and techniques of scientific observation, control, and analysis specifically oriented to research in psychology in the context of service learning. Evaluation of research designs and their implementation in professional settings. Emphasis on univariate statistical analyses. Credit will not be awarded to students who have credit for PSY 820.

**PSY 822. Crisis Management. (1 Credit)**

Prerequisite: Departmental Approval. Theoretical and practical knowledge in crisis prevention, preparedness, response, and recovery from the systemic level to the individual level. Includes assessment and treatment associated with suicidality.

**PSY 824. Intellectual Assessment. (3 Credits)**

A. Prerequisite: departmental approval. Techniques, principles and problems in the administration, scoring, interpretation, and reporting of individual tests of intelligence for children and adults.

**PSY 825. Personality Assessment. (3 Credits)**

A. Prerequisite: departmental approval. Techniques, principles and problems of evaluating personality via interviews, objective and projective testing. Emphasis on integration of results.

**PSY 826. Professional Concerns I. (1-3 Credits)**

A. Prerequisite: departmental approval. Consideration of ethical and related problems of psychologists.

**PSY 827. Topics in Assessment. (1 Credit)**

A. Prerequisite: departmental approval. Administering, scoring, and interpreting instruments in the area of vocational interest, adolescent personality, adaptive behavior, and individual academic assessment. Emphasis is on application in school and clinical settings.

**PSY 833. Beh Research and Measurement. (3 Credits)**

A. Prerequisite: Departmental Approval. Review of principles and practices underlying behavioral measurement and single subject research designs.

**PSY 837. Social Psy & Cultural Diversity. (3 Credits)**

A. Prerequisite: departmental approval. Graduate level survey of topics in social psychology including social influence, persuasion, social cognition, self-justification, aggression and prejudice. Emphasis on multi-cultural diversity and tolerance of other groups.

**PSY 838. Practicum in Clinical Psy. (1-4 Credits)**

A. Prerequisite: PSY 826 or departmental approval. Supervised Practice in applied settings. Participation varies with student's course work and experience. Class meetings are arranged. May retake to maximum of nine credit hours.

**PSY 841. Psychopathology. (3 Credits)**

A. Prerequisite: departmental approval. Etiology and description of various aspects of psychopathology and ineffective behavior. Credit will not be awarded to students who have credit for COU 855.

**PSY 842. Interventions: School & Home. (3 Credits)**

A. Prerequisite: Departmental approval. Academic and behavioral interventions for school-age children will be reviewed. Emphasis is on identifying, selecting, and implementing research-based interventions for specific behaviors.

**PSY 843. Practicum. (1-4 Credits)**

A. Prerequisite: departmental approval. Supervised practice in applied settings. Selective participation with an assigned agency varies with the student's program with level of preparation in course work, and with previous supervised field experience. Class meetings as arranged. May be retaken to a maximum of eleven credit hours. Graded Satisfactory/Unsatisfactory.

**PSY 845. Clinical Issues and the Deaf. (3 Credits)**

A. Prerequisite: departmental approval. Survey of clinical issues involved in providing mental health services to the deaf and hard-of-hearing. Topics will include the prevalence and nature of psychological problems among the deaf and hard-of-hearing, ethical and professional concerns, the interface between mental health and other services, and psychological assessment and therapy issues and strategies.

**PSY 846. Behavioral Research Methods. (3 Credits)**

A. Prerequisite: departmental approval. Theory and methods of contemporary practice of behavioral assessment and single subject research design. Supervised practice in clinical applications of assessment methods. Review of relevant learning theory and behavioral principles.

**PSY 848. Intro to School Psychology. (3 Credits)**

A. Prerequisite: departmental approval. Theory observation, and supervised practice in the role of school psychologist. Includes systems analysis, the consultation process, and interprofessional relationships. Intervention skills appropriate for dealing with those problems.

**PSY 849. Advanced Developmental PSY. (3 Credits)**

(3) A. Prerequisite: Departmental approval. The development of individual difference in traits and behavior examined from the perspective of personality and developmental psychology. Selected coverage of both foundational and current theoretical and empirical literatures. Credit will not be awarded for both PSY 849 and PSY 847.

**PSY 850. Psychotherapy & Behav Change I. (3 Credits)**

A. Prerequisite: PSY 841 or departmental approval. A didactic and experiential introduction to the theories and techniques acilitative of personal growth and behavior change.

**PSY 853. Biological Bases of Behavior. (3 Credits)**

A. Prerequisite: departmental approval. A survey of the principles, research and methodology of psychophysiology, including consideration of the autonomic correlates of emotion and arousal, biofeedback, psychosomatic diseases, and psychophysiological correlates of psychopathology.

**PSY 855. Addressing Problem Behaviors. (3 Credits)**

A. Prerequisite: Departmental Approval. Review of principles, practices, and methods used to decrease problem behaviors as well as general intervention and behavior change procedures.

**PSY 857S. Child & Family Interventions. (3 Credits)**

A. Prerequisite: departmental approval. Conceptualization and intervention for childhood psychological disorders are reviewed and experienced through service learning pedagogy. Emphasis is on individual and group interventions. Credit will not be awarded for both PSY 857 and 857W.

**PSY 859. Cog/Affect Bases of Behavior. (3 Credits)**

Prerequisite: departmental approval. Broad survey of findings regarding cognitive and affective influences on behavior, including learning and conditioning, memory, and cognitive and affective processes. Credit will not be awarded to students who have credit for PSY 840.

**PSY 860. Psychotherapy & Beha Change II. (3 Credits)**

A. Prerequisite: PSY 850 or departmental approval. The in-depth study of techniques selected from those presented in PSY 850. Emphasis will be placed on developing proficiency in such skills and techniques.

**PSY 862. Statistic & Research Design II. (3 Credits)**

A. Prerequisite: PSY 820 or equivalent with department approval. Principles and techniques of scientific observation, control, and analysis, specifically oriented to multivariate research in psychology. Evaluation of research designs and their implementation in professional settings.

**PSY 863. Understanding Suicide. (3 Credits)**

A. Prerequisite: Admission in doctoral program or departmental approval. This seminar course will examine the topic of suicide in depth. Theoretical and empirical perspectives from public health, sociology, psychology, and genetics/neuroscience will be considered. Philosophical and ethical issues related to suicide will be explored, as will a special emphasis on clinical practice with suicidal patients.

**PSY 864. Child Psychopathology. (3 Credits)**

A. Prerequisite: PSY 848 or departmental approval. Course will focus on the theory, etiology, and context associated with psychopathology in school-aged children and adolescents.

**PSY 865. Psychological Consultation. (3 Credits)**

A. Prerequisite: departmental approval. Exploration of the theoretical and empirical underpinnings of psychological consultation process, and supervised practice in the provision of indirect psychological services.

**PSY 866. Adv Topics Applied Beha Analys. (3 Credits)**

A. Prerequisite: Departmental Approval. Introduction to advanced ethics and review of applied behavior analysis assessment, intervention, and ethics concepts and procedures within a case study format.

**PSY 868. Prog Eval in Soc Behav Sci II. (3 Credits)**

A. Prerequisite: PSY 820 or 862 or equivalent with departmental approval. Survey and application of program evaluation theory, designs, implementations and problems. Emphasis on preparing students to design and implement program evaluations of social, educational and organizational programs.

**PSY 869. Psychology of Trauma. (3 Credits)**

Prerequisite: departmental approval. Explores the psychological impact of various types of trauma. Introduces key elements of trauma research and practice, including assessment, diagnosis, theoretical models, and intervention.

**PSY 871. Group and Family Therapy. (3 Credits)**

A. Prerequisite: departmental approval. Theory and techniques of group and family therapy. Emphasis will be placed on developing and applying intervention skills.

**PSY 872. Selection & Perf Appraisal. (3 Credits)**

A. Prerequisite: PSY 790 or departmental approval. Psychological theory, research, and practice pertaining to the selection and appraisal of human resources in the workplace.

**PSY 873. Organizational Psychology. (3 Credits)**

A. Prerequisite: departmental approval. Examination of research, theory, and applications in organizational psychology. Topics include commitment, involvement, satisfaction, power, conflict, motivation, leadership, quality of work life, group/team processes, and organizational structure.

**PSY 874. Organization Change and Dev. (3 Credits)**

A. Prerequisite: departmental approval. Analysis of psychological theory, research and practice pertaining to organization change and development including the change process, culture, interventions, evaluation, consulting, and legal/ethical concerns.

**PSY 875. Training and Development. (3 Credits)**

A. Prerequisite: departmental approval. Graduate level survey of psychological theory, research, and practice utilized in the training and development of human resources in the workplace.

**PSY 880. Work Environment. (3 Credits)**

A. Prerequisite: departmental approval. Seminar examining the ways in which workers are influenced by the physical environment. Topics will include lighting, noise, temperature, aesthetics, privacy, crowding, territoriality, human factors, and ergonomics.

**PSY 881. Advanced Children's Assessment. (3 Credits)**

A. Prerequisite: departmental approval. Theory and research regarding psychological and psychoeducational problems of childhood and adolescence in the context of diagnostic criteria, including training in the use of adaptive behavior scales and measures for screening academic achievement.

**PSY 887. Independent Work in Psychology. (1-3 Credits)**

A. Prerequisite: approval of independent study proposal by faculty supervisor and department chair prior to enrollment. Student is responsible for conceptualization and investigation of research problem and drawing formal conclusions. May be retaken to a maximum of six hours provided a different problem is studied each time.

**PSY 888. Master's Research Project. (3 Credits)**

Empirical investigation of a selected topic in psychology, including submission of a report to the department.

**PSY 895. Building New Behaviors. (3 Credits)**

A. Prerequisite: Departmental Approval. Review of principles, practices, and methods used to increase desired behavior.

**PSY 896. Internship in School PSY. (3-6 Credits)**

(3-6) A. Prerequisite: Departmental approval. Intensive supervised experience in approved educational setting. May be retaken to a maximum of twelve hours. Graded Satisfactory/Unsatisfactory. A minimum of 1200 hours of work is required for the total twelve hours credit awarded.

**PSY 897. Special Topics in Psychology. (3 Credits)**

A. Selected topics for advanced graduate study. Topics will vary. May be retaken to a total of six hours, provided the subject matter differs each time.

**PSY 898. Thesis Research. (1-6 Credits)**

(1-6) A. Prerequisite: Departmental approval. Experimental investigation of a selected topic, including preparation of a formal report. May be retaken to a maximum of twelve hours. Graded Satisfactory/Unsatisfactory. A minimum of 1200 hours of work is required for the total twelve hours credit awarded.

**PSY 899A. Internship in Clinical Psych. (4 Credits)**

A. Prerequisite: departmental approval. Intensive supervised experience in an approved clinical setting. May be retaken to a maximum of twelve hours. Graded Satisfactory/Unsatisfactory.

**PSY 938. Doctoral Prac in Clinical Psyc. (1-4 Credits)**

(1-4) Prerequisite: PSY 838. Supervised experience in applied settings. Participation varies with student's course work and experience. Class meetings as arranged. May be retaken to a maximum of 21 credit hours.

**PSY 950. Clinical Supervision & Consult. (3 Credits)**

Prerequisite: departmental approval. Advanced seminar covering theories, issues, methods, and techniques in the supervision of psychotherapy and assessment. Consultation issues and models will also be examined.

**PSY 990. Doctoral Specialty Project. (3 Credits)**

A. Prerequisite: Departmental approval. Investigation of clinical best practices for a selected disorder. Requires a written report and oral presentation. May be retaken for a maximum of 12 hours. Graded Satisfactory/Unsatisfactory.

**PSY 999. Doctoral Intern in Clinic Psyc. (6 Credits)**

A. Prerequisite: Departmental approval. Intensive supervised experience in an approved external clinical setting. May be retaken to a maximum of 12 credit hours. Graded Satisfactory/Unsatisfactory.

## Applied Behavioral Analyst Certification, University Certificate

To obtain a BCBA Certification students must:

1. hold a Master's or Doctoral degree;
2. have completed Board approved ABA coursework;
3. have completed the required and documented supervised practical experience; and
4. pass an examination administered by the Behavioral Analyst Certification Board

The ABA Certificate is designed for students who already have a Master's or Doctoral degree, and who want to work toward eligibility to sit for the BCBA Certification Exam.

The ABA Certificate provides the required approved ABA coursework.

Students are responsible for finding their own practical experiences in order to accumulate the required hours of supervised experience, and for scheduling and paying for the BCBA Certification Exam. Information can be found at [www.bacb.com](http://www.bacb.com) (<http://www.bacb.com>)

### Admission Requirements

- Note that persons planning to apply for BCBA Certification are required by the Behavior Analyst Certification Board to hold a

Master's or Doctoral degree, to have completed the Board approved ABA coursework, to have completed the required and documented supervised practical experience, and to pass an examination administered by the Behavioral Analyst Certification Board.

- The ABA Certificate from EKU provides the required ABA coursework. Students are responsible for finding their own practical experiences in order to accumulate the required hours of supervised experience, and for scheduling and paying for the BCBA Certification Exam. Information can be found at [www.bacb.com](http://www.bacb.com) (<http://www.bacb.com>).
- For students with a Master's degree, admission requirements are minimum overall graduate grade point average of 2.75, minimum of one research course and one statistics course, minimum of three additional courses in psychology or a related discipline and a personal statement.
- Personal statement must address the following areas:
  - a. What personal characteristics do you possess that you believe are important to the practice of applied behavior analysis? Do you possess any particular strengths that you feel will be an asset to you in graduate school? What about any personal challenges that you think might hinder your progress?
  - b. What are your professional goals?
  - c. Describe any experiences that have particularly prepared you for graduate study in applied behavior analysis (e.g., co-op/ internships, work experiences, life experiences).
  - d. Explain if you feel that any portion of your application does not accurately reflect your academic skills or preparation to complete this certificate.

## Autism Spectrum Disorder, University Certificate

The Autism Spectrum Disorder Certificate provides integrated multidisciplinary training in autism and related disorders. Participation is limited to students enrolled in graduate degree programs in Psychology, Occupational Therapy, Communication Disorders, and Special Education. Admission to one of the designated graduate degree programs does not guarantee admission to the certificate program. Post-degree students with graduate degrees in one of these fields will also be considered, although the focus of the certificate is on pre-service training. Students

seeking admission to the certificate program should contact their graduate program advisor for information.

## Program Requirements

CIP Code: 42.9999

A total of 18 credit hours is required for candidates for the Autism Spectrum Disorder Certificate, including 1 course in each of the four participating disciplines (Psychology, Occupational Therapy, Communication Disorders, and Special Education), one discipline-specific practicum in autism spectrum disorders, and a capstone course in autism spectrum disorders.

OTS 831 Practice Seminar II must be paired with OTS 846 Community Practice Fieldwork to equal six hours.

## Comprehensive Examination

In addition to the exit requirements for their degree, candidates for the certificate will be required to successfully complete an oral examination on Autism Spectrum Disorders and register for GRD 858N Autism Spect Oral Comp Ex.

## Clinical Psychology Program, Master of Science (M.S.)

### Admission Requirements

Candidates must satisfy the following special requirements:

A minimum of five undergraduate courses in psychology: general psychology, statistics, and experimental psychology are required, as well as two other courses acceptable to the departmental admissions committee. Satisfactory performance on the general sections of the Graduate Record Examination is required prior to admission. Analytical Writing scores of 4.0 or higher are expected for all programs. Admission is competitive and limited to available space. Meeting the minimum requirements, therefore, does not guarantee admission. Candidates must arrange for submission of three letters of recommendation directly to the department, two related to the undergraduate major, with at least one from psychology faculty.

The M.S. program in Clinical Psychology at EKU is part of the doctoral (Psy.D.) program. Students are not admitted solely for the purpose of obtaining the M.S. degree in Clinical Psychology.

### Program Requirements

CIP Code: 42.2801

Requirements for the degree are a minimum of 55 graduate hours in order to complete the degree program.

<b>Total Hours</b>		<b>55</b>

1

Students must earn a grade of B or better.

## Exit Requirements

Students in the Clinical Psychology Program must complete the following:

### Comprehensive Examinations

Register for written and oral comprehensive examinations in their area of study (GRD 857K MS Clinical PSY Writ Comp Ex & GRD 858K MS Clinical PSY Oral Comp Ex (0 credit hours)), and must pass both of these examinations.

## Clinical Psychology, Doctor in Psychology (Psy. D.)

### Admission Requirements

A minimum of five undergraduate courses in psychology: general psychology, statistics, and experimental psychology are required, as well as two other courses acceptable to the departmental admissions committee. Applicants are required to submit academic transcripts for any undergraduate and graduate work, and the GRE score report. Candidates are encouraged to complete the GRE Psychology Subject Test if Psychology was not their major as an undergraduate. Please note that GRE scores and GPA may be used to narrow the applicant pool. Candidates with a GPA of 3.0 or higher and GRE scores at the 50th percentile or higher will be competitive. Admission is limited to available space. Meeting the minimum requirements, therefore, does not guarantee admission.

Applicants must submit a cover letter, expressing their interest in the program (1-2 typewritten, double spaced pages). In addition, applicants must respond to the following six, brief (no more than 500 words), essay prompts:

1. Tell me about the types of extra-curricular activities you are involved in. Please include any leadership roles, volunteer work, or team membership. How has this shaped your interest in serving others?
2. Our program heavily emphasizes multiculturalism and social justice, including rural culture. What experiences and perspectives would you bring to the program in this regard? What is something you learned about yourself from at least one of these experiences?
3. Please tell us about any life experience you have had exposure to that would be beneficial to your work in this career field (co-op, internship, shadowing, or work experience).
4. If you have had any research experience in your undergraduate or graduate studies, briefly describe your involvement in it.
5. What gives you meaning and purpose? How might this be relevant in your decision to pursue clinical psychology?
6. How do you balance demands on your time, responsibilities, and self-care?

Applicants must arrange for submission of three letters of recommendation from individuals familiar with your abilities relevant to graduate-level study in psychology, with at least one from psychology faculty. Applicants must also submit a curriculum vitae.

Applications are completed online and must be received by December 1. Top applicants will be invited for an interview. Notification regarding admission normally will be made in February or March.

## Program Requirements

CIP code: 42.2801

Requirements for the degree are a minimum of 120 graduate hours including 12 credit hours for a year-long internship, 27 credit hours for clinical practica, 72 credit hours of required courses, 6 credit hours for the doctoral research project, and 3 hours of elective graduate courses approved by the student's graduate advisor.

## Exit Requirements

Students in the Doctor of Psychology Program must register for written and oral comprehensive examinations in their area of study (GRD 857R PsyD Clinical PSY Writ Comp Ex & GRD 858R PsyD Clinical PSY Oral Comp Ex) (0 credit hours), and must pass both of these examinations.

## General Psychology, Master of Science with a Concentration in ABA (M.S.)

### Information About the Master's Degree

There are two Master's Degrees in General Psychology: this program is for those who seek the educational requirements to pursue ABA Certification, and there is another one in Experimental Psychology which requires a thesis (more information on that program here (<https://catalogs.eku.edu/graduate/letters-arts-social-sciences/psychology/general-concentration-experimental-ms/>)).

### Information About the ABA Concentration (Within the General Psychology M.S. Degree)

To obtain a BCBA Certification students must:

1. hold a Master's or Doctoral degree;
2. have completed Board approved ABA coursework;
3. have completed the required and documented supervised practical experience; and
4. pass an examination administered by the Behavioral Analyst Certification Board.

The **M.S. General Psychology Degree with ABA Concentration** is designed for students interested in earning a Master's degree that will provide expertise in applied behavior analysis, and allow them to work toward eligibility to sit for the BCBA Certification Exam.

The M.S. General Psychology Degree with ABA Concentration provides:

1. the required Master's degree and
2. the required Board approved ABA coursework.

Students are responsible for finding their own practical experiences in order to accumulate the required hours of supervised experience, and for scheduling and paying for the BCBA Certification Exam. Information can be found at [www.bacb.com](http://www.bacb.com) (<http://www.bacb.com>).

## Admission Requirements

### M.S. General Psychology: ABA Concentration

- Minimum overall undergraduate grade point average of 2.5, or 2.75 in the last 60 hours
- Minimum of one research course and one statistics course
- Minimum of three additional courses in psychology or a related discipline
- GRE: If undergraduate GPA is below 3.0, then satisfactory performance on the general sections of the Graduate Record Examination (GRE) is required.
- Personal statement must address the following areas:

- a. What personal characteristics do you possess that you believe are important to the practice of applied behavior analysis? Do you possess any particular strengths that you feel will be an asset to you in graduate school? What about any personal challenges that you think might hinder your progress?
- b. What are your professional goals?
- c. Describe any experiences that have particularly prepared you for graduate study in applied behavior analysis (e.g., co-op/ internships, work experiences, life experiences).
- d. If you feel that any portion of your application does not accurately reflect your academic skills or preparation for graduate school in psychology (e.g., GRE, GPA, etc.), please explain.

## Program Requirements

CIP Code: 42.0101

A total of 33 credit hours is required for candidates for the Master of Science in General Psychology. In order to complete the degree program, ABA concentration students must earn a grade of B or better in the following core courses: PSY 817, PSY 813, PSY 816, PSY 833, PSY 895, PSY 855, PSY 866.

Code	Title	Hours

<b>Capstone Requirement</b>		
PSY 866	Adv Topics Applied Beha Analys	3
<b>Total Hours</b>		<b>18</b>

## Exit Requirements

Students in the Applied Behavior Analysis Concentration must register for a written comprehensive examination in their area of study (GRD 857J MS Psy Written Comp Exam) (0 credit hours), and pass this examination.

# General Psychology, Master of Science with a Concentration in Experimental Psychology (M.S.)

## Information About the Master's Degree

There are two Master's Degrees in General Psychology: this program is in Experimental Psychology which requires a thesis, and there is another one for those who seek the educational requirements to pursue ABA Certification (more information on that program here (<https://catalogs.eku.edu/graduate/letters-arts-social-sciences/psychology/general-concentration-aba-ms/>)).

## Information About the Experimental Psychology Master's Program

The Master of Science degree program in General Psychology offers students advanced training in the core areas of psychology and the opportunity to develop and explore specialized areas of interest. Students work closely with a faculty mentor to design an individualized course of study that combines classroom training and hands-on research experience, and culminates in a Master's thesis. Graduates will have a solid foundation for pursuing doctoral-level training in psychology and related fields or for entry into a variety of work settings.

## Admission Requirements

### M.S. General Psychology: Experimental Concentration

- Minimum overall undergraduate grade point average of 2.5, or 2.75 for the last 60 hours.
- Minimum of five undergraduate courses in psychology, including general psychology, statistics, experimental psychology, and two other courses acceptable to the departmental admissions committee.
- Satisfactory performance on the general sections of the Graduate Record Examination. Analytical Writing scores of 4.0 or higher are expected.
- Three letters of recommendation; two letters must be related to the undergraduate major, with at least one from psychology faculty.
- Applications for fall admission should be received by March 1. Notification regarding admission normally will be made in April. Students applying later may be accepted as space is available.

Admission is competitive and limited to available space. Meeting the minimum requirements, therefore, does not guarantee admission.

## Industrial and Organizational Psychology, Master of Science (M.S.)

### Admission Requirements

Candidates must satisfy the following requirements:

A minimum of two undergraduate psychology courses including statistics and one upper division psychology course are required [comparable courses in relevant disciplines (e.g., Business) will be considered]. Applicants are required to submit academic transcripts for any undergraduate and graduate work. An undergraduate grade point average of 3.0 is required. Applicants with a cumulative undergraduate GPA of 3.0 or higher are exempt from the GRE requirement. Target scores for the Industrial and Organizational Psychology program are 149 or above on the Verbal section and 144 or above on the Quantitative section of the GRE.

Applicants must submit a personal statement addressing academic experiences, professional goals, and an explanation of why the field of I-O psychology, and specifically the ECU I-O Psychology Online Program, is a good fit. Below are some additional questions to consider as you construct your response.

1. What personal characteristics do you possess that you believe are important to the practice of I-O psychology?
2. Do you possess any particular strengths that you feel will be an asset to you in graduate school?
3. What are your professional goals and how do they match the mission of our program?
4. Describe any experiences that have particularly prepared you for graduate study in I-O psychology (e.g., work experience, research experience, particular coursework, etc.).
5. If you feel that any portion of your application does not accurately reflect your academic skills or preparation for graduate school in psychology (e.g., GRE, GPA, etc.), please explain in your personal statement.

Applicants must arrange for submission of three letters of recommendation providing evidence of academic potential from persons

familiar with the applicant’s academic or employment experience. Applicants must also submit a curriculum vitae/Resume.

Applications are completed online. Applicant deadlines are August 5th, October 5th, January 5th, and March 5th.

## Program Requirements

CIP Code: 42.2804

The successful completion of 36 credit hours is required of candidates for the Master of Science in Industrial and Organizational Psychology. In addition to 33 hours of required courses, 3 credit hours of practicum are required.

G. Ashley; S. Binion; A. Callahan; D. Higgins; N. Lavy-Joy; L. Long; K. Martin; C. Reid; E. Stevenson

## Master’s

- Master of Social Work (M.S.W.) (p. 772)

## Certificate

- Addictions Intervention, University Certificate (p. 770)
- Child and Family Services, University Certificate (p. 771)
- Leadership and Management, University Certificate (p. 771)
- Mental Health, University Certificate (p. 774)
- Social Advocacy and Justice, University Certificate (p. 774)

## Courses

### SWK 761. Alcohol and Drug Assessment. (3 Credits)

A. Prerequisite: Departmental approval. Provides clinical and scientific knowledge about the history and range of consequences associated with alcohol and drug addiction. Credit will not be awarded for both SWK 561 and SWK 761.

### SWK 762. Alcohol and Drug Treatment. (3 Credits)

A. Prerequisite: Departmental approval. Provides clinical and scientific knowledge about the treatment of alcohol and drug addiction. Credit will not be awarded for both SWK 562 and SWK 762.

### SWK 800. The Social Work Relationship. (3 Credits)

(3) A. Introduction to generalist social work practice including the importance of self-care, professional ethics, and respect for diversity with the opportunity to build skills in facilitating therapeutic relationships.

### SWK 810. Human Behav Social Enviro I. (3 Credits)

(3) I, II. Applies current research and various paradigms to explain how biopsychosocial-spiritual development across the lifespan and in relation to the social environment shapes individual functioning and family interactions.

### SWK 815. Human Behav Social Enviro II. (3 Credits)

(3) I, II. Prerequisite: SWK 800 with a minimum grade of “B” or departmental approval. Prerequisite or corequisite: SWK 810. Applies current research and various paradigms to explain how social, cultural forces, and institutions shape group, organization, and community interactions.

### SWK 820. Social Work Practice I. (3 Credits)

(3) I, II. Prerequisite: SWK 800 and SWK 810 with a minimum grade of “B” or departmental approval. Corequisite: SWK 825. Foundation for social work practice with individuals. Draws from current research and various paradigms with the opportunity to practice facilitating the generalist intervention method to develop skills in ethical, culturally inclusive micro practice.

### SWK 825. Social Work Research Methods. (3 Credits)

(3) I, II. Prerequisite: SWK 800 and SWK 810 with a minimum grade of “B” or departmental approval. Prerequisite or Corequisite: SWK 820. Foundation for qualitative and quantitative research with the opportunity to critically evaluate research methodology and plan a research study for ethical, culturally inclusive social work practice across client systems.

### SWK 830. Social Work Practice II. (3 Credits)

(3) I, II. Prerequisites: SWK 815 and SWK 820 with a minimum grade of “B” or departmental approval. Foundation for social work practice with families and groups. Draws from current research and various paradigms with the opportunity to practice facilitating a psychoeducational group to develop skills in ethical, culturally inclusive mezzo practice.

### SWK 840. Social Work Practice III. (3 Credits)

(3) I, II. Prerequisite: SWK 815, SWK 820 and SWK 830 with a minimum grade of “B” or departmental approval. Prerequisite or corequisite: SWK 845. Foundation for generalist social work practice with organizations and communities. Draws from current research and various paradigms with the opportunity to practice facilitating a task group to develop skills in ethical, culturally inclusive macro practice.

**SWK 845. Soc Policy Analy and Advoc. (3 Credits)**

(3) I, II. Prerequisite: SWK 800 with a minimum grade of "B" or departmental approval. Engages students as agents of change starting with policy analysis, formulation, modification, and evaluation at administrative, judicial, and legislative levels. There is an emphasis on personal and social empowerment to foster policies and practices that support a just society.

**SWK 850. Generalist Practicum. (1-3 Credits)**

I, II. Prerequisite: Admission to the MSW Social Work Program, Practicum Placement Approved by Field Director, SWK 800 and SWK 810 completed with at least a "B" or departmental approval. Supervised practice in a social agency and seminar to discuss the application of social work knowledge, skills, competencies, behaviors, ethics and values necessary for ethical, culturally inclusive, and evidence-based generalist practice. May be retaken to a maximum of six hours.

**SWK 855. Generalist Capstone. (2 Credits)**

I, II. Prerequisite: Admission to Advanced Standing or all generalist courses completed with a minimum grade of "B" or departmental approval. Opportunity to review, integrate, and apply knowledge for the demonstration of proficiency with all nine competencies in generalist practice as a foundation for ethical, culturally inclusive, and evidence-based interprofessional social work practice.

**SWK 860. Interprofessional Micro Practice. (3 Credits)**

A. Prerequisite: Admission to Advanced Standing or all generalist courses completed with a minimum grade of "B" or departmental approval. Opportunity to focus on the application of micro-level social work theories, skills, evidence-based interventions, and research methods for practice evaluation in order to engage in ethical, culturally inclusive, and evidence-based interprofessional micro social work practice.

**SWK 863. Stress Management & Self-Care. (3 Credits)**

A. Prerequisite: Departmental approval. Addresses what supports a healthy lifestyle that includes stress management and perceived quality of life. Emphasis is on evidence-based approaches and experiential learning to inform the development and maintenance of a plan for self-care.

**SWK 864. Child and Family Services. (3 Credits)**

A. Prerequisite: Departmental approval. Critical appraisal of societal values underlying services to children. Examines a range of social and child welfare services, impact of public policies, and interventions to support children and families.

**SWK 865. Social Gerontology. (3 Credits)**

A. Prerequisite: Departmental approval. Applies current research and various paradigms to describe factors that shape the aging process. Class activities inspire new insights that can be used to better support older adults and their families.

**SWK 866. Crisis Intervention. (3 Credits)**

A. Prerequisite: Departmental approval. Examination of current theories pertaining to the fundamentals of trauma and traumatic stress that can lead to crisis. The implications of crisis intervention to modify, manage, and cope with trauma will be addressed.

**SWK 867. Spirit Sensitivity Help Profes. (3 Credits)**

A. Prerequisite: Admission to ECU Graduate School or departmental approval. Describes how professionals can address spiritual issues that emerge in health and mental care settings. Students will also explore how their own beliefs influence daily life and work.

**SWK 870. Interprofessional Mezzo Practice. (3 Credits)**

A. Prerequisite: Admission to Advanced Standing or all generalist courses completed with a minimum grade of "B" or departmental approval. Opportunity to focus on the application of mezzo-level social work theories, skills, evidence-based interventions, and research methods for practice evaluation in order to engage in ethical, culturally inclusive, and evidence-based interprofessional mezzo social work practice.

**SWK 880. Interprofessional Macro Practice. (3 Credits)**

A. Prerequisite: Admission to Advanced Standing or all generalist courses completed with a minimum grade of "B" or departmental approval. Opportunity to focus on the application of theories of change and social justice, community engagement, and research methods for program evaluation in order to engage in ethical, culturally inclusive, interprofessional macro social work practice.

**SWK 890. Interprofessional Practicum. (1-4 Credits)**

A. Prerequisite: Admission to Advanced Standing or all generalist courses completed with a minimum grade of "B" or "S" and field director approval of placement. Corequisite: SWK 860 or SWK 870 or SWK 880. Supervised practice in a social agency and foundation seminar to integrate social work and relevant knowledge for ethical, culturally inclusive, and evidence-based practice. May be retaken to a maximum of eight hours.

**SWK 895. Interprofessional Capstone. (2 Credits)**

(2). I, II. Prerequisite: All generalist and advanced courses completed with a minimum grade of "B" or departmental approval. Opportunity to review, integrate, and apply knowledge for the demonstration of proficiency with all nine competencies that inform ethical, culturally inclusive, and evidence-based interprofessional social work practice.

**SWK 899. Indep Study in Social Work. (1-3 Credits)**

A. Student must consult with the faculty project advisor and have the independent study proposal form approved by their faculty project advisor, program director, and department chair prior to enrollment. Course may include intensive reading in a specialized area, synthesizing literature on a topic, completing a research project, or other assignment arranged with faculty advisor. May be retaken to a maximum of nine hours.

## Addictions Intervention, University Certificate

Interdisciplinary University Certificate (IUC) programs provide a low-cost, alternative pathway for an academic credential that conveys expertise in a shared area of concern. Students gain unparalleled access to specialized courses that have been carefully selected for this curriculum. The Addictions Intervention Certificate Program enables students to draw from different perspectives and opportunities to build interdisciplinary partnerships around cutting-edge practices in addictions intervention. IUC courses vary in timing of being offered, but students have a number of course options.

## Master of Social Work (M.S.W.)

### General Information

The Master of Social Work (MSW) Program is an online program that consists of 8-week long asynchronous courses and field practicum hours. The MSW Program builds on a generalist foundation to prepare students to be interprofessional social work practitioners. This concentration enables students to work collaboratively across disciplines, settings, and populations. Students also participate in an Interdisciplinary University Certificate Program. This provides MSW students access to courses that uniquely inform interprofessional social work practice as it relates to in an area of shared concern. Therefore, MSW students learn to integrate social work theory, practice, and research as well as draw from interdisciplinary perspectives to support the wellbeing of individuals, groups, families, organizations, and communities through interprofessional social work practice.

The MSW program offers a part- and full-time course of study, employer-based field placements, and advanced standing for students with an undergraduate degree in Social Work. The regular program consists of 60 graduate credit hours of generalist courses and concentration courses. Students who are admitted into the regular program start with generalist courses to ensure students have mastered content on the practice of generalist social work. These students and students accepted with advanced standing status proceed with concentration courses to integrate generalist social work theory (i.e., diversity, values and ethics, and human behavior I/II theories), practice (i.e., skills and intervention), and research (i.e., methods, data collection, and analysis).

MSW students gain additional experience in interprofessional social work practice by drawing from interdisciplinary perspectives through an approved Interdisciplinary University Certificate Program. Students choose an approved Interdisciplinary University Certificate Program and three elective courses in that certificate's curriculum. An Interprofessional Practicum and Integrative Capstone project are required as part of this course sequence. In coordination with MSW faculty and staff, MSW students continue formation as interprofessional social workers while taking elective courses with students across disciplines. MSW students gain practicum experience with a population (or area) of interest to transfer classroom skills into the field for collaborative action.

### Admission Requirements

All applicants applying for admission to the 60-hour program must have a baccalaureate degree from a college or university accredited by the appropriate regional accrediting agency or foreign equivalent with a grade point average of 2.7 out of a possible 4.0 on all undergraduate work and a minimum GPA of 3.0 out of a possible 4.0 on all previous graduate work<sup>1</sup>. All applicants applying for advanced standing status must have a cumulative undergraduate GPA of 3.0 or higher, must have an undergraduate major in Social Work from a Council on Social Work Education accredited program and must have graduated within 5 years of entry to the MSW program. Some work experience is preferred. Although GRE scores are not required for program admission, applicants may submit current scores from the GRE General Exam to supplement their

application materials. GRE scores are valid for five years from the date of the exam.

1

Preference is given to applicants with a 3.0 cumulative GPA or above in their undergraduate work.

### Program Requirements

CIP Code: 44.0701

Requirements for the degree are a minimum of 60 graduate hours for the regular program and 30 graduate hours for students with advanced standing status. Students must maintain an overall GPA of 3.0 or better on all graded courses and maintain a satisfactory performance in field practicum courses. Departmental approval is required for student progression in the program if they do not earn at least a "B" in required courses. Students must also maintain conduct that is congruent with the Code of Ethics of the National Association of Social Workers.

## Exit Requirements

### Capstone

Students must earn at least a "B" in SWK 855 Generalist Capstone and SWK 895 Interprofessional Capstone. A capstone project is required in SWK 895 Interprofessional Capstone to demonstrate mastery in the integration of social work theory and practice with interdisciplinary knowledge for ethical, culturally based advanced generalist interprofessional social work practice.

### Certificate Program Completion

In consultation with a student's MSW academic advisor, each student is required to complete at least three elective courses, SWK 890 Interprofessional Practicum, and SWK 895 Interprofessional Capstone for a total of 19 credit hours as part of an approved certificate program. The capstone project and field practicum must relate to the topic of the certificate program and demonstrate competency in the practice of interprofessional social work practice.

*MSW students must have an overall GPA of 3.0 or better on all graded courses, a satisfactory performance in field practicum courses, and conduct that is congruent with the Code of Ethics of the National Association of Social Workers to be eligible for graduation.*

## Mental Health, University Certificate

### Interdisciplinary Certificate in Mental Health

Interdisciplinary University Certificate (IUC) programs provide a low-cost, alternative pathway for an academic credential that conveys expertise in a shared area of concern. Students gain unparalleled access to specialized courses that have been carefully selected for this curriculum. The Mental Health Certificate Program enables students to draw from different perspectives and opportunities to build interdisciplinary partnerships around cutting-edge practices in mental health care. IUC courses vary in timing of being offered, but students have a number of course options.

MPH 810	Human Behavior Change
SWK 845	Soc Policy Analy and Advoc
SWK 863	Stress Management & Self-Care
SWK 890	Interprofessional Practicum
SWK 895	Interprofessional Capstone
VTS 700	Veteran Identity Theory

**Total Hours** **18**

*Students in the Master of Social Work Program (MSW) who wish to obtain this certification have separate requirements. Please refer to MSW program requirements in the EKU Graduate Catalog for more information.*

## College of Science, Technology, Engineering, & Mathematics

Dr. Tom Otieno, Dean  
Science Building 1228  
(859) 622-1405

Dr. Tim Ross, Associate Dean  
(859) 622-8140

STEM.eku.edu (<http://www.science.eku.edu>)

Departments within the College of Science STEM offer programs leading to the following degrees: Master of Science and Master of Arts.

The Master of Science is offered by the departments of Biological Sciences, Computer Science and Information Technology, and the School of Engineering, Aviation, Construction and Technology.

## Department of Agriculture

Interim Chair  
Carter 2  
[www.agriculture.eku.edu](http://www.agriculture.eku.edu) (<http://www.agriculture.eku.edu>)  
(859) 622-2228

The Department of Agriculture provides courses at the graduate level in technical agriculture and horticulture. Students receiving graduate credit must meet additional specified requirements.

Graduate students have the choice of two degree concentrations: Master of Science in Technology Management with a concentration in Agriculture Operations, or a Master of Arts in Education with an Agriculture Education concentration.

The Master of Arts in Education with a concentration in Agriculture Education is offered through the College of Education and Applied Human Sciences, in cooperation with the Department of Agriculture. Information and requirements for this program can be found in the College of Education and Applied Human Sciences section of this Catalog.

The Master of Science in Technology Management with a concentration in Agriculture Operations is offered through the Department of Applied

Engineering and Technology in cooperation with the Department of Agriculture. Information and requirements for this program can be found in the Department of Applied Engineering and Technology section of this Catalog.

Dr. Stephen Richter, Executive Director  
Science Building 3106  
(859) 622-8688

## The Institute of Agriculture, Natural Resources, and the Environment

The Institute of Agriculture, Natural Resources, and the Environment is comprised of the Department of Agriculture, the Center for Environmental Education, and the Division of Natural Areas. Consistent with Eastern Kentucky University's long and successful history of managing agricultural and natural resources for the greater benefit of the campus and local community, the Institute will enhance opportunities for collaborative growth and program support in developing interdisciplinary programs and administering EKU's farms and natural areas for land stewardship and resource management. The Institute offers associate, baccalaureate, and university certificate programs.

The Institute also supports a broad range of interdisciplinary activities, programs, and opportunities for students, including (1) applied learning through internships in agriculture, natural resource management, and environmental education at EKU farms and natural areas; (2) courses, educational programming, and public engagement at our six field stations totaling over 3,200 acres: Meadowbrook Farm, Lilley Cornett Woods Appalachian Research Station, Maywoods Environmental and Educational Laboratory, Taylor Fork Ecological Area, Cardinal Lane Outdoor Laboratory, and Gladie Cultural and Environmental Learning Center; and (4) job-placement opportunities with state, federal, and non-governmental organizations; and (5) interdisciplinary university certificates that will enrich their degree programs.

## Department of Biological Sciences

Dr. Sherry Harrel, Chair  
Dr. Luke Dodd, Graduate Coordinator/Advisor  
[www.biology.eku.edu](http://www.biology.eku.edu) (<http://www.biology.eku.edu>)  
(859) 622-1531

## General Information

The Department of Biological Sciences provides opportunities for graduate studies leading to the Master of Science degree in Biology. Thesis and non-thesis programs of study are available. A planned program of study, based on individual needs is selected by each student in consultation with the student's graduate committee. Students engaged in thesis work may conduct research in such areas as aquatic biology, animal behavior and ecology, plant systematics and ecology, wildlife and conservation biology, physiological and molecular ecology, and biomedical sciences including cellular and molecular biology, and microbiology.

The Master of Arts in Teaching Secondary Education degree with a concentration in Biology is offered by the College of Education and Applied Human Sciences in cooperation with the Department of Biological Sciences. Requirements for the degree are found in the College of Education and Applied Human Sciences section of this Catalog.

The Department of Biological Sciences cooperates with other departments in the College of STEM and the College of Education and

Applied Human Sciences in offering the Master of Arts in Education, Secondary Education with a concentration in Biology. This concentration is primarily for non-specialized science teachers and is described in the College of Education and Applied Human Science section of this Catalog.

## Master's

- Biology, Master of Science (M.S.) (p. 778)

## Courses

### BIO 700. Environmental Issues. (3 Credits)

(3) II. Students will learn to identify, investigate and evaluate environmental issues as well as plan appropriate action based on their analysis. Credit will not be awarded to students who have credit for BIO 500, ENV 700 or CNM 800.

### BIO 711. Experiment Appro/Molecular Bio. (3 Credits)

I. Laboratory experiencebased course in molecular biology techniques. Subject will be introduced in a lecture setting and practical laboratory training. Techniques will include PCRbased methodologies, immunological approaches, and basic protein and nucleic acid manipulations. 1 Lec/4 Lab.

### BIO 714. Evolution. (3 Credits)

A. A study of Darwinism, the history of life in the context of contemporary biology, and the evidences and mechanisms of evolutionary change, with particular emphasis on human evolution and the challenges of teaching and understanding evolution in modern society.

### BIO 720. Invasive Species Management. (3 Credits)

A. Examination of the circumstances that allow introduced species to become invasive. Reviews the current approaches used to reduce the incidence and impact of invasive species. Credit will not be awarded to students who have credit for BIO 599/799 Special Topics: Invasive Species Management.

### BIO 721. Plant Ecology. (4 Credits)

A. Ecological concepts and principles relevant to eastern terrestrial ecosystems. Required weekend field trips and an extended field trip in the region. 2 Lec/4 Lab.

### BIO 722. Grasses & Grasslands. (3 Credits)

I. Prerequisite: instructor approval. Development and composition of grasslands; phylogeny, classification, and identification of grasses. Emphasis on North American grasses and grasslands, with field trips to native and managed grasslands. 1 Lec/4 Lab.

### BIO 725. Aquatic and Wetland Plants. (3 Credits)

A. Collection, systematics, distribution, ecology, and reproduction of aquatic and wetland vascular plants. 1 Lec/4 Lab.

### BIO 727. Immunology. (3 Credits)

I. Characteristics of immune reactions at the molecular level and in vivo. Nature and interactions of antigens and antibodies, and allergic phenomena. 2 Lec/3 Lab.

### BIO 728. Virology. (3 Credits)

A. Fundamentals of classification, structure, and pathogenesis of viruses. Host-virus interactions and their applications to medicine and industry. Related areas of immunology, cell culture procedures and applications will be introduced. 2 Lec/3 Lab.

### BIO 729. Microbiology in Everyday Life. (3 Credits)

I, II. Microbes in medicine, agriculture, and industry; emphasis on teaching microbiology in the classroom. Course open to Biology-Teaching or Education majors.

### BIO 731. Principles Molecular Biology. (4 Credits)

I, II. An in-depth study of the structure, function, and technological applications of nucleic acids and proteins. Laboratory experiences will involve manipulation of DNA and RNA molecules for the purpose of isolation, genetic engineering, forensics, and gene expression analysis. Credit will not be awarded for both BIO 731 and BIO 731S. 2 Lec/4 Lab.

### BIO 731S. Principles of Molecular BIO I. (4 Credits)

I, II. An in-depth study of the structure, function, and technological applications of nucleic acids and proteins. Laboratory experiences will involve manipulation of DNA and RNA molecules for the purpose of isolation, genetic engineering, forensics, and gene expression analysis. Credit will not be awarded for both BIO 731 and BIO 731S. 2 Lec/4 Lab.

### BIO 732. Conservation Biology. (3 Credits)

II. Examination of principles and practices of conserving global biological diversity. Emphasis on causes, consequences and rates of extinction, as well as the natural resource planning and policies used to mitigate the loss of biodiversity. Focus will be given to the application of philosophical, biological, sociological, legal, and on-the-ground management principles for the conservation of genes, species and ecosystems.

### BIO 733. Bioinformatics:Principles & App. (3 Credits)

A. An exposure to the theory and practice of bioinformatics as they relate to laboratory (Cell and Molecular Biology, Biochemistry) and field (Evolutionary and Population Biology) research applications in the life sciences. Discussion and utilization of the prevalent approaches and methodologies currently used in Bioinformatics.

### BIO 735. Pathogenic Microbiology. (4 Credits)

A. Studies in the field of advanced clinical microbiology with emphasis on morphology, cultivation, biochemistry, and serological identification of bacterial diseases; aspects of pathogenesis, epidemiology, and control measures of bacterial and mycotic diseases. 2 Lec/4 Lab.

### BIO 736. Dendrology. (3 Credits)

A. Woody plant taxonomy with emphasis on field identification of trees and shrubs in summer and winter conditions; habitats and distributions; economic importance; forest regions of North America. 1 Lec/4 Lab.

### BIO 742. Freshwater Invertebrates. (3 Credits)

A. Collection, systematics, distribution, behavior, ecology, and life histories of freshwater invertebrates. 2 Lec/3 Lab.

### BIO 746. Histology. (4 Credits)

II. This course will provide students with an essential understanding of functional morphology in vertebrate tissues and organs. Pathology examples will be used to explain the cellular and molecular basis of normal function related to structure. 2 Lec/4 Lab.

### BIO 747. Comparat Vertebrate Embryology. (4 Credits)

A. Gametogenesis, fertilization, morphogenesis, and organogenesis of the frog, bird, and mammal. Particular emphasis is placed on mammalian development. 2 Lec/4 Lab.

### BIO 748. Insect Diversity. (3 Credits)

A. An introduction to the insects with an emphasis on classification, identification, natural history, and evolution of insect orders and common families. (2 Lec/3 Lab). Credit will not be awarded for both BIO 748 and BIO 799: Topics on Biological Sciences.

**BIO 749. Neurobiology. (3 Credits)**

I. A discussion of the cellular architecture of the nervous system, with emphasis on the biochemical and electrophysiological properties of neurons and glia that control cognition, learning and memory, emotion, sensation and perception, endocrine regulation, and neurological illness. An overview of molecular research methods used to investigate neural function.

**BIO 750. Animal Behavior. (4 Credits)**

II. Advanced study of behavior with emphasis on inherited behavioral patterns in relation to the evolution and ecology of animals. 3 Lec/2 Lab.

**BIO 753. Mammalogy. (3 Credits)**

I. Classification, natural history, field methods, and distribution of mammals. Requires participation in an extended field trip outside of normal class hours. 1 Lec/4 Lab.

**BIO 754. Ornithology. (3 Credits)**

II. Avian biology with emphasis on field identification of local avifauna, anatomy, physiology, ecology, evolution, migration, economic importance, distribution, and behavioral patterns. Early morning field trips required. 2 Lec/4 Lab.

**BIO 755. Behavioral Ecology. (3 Credits)**

A. How behavior is influenced by natural selection in relation to ecological conditions. Emphasis on quantitative and experimental methods and on integrating theoretical ideas with field and laboratory experience.

**BIO 756. Herpetology. (3 Credits)**

II. Natural history of the amphibians and reptiles including taxonomy, general ecology, behavior, distribution, breeding, and food habits. 2 Lec/3 Lab.

**BIO 757. Ichthyology. (3 Credits)**

I. A phylogenetic examination of morphological, ecological, and behavioral diversifications of fishes in the world, with special attention to the Appalachian fauna. Laboratory devoted to anatomy, identification, and reproductive strategies. 2 Lec/Lab.

**BIO 758. Freshwater Ecology. (3 Credits)**

A. Ecology of lakes and streams with reference to physical, chemical, and biological factors. To include a variety of methods and instruments. 2 Lec/3 Lab.

**BIO 761. Fish Biology & Management. (3 Credits)**

A. Methods for assessment and analysis of fish populations and aquatic habitats, including age and growth, fecundity, food habits, and yield. Emphasis on economics and ecological importance of management decisions. 2 Lec/4Lab.

**BIO 790. Ecology for Teachers. (3 Credits)**

(3) I. This course introduces ecology and the environment through an interdisciplinary approach beginning with the physical environment progressing to whole ecosystems and onto analyses of ecological sustainability. Classroom strategies and techniques will be modeled. Credit will not be awarded to students you have credit for ENV 790 or CNM 799.

**BIO 795. Topics in Field Biology. \_\_\_\_\_. (3 Credits)**

A. Prerequisite: Departmental Approval. Concepts, methods, analyses, and organismal identification used to study selected topic. Material will be taught using a combinations of lecture, discussion, and experiential learning via hands-on field activities. May be repeated up to a maximum of 12 hours provided subject matter is different each time. 1 Lec/4 Lab.

**BIO 798. Special Problems. (1-3 Credits)**

I, II. Prerequisite: students must have the independent study proposal form approved by the faculty supervisor and department chair prior to enrollment. Independent research in the biological sciences, under the guidance of a faculty member, which allows students to design a research problem and make experimental observations and conclusions. May be retaken to a maximum of four hours.

**BIO 799. Topics in Bio Sciences: \_\_\_\_\_. (6 Credits)**

A. Prerequisite: departmental approval. Special topics in the biological sciences of current interest to faculty and students may be presented through lecture, discussion, lab and field experiences, and report. May be retaken to a maximum of nine hours. Provided subject matter differs each time.

**BIO 800. Biology and Ethics. (1 Credit)**

(1) I. Responsibilities and ethics of research and teaching in the biological sciences. 2 Lab.

**BIO 801. Scien Lit & Writing-Biology. (2 Credits)**

I. Directed readings in biology designed to acquaint the student with the major sources of literature, the delimitation of problems, note taking, the making of bibliographies, and the writing of scientific articles.

**BIO 802. Selected Topics in Bio Sci. (1-4 Credits)**

A. Advanced study of modern biological principles and the solution of interacting problems. The course content will be designed to meet the needs of students in specialized areas of biology. May be retaken to a maximum of eight hours.

**BIO 806. Aquatic Entomology. (3 Credits)**

A. To develop an understanding of, and an appreciation for, aquatic insects. Techniques on collecting as well as the biology, ecology, and systematics of each of the aquatic insect orders will be considered. 2 Lec/3 Lab.

**BIO 810. Biostatistics. (3 Credits)**

I. Statistical analysis of biological data. Students participate in the taking and processing of data by use of well-established statistical techniques. 2 Lec/2 Lab.

**BIO 816. Biogeography. (3 Credits)**

A. Physical and biotic factors influencing the evolution, diversity and distribution of Earth's biota; ecogeographic principles, patterns and theories related to the diversity and distributions of organisms.

**BIO 820. Principles of Pharmacology. (3 Credits)**

An in-depth study of how drugs interact and alter biological systems in the body. The concepts of drug metabolism, physiological response, and therapy will be emphasized. 3 Lec.

**BIO 821. Applications in Flow Cytometry. (3 Credits)**

This course focuses on principles, applications and quality assurance of flow cytometry in research and clinical use in immunology, hematology and transplantation. Emphasis is placed on the biological and physical principles underlying flow cytometry. 2 Lec/2 Lab.

**BIO 831. Molecular Regulation. (3 Credits)**

A. Discussion and experimental manipulation of transcriptional/translational regulation in eukaryotes/prokaryotes with reliance on the current literature as reference. Coverage of regulatory mechanisms and experimental approaches. 2 Lec/2 Lab.

**BIO 839. Co-op or Appl. Lrn: Biology. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisors in a cooperative job experience related to student's academic studies. Credit varies with hours of employment; three to six hours per semester or summer. May be retaken at the discretion of the department or college involved. A minimum of eighty hours of work is required for each academic credit. Cannot be used to meet requirements in the thesis concentration.

**BIO 845. Vert Physiological Ecology. (3 Credits)**

A. Comparative study of physiological mechanisms of vertebrates in response to changing environmental conditions. Topics emphasized include temperature adaptation, color change, orientation, and biological rhythms. 2 Lec/3 Lab.

**BIO 846. Population Ecology. (3 Credits)**

A. Theoretical and applied study of size and organization of animal and plant populations and the physical and biological factors affecting spatial and temporal patterns.

**BIO 847. Community Ecology. (3 Credits)**

(3) A. Principles and applications of community ecology: including species interactions, community structure and diversity, and succession. Statistical methods in community ecology. (2Lec/3 Lab).

**BIO 848. Aquatic Ecosystems. (3 Credits)**

A. Modern methods for analysis of biological integrity of aquatic ecosystems. To include fieldwork involving various methods, and the calculation and discussion of currently used metrics. 2 Lec/3 Lab.

**BIO 849. Field Methods in Ecology. (3 Credits)**

A. Field sampling techniques and methods of observation applicable to describing terrestrial plant and animal communities. Field data utilized to develop an environmental impact statement. 6 Lab.

**BIO 880. Current Review of Biology. (3 Credits)**

A. Prerequisite: BIO 801 or departmental approval. Summary and critical evaluation of current research project in a particular area of biology, written in consultation with faculty advisor. Required of graduate students in non-thesis concentration. Cannot be used to meet requirements in the thesis concentration.

**BIO 881. Independent Study. (1-4 Credits)**

I, II. Prerequisite: approval of independent study proposal form by faculty supervisor and department chair prior to enrollment. Advanced research in the biological sciences under the guidance of a faculty member, which allows students to design a research problem and make experimental observations and conclusions. May be retaken to a maximum of four semester hours. Credit will not be given to students enrolled in the M.S. Biology thesis program.

**BIO 890. Graduate Seminar. (1 Credit)**

A. Prerequisite: BIO 801. Presentation and discussion of selected topics and research in the biological sciences. Required of all graduate students and may be retaken to a maximum of two hours.

**BIO 891. Thesis Research. (1-6 Credits)**

A. The accomplishment of an independent research project, in consultation with a faculty advisor, for the preparation of a thesis as part of the requirements for the M.S. degree in Biology. May be retaken to a maximum of six hours.

**BIO 891C. Continuation - Thesis Research. (1-9 Credits)**

A. Prerequisite: departmental approval. The continuation of an independent research project, in consultation with a faculty advisor, for the preparation of a thesis as part of the requirements for the M.S. degree in Biology. May be retaken as necessary to complete research thesis. A student must have registered for six hours of BIO 891 before registering for BIO 891C. May not be used to satisfy degree program requirements.

## Biology, Master of Science (M.S.)

### General Requirements

Graduate students must complete a minimum of 30-36 graduate semester hours for the Master of Science degree, depending on whether a thesis or non-thesis program is followed. At least 50 percent of the course work hours must be at the 800 level. The planned program of study must consist of:

1. at least 18-24 semester hours of biology including BIO 810 Biostatistics (3 hours), BIO 801 Scien Lit & Writing-Biology (2 hours), BIO 800 Biology and Ethics (1 hour), and
2. 12 semester hours of additional electives in biology or other courses in the natural and mathematical sciences.

A grade point average of 3.0 must be maintained; a maximum of six semester hours of course work with a grade of "C" may be applied toward degree requirements.

### Admission Requirements

All applicants must meet the general requirements established by the Office of Graduate Education and Research for clear admission. Final acceptance of an applicant is determined by the Graduate Affairs Committee of the Department of Biological Sciences.

All applications to the Graduate School must include:

1. Completed application for admission, including a statement of personal and professional objectives
2. Application Fee
3. Scores on the verbal, quantitative, and analytical portions of the Graduate Record Examination [GRE]
4. Grade point average (GPA) & official transcript(s)
5. Three letters of recommendation
6. The departmental experience & essay form (MSWord document)
7. The Graduate Studies Advisor Agreement Form.

All applicants must meet the general requirements established by the Graduate School for clear admission. In addition, applicants are expected to have verbal scores of 146 or above, quantitative scores of 140 or above, and analytical writing scores of 3.0 or above on the Graduate Record Exam. Applicants should have an undergraduate major in an area of the biological sciences, and supporting courses in chemistry, physics, and mathematics are recommended. Any deficiencies in a successful applicant's undergraduate training will be specified by the Department's Graduate Affairs Committee at the time of admission.

Prior to admission, applicants must have a faculty member from the Department of Biological Sciences agree to serve as their advisor should they be accepted to the program. Information concerning the research interests of faculty in the Department of Biological Sciences is available online at <http://biology.eku.edu/people> (<http://biology.eku.edu/people/>). Applicants should contact faculty with similar research interests to

determine if they are accepting new students and would be willing to serve as their advisor. Once an advisor has been identified, applicants and/or advisors should inform the Graduate Coordinator. Applications will not be considered complete without the Graduate Studies Advisor Agreement Form.

## Program Requirements

CIP Code: 26.0101

Courses equivalent to BIO 111 Cell and Molecular Biology and BIO 112 Ecology and Evolution, BIO 315 Genetics, BIO 348 Vertebrate Physiology, CSC 190 Object- Oriented Programming I, CSC 191 Object- Oriented Programming II, CSC 195 Discrete Structures II may be required as prerequisites.

Code	Title	Hours
<b>Biology Core</b>		
BIO 800	Biology and Ethics	1
BIO 801	Scien Lit & Writing-Biology	2
BIO 810	Biostatistics	3
<b>Tracks</b>		
Choose from one of the following tracks:		24-31
<i>Thesis Track</i>		
BIO 891	Thesis Research	
Choose from 18 hours of approved electives		
<i>Non-Thesis Track</i>		
BIO 880	Current Review of Biology	
Choose from two of the following:		
BIO 727	Immunology	
BIO 728	Virology	
BIO 731	Principles Molecular Biology	
BIO 821	Applications in Flow Cytometry	
BIO 831	Molecular Regulation	
BIO 848	Aquatic Ecosystems	
BIO 849	Field Methods in Ecology	
Choose from 20-21 hours of approved electives		
<b>Exit Requirements</b>		
GRD 857A	MS Bio 1st Written Comp Exam	0
GRD 858A	MS Bio Oral Exam	0
<b>Total Hours</b>		<b>30-37</b>

## Exit Requirements

All students must demonstrate their knowledge of biology by successfully passing an oral examination (GRD 857A MS Bio 1st Written Comp Exam) and by successfully defending their thesis (or, if pursuing the non-thesis program, their BIO 880 Current Review of Biology paper) in an oral examination (GRD 858A MS Bio Oral Exam). The committee for a student shall consist of the faculty member who has agreed to serve as the student's advisor and at least two members of the department's Graduate faculty members.

## Thesis Program

Six semester hours of Thesis Research (BIO 891 Thesis Research) are required in the 30-hour thesis program. A thesis based on the student's research must be submitted. Twenty-four hours of additional coursework will complete the requirements for the degree. Credit will not be given for

BIO 880 Current Review of Biology or BIO 881 Independent Study in the thesis program.

## Non-Thesis Program

Three semester hours of BIO 880 Current Review of Biology are required in the 36-hour non-thesis program. Thirty hours of additional coursework will complete the requirements for the degree. Credit will not be given for BIO 891 Thesis Research in this program.

## Department of Chemistry

Dr. Tanea Reed  
(859) 622-1456  
Science Building 4126  
Dr. Karim Abdelhay, Graduate Coordinator/Advisor  
www.chemistry.eku.edu (http://www.chemistry.eku.edu)  
(859) 622-1456

The Department of Chemistry cooperates with the other STEM departments and the College of Education and Applied Human Sciences in offering the degree of Master of Arts in Education, in Secondary Education with a concentration in Physical Science. The program is primarily for non-specialized science teachers and is described more thoroughly in the College of Education and Applied Human Sciences section of this Catalog.

## Master's

*No results were found.*

## Courses

**CHE 701. Chemtopics: \_\_\_\_\_ (3 Credits)**

A. Prerequisite: instructor approval. Topics to be chosen from a current and/or specialized area of chemistry such as environmental chemistry or industrial chemistry, and will vary according to students' needs. May be retaken to a maximum of six hours.

**CHE 701A. Chemtopics: \_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from a current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 701B. Chemtopics: \_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from a current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 701C. Chemtopics: \_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from a current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 701D. Chemtopics: \_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from a current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 701E. Chemtopics:\_\_\_\_\_ (1-3 Credits)**

A. Prerequisite: departmental approval. Topics to be chosen from a current and/or specialized area of chemistry based on interests and/or need: A: Analytical, B: Biochemistry, C: Inorganic, D: Organic, or E: Physical. May be retaken to a maximum of six hours.

**CHE 701L. Chemtopics Lab:\_\_\_\_\_ (1 Credit)**

A. Prerequisite: departmental approval. Laboratory experiences chosen from specialized areas of chemistry including advanced chemical instrumentation/analysis, synthetic methods, computational chemistry, or molecular modeling. Topics vary according to student needs. May be retaken to a maximum of two hours. 3 Lab.

**CHE 702. Polymers & Particles. (1 Credit)**

A. Study of the structure, synthesis, preparation, characterization, and properties of synthetic polymers, supramolecular aggregates, and/or meso- or nanoscale materials. (3 Lab)

**CHE 715. Synthetic & Analytical Methods. (3 Credits)**

A. Corequisite: CHE 715L Synthesis, isolation, purification, and characterization (including spectroscopy and other analytical methods) of inorganic and organic compounds and mixtures. Other methods include handling of air and moisture sensitive compounds and molecular computations. 3 Lec/6 Lab.

**CHE 715L. Synthet & Analytical Metho Lab. (2 Credits)**

A. Corequisite: CHE 715. Synthesis, isolation, purification, and characterization (including spectroscopy and other analytical methods) of inorganic and organic compounds and mixtures. Other methods include handling of air and moisture sensitive compounds and molecular computations. 6 Lab.

**CHE 720. Mass Spectrometry. (3 Credits)**

A. Prerequisite: Departmental approval. Topics include types of mass spectrometers: qualitative and quantitative mass spectrometry, different ionization processes, sample inlet systems (including chromatography systems), and interpretation of mass spectral data.

**CHE 770. Biophysical Chemistry I. (4 Credits)**

I, II. An introduction to physical and chemical explanations of biological phenomenon and physical chemistry theories and methodologies applied on biological systems. Topics include thermodynamics, chemical equilibrium, kinetics, quantum chemistry, spectroscopy, and selected topics. 6 Lec/Lab Credit will not be awarded for both CHE 770 and 570.

**CHE 774. Physical Chemistry I. (3 Credits)**

A. Corequisite: CHE 774L. A study of thermodynamic properties in physical and chemical systems; electrochemical processes; rates and mechanisms of chemical reactions.

**CHE 774L. Physical Chemistry Lab I. (1 Credit)**

A. Prerequisites or Corequisites: CHE 774 (C or better). Laboratory component of CHE 774. Experimental work to illustrate principles of physical chemistry that include thermochemistry, thermodynamics, equilibrium, and reaction kinetics. 3 Lab.

**CHE 775. Physical Chemistry II. (3 Credits)**

A. Corequisite: CHE 775L. An introduction to quantum mechanics as applied to model, atomic, and molecular systems; applications of atomic and molecular spectroscopy; introduction to computational chemistry.

**CHE 775L. Physical Chemistry Lab II. (1 Credit)**

A. Prerequisites or Corequisites: CHE 775 (C or better). Laboratory component of CHE 775. Experimental work to illustrate principles of physical chemistry including UV-visible, infrared, and fluorescence spectroscopic techniques, fundamentals of laser operation, statistical mechanics, and computational chemistry.

**CHE 776. Advanced Physical Chemistry. (3 Credits)**

A. Prerequisite: CHE 575 (MAT 353 Recommended) or departmental approval. Intermediate and advanced topics in thermodynamics, kinetics, structure and bonding. Credit will not be awarded to students who have credit for CHE 772.

**CHE 801. Special Topics in CHE Ed. (3-6 Credits)**

(3) A. Prerequisite: Departmental approval. Areas of secondary school chemical content aligned with current state and national standards. May be retaken for a maximum of 6 credit hours provided topics are different. Lec/Lab.

**CHE 802. Topics in Analytical Chemistry. (1-3 Credits)**

A. Prerequisite: departmental approval. Topics chosen from advanced areas of interest and vary according to needs. May be retaken for credit when new topics offered.

**CHE 810. Professional Training. (2 Credits)**

I. Prerequisite: departmental approval. Course demonstrates professional tools and establishes skills including chemical literature searching, independent project planning, methods for disseminating chemical data, chemical safety, as well as professional ethical conduct.

**CHE 811. Chemistry Practicum. (1-3 Credits)**

(1-2) Methodologies of chemistry teaching achieved through guided mentoring. Formal project assigned by faculty mentor is required for each student. Examples include developing novel assignments or lab experiences, designing new education demonstrations, or investigating lecturing/tutoring techniques. May be retaken for a maximum of two hours. 3-6 Lab.

**CHE 822. Advanced Analytical Chemistry. (3 Credits)**

A. Modern practices in chemical analysis. Sampling, sample preparation, spectroscopic and chromatographic methods.

**CHE 830. Applied Biochemistry. (3 Credits)**

A. Structure, analysis and organization of proteins; drug development; organic mechanisms of enzyme action; and the chemistry of the immune system.

**CHE 839. Co-op or Appl. Lrn: Chemistry. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and professional supervisors in an accepted chemistry or chemistry-related internship. Half (.5) to three hours per semester or summer. May be retaken up to a maximum of three hours. 80 hours work for each credit.

**CHE 839A. Co-op or Appl Lrn: Chemistry. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisors in cooperative experience. Half (.5) to three hours per semester or summer. May be retaken to a maximum of six hours. A minimum of 80 hours work for each credit.

**CHE 839B. Co-op or Appl Lrn: Chemistry. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisors in cooperative experience. Half (.5) to three hours per semester or summer. May be retaken at discretion of department or college up to a maximum of three hours. A minimum of 80 hours work for each credit.

**CHE 839C. Co-op or Appl Lrn: Chemistry. (0.5-6 Credits)**

A. Prerequisite: departmental approval. Work under faculty and field supervisors in cooperative experience. Half (.5) to three hours per semester or summer. May be retaken at discretion of department or college up to a maximum of three hours. A minimum of 80 hours work for each credit.

**CHE 845. Chem Lab & Demonstr Techniques. (1-4 Credits)**

A. Prerequisite: six semesters of undergraduate work in chemistry or departmental approval. Techniques of constructing and demonstrating apparatus to illustrate principles of chemistry. Primarily for high school and community college science teachers. 3-12 Lab.

**CHE 850. Advanced Inorganic Chemistry. (3 Credits)**

A. Prerequisite: Molecular symmetry in inorganic chemistry, mechanisms of inorganic reactions, and catalysis by coordination and organometallic complexes.

**CHE 860. Advanced Organic Chemistry. (3 Credits)**

A. Prerequisite: Structure and reactivity of organic molecules and an in-depth study of interactions involved in molecular, macromolecular, and supramolecular systems and multiple step synthesis for polyfunctional molecules.

**CHE 880. Graduate Seminar. (1 Credit)**

A. Presentation of significant developments in chemistry to members of the chemistry faculty and department majors. May be retaken to a maximum of three hours. Cannot be taken concurrently with CHE 810. 1 Lec.

**CHE 890. Grad Lit & Project Planning. (1 Credit)**

A. Extensive survey of literature related to a specific research program and planning of that program through consultation with a selected research advisor.

**CHE 895. Chemistry Independent Research. (1-3 Credits)**

A. Objectives and techniques of chemical research. Problems in all fields of chemistry. May be retaken to a maximum of three hours. Student must have the independent study proposal form approved by faculty supervisor and departmental chair prior to enrollment.

**CHE 899. Thesis. (1-6 Credits)**

A. Laboratory research in one of the major areas of chemistry for application to a thesis. May be retaken to a maximum of six hours.

**CHE 899C. Cont' of Thesis Research. (1-9 Credits)**

(1-9) A. Prerequisite: departmental approval. The continuation of research in one of the major areas of chemistry. May be retaken as necessary to complete research. A student must have registered (or be currently registered) for six hours of CHE 899 before registering for CHE 899C. May not be used to satisfy degree program requirements. Credit will not be awarded for both CHE 895C and CHE 899C.

## Department of Computer Science and Information Technology

Dr. Kuang-Nan Chang, Chair

Dr. Mengkun Yang, Graduate Coordinator/Advisor
